

# APPENDIX C

## Housing Site pro-formas

Further work will need to be undertaken on the merits of each potential housing site. The first stage of this work has taken place by assessing all of the possible sites against criteria from the Sustainability Appraisal for the Local Plan Part 2. These can be seen on the following pages. The sites selected will need to be proven to be suitable, deliverable and developable.

# Contents Page

Swadlincote including Woodville	1-117
Derby Urban Area	118-242
Burton on Trent	243-251
Key Service Villages	252-562
Local Service Villages	563-699
Rural Villages	700-828
Rural Areas	829-837
Assessment Notes	838-845

# **SWADLINCOTE INCLUDING WOODVILLE**

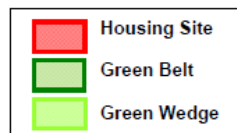

## Site 138: S0146a. Land west of Vale Road and Edward Street, Hartshorne

### Description:

The site lies west and north west of Vale Road and Edward Street and is within the built settlement of Woodville. Swadlincote town centre is approximately 2.5km away to the west. Burton upon Trent town centre is 10km to the north west.

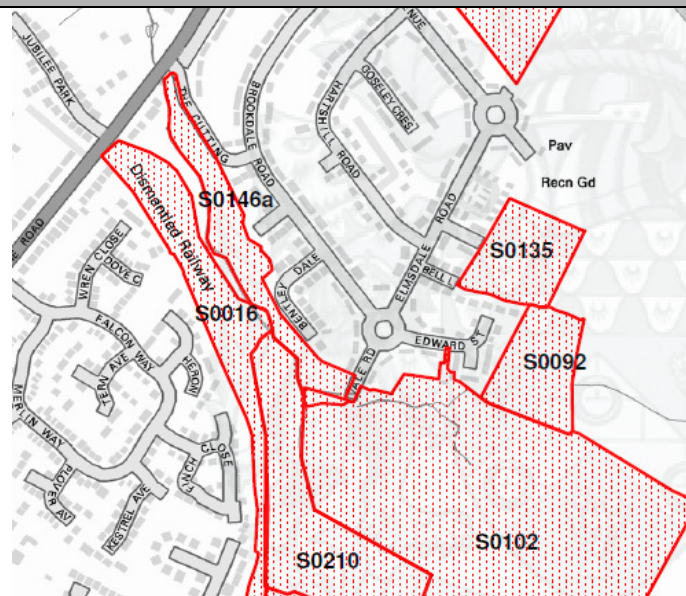

The site comprises open space with trees on site. The site area is 1.54ha. The site is in single ownership and at present there is no developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- The majority of the site is covered by County Wildlife site SD026 Woodville Disused railway.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable housing subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest Tree Planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Woodville 0.9km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch and within 1200m of a primary school. There is no centre within Woodville however the site is located within 800m of a library, a convenience store and pub, and within 1200m of a post office.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of the development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings, subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However further assessment of the impact of the gradient constraint on viability would be required. - There is an identified need for affordable housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is a metalled footpath adjacent to the site on Hartshorne road, which would connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision. Development of this scale would be unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development will have an uncertain impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. - There is a metalled footpath adjacent to the site on Hartshorne road, which would connect the site to the surrounding area. - There is no established off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development. Although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield,</li> <li>- Site is likely to be Grade 4 poor agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There are areas of less susceptibility and intermediate susceptibility along the western boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service. There is no village centre within Woodville, however the site is located within 800m of a sports pitch, library, convenience store, pub and within 1200m of a primary school and post office.</li> <li>- The site is located within 1.7km of Granville Sports Colleague.</li> <li>- Site lies within 2km of the nearest major employment site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. HERS28120 is located within 65m of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The majority of the area is located within in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity. However a small section if located within secondary sensitivity.</li> <li>- There is a deep ditch that runs through the site and also the site slopes upwards in the southern section.</li> <li>- TPO207 covers the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Hartshorne Road to the north, existing development to the east, woodland to the west.</li> <li>- TPO207 covers the site.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

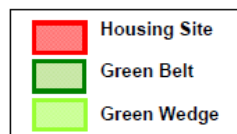

## Site xx: S0248: Land west of Longlands Lane, Swadlincote

### Description:

The site is located within Midway and is 1.8km from Swadlincote Town Centre and 7.1km from Burton Town Centre.

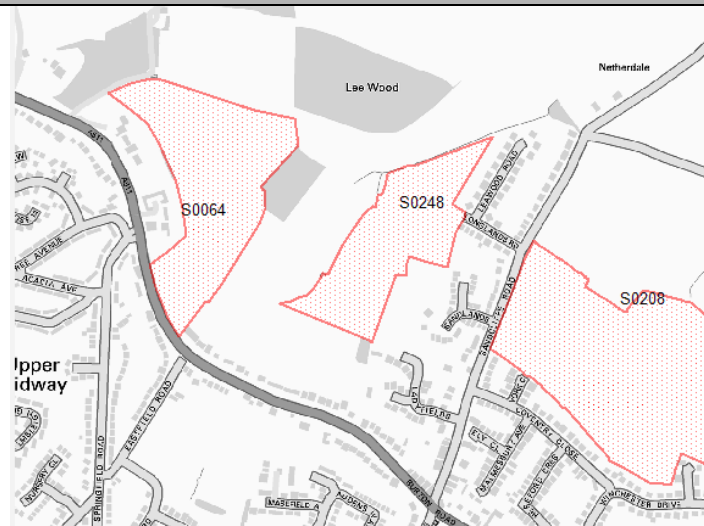

The site is predominantly with one dwelling on the site. The site is 4ha and within single ownership. There is medium developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 320m of SD342 Hoofies Wood,	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide open space and leisure provision both on site and within 1200m of the site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within 2.1km of the site.	
	Will it promote healthy lifestyles?		- The site is located within 1200m of a sports pitch, however is in excess of 1200m of a primary school and services within Newhall.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports Colleague which spare capacity with 558 pupils attending the school with a capacity of 830. - Eureka Primary School is at capacity with 142 pupils attending the school with a capacity of 140.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However further assessment would be required on the viability impact of the gradient on the site and the access to the site, - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 800m of an hourly bus service. - There is no metalled footpath immediately adjacent to the site, which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 800m of an hourly bus service. - There is no metalled footpath immediately adjacent to the site, which could connect the site to the surrounding area. - There is no off-road cycle path adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available. - The access point onto the site is constrained due to the Sandcliffe Road being a single land and access onto Longlands Road requiring the demolition of the existing bungalow on the site.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/pr otect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is predominantly greenfield and will not regenerate the existing built up area, - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield and there is very limited potential to reuse demolition waste materials on site during construction phase (the existing dwelling on the site) - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is very limited potential to reuse demolition waste onsite (from the existing dwelling), although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight increase in noise levels locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1 and will have no discernible impact on flood risk.</li> <li>- There is a small area of intermediate and less susceptible surface water flooding within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development will conform with existing requirements to retain runoff rates at greenfield field levels through the use of a SuDs scheme. Redevelopment of the brownfield part of the site would normally be expected to result in reduced run off rates, although this will be dependent upon the design of the scheme.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 800m of an hourly bus service.</li> <li>- The site is located within 1200m of a sports pitch; however is in excess of 1200m of a primary school and services within Newhall.</li> <li>- Nearest major employment site is within 3km at Woodville.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any conservation area or listed building.</li> <li>- No HERs are located within the site</li> <li>- The site is located within 500m of Bretby Hall Historic Garden.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of secondary sensitivity according to the County Councils Areas of Multiple Environmental Sensitivity</li> <li>- The site is located within the Leicestershire and South Derbyshire Coalfields Landscape Character Area.</li> <li>- There are trees within the site.</li> <li>- The gradient of the site would need to be taken into consideration when developing the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site is contained by existing development to the east, trees and hedgerows to the north south and west.</li> <li>- There are trees within the site</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

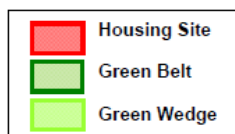

## Site xx: S0167: Land at Gresley Old Hall, Gresley Wood Road, Swadlincote

### Description:

The site is located within Swadlincote and is 2.5 km from Swadlincote Town Centre and 7.8km from Burton Town Centre.

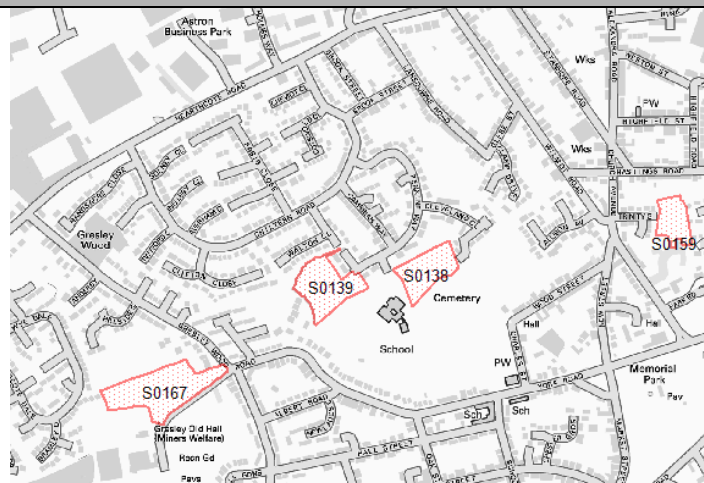

The site comprises vacant greenfield land. The site is 1.39ha and is within single ownership. There is medium developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- The site is located within 300m of County Wildlife Site SD313 Hall Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held of protected or BAP species within 100m of site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- Outline application 9/2009/0191 provides an indicative layout for landscaping, which shows the areas of proposed landscaping, including tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Site will not contribute towards the delivery of affordable housing to meet local needs. Instead, proceeds from sale of land to contribute toward maintaining the fabric of Gresley Old Hall, a Listed Building, and other community buildings on the site.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- Outline application 9/2009/0191 proposes a range of house types and sizes, but does not include affordable housing.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site would contribute to overall housing need in combination with other developments in South Derbyshire and would be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development will deliver informal open space provision on site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- The nearest GP is located within Swadlincote (Gresleydale Healthcare Centre). 1.6km from the site.	
	Will it promote healthy lifestyles?		- The site is within 800m of a sports pitch and a primary school (using a public footpath) and within 1200m of a convenience store, pharmacy and cash point.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impacts are uncertain.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The closest Primary School is Pennine Junior School which is exceeding capacity with 333 pupils attending the school with a capacity of 324. - The Pingle School has some spare capacity with 1045 pupils attending the school with a capacity of 1376.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Development will have no effect.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - There is an existing metalled footpath adjacent to the site on Gresley Wood Road, which could be used to connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development will make some contribution towards the provision of open space, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development on this scale will not have a significant impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 400m of an hourly bus service. - There is a PROW across the north of the site.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - There are no known electricity or water supply constraints in this location. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Development will not deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is greenfield and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers, which would be addressed at reserved matters stage, although the design and access statement submitted with the outline application indicates the development will be sympathetic to its setting adjacent to the Listed Gresley Old Hall.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters containing this information).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield however is not within agricultural use.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of an hourly bus service.</li> <li>- The site is located within 800m of a primary school and sports pitch and is located within 1200m of a convenience store.</li> <li>- The nearest major employment site lies within 2km at Heathcote Road</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016 when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Grade II Listed Building Gresley Old Hall is located within 100m of the site. Development could help maintain fabric of this building.</li> <li>- HERS26850 Swadlincote ridge and furrow and later field boundary is located within the east of the site.</li> <li>- Impacts could be dependent on the detailed layout and design of the scheme, although the design and access statement submitted with the outline planning applications indicates a scheme that would be sensitive to the setting.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site is contained by trees and hedgerows to the north, existing development and trees and hedgerows to the south, a road, trees and hedgerows to the south and existing development to the west.</li> <li>- The parcel could contribute towards green infrastructure provision.</li> </ul>	

Version 1a

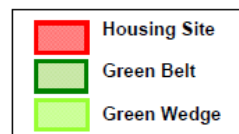

## Site xx: S0161: Land south of Cadley Hill, Industrial Estate

### Description:

The site is agricultural land that lies between an industrial estate - Cadley Hill Industrial Estate and a housing estate - Castleton Park.

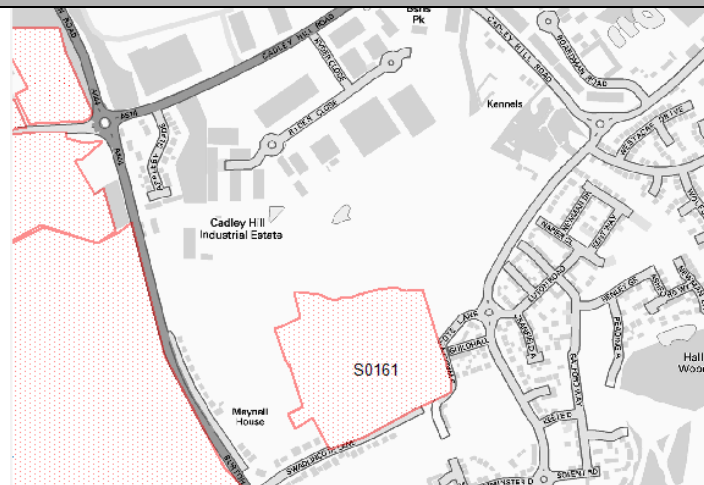

It represents greenfield land in agricultural use and measures 6.36ha. The site is within single ownership and there is low developer interest. Land to the north east of the site is allocated in the emerging South Derbyshire Local Plan for employment development (Policy E1).

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located 310m of SD313 Hall Wood.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data, will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Site will contribute towards the delivery of affordable housing to meet local needs.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable housing subject to viability and will be likely to deliver a range of house sizes	
	Will it provide sufficient housing to meet existing and future need?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it reduce the number of unfit or empty homes?	Yes	- The site will contribute to overall housing need in combination with other developments in South Derbyshire and will be deliverable within the plan period.	
	Will it meet the needs of travelling show people?	No	- Site will not bring empty homes back into use or improve unfit homes.	
		No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located at Gresleydale Health Centre, 600m from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of Castleton Park Local centre. - Pennine Way primary school is located 2km away. Sports pitch provision is located 1200m from the site.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Pingle School which has spare capacity, with 1045 pupils attending the school with a capacity of 1376. - The primary schools for the site is Pennine Way Primary School which is at capacity with 333 pupils attending the school with a capacity of 324 pupils.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 400m of an hourly bus service - The site is reactively well located in respect of Castleton Park Local Centre. - There is a metalled footpath adjacent to part of the site which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education and open space provision, and sports provision. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is located within 400m of an hourly bus service. - There is a metalled footpath adjacent to part of the site which could connect the site to the surrounding area. - There is no off road cycle route adjacent to this site at present although development would provide the opportunity to establish a cycle link between Swadlincote Lane and Ryder Close.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - No known electricity or water supply constraints - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality?		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area,</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>However there may be increased noise complaints due to proximity of the site to employment land (part of the site is allocated for employment land).</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield</li> <li>Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1 and will have no discernible impact on flood risk.</li> <li>There are three small areas within the site less susceptible to surface water flooding, within the rest of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform to existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Site is located within 400m of an hourly bus service, within 800m of a local centre and within 1200m of a sports pitch.</li> <li>Site lies within 2km of the nearest major employment site.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>The development would be unlikely to affect the setting of any conservation area or listed building.</li> <li>HERS26848 is located within the site.</li> <li>Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Site is located within an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>The site is located within the Leicestershire and South Derbyshire Coalfield Landscape Character Area,</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by road to the south, and trees and hedgerows to the north east and west.</li> <li>The land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential design and layout.</li> </ul>	

Version 1a

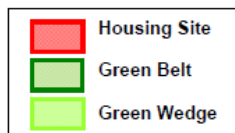

## Site xx: S0159: Land off Willmott Road, Swadlincote

### Description:

The site is located within 1.5km of Swadlincote from Swadlincote Town Centre and 8.5km from Burton Upon Trent Town Centre.

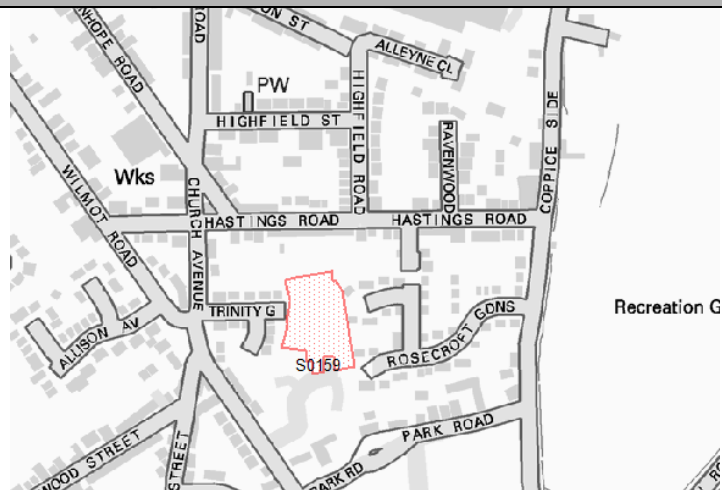

The site comprises of open space. It extends some 1.1ha. There is high developer interest and the site is in single ownership.

#### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1km of SD377 Midway Clay Site.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data, will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site could need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site, including through National Forest Tree Planting.</li> <li>- The site comprises part of Baker Street Recreation Ground.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Development would make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Swadlincote (Swadlincote Surgery) 1.1km from the site.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- Site is located within 800m of a sports pitch, within 1200m of a primary school</li> <li>- The site is located 1.5km from Swadlincote Town Centre.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of the development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- Impact unknown.</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest primary school is Pennine Way Junior Academy which is exceeding capacity with 333 pupils attending the school with a capacity of 324 pupils.</li> <li>- The nearest secondary school is The Pingle School which has some spare capacity with 1045 pupils attending the school with a capacity of 1376.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective</li> <li>- Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		<ul style="list-style-type: none"> <li>- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development.</li> <li>- There is an identified need for affordable housing in this area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- The site is within 800m of an hourly bus service.</li> <li>- There is no off-road cycle route adjacent to this site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development would make some contribution towards the provision of education, open space and sport provision and healthcare. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services.</li> <li>- No information regarding site services or facilities has been provided in respect of this site by promoters.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- Development will have an uncertain impact.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 800m of an hourly bus route</li> <li>- There is no off-road cycle route adjacent to this site.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity</li> <li>- It is unclear whether there is capacity in the local sewerage network to accommodate growth.</li> <li>- Superfast Broadband is available.</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is not previously developed and will not regenerate existing built up area, - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plan - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale of the scheme and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- It is unclear whether this site has potential for impacts associated with methane or other gas release associated with historic use of the site for waste disposal.	
	Will it reduce noise pollution?		- Development is likely to lead to a slight increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		- Site is greenfield however is not agricultural land.	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is in Flood Zone 1.</li> <li>- There is no indication of surface water flooding.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 800m of an hourly bus service. The site is within 800m of a sports pitch and within 1200m of a primary school. Swadlincote Town Centre is 800m from the site on foot.</li> <li>- The Pingle School is 1.8km from the site</li> <li>- The nearest major employment site is within 700m at Heathcote Road</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely affect the setting of any Conservation Areas and Listed Buildings.</li> <li>- No HERs sites within the site, however HERS26887 is located within 20m of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		- The site is located in an area of lower sensitivity according to the County Councils Areas of Multiple Environmental Sensitivity	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential design and layout.</li> </ul>	

Version 1a

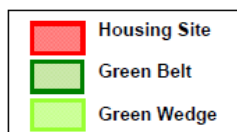

## Site xx: S0156: Land to the south west of 1 Vicarage Road, Woodville

### Description:

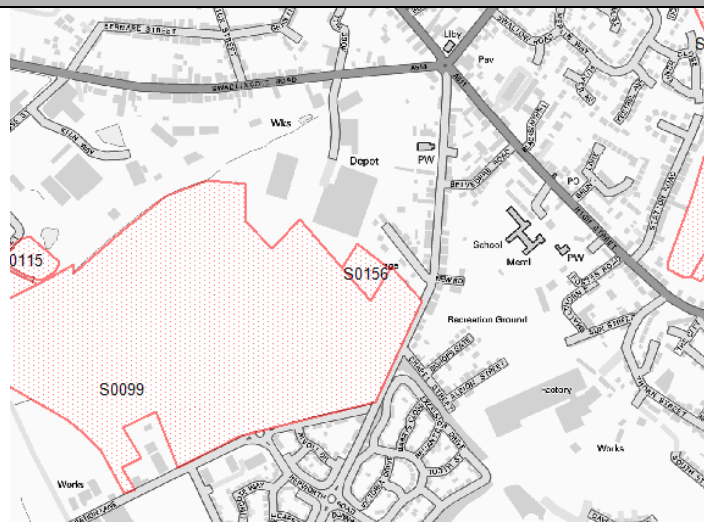

The site is located 2km from Swadlincote Town Centre.

The site comprises of Paddock Land. It extends some 0.54ha and is currently in one ownership. There is no developer interest.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 620m of SD026 Woodville Disused Railway.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. Based on incomplete data will need updating.	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the sites National Forest location.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site would make an uncertain contribution towards the provision of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site. However due to the size of the site, development would make an uncertain contribution towards the delivery of affordable housing. Although given local plan requirements the site will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Woodville (Woodville Surgery) 0.4km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch and within 1200m of a primary school. There is no village centre within Woodville, however the site is located within 800m of a library service, a convenience store, public house and within 1200m of a post office.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- The site would be unlikely to deliver to affordable housing due to the size of the site. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 800m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is no existing metalled footpath adjacent to the site, which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is Unlikely that development on this scale would have a significant impact on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 800m of an hourly bus service. - There is an existing PROW along the northern boundary of the site. - There is no existing metalled footpath adjacent to the site, which could connect the site to the surrounding area. - There is no established off-road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - There are no known electricity or water supply constraints in this location. - Superfast Broadband is available. - Access to the site would require the demolition of existing dwellings.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development could lead to an increase in noise complaints due to the proximity of the site to nearly employment uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield. The site is either poor quality agricultural land or considered to be predominantly in urban use.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 800m of an hourly bus service. The site is located within 800m of a sports pitch and library service, convenience store and public house and within 1200m of a primary school and post office.</li> <li>- The site is well located in respect of secondary school provision, Granville Sports Colleague is 1.4km from the site.</li> <li>- The nearest major employment site is within 2km at Woodville/Swadlincote.,</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation/</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any listed building or conservation area.</li> <li>- No HERs sites within the site, however HERS28136 is located within 50m to the west of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within Leicestershire and South Derbyshire Coalfield Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by trees and woodland to the west, trees and existing development to the north and east, trees to the south.</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

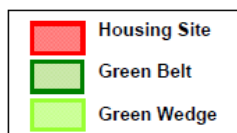

## Site xx: S0155: Rose Tree Lane, Newhall

### Description:

The site is located within Newhall, 2.9km from Swadlincote Town Centre.

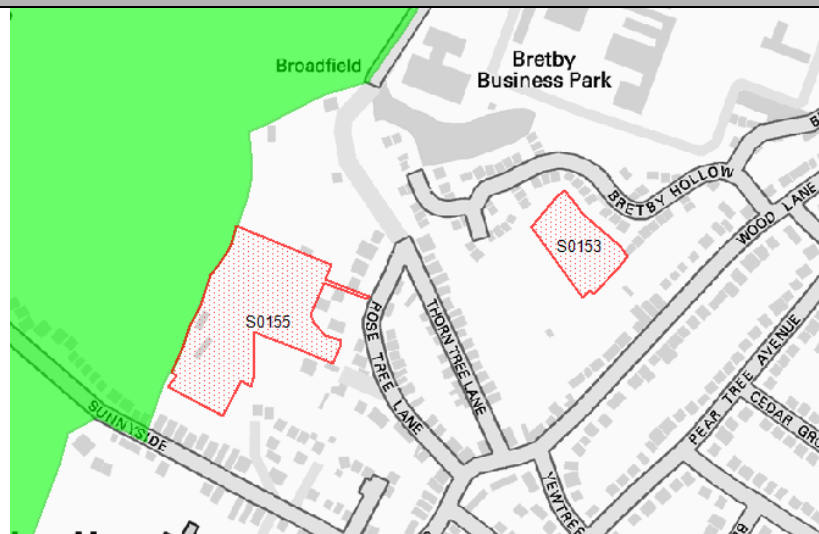

The site comprises of Grazing land a dwelling and its curtilage. It extends some 1.53ha and is currently in single ownership. There is medium developer interest. In addition the site is adjacent to the Burton- Swadlincote Green Belt.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 500m of SD042 Bretby disused railway. - SD43 Bretby Fields is located 240m from the site.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passes over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on-site and within 1200m of the site including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make a contribution towards the provision or expansion of healthcare provision within 1.2km of the site. The nearest GP is located in Newhall (Newhall Surgery), 0.3km from the site.	
	Will it promote healthy lifestyles?		- The site is located within 800m of a sports pitch, a primary school. There is no centre in Newhall, however the site is located within 800m of a convenience store, post office and village hall.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely dependent by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest Primary School is Newhall Community Junior School which has some spare capacity with 293 pupils attending the school with a capacity of 236 pupils. - The nearest Secondary School is William Allitt, which is exceeding capacity with 973 pupils attending the school with a capacity of 945. - Pingle School however does have some spare capacity.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact on viability of the creation of an access would require further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service to, Burton, Measham, Ashby. - There are some local facilities within Newhall: convenience store, open space and facilities, post office, pharmacy, village hall. - There is an existing metalled footpath adjacent to the site on Sunnyside Road which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Uncertain highways impact.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 400m of a bus route - There are no off-road cycle routes adjacent to this site. - There is an existing metalled footpath adjacent to the site on Sunnyside Road which could connect the site to the surrounding area.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - There are no known electricity or water supply constraints in this location. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is predominantly and will not generate the existing built up area. - The contribution the site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- There is very limited potential to reuse demolition waste materials from the existing dwelling on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is very limited potential to reuse demolition waste from the existing dwelling on the site. Although the use of materials used overall could be reduced through the adoption of site waste management plans <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield</li> <li>- Site is likely to be Grade 4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. Redevelopment of any brownfield land would normally be expected to result in reduced levels of surface water runoff, although this would be dependent upon the design of the scheme.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service. The site is located within 1200m of a convenience store, a primary school, a post office and village hall within Newhall.</li> <li>- The site is well located in respect of Secondary School provision which is located 0.4km from the site.</li> <li>- The nearest employment site is within 2km at Bretby Business Park.</li> <li>- The nearest supermarket is at Newhall, 600m from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any listed buildings or conservation areas.</li> <li>- HERS0155 is located within the site and HERS17512 is located immediately to the north of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within a lower area of sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- There are existing trees within the site.</li> <li>- TPO246 is located on part of the southern boundary of the site. (review extent)</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the east and south and trees and hedgerows to the north and west.</li> <li>- There are existing trees within the site.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

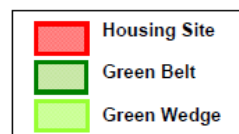

## Site xx: S0153: Land to the rear of 113 Wood Lane, Newhall

### Description:

The site is located within Newhall and is 3.6km from Swdalincote Town Centre.

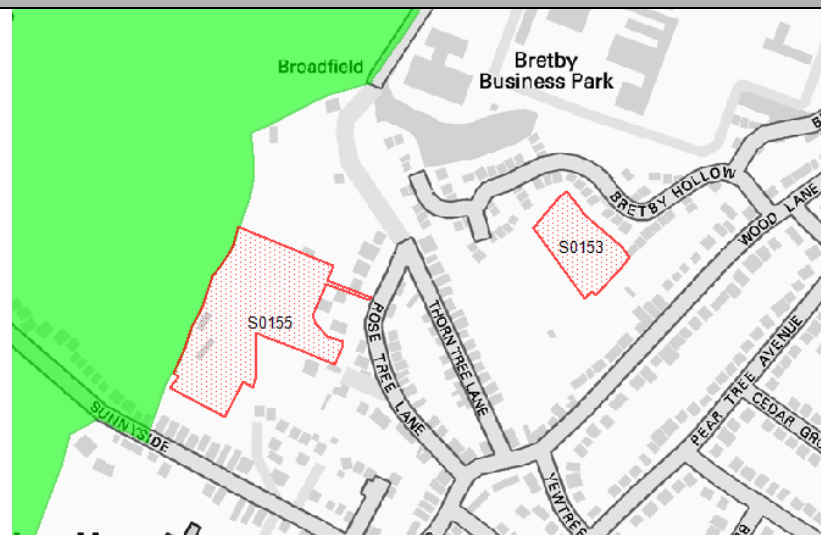

The site comprises of green space with trees planted on the site. It extends some 0.49ha and is currently in single ownership. There is high developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 470m of SD049 Footpath Plantation, Bretby. - The site is located within 300m of Potential Wildlife Site SD043 Bretby Fields.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. Based on incomplete data will need updating.	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Site would make an uncertain contribution towards the delivery of affordable housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, however due to this size of the site, the site would make an uncertain contribution towards the delivery of affordable housing, however given the local plan requirement; development would be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Newhall (Newhall Surgery) 1.1km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1200m of a primary and a sports pitch. There is no village centre within Newhall, however the site is within 1200m of a convenience store, a village hall and post office.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest Primary School is Newhall Community Junior School which has some spare capacity with 293 pupils attending the school with a capacity of 236 pupils. - The nearest Secondary School is William Allitt, which is exceeding capacity with 973 pupils attending the school with a capacity of 945. - Pingle School however does have some spare capacity.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Due to the size of the site development would make an uncertain contribution towards the delivery of affordable housing on site. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is within 400m of an hourly bus service, to Ashby Coalville, Leicestershire and Burton on Trent. - There are some local facilities within Newhall: convenience store, open space and facilities, post office, pharmacy, village hall. - There is a metalled footpath adjacent to the site on Bretby Hollow which could connect the site to the area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that a site of this scale will have any significant impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is within 400m of an hourly bus service, to Ashby Coalville, Leicestershire and Burton on Trent. - There is a metalled footpath adjacent to the site on Bretby Hollow which could connect the site to the area. - There is no established off-road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - There are no known electricity or water supply constraints in this location. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout and design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield, however not within agricultural use.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is in Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of an hourly bus service and is located within 1200m of services within Newhall, including a convenience store, primary school, sports pitch, village hall and post office.</li> <li>- The site is also well related to secondary school provision; William Allitt is 1km from the site.</li> <li>- The nearest major employment site lies within 2km at Bretby Business Park</li> <li>- The nearest supermarket lies within 1km at Newhall.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any listed buildings or conservation areas.</li> <li>- There are no HERS on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- TPO199 covers a large proportion of the site. (review extent and amend if necessary)</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the north, east and west and trees are allocated with the site along the borders of the site.</li> <li>- Uncertain effects identified due to lack of information held regarding site design and layout.</li> </ul>	

Version 1a

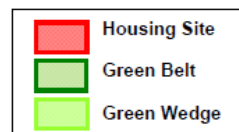

## Site xx: S0149: Rear of 113-137 Burton Road, Woodville

### Description:

The site is located 2km from Swadlincote Town Centre.

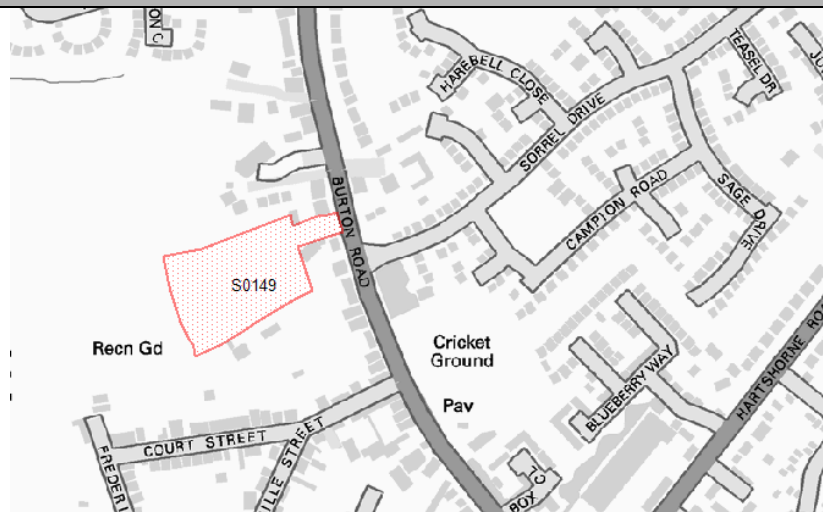

The site comprises a paddock and it extends some 1.2ha. The majority of the site is in single ownership, however there are numerous ownerships on an access strip according to submitted info, however all parties are currently willing to participate.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- The site is located within 300m of County Wildlife Site SD377 Midway Clay Site.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the sites National Forest location	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both on site and within 1200m of the site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Woodville (Woodville Surgery) 0.2km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1200m of a sports pitch and primary school. There is no centre within Woodville, however the site is within 800m of a convenience store, post office, library and public house.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- There are no identified impacts from site development in respect of this issue - Impacts would be uncertain and would be largely determined by detailed design and layout of the development.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service to Burton on Trent, Ashby, Coalville and Leicestershire. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is a metalled footpath adjacent to the site on Burton Road which could be used to connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale will have any significant impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site located within 400m of an hourly bus service. - There is a metalled footpath adjacent to the site on Burton Road which could be used to connect the site to the surrounding area. - There are no off-road cycle routes adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - There are no known electricity or water supply constraints. - Superfast Broadband is available. - Access to the site would require the demolition of existing dwellings.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is predominantly greenfield and will regenerate existing built up area. - The contribution the site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield, however there may be potential to reuse some waste materials on site during the construction phase from the existing dwellings which would require demolition to gain access to the site. - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is very small potential to reuse demolition waste on site from the existing housing on the site, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>The site is predominantly greenfield.</li> <li>The site is satiated in land classified as land predominantly in urban area.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1.</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform to existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is located within 400m of an hourly bus service. The site is relatively well located in respect of nearby services. The site is within 1200m of a primary school and is located within 800m of a post office, a convenience store, library and public house.</li> <li>The site is well located in respect of Secondary School provision which is within 500m of Granville Sports Colleague.</li> <li>The nearest major employment site is within 2km, at Swadlincote Road, Woodville.</li> <li>The nearest supermarket is 1.2 km away at Woodville High Street.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>The development would be unlikely affect the setting of any listed buildings.</li> <li>No HERS are located within the site; however HERS26864 is located immediately to the north of the site.</li> <li>Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>The majority of the site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of lower sensitivity according to the County Councils Areas of Multiple Environmental Sensitivity.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by existing to the east, trees to the north of the site, hedgerows to the west and south (along with existing development to the south).</li> <li>The land parcel could contribute towards green infrastructure provision;</li> <li>Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

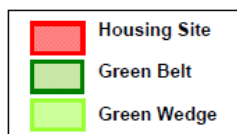

## Site xx: S0148: Land at Common Ground, Church Gresley

### Description:

The site is located within Church Gresley. The site 2.5km from Swadlincote Town Centre and 10.1km from Burton on Trent Town Centre.

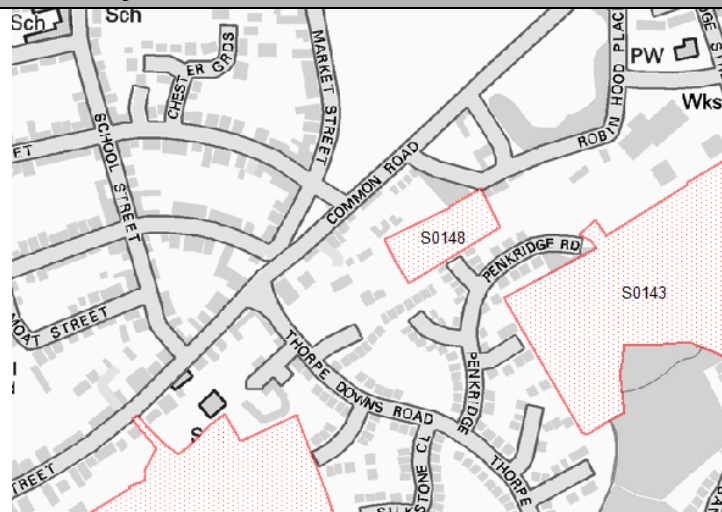

The site comprises of greenfield land. It extends some 0.46ha and is currently in multiple ownership, due to the ransom strip to the site. There is medium developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km of SD313 Hall Wood.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site could need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site,	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make a contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Church Gresley 2.1km from the site,	
	Will it promote healthy lifestyles?		- The site is located within 800m of a sports pitch and primary school. - The site is located within 800m of a convenience store, a pharmacy and a cash point.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts could be uncertain and would be largely determined by detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development of this site will have on accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest primary school is Pennine Way Junior Academy which is exceeding capacity with 333 pupils attending the school with a capacity of 324 pupils. - The nearest secondary school is The Pingle School which has some spare capacity with 1045 pupils attending the school with a capacity of 1376.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However further assessment would be required on the access to the site. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 800m of an hourly bus stop. - There is a public footpath adjacent to the site, which would connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development at this scale is unlikely to affect the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 800m of an hourly bus stop - There is a public footpath adjacent to the site, which would connect the site to the surrounding area. - Although not off-road at this point, National Cycle Route 63 passes within 200m	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - It is unclear whether there is capacity in the local sewerage network to accommodate growth. - Superfast Broadband is available. - Access to the site is constrained due to a ransom strip and the end of Kirkland Way (this covers access to the site)	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been put forward by site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield however is not within agricultural use.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 800m of an hourly bus service. The site is located within 800m of a sports pitch, a primary school and a convenience store, a pharmacy and cash point.</li> <li>- The nearest major employment site lies within 2kkm at Pool Street / Kiln Way</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any conservation area or listed buildings.</li> <li>- No HERs sites within development area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development.</li> <li>- The land could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout</li> </ul>	

Version 1a

## Site xx: S0139: Land at Pennine Way, Church Gresley

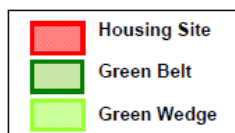

### Description:

Site lies at Pennine Way, Swadlincote and comprises open space with some planting. The site is located 2.2km from Swadlincote Town Centre and 8.6km from Burton Town Centre,

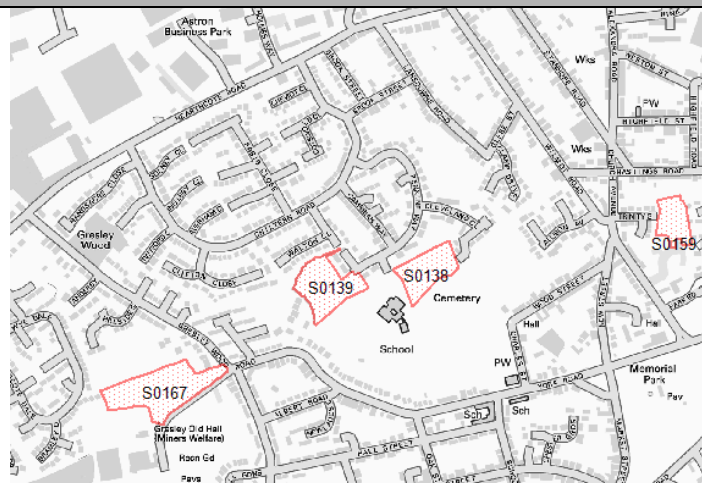

It extends to 0.94 ha and is in single ownership with no developer interest.

Part of the site has planning permission for 10 dwellings (9/2015/0415).

### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- The closest site of local importance for nature conservation (County Wildlife Site) is located over 500m from SD313 Hall Wood.	
	Could development affect protected species or BAP priority species?		- No records held of protected or BAP species within 100m of site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site masterplan for the whole site. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site.</li> <li>- Site would deliver informal open space provision, including through National Forest tree planting.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Swadlincote (Swadlincote Surgery). 1.5km from the site.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- The site is located within 800m of a primary school and sports pitch.</li> <li>- The site is located within 1200m of a convenience store, pharmacy and cash point.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development.</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- Impacts are uncertain.</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The closest Primary School is Pennine Junior School which is exceeding capacity with 333 pupils attending the school with a capacity of 324.</li> <li>- The Pingle School has some spare capacity with 1045 pupils attending the school with a capacity with 1376.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective</li> <li>- Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		<ul style="list-style-type: none"> <li>- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development.</li> <li>- There is an identified need for affordable housing in this area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service.</li> <li>- There is an existing metalled footpath adjacent to the site which could connect the site to the surrounding area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services.</li> <li>- No information regarding site services or facilities has been provided in respect of this site by promoters.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- It is unlikely that development on this scale would have any significant impact on the highway network.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- Site will be within 400m of an hourly bus service.</li> <li>- There is a PROW though the site.</li> <li>- There are no off-road cycle routes adjacent to this site.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity</li> <li>- There are no known electricity or water supply constraints in this location.</li> <li>- Superfast Broadband is available.</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site developers.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters for the whole site).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield however is not within agricultural use.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1</li> <li>There is no indication of surface water flooding on the site,</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Site is located within 400m of an hourly bus service.</li> <li>The site is located within 800m of a primary school and sports pitch and is located within 1200m of a convenience store, pharmacy and cash point.</li> <li>The nearest major employment site lies within 2km at Heathcote Road</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>The site would be unlikely to affect the setting of any conservation area of listed building.</li> <li>No HERs sites within development area</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>The development of part of the site would require the removal of the woodland on the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>Site is contained any existing development to the north, east and west.</li> <li>Woodland is contained within the site.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout of the whole site.</li> </ul>	

Version 1a

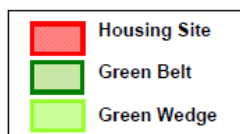

## Site xx: S0133: H K Wentworth, Kinsbury Park, Swadlincote

### Description:

Site lies to the south of Eureka Park, Swadlincote. The site is located 250m of Swadlincote High Street

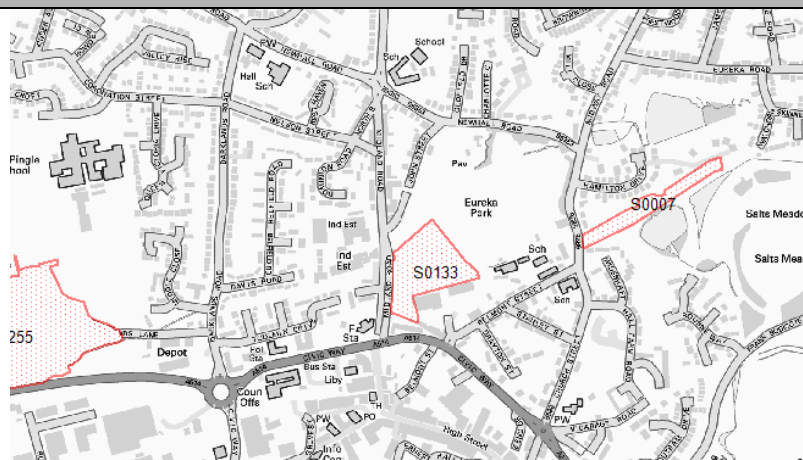

It represents former industrial land and measures 1.68ha. It is in one ownership and developer interest is high.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- The site is located within 300m of County Wildlife Site SD377 Midway Clay Site.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- Application 9/2015/0415 proposes a small amount of soft landscaping including tree planting	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- The Design and Access Statement for application 9/2015/0498 states that affordable housing can be delivered on site.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Application 9/2015/0498 proposes a mix of dwelling types and sizes and the Design and Access Statement for 9/2015/0498 states that affordable housing can be delivered on site.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Application 9/2015/0498 does not propose open space on the site.</li> <li>- Development of the site could make a limited contribution towards improving open space and leisure provision within 1200m of the site, including open space adjacent to the site.</li> <li>- Site would deliver informal open space provision, including through National Forest tree planting.</li> </ul>	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Development would make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. Swadlincote Health Centre is located within 300m of the site.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- The site is located within 800m of a sports pitch, Primary School and Swadlincote Town Centre.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue</li> </ul>	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- Impacts are uncertain.</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest Primary School is Belmont Primary School, which is nearing capacity with 416 pupils attending the school with a capacity of 420 pupils.</li> <li>- The nearest Secondary School is Granville Sports Colleague which has spare capacity with 558 pupils attending the school with a capacity of 830 pupils.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective</li> <li>- Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		<ul style="list-style-type: none"> <li>- Application 9/2015/0498 states that affordable housing can be provided on site.</li> <li>- There is an identified need for affordable housing in this area.</li> </ul>	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service.</li> <li>- The site is well located in respect of services within Swadlincote High Street.</li> <li>- There is a metalled footpath adjacent to the site, which would connect the site to the surrounding area.</li> </ul>	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services.</li> <li>- No information regarding contributions has been provided.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- The Transport Assessment submitted with planning application 9/2015/0498 indicates that development can be satisfactorily accommodated by the highway network.</li> </ul>	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- Site will be within 400m of a bus route</li> <li>- There is no off-road cycle route adjacent to the site.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity</li> <li>- No known electricity or water supply constraints</li> <li>- Superfast Broadband is available.</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is previously developed and the buildings on the site and vacant. Development of the site would improve the quality of the built development of the site.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is brownfield and there is potential to reuse demolition waster material on site during construction phase from the existing buildings on the site. - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout containing this information).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles - there is no information containing this information	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- The site is brownfield and there is potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is brownfield</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is in Flood Zone 1 and will have no discernible impact on flood risk.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- As a brownfield site, the volume of surface runoff would normally be expected to be reduced as part of a redevelopment scheme, although this would be dependent upon the detailed design of any proposal.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is within 400m of an hourly bus service, and is within 800m of Swadlincote Town Centre, a sports pitch and a primary school.</li> <li>- Granville Sports Colleague is 2.2km from the site.</li> <li>- Site lies within 2km of the nearest major employment site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any conservation area or listed building.</li> <li>- HERS26886 covers most of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is brownfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site is located within an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- TPO163 is located along the southern boundary of the site (review extent)</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Midland Road to the east, existing development and trees to the south, trees to the north and east.</li> <li>- Application 9/2015/0498 proposes no open space on the site however does propose some limited planting on site. However retains the existing TPO trees on the site.</li> </ul>	

Version 1a

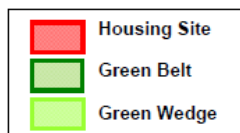

## Site xx: S0115:Woodville, Pool Street, John Street Swadlincote

### Description:

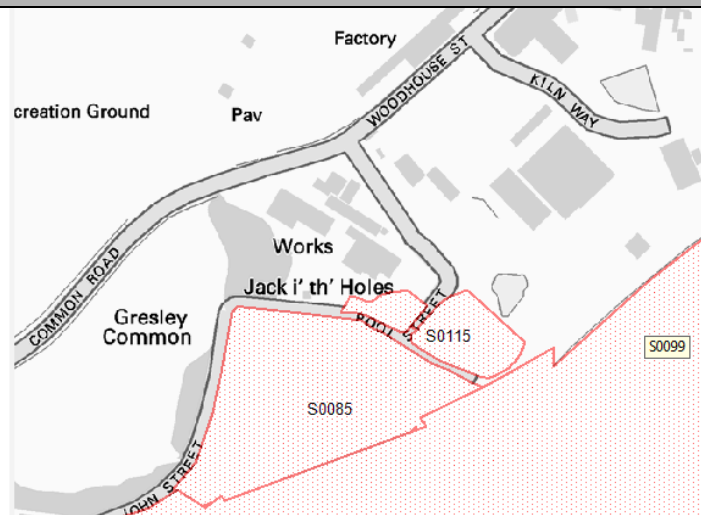

The site is located 1.3km from Swadlincote Town Centre.

The site comprise to two areas on opposite side of Pool Street. The sites together extends some 0.73ha. The site is a former pottery and is in one ownership. There is low developer interest.

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 910m of SD377 Midway Clay Site.	
	Could development affect protected species or BAP priority species?		- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site could need to be passed over to tree planting and landscaping given the sites National Forest location.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this are or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site would make an uncertain contribution towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site. Development of the site would make an uncertain contribution towards the delivery of affordable housing due to its size. However due to local plan requirement would be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision of healthcare facilities within 3km of the site. The nearest GP is located within Woodville (Woodville Surgery) 1.3km from the site.	
	Will it promote healthy lifestyles?		- There in centre within Woodville, however the site is within 1200m of a convenience store; however is in excess of 1200m from Woodville Post Office, library and community centre. - The site is in excess of 1200m from a primary school, however is within 800m of a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- The site is derelict and the area is subject to antisocial behaviour. Development of the site would help address this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - The nearest primary school is Pennine Way Junior School which is exceeding capacity with 333 pupils attending the school with a capacity of 324 pupils.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Due to the size of the site development would make an uncertain contribution towards the delivery of affordable housing. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 800m of an hourly bus service. - There are some local facilities (including a primary school, village hall, doctors, convenience store, post office, public house, library) - There are no metalled footpaths immediately adjacent to the site which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale will have any significant impact on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 800m of an hourly bus service - There are no metalled footpaths immediately adjacent to the site which could connect the site to the surrounding area. - There are no established off-road cycle routes adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - There are no known electricity or water supply constraints - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limits support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have mess significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/pr otect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is previously developed and development of the site would regenerate the area.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is brownfield and there is hard standing on the site which could be used during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- The site is brownfield and there is hard standing on the site which could be used during the construction phase. - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site is in Flood Zone 1.</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>Redevelopment of brownfield land would normally be expected to result in a reduction in runoff rates, but this will be determined by the design of the scheme.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Site is within 800m of an hourly bus service. There is no centre within Woodville, however the site is located within 1200m of some services (convenience store), however is in excess of some services (post office, primary school, post office, library school.</li> <li>Granville Sports Colleague is 2.1km from the site. <ul style="list-style-type: none"> <li>The nearest major employment site lies adjacent to the site</li> <li>The nearest supermarket is 1.2km away.</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development may affect the setting of nearby listed buildings (Grade II Bottle Kin and Grade II* Bottle Kiln)</li> <li>A small element of HERS 26885 is located within the right site, the majority of the HERS site is located adjacent to the site.</li> <li>HERS26867 is adjacent to both sites</li> <li>Hers 26865 is immediately adjacent to the left site.</li> <li>Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is brownfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>The site is located within the lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>The site is located within the Leicestershire and South Derbyshire Coalfield Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>Hedgerows, trees or other landscaping elements could contribute towards integrating new development into the landscaping.</li> <li>The land parcel could contribute towards green infrastructure provision</li> <li>Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

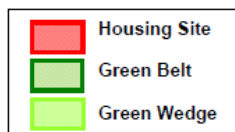

## Site xx: S0112: Orchard Street, Newhall, Swadlincote

### Description:

The site is located within Newhall and is 2.4km from Swadlincote Town Centre.

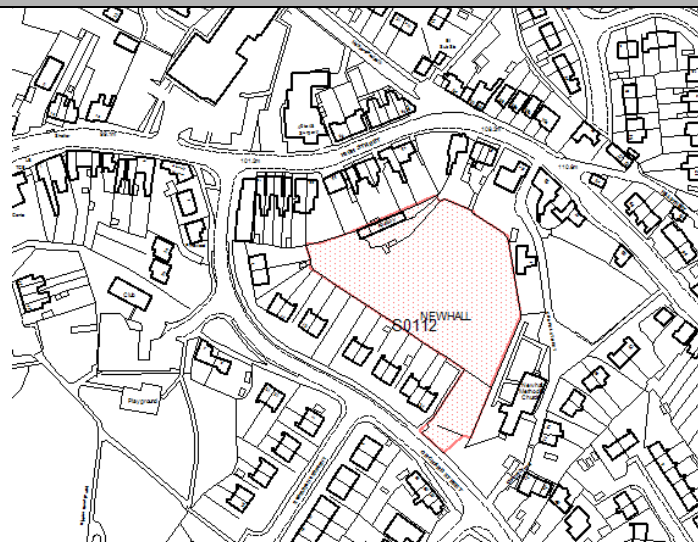

The site comprises of open space. It extends some 0.59ha and is currently in multiple ownership. However all parties are currently willing to develop the site for residential use. There is no developer interest.

#### Key

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Specific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 800m of SD273 Breach Leys Farm Meadows.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 300m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Site would make an uncertain contribution towards the delivery of affordable housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, however due to the size of the site, the site would provide an uncertain contribution towards the delivery of affordable housing, however due to local plan requirements the site would be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make a contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. - The nearest GP is located in Newhall (Newhall Surgery) 0.2km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch, a primary school and within 800m of a convenience store, post office and village hall.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest Primary School is Newhall Community Junior School which has some spare capacity with 293 pupils attending the school with a capacity of 236 pupils. - The nearest Secondary School is William Allitt, which is exceeding capacity with 973 pupils attending the school with a capacity of 945. - Pingle School however does have some spare capacity.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Due to the size of the site, development would make an uncertain contribution towards the delivery of affordable housing. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 400m of an hourly bus service to Burton, Ashby, Coalville and Leicestershire. - There is a metalled footpath adjacent to the site on Orchard Street. - There are some local facilities within Newhall: convenience store, open space and facilities, post office, pharmacy, village hall. - There are no off-road cycle routes adjacent to this site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant impact on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site would be within 400m of an hourly bus service to Burton, Ashby, Coalville and Leicestershire. - There is a metalled footpath adjacent to the site on Orchard Street. - There are no off road cycle routes adjacent to this site,	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - No known electricity or water supply constraints - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect of encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate the existing built up area. - The contribution the site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality?		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development?		<ul style="list-style-type: none"> <li>Site is greenfield, however does not comprise of agricultural use.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1.</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform to existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Primary school, village hall, convenience store and post office are within 800m and site is within 400m of an hourly bus service.</li> <li>William Allitt Secondary School is 0.6km from the site.</li> <li>The nearest major employment site is Bretby, which is within 2km of the site.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>The site may affect the setting of Grade II Central Melodist Church which is located immediately to the north of the site.</li> <li>No HERs sites within the site.</li> <li>Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Site is located away from areas of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by existing development and trees and hedgerows along part of the southern boundary of the site.</li> <li>The land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

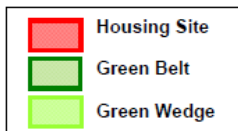

## Site xx: S007: Land east of Midway, Swadlincote

### Description:

The site is located within Swadlincote and is 0.5km from Swadlincote Town Centre.

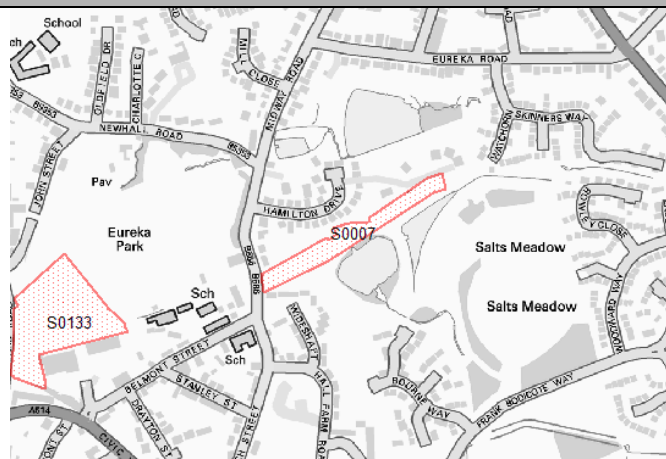

The site is greenfield (restored land) and is heavily wooded and overgrown. It extends some 0.79ha, is currently in single ownership and there is no developer interest in the site.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- County Wildlife Site SD377 Midway Clay Site covers the site.	
	Could development affect protected species or BAP priority species?	Yes	- There are no records of BAP or Protected species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - However 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Due to the size of the site, development would make an uncertain contribution towards the delivery of affordable housing. However the SHLAA suggestion form states that the land owners would like to develop affordable housing on the site.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- The SHLAA suggestion form states that the land owners would like to develop affordable housing on the site. No data has been submitted by site promoters in respect of housing types on the site, although given the local plan requirements development would be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is heartwood Medical Practice is 0.8km from the site.	
	Will it promote healthy lifestyles?		- The site is located within 800m of Swadlincote Town Centre, a sports pitch, a Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of the development. - There are no identified impacts from site in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impacts are uncertain.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest Primary School is Belmont Primary School, which is nearing capacity with 416 pupils attending the school with a capacity of 420pupils. - The nearest Secondary School is Granville Sport Colleague which has spare capacity, 558 pupils attend the school with a capacity of 830.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Due to the size of the site, development would make an uncertain contribution to the delivery of affordable housing. However the SHLAA suggestion form states that the land owners would like to see affordable housing on the site. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 400m of an hourly bus service to Burton, Ashby, Coalville and Leicestershire. - There is a metalled footpath adjacent to the site on Midway Road.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant impact on highway congestion given its scale	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 400m of a bus route - There is a metalled footpath adjacent to the site on Midway Road. - There are no off-road cycle routes adjacent to this site	
	Will it make the best use of other infrastructure?		- Development of this site would be served by WWTW which is nearing capacity - There are no known electricity or water supply constraints. - Superfast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is restored greenfield land and will not regenerate the existing built up area. - The contribution the site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these sites has been put forward by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- There is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts re unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield, however does not comprise agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood zone 1</li> <li>The eastern part of the lies within an area of less and intermediate susceptibility to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Primary school provision, Swadlincote Town Centre and sports pitch are all within 800m. The site is within 400m of an hourly bus service.</li> <li>The nearest major employment site is within 2 km at Kiln Way/Pool Street</li> <li>The is located 1.5km from Granville Sports Colegues and 1.3km from a supermarket.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>The site would be unlikely to affect the setting of any nearby listed buildings and Swadlincote Town Centre Conservation Area</li> <li>No HERS sites are located within the site.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is restored greenfield land.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Site is located within the an area of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>There is a cutting on the eastern end of the site that would require filling and the bridge removing.</li> <li>TPO215 covers the site. (review extent)</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The sits is contained by existing development to the north, east and west and part of the southern boundary.</li> <li>The site contains a County Wildlife Site.</li> <li>Trees cover the site.</li> <li>Uncertain effect identifies due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

**Site xx: S0208** Land east of Sandcliffe Road, Lower Midway

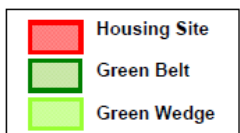

**Description:**

The site lies adjacent to the Lower and Upper Midway residential estates in Swadlincote. Swadlincote town centre is 2.6 km to the south of the site, and A511 lies to the south of the site.

Residential development borders the southern and western boundaries of the site. Fields dispersed with hedgerows and pockets of woodland border the remaining boundaries.

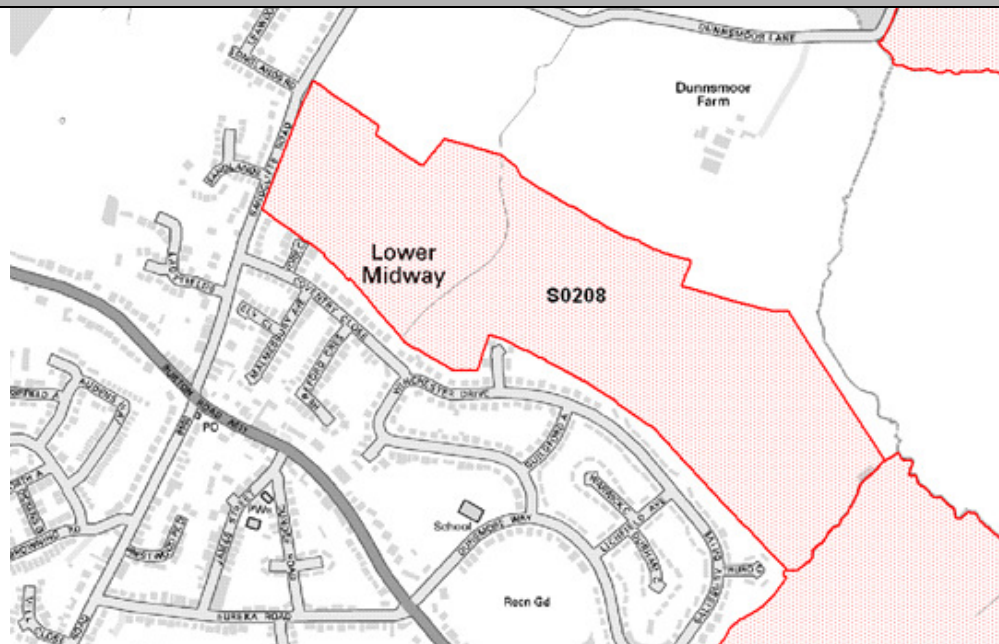

The site is in single ownership. Demand from developers is thought to be high, and there is thought to be medium end values for housing.

MAP IS NOT TO SCALE    NORTH 

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- There are no County Wildlife Sites within 300m of this site. (Lee Wood Grass Land (SD206), which is located 350m to the north west of the proposal site, has been removed from the wildlife site register in recent years).	
	Could development affect protected species or BAP priority species?	No	- There are no recording of BAP or Protected species within 300m. <b>based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether site will include the creation of new habitats or tree planting although this is likely given the sites location within the National Forest and extant national Forest Planting Guidelines	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disable people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could deliver open or recreational space on site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- The site is located around 1.5km (depending on access) from Heartwood Medical Centre (Civic Way), and Swadlincote Surgery (Darklands Road). - Development could help fund improvements to local medical facilities	
	Will it promote healthy lifestyles?		- Site is located within 800m of local recreation provision and primary school, and in excess of 1500m of a local centre in Newhall	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Development would have an uncertain effect in respect of dealing with safety issues around the site	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools are Granville which has some capacity to accommodate growth Pingle which could accommodate further growth (>2km), - There is no capacity for the expansion of local primary schools to meet requirements generated by a site of this scale	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact of the gradient and pylons on the site would require further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is also within 1.8km of Swadlincote town centre. A small supermarket is located within 300m of the site. - Two buses per hour (reducing to one per hour in the evening) operate in the residential area to the south. - The site is within 400m of existing bus stops accessible via only two pedestrian routes one along Sandcliffe Road and the other through the adjacent residential estate to the south. Much of the site would therefore be closer to 800m from the bus route in practical terms	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Strategic growth could support the provision of new education, open space and sports provision and would support existing health care provision and shops in Swadlincote.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development at the scale proposed would have an uncertain impact in respect on traffic congestion locally including on the A511 and the A511 and Sandcliffe Road Junction	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is a twice hourly bus service (reducing to once hourly service in the evening) serving this area, - Off road cycling provision in this area is undeveloped.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements - Superfast Broadband to be delivered commercially by 2016.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it encourage economic diversification?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it improve average incomes in the District?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect on respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to facilities in Midway and Swadlincote.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Surface and Ground Water</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority this site comprises Grade 3 land. It is unclear whether this could comprise Best and Most Versatile land and as such a precautionary approach has been taken and it is assumed that some land would be grade 3a.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- This site is located outside of an area at fluvial flood risk although there is a small watercourse just outside of the north eastern part of the site (see image) which is known to flood.</li> <li>- There is no indication of surface water flooding within the majority of the site, however a small area within the north of the site is located within an area less susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be expected to conform with emerging national SUDS legislation, and therefore surface water would have to be retained back to greenfield runoff rates, and would have no impact on flooding downstream.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is adjacent to the Swadlincote urban area and would be in excess of 1200m from a local centre including health facilities.</li> <li>- An hourly bus service passes within 400m</li> <li>- The nearest major employment is located 2km away at Woodville.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No architectural features have been identified within in this area which are likely to be affected by new development.</li> <li>- Potential for in ground archaeology identified in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural ad leisure resource within the District.</li> <li>- No masterplan design information included on connectivity of this site and wider area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of secondary sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- Development in this location would have a notable impact on the local landscape due to local landform and prominence of the site from the north).</li> <li>- The existing settlement boundary along Salisbury Drive, Winchester Drive and Coventry Close is poorly screened and presents an eroded settlement edge from near and distant views to the north.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- There are few substantial hedgerows, field trees or other landscape elements on site which could help integrate new development into the local landscape.</li> <li>- Site development is not likely to lead to the loss of landscape elements given a relative lack of features on site</li> <li>- National Forest Planting could deliver new and enhance existing habitats such as woodland, hedges on site</li> </ul>	

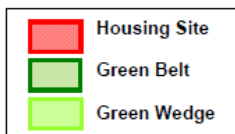

## Site xx: S0064 Land East of A511, Burton Road, Midway

### Description:

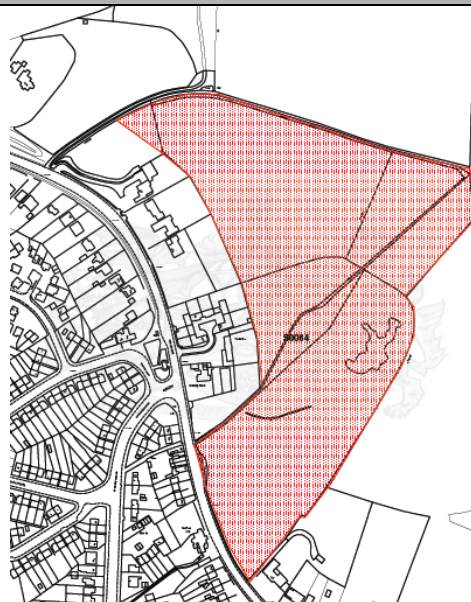

This is a small site broad triangular site which wraps around the Midway Farm. It is bounded by the A511 and residential properties to the west whilst to the north and south it is surrounded by agricultural land.

The site extends 6.68ha. The site is in single ownership and there is a high level of developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- There is a non-statutory wildlife sites within 200m of this site (SD342) Hoofies Wood	
	Could development affect protected species or BAP priority species?		- There are no recording of BAP or Protected species within 300m. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether site will include the creation of new habitats or tree planting - 20% of the site would need to passed over the tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?		- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Sites would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disable people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Sites are urban extension and will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- No, site would be an urban extension and would be very unlikely to includes provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could deliver new open and recreational space on site, including National Forest planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Existing healthcare facilities are located within 1500m of the existing surgery in Newhall - Development could help fund improvements to local medical facilities.	
	Will it promote healthy lifestyles?		- Site is located within 800m of local recreation provision and primary school, and within 1500m of Swadlincote town centre and within 1500m of Newhall local centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- There are no identified impacts from site development in respect of this issue - Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Development would have an uncertain effect in respect of dealing with safety issues around the site	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools are Pingle which could accommodate further growth (>2km), - It is very unlikely that a proposal of this scale could deliver a new primary school - The nearest primary school is Elmsleigh infant. It is unclear whether this school is capable of expansion to accommodate this level of growth	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact on viability of the gradient across the site would need further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is adjacent to the main urban area of Swadlincote - The nearest local centre is 1500m (Newhall) and Swadlincote town centre is also 1500m away. Bus stops are located just outside the site on Burton Road (within 400m) Road and are served by a twice hourly bus service to Swadlincote and Burton. (no.21) - There are some local facilities (including convenience and other shops, outdoor sports provision and health centre within 1500m) - Secondary school provision would be within 2km of the site - The nearest major employment opportunity is at Bretby Business Park less than 2km from the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Strategic growth could support the provision of new education, open space and sports provision and would support existing health care provision and shops in Newhall.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development would have an uncertain impact in respect on traffic congestion locally including on the A511.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is a twice hourly bus service between Swadlincote and Burton Serving this area, - Off road cycling provision in this area is undeveloped.	
	Will it make the best use of other infrastructure?		- Site is likely to be served by Claymills or Stanton WWTW. Both have got capacity to accommodate limited growth - It is unclear whether capacity improvements would be required within the sewerage network around Midway/Newhall - Superfast Broadband available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it encourage economic diversification?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it improve average incomes in the District?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth in this area is unlikely to have any discernible effect in respect of supporting the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to facilities in Newhall and Swadlincote
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Site is not previously developed and will not regenerate existing built up areas - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is not known whether development will have a significant impact on local water quality.</li> <li>Nitrate Vulnerable Zone = Surface and Ground Water</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with adjacent land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield</li> <li>Based on agricultural land classification maps held by the Authority this site comprises Grade 3 land. It is unclear whether this could comprise Best and Most Versatile land and as such a precautionary approach has been taken and it is assumed that some land would be grade 3a.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site is located within floodzone 1</li> <li>There is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is more than 1.2km from Swadlincote town centre and Newhall local centre.</li> <li>The site is well related to an hourly bus service (bus stops within 400m) and</li> <li>Strategic employment is located within 2km at Bretby Business Park.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development is could affect the setting of Midway Farm (listed building) and Bretby Historic Park and Garden (within 100m of the site).</li> <li>No HERS within site area</li> <li>It is unclear whether there is potential for in ground archaeology in this area.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural ad leisure resource within the District.</li> <li>No masterplan design information included on connectivity of this site and wider area.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of higher sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>Site sits in an elevated (prominent position) and would be prominent in the local landscape including from Bretby Hall Historic Park and Garden to the north.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>Site is contained by existing development and road to the west</li> <li>Significant woodland to the north and west of the site</li> <li>There is a small block of woodland within the site as well as a pond, field trees and hedgerows around an number of field parcels</li> <li>These features could help tie development into wider landscape</li> </ul>	

Version 1a

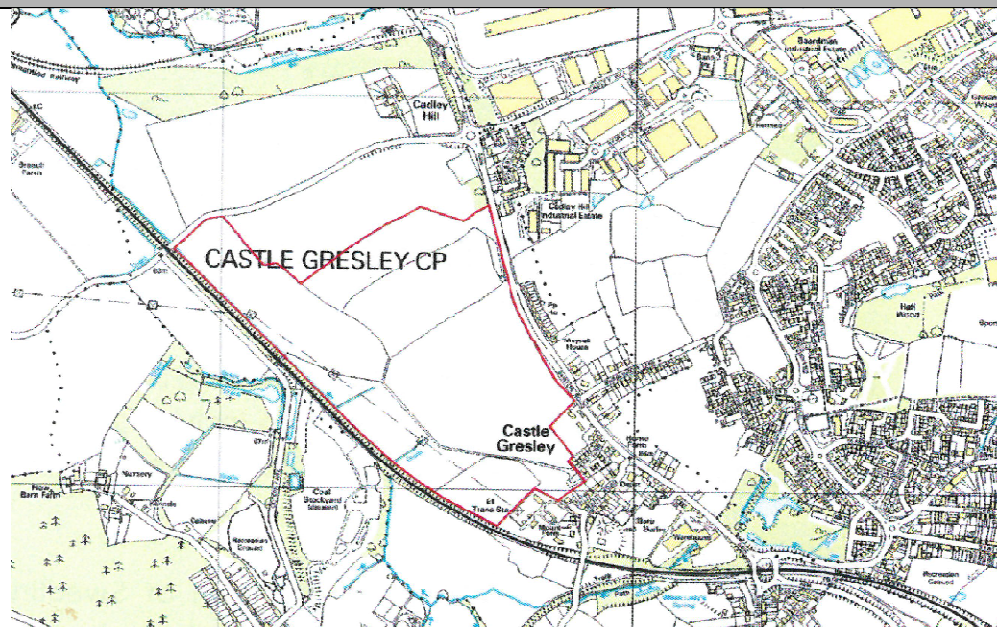

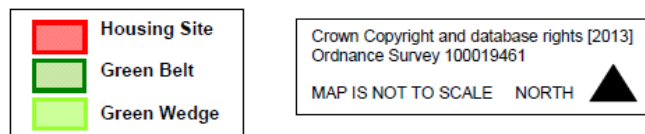

## Site XX S0254: Castle Fields, Swadlincote

### Description:

This site was first promoted for development in November 2013. Prior to this the site had not been promoted through the SHLAA or LDF process. The site is located to the immediate west the A444 and the consented but not yet built mixed use Cadley Hill Site, whilst to the south lies existing residential development. The western edge of the site is bounded by the National Forest Line. The site to the north is promoted for employment and housing development through the Plan.

The site extends some 41.5 ha. The site is thought to be in single ownership and there is a high level of developer interest in the site.

### Key

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- The site is not within 1km of a statutorily protected wildlife site such as SSI or SAC and is not in the catchment of the he River Mease SAC	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- Site is within 300m of two wildlife sites (SD306, Castle Mound) and SD360 (Whitelady Springs)	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. Based on incomplete data will need updating	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- There is potential for biodiversity gain on all sites. The site is within the National Forest and site master plan indicates 30% tree planting on site together with new informal and formal open space and SUDS provision.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disable people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in Swadlincote and South Derbyshire.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site would deliver informal open space provision on site including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Swadlincote (Gresleydale Healthcare Centre) is located within 1500m of the site.	
	Will it promote healthy lifestyles?		- The site is within 1200m of a sports pitch and services within Castleton Park local centre and Castle Gresley. - The site is 2.5km from Pennine Way School on foot and 3km from Linton Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- There are no identified impacts from site development in respect of this issue - Impacts would be uncertain and would be largely determined by detailed design and layout for the development.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- It is not known what impact development would have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools, are Pingle and William Allitt. William Allitt is full although Pingle has some capacity to accommodate growth. - The closest Primary School is Pennine Way which offers some spare capacity. Linton Primary School is nearing capacity with 256 pupils attending the school with a capacity of 260.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- There is an hourly or better bus route which is accessible within 400m of the site - The site is located within 1200m of Castle Gresley Village centre and Castleton Park local centre. - There is no metalled footpath adjacent to the site, however there maybe possibility to construct one.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education, open space and sports provision and health. It would also help to sustain existing bus services and could help improve the case for the establishment of a National Forest Line passenger rail service.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development would be likely to impact the A444 but it is not known whether impacts would be significant.	- Requirements for Green Travel Plans, or other measures to secure non-car travel
	Will it increase the proportion of journeys using modes other than cars?		- A submitted master plan (for the whole site) proposes two crossing points across the A444 and links into cycling routes on Castleton Park and Cadley Hill. - There is an hourly or better bus service which runs along the A444 to the east of the site - The site earmarks land to accommodate a passenger railway station should the National Forest Line be reopened.	
	Will it make the best use of other infrastructure?		- May be requirements to increase capacity at Stanton WWTW which could serve this development - Local capacity improvements to the sewerage network required to support development at the scale proposed. - There are no known water or electricity supply constraints. - Superfast broadband coverage available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing, selling new homes during site build out. Would have less significant benefits following site build.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses by ensuring sufficient housing supply (indirect effect)	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth in this area is unlikely to have any discernible effect in respect of supporting the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Sites are not previously developed so it will not help regenerate existing built up areas, but could reinforce local design and character	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		Development of this nature is unlikely to have any significant impact on local water quality. - Nitrate Vulnerable Zone = Groundwater and Surface Water - Ground Water Protection Zone = No	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with neighbouring land uses.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with neighbouring land uses - Location next to a rail line could lead to increased noise complaints	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		- Site is greenfield - Site is likely to be partly Grade 2 very good quality agricultural land and partly Grade 3 good to moderate quality agricultural land.	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		- Site is mainly Flood Zone 1, but there is an area within Flood Zones 3a and 2 to the west of the site. - Part of the site to the west lies within an area of less and intermediate susceptibility to surface water flooding and part of the site to the south lies within an area of less susceptibility to surface water flooding. However there is no indication of surface water flooding within the majority of the site.	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform to existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		- The site is less than 400m from an hourly bus service and less than 2km from employment land at Tetron Point and Cadley Hill. It is within 1200m of Castleton Park local centre and services and facilities at Castle Gresley.	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		- HERS site 17812 located within site (Castle Gresley Sand Pits, Smithy and Quarry)	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is agricultural and development would lead to the loss of 26ha of productive land.	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		- Site is located away from areas of primary and secondary sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity - This site is located to the west of the A444 which forms the western extent of Swadlincote. Development past this defensible boundary could represent a significant intrusion into the countryside.	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		- The site is bounded to the east by Burton Road and the Cadley Hill Site. And to the west by the National Forest Railway line. - The site lies within The National Forest and would contribute towards new tree planting and habitat creation which would account for >30% of the site. - New strategic landscaping along the railway line and northern edge of site to reduce landscape effects	

Version 1a

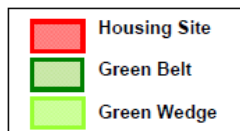

## Site 46: S0105a: Land West of A444, Cadley Hill Swadlincote

### Description:

The site lies on the opposite side of the A444 to the main built up area of Swadlincote. Swadlincote town centre is 2.4 km to the north east.

The site comprise agricultural land. It extends some 10.39ha and is currently in single ownership. There is medium developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is more than 1km from the nearest statutory wildlife site.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- County Wildlife Site SD304 Cadley Hill Railway Area is located within 300m of the site and Local Nature Reserve – Coton Park Coal Staking yard is located within 300m of the site.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data needs updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- The site is located in the National Forest and would be expected to contribute to National Forest Planting	
	Will it protect sites of geological importance?	Yes	- Site is not located within 1km of a Regionally important geological site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site would deliver informal open space provision on site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- The site is located around 1.7km on foot from nearest doctors surgery which is located on Castleton Park and could help fund improvements to local medical facilities.	
	Will it promote healthy lifestyles?		- Site is located within 1.7km on foot from Castleton Park Local centre and 2.6km from Swadlincote Town Centre - Pennine Way Primary School is 2.6km away on foot. Sports pitch provision is located 1000m from the site	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- There are no identified impacts from site development in respect of this issue - Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impacts are unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools are Pingle School and William Allitt School, the former offering spare capacity, but the latter offering no spare capacity. - Pennine Way Primary School is 2.6km from the site on foot and offers some spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 400m of nearest bus stops the A444. Buses run three times an hour to Burton and Swadlincote - There are no off-road cycle routes adjacent to this site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 400m of a bus route - Development could offer opportunities to strengthen local walking and cycling provision - Most services are beyond acceptable walking distances.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - It is unclear whether there is capacity in the local sewerage network to accommodate growth. - Superfast Broadband is expected to be delivered in this area by 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is a greenfield so it will not help regenerate existing built up areas, but could reinforce local design and character	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Surface and Ground Water</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>It is unclear whether this site has potential for impacts associated with methane or other gas release associated with historic use of the site for waste disposal.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield and in agricultural use.</li> <li>Around half of the sites fall within an area of grade 2 agricultural land. Development would therefore lead to the loss of some Best and Most Versatile agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>The site is located within flood zone 1.</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Site is within 2km of a local centre km of Swadlincote town centre, 400m of an hourly or better bus service and within 2km of a strategic employment site.</li> <li>Site performance would be significantly improved if a local centre was accommodated on site.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>No architectural features have been identified within in this area which are likely to be affected by new development.</li> <li>No HERs sites within development area</li> <li>There is limited potential for below ground archaeology in this location</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Site is located away from areas of primary and secondary sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>This site is located to the west of the A444 which forms the western extent of Swadlincote and lies beyond a minor ridgeline. Development past this defensible boundary would represent a significant intrusion into the countryside.</li> <li>Area is located in a natural dip which could reduce visual impacts of development in this area</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site lies within The National Forest and would contribute towards new tree planting and habitat creation.</li> </ul>	

Version 1a

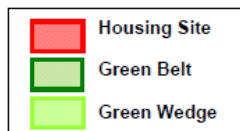

## Site 46: S0105: Land West of A444, Cadley Hill Swadlincote

### Description:

The site lies on the opposite side of the A444 to the main built up area of Swadlincote. Swadlincote town centre is 2.4 km to the north east.

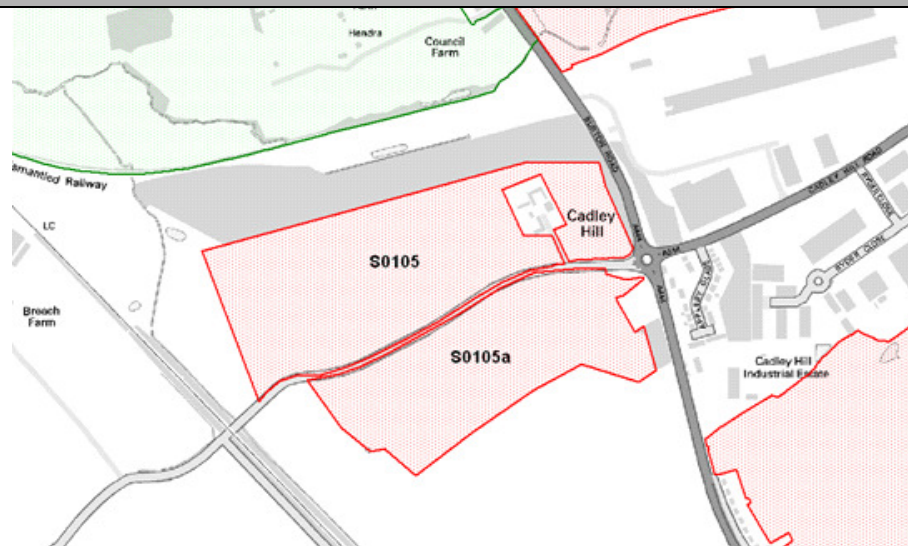

The site comprise agricultural land. It extends some 15.03ha and is currently in single ownership. There is medium developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is located within 1km of a statutory wildlife site, but this is in excess of 800m of the site and would not be affected by development.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- There are no local wildlife sites on either site, although Cadley Hill Railway Area (SD304) is located immediately to the north of the site.	
	Could development affect protected species or BAP priority species?	Yes	- There are likely to be great crested newts in the local wildlife site (SD304) to the north. Based on incomplete data needs updating.	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- The site is located in the National Forest and would be expected to contribute to National Forest Planting	
	Will it protect sites of geological importance?	Yes	- Site is not located within 1km of a Regionally important geological site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site would deliver informal open space provision on site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- The site is located around 1.7km on foot from nearest doctors surgery which is located on Castleton Park and could help fund improvements to local medical facilities.	
	Will it promote healthy lifestyles?		- Site is located within 1.7km of Castleton Park Local centre and 2.6km from Swadlincote Town Centre - Pennine way Primary School is 2.6km away on foot away. Sports pitch provision is located 1000m from the site	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- There are no identified impacts from site development in respect of this issue - Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impacts are known	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools are Pingle School and William Allitt School, each some 3.5km away, the former offering some spare capacity and the latter none. - Pennine Way Primary School is 2.6km from the site on foot and offers some spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site would be within 400m of nearest bus stops the A444. Buses run three times an hour to Burton and Swadlincote - There are no off-road cycle routes adjacent to this site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site will be within 400m of a bus route - Development could offer opportunities to strengthen local walking and cycling provision - Most services are beyond acceptable walking distances.	
	Will it make the best use of other infrastructure?		- Development of this site would be served by Stanton Waste Water Treatment Works which is nearing capacity - It is unclear whether there is capacity in the local sewerage network to accommodate growth. - Superfast Broadband is expected to be delivered in this area by 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote area is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is unlikely to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is a greenfield so it will not help regenerate existing built up areas, but could reinforce local design and character	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - <b>Review minerals safeguarding information on receipt.</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Surface and Ground Water</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>It is unclear whether this site has potential for impacts associated with methane or other gas release associated with historic use of the site for waste disposal.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield and in agricultural use.</li> <li>Site is likely to be Grade 4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>This site is almost entirely in Flood Zone 1, although a very small area at the northern edge lies within Flood Zones 3a and 2.</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>Site is more than 1200m from Castleton Park local centre and Swadlincote town centre, within 400m of an hourly or better bus service and within 2km of a strategic employment site.</li> <li>Site performance would be significantly improved if a local centre was accommodated on site.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>No architectural features have been identified within this area, which are likely to be affected by new development.</li> <li>No HERs sites within development area</li> <li>There is limited potential for below ground archaeology in this location</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>New development in this area could connect to the National Forest which is an increasingly important cultural and leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Site is located away from areas of primary and secondary sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>This site is located to the west of the A444 which forms the western extent of Swadlincote and lies beyond a minor ridgeline. Development past this defensible boundary would represent a significant intrusion into the countryside.</li> <li>Area is located in a natural dip which could reduce visual impacts of development in this area</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>Site to the north is a County Wildlife Site and recent site surveys indicate that it still meet the selection criteria for a CWS.</li> <li>The site lies within The National Forest and would contribute towards new tree planting and habitat creation.</li> </ul>	

Version 1a

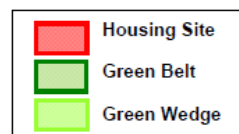

## Site 140: S0210. Land between Woodville & Vale Road, Hartshorne

### Description:

The site lies to the east of Finch Close and south of Vale Road, contiguous with the built up area of Woodville. Swadlincote town centre is approximately 2km away to the west. Burton upon Trent town centre is 10km to the north west.

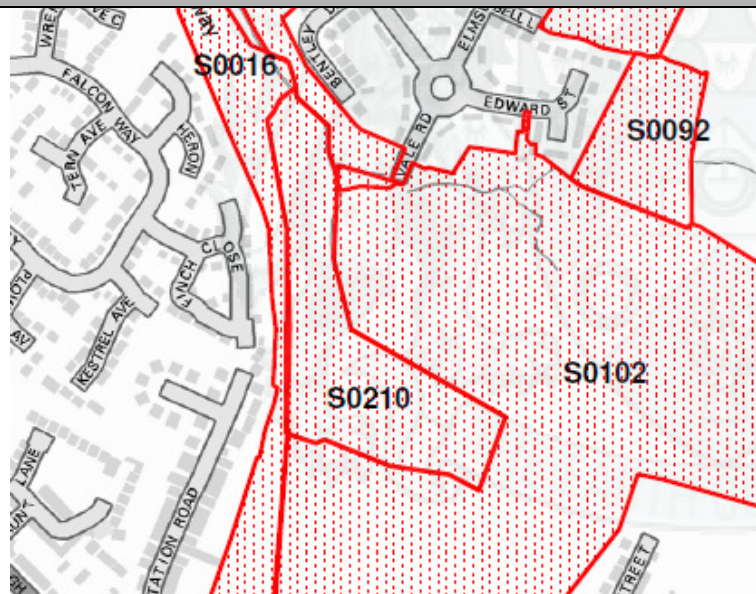

The site, measuring 3.2 ha, comprises vacant land, which was previously used as an industrial site, with buildings demolished in 1970s. It is in single ownership and there is high developer interest in the site.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- County Wildlife site SD026 Woodville Disused Railway covers the site.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. Based on incomplete data will need updating	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring back empty homes into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make a contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is in Woodville 1km from the site.	
	Will it promote healthy lifestyles?		- The site is located within 800m of a sports pitch and primary school, a library, a convenience store, a public house and a post office.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings, subject to wider viability issues. Although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. However the impact on viability of the gradient and other physical constraints would require further assessment. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is no metalled footpath adjacent to the site which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided by site promoters, but it is unlikely that services would be provided within a site of this scale.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on the highway network, although it has potential to have a detrimental impact on the A511/A514 Clock roundabout.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. However the site requires access to other SHLAA sites to be able to reach the bus services. - There is no metalled footpath adjacent to the site which could connect the site to the surrounding area. - There is a PROW within the site giving access to Station Road. - There is no established cycle route adjacent to this site, although it may provide the opportunity to develop one of the links proposed in the Greenway Strategy for South Derbyshire.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Access to the site is constrained due to access being required through adjacent SHLAA sites. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is greenfield and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield</li> <li>Site is likely to be Grade 4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>The site lies within Flood Zone 1.</li> <li>There is no indication of surface water flooding within the majority of the site. However the north east boundary has an intermediate susceptibility to surface water flooding and a small area within the centre of the site is less susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform to existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is located within 400m of an hourly bus service. There is no centre within Woodville however the site is located within 800m of a library service, a sports pitch, a convenience store, a public house, a post office and primary school. The site is located within 1.8km of Granville Sports College.</li> <li>Site is within 2km of the nearest major employment site.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation,</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>HERS0210 and 28121 are located within the site and HERS28135 is located within 20m of the site and HERS28129 is located within 10m of the site.</li> <li>Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity.</li> <li>The site is located within the Leicestershire and South Derbyshire Coalfield area.</li> <li>TPO 207 covers the site.</li> <li>Part of the site slopes towards Vale Road and there are pylons and a stream running through the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by development and woodland to the north, woodland to the west and trees and hedgerows to the south. The site is open to the south.</li> <li>TPO207 covers the site</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

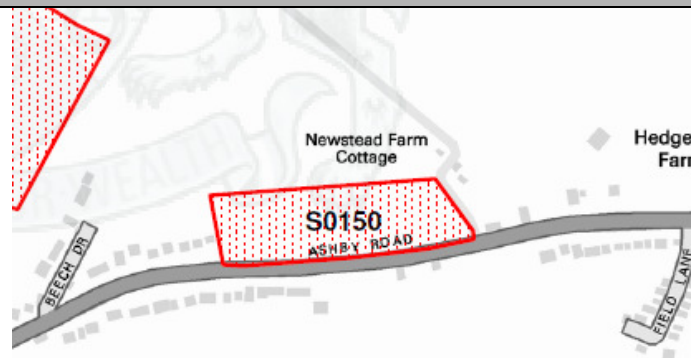

Version 1a

## Site 139: S0150. Site at OS Fields 7100 & 8400, Ashby Road, Blackfordby

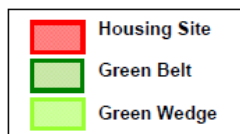

### Description:

The site lies north of Ashby Road (A511), contiguous with the built up area of Woodville and up to The Greyhound Public House. Swadlincote town centre is approximately 3km away to the west. Burton upon Trent town centre is 10.5km to the north west.

The site comprises agricultural grazing land and is 1.82ha in size. The site is in single ownership and there is a high level of developer interest in the site.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 500m of SD210 – Station Road/Vale Road.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- Information submitted with the sites SHLAA suggestion form states that appropriate landscaping can be provided to ensure the development is appropriate within the National Forest. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on-site and within 1200m, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. - The nearest GP is located in Woodville 1.3km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1.2km of a primary school and sports pitch. - There is no centre within Woodville however the site is located within 800m of a public house, within 1200m of a post office, however is within excess of 1200m of a library and convenience store.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is located within 400m of an hourly bus service. - The site is within 1200m of the primary school and post office, but more than 1200m from the library and a convenience store. - There is a metalled footpath adjacent to the site which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and health. Development of this scale would be unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development in this location would have on the road network, although there may be some detrimental impact on the A511/A514 Clock roundabout.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is located within 400m of an hourly bus service. - There is a metalled footpath adjacent to the site which could connect the site to the surrounding area. - There is no established off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the service.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land or Grade 4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There is no indication of surface water flooding within the majority of the site, however two small areas to the north of the site are less susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service. There is no village centre within Woodville , however the site is located within 800m of a public house, within 1200m of a primary school, sports pitch and post office and in excess of 1200m of a library and convenience store.</li> <li>- The site is located within 2.25km of Granville Sports Colleague.</li> <li>- Site lies within 2km of the nearest major employment site, in Woodville.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Melbourne Parklands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the west and east, trees hedgerows and Ashby Road to the east and hedgerows to the north.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

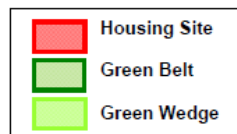

## Site 138: S0146a. Land west of Vale Road and Edward Street, Hartshorne

### Description:

The site lies west and north west of Vale Road and Edward Street and is within the built settlement of Woodville. Swadlincote town centre is approximately 2.5km away to the west. Burton upon Trent town centre is 10km to the north west.

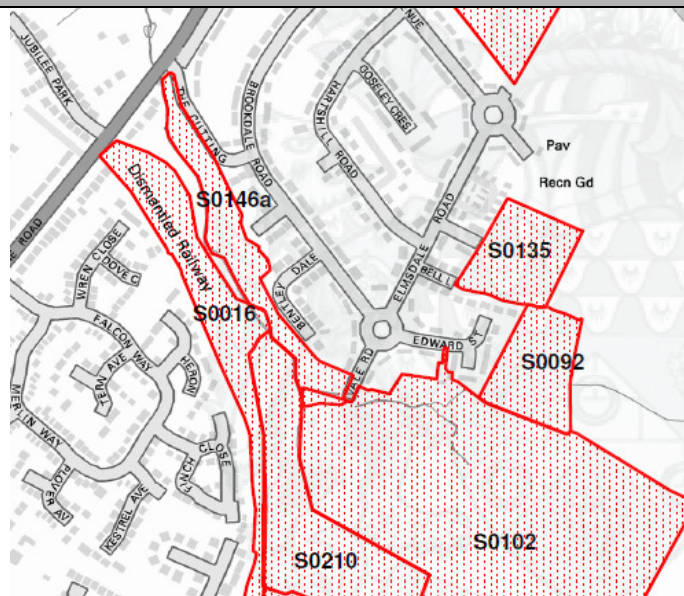

The site comprises open space with trees on site. The site area is 1.54ha. The site is in single ownership and at present there is no developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- The majority of the site is covered by County Wildlife site SD026 Woodville Disused railway.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable housing subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest Tree Planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Woodville 0.9km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch and within 1200m of a primary school. There is no centre within Woodville however the site is located within 800m of a library, a convenience store and pub, and within 1200m of a post office.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of the development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings, subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However further assessment of the impact of the gradient constraint on viability would be required. - There is an identified need for affordable housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is a metalled footpath adjacent to the site on Hartshorne road, which would connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision. Development of this scale would be unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development will have an uncertain impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. - There is a metalled footpath adjacent to the site on Hartshorne road, which would connect the site to the surrounding area. - There is no established off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development. Although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield,</li> <li>- Site is likely to be Grade 4 poor agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There are areas of less susceptibility and intermediate susceptibility along the western boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service. There is no village centre within Woodville, however the site is located within 800m of a sports pitch, library, convenience store, pub and within 1200m of a primary school and post office.</li> <li>- The site is located within 1.7km of Granville Sports Colleague.</li> <li>- Site lies within 2km of the nearest major employment site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. HERS28120 is located within 65m of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The majority of the area is located within in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity. However a small section if located within secondary sensitivity.</li> <li>- There is a deep ditch that runs through the site and also the site slopes upwards in the southern section.</li> <li>- TPO207 covers the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Hartshorne Road to the north, existing development to the east, woodland to the west.</li> <li>- TPO207 covers the site.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

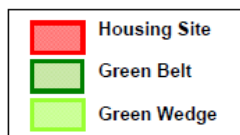

## Site 137: S0135. Land at Bretby View, Goseley Estate Hartshorne

### Description:

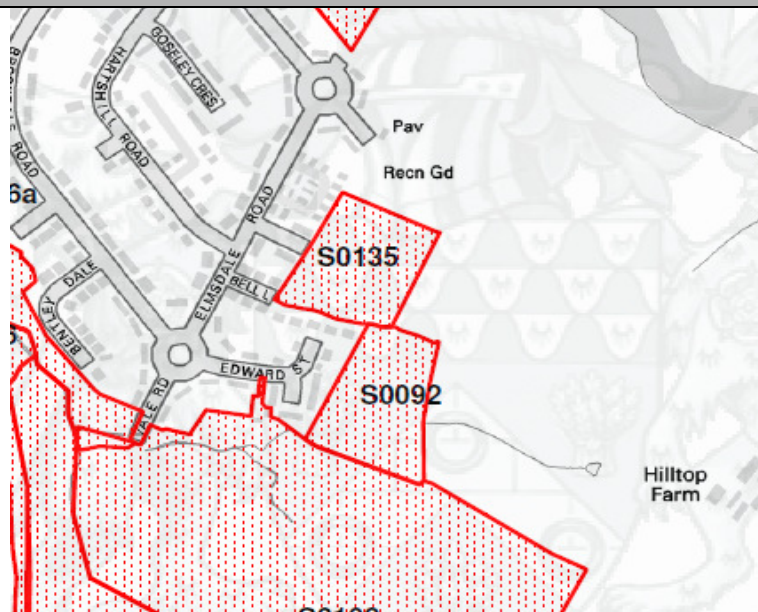

The site lies to the east of Bell Lane and is contiguous to the built settlement of Woodville. Swadlincote town centre is approximately 2.5km away to the west. Burton upon Trent town centre is 10km to the north west.

The site comprises agricultural land and is 1.28ha in size. The site is currently in single ownership and currently there is no developer interest in the site.

	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision on site and within 1200m, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Woodville 1.1km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch, however is in excess of 1200m a primary school. There is no centre within Woodville, however the site is in excess of 1200m of a library service, post office, public house and convenience store.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Impacts unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is no footpath immediately adjacent to the site. The closest footpath is on Elmsdale Road.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development of this scale would be unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development would have an uncertain impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. - There is no footpath immediately adjacent to the site. The closest footpath is on Elmsdale Road. - There is no established off-road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth in the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield.</li> <li>The site is likely to be Grade 4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1.</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is within 400m of an hourly bus service. The site is located within 800m of a sports pitch and in excess of 1200m of a primary school. There is no centre within Woodville, however the site is in excess of 1200m of a convenience store, public house, post offices and library.</li> <li>The site is located 2.3km from Granville Sports College.</li> <li>Site lies within 2km of the nearest major employment site, at Woodville.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>The site is located within the Leicestershire and South Derbyshire Coalfields Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by existing development and hedgerows to the north and west, hedgerows to the east and is open to the south</li> <li>This land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

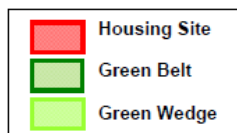

## Site 135: S0092. Site off Edward Street, Hartshorne

### Description:

The site lies to the east of Edward Street and is contiguous to the built settlement of Woodville. Swadlincote town centre is approximately 2.5km away to the west. Burton upon Trent town centre is 10km to the north west.

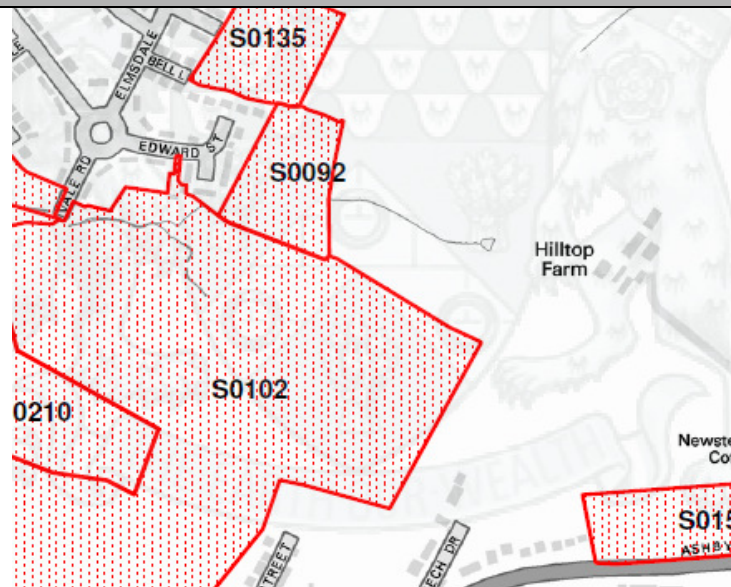

The site of 1.3ha comprises agricultural land. The site is in single ownership and currently there is no developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located within 300m of County Wildlife Site of SD026 Woodville Disused Railway.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. Based on incomplete data will need updating.	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the sites National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Woodville 1.5km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch; however is in excess of 1200m of a primary school. There is no village centre within Woodville, however the site is in excess of 1200m of a library, convenience store, post office and pub.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is located within 800m of an hourly bus service - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is no metalled footpath immediately adjacent to the site which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development would have an uncertain impact on the highways network	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is located within 800m of an hourly bus service - There is no metalled footpath immediately adjacent to the site which could connect the site to the surrounding area. - There is no established cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - Super Fast broadband available. - Access to the site is constrained due to the 5 metre entrance to the field and access being required through another SHLAA site.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect on respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the service.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield</li> <li>Site is likely to be grade 4 poor agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1</li> <li>There is no indication of surface water flooding on the majority of the site, however part of the site is less susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is located within 400m of an hourly bus service. There is no centre within Woodville, however the site is located within 800m of a sports pitch, however is in excess of 1200m of a primary school, a library, convenience store, post office and pub.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation..</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development is unlikely to affect the setting of a conservation area of any listed buildings</li> <li>No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>The site is located within the Leicestershire and Coalfield Landscape Character Assessment.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by exiting development to the west and hedgerows to the north, east and south.</li> <li>Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>This land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

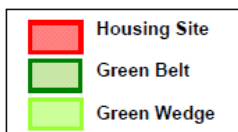

## Site 134: S0058. Land adjacent Broomy Farm, Woodville Road, Hartshorne

### Description:

The site lies between Woodville Road and Broomy Farm, Woodville. Swadlincote town centre is 2.5km away to the south west. Burton upon Trent town centre is 10km to the north west.

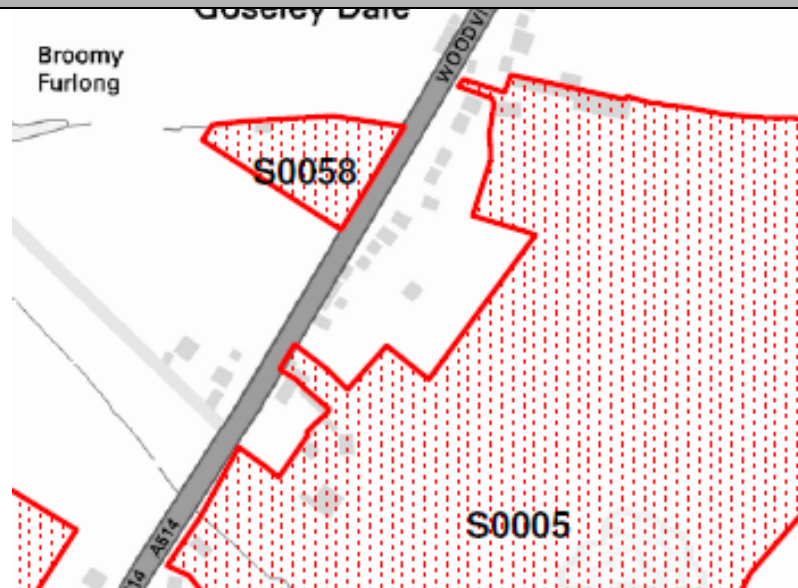

The site comprises a paddock in good condition together with farm buildings and is 0.7ha in size. The site is in single ownership and there is a medium level of developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 700m of Woodville Disused Railway.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Sites would make an uncertain contribution towards the delivery of affordable housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the size of the site, the site would make an uncertain contribution towards the delivery of affordable house, however due to local plan requirements the site will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site, including through National Forest planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within 1.5km of the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m of a sports pitch and within 1200m of a primary school within Hartshorne (however is in excess of 1200m of a primary school within Woodville. There is no centre within Woodville or Hartshorne, the site is in excess of 1200m of post office, a convenience store and library, however the site is within 800m of a public house within Hartshorne.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292. - Hartshorne C of E Primary School is nearing capacity with 101 pupils attending the school with a capacity of 112 pupils.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- The site would make an uncertain contribution towards the delivery of affordable housing, due to the size of the site. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 800m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is a metalled footpath adjacent to the site on Woodville Road which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education, open space and sport provision and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant impact on the operation of the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 800m of an hourly bus service. - There is a metalled footpath adjacent to the site on Woodville Road which could connect the site to the surrounding area. - There is no off-road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is greenfield and therefore will not regenerate the land. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>Nitrate Vulnerable Zone = Yes</li> <li>Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield</li> <li>Site is likely to be Grade 3, good to moderate quality and/or Grade4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1.</li> <li>The northern boundary of the site is less susceptible to surface water flooding and a small area on the north east boundary has an intermediate susceptibility to surface water flooding. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is located within 800m of an hourly bus service. Site is within 1200m of a sports pitch and within 1200m of a primary school within Hartshorne (however is in excess of 1200m of a primary school within Woodville. There is no centre within Woodville or Hartshorne, the site is in excess of 1200m of post office, a convenience store and library, and however the site is within 800m of a public house within Hartshorne.</li> <li>Granville Sports Colleague is located 2.3km from the site.</li> <li>The nearest major employment site lies within 2km at Woodville.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>The site is located within the Leicestershire and South Derbyshire Coalfield Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by Woodville Road and trees to the south, trees and hedgerows to the north east</li> <li>This land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

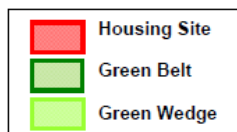

## Site 133: S0016. Land between High Street and Hartshorne Road, Woodville

### Description:

The site lies adjacent to the built up area of Woodville. Swadlincote town centre is 2km away to the west. Burton upon Trent town centre is 10km to the north west.

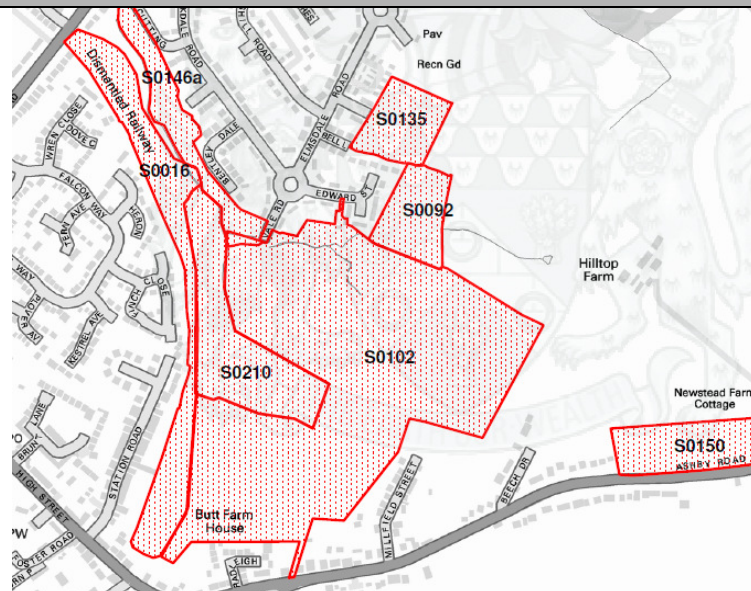

The site comprises vacant land, heavily planted with a footpath across the site. The site is 3.36ha in size. The site is in single ownership and there is a high level of developer interest in the site.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Green	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Red	- The site is covered by County Wildlife Site SD026 Woodville disused railway.	
	Could development affect protected species or BAP priority species?	Green	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Green	- No master plan of the site has been submitted however the SHLAA suggestion forms states that land can be allocated on the site for tree planting. - 20% of the site would need to be passed over to tree planning and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Green	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Green	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Orange	- The SHLAA suggestion form suggests that the site could deliver affordable housing. Any given local plan requirements, development would be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/or disabled groups?	Orange	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Green	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	Red	- Site will not bring back empty homes into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	Red	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site, including through National Forest planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Woodville, 0.8km from the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m of a primary school and recreation ground. There is no centre within Woodville, however the site is located within 800m of a convenience store, library, public house, however is within 1200m of a post office.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Granville Sports College which has some spare capacity. - Woodville C of E Primary School is nearing capacity with 283 pupils attending the school with a capacity of 292.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver few affordable housing, the SHLAA suggestion form states that affordable housing could be provided on site. And the SHLAA prepared by the Authority Indicated that the site could be viable for housing development. However the impact of the heavy planting, stream and gradient on viability would need further assessment. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - There are some local facilities nearby (including a primary school, doctors, convenience store, post office, public house, library) - There is a metalled footpath adjacent to the site on Hartshorne road, which would connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Strategic growth could support the provision of new education, open space and sports provision and healthcare. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by site promoters	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the highway network, although it could have a detrimental impact on congestion at the A511/A514 Clock roundabout junction.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. - There is a metalled footpath adjacent to the site on Hartshorne road, which would connect the site to the surrounding area - There is no established cycle route adjacent to this site, although its development could assist in the delivery of a proposed greenway.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements. - There are no known requirements for additional water supply or electricity network improvements in this area. - Super Fast broadband available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the Swadlincote Urban Area is unlikely to have any tangible effect in respect of encouraging growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or serviced within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is greenfield and will not regenerate the existing built up areas. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield, although had previously had a railway track running through the site.</li> <li>- Site is likely to be grade 4 poor quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- Within the south of the site lies an area of less and intermediate susceptibility of surface water flooding and a small area of more susceptibility of surface water flooding and a small area less susceptible to surface water flooding within the north west boundary of the site</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of an hourly bus service. The site is located within 800m of a convenience store, a library, public house and 1200m of a primary school, sport pitch and post office.</li> <li>- The site is located 1.6km from Granville Sports Colleague.</li> <li>- Site lies within 2km of the nearest major employment area.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS are located within the site, however HERS2810, 28135 and 28121 are adjacent to the site.</li> <li>- Unknown potential for archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- Site is covered by TPO 207.</li> <li>- The site contains pylons and has steep banks.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the north, west and south and by trees and hedgerows to the east.</li> <li>- TPO 207 covers the site.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site 49: S0005: Goseley Estate Extension, Woodville

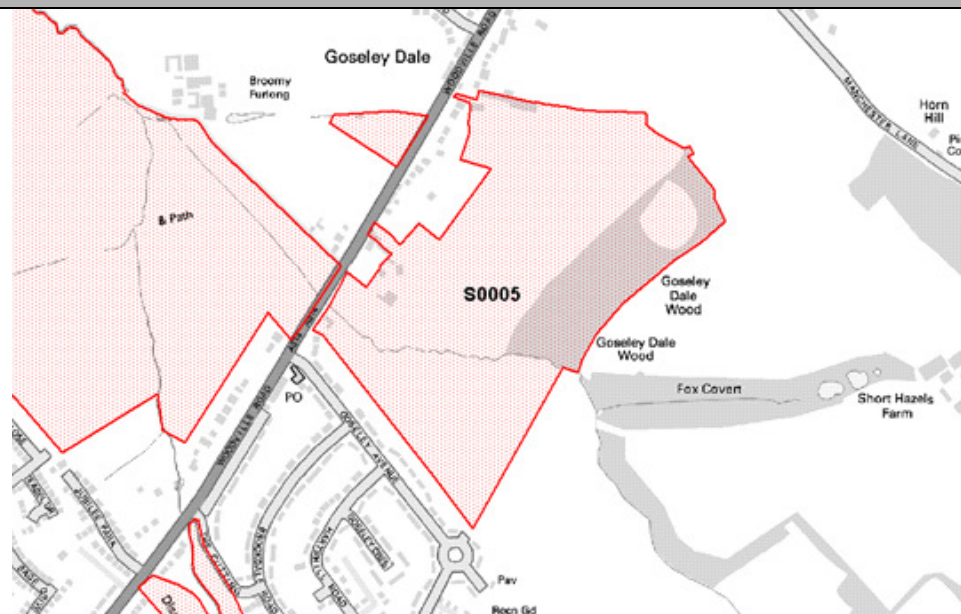

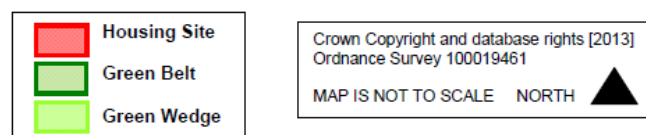

### Description:

The site lies adjacent to Woodville and the Goseley Estate. Swadlincote town centre lies 2.4 km to the south west of the site.

The site comprises agricultural fields, which are interspersed by trees and hedgerows along the field boundaries. The southern boundary of the site is bordered by residential development, and there are a number of buildings within the site along the eastern boundary. Woodville Road borders the site to the west.

The site extends 20ha and is in multiple ownership. There is thought to be a low level of developer interest in the site.

### Key

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The site is located around 350m to the north of Woodville Railway Cutting County Wildlife Site (SD026) and is unlikely to affect this site. A former site (Hartshorne Meadow SD093), which is located on the Southern Boundary of the site, has been removed from the wildlife site register	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 300m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. However 20% of the site would need to be passed over to tree planting and landscaping given the National Forest Location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable home subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide new open and recreational space on site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- The site is located around 1200m (depending on access) from the Burton Road Health Centre. Development could help fund improvements to local medical facilities.	
	Will it promote healthy lifestyles?		- Site is located within 1500m of local centre and 1000m of a primary school and sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- There are no identified impacts from site development in respect of this issue - Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Development would have an uncertain effect in respect of dealing with safety issues around the site	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools, is Granville (1km) which has some capacity to accommodate growth - There is no capacity to expand Woodville Primary, may be potential to expand Hartshorne School although this is unclear.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA proposed by the Authority indicates that the site could be viable for housing development. However the viability impact of the heavy planting, gradient, public sewer and overhead power lines would need further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site adjoins the existing Goseley Estate to the urban area of Swadlincote. The nearest local centre is Woodville within 1500m of the site. Hourly bus service within 400m of the site. - There are some local facilities (including convenience and other shops, cashpoint, outdoor sports provision and health centre within 1.5km) - Secondary school provision Granville (1.5km)	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Growth could support the provision of new education, open space and sports provision and would support existing health care provision and shops in Woodville.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Impact unknown, development could have an impact on traffic congestion around Clock Island..	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is a hourly bus service between Swadlincote and Derby serving this area, - There is limited potential for off road cycling provision in this area.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements - There are no known requirements for additional water supply or electricity network improvements in this area - Superfast broadband will be delivered commercially in this area by 2016.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth in this area is unlikely to have any discernible effect in respect of supporting the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site would be unlikely to deliver additional shops or services within the site.	- Ensure good connectivity to Woodville Local centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Site is not previously developed and will not regenerate existing built up areas - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<p>It is unclear whether water quality benefits will be delivered due to the lack of detailed about design of the scheme.</p> <ul style="list-style-type: none"> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority land would be Grade 4. And is not Best and Most Versatile.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is located within flood zone 1</li> <li>- Within the north of the site lies an area less susceptible to surface water flooding and less, intermediate and more susceptible to surface water flooding within the south of the site. However there is no indication of surface water flooding within the majority of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is well related to an hourly bus service (bus stops within 400m), local centre within 1500m and employment land (site within 2km).</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- HERS site 20236 located within development area</li> <li>- Potential for below ground archaeology</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural ad leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is productive agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of secondary sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- Development in this location would be visible from higher ground to the north, due to local landform and prominence of the site</li> <li>- The site is well connected to the urban area of Woodville, however it is not contained by urban form, and development would expand into the open countryside and have the effect of closing the gap between Hartshorne and Woodville.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The eastern part of the site comprises of scrub and could help screen the site from views to the east.</li> <li>- There is also an extensive are of immature woodland and scrub close to the southern edge of the site</li> <li>- Given the extent of scrub and woodland on site much of this could be lost through site development.</li> </ul>	

Version 1a

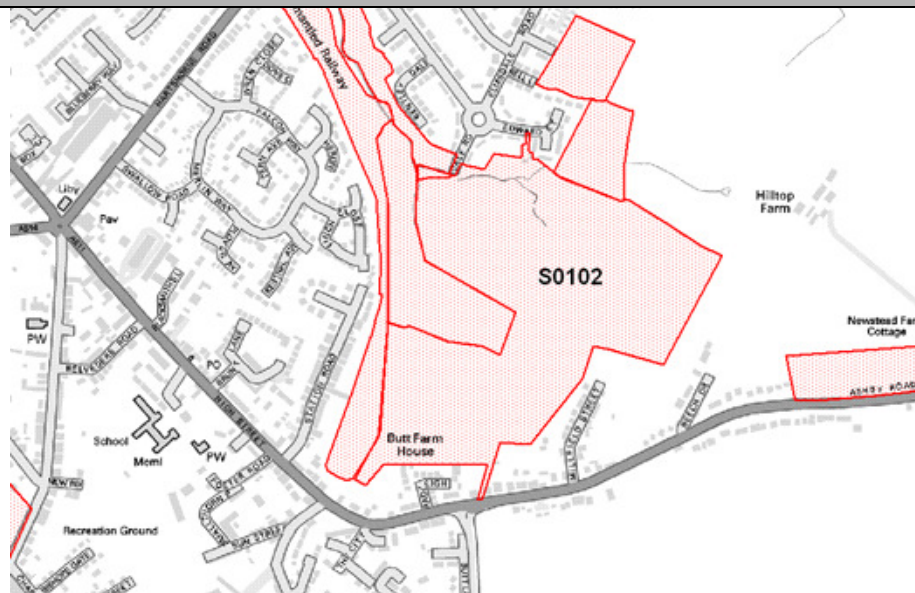

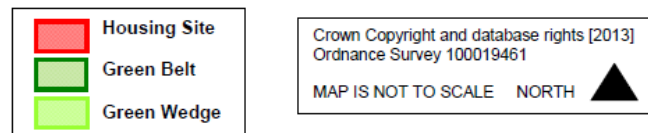

## Site xx: S0102: Butt Farm, Woodville

### Description:

The Butt Farm site lies adjacent to the urban area of Woodville. Woodville shopping facilities are less than 0.8 km away on High Street. Swadlincote town centre is 2.6 km away and Burton town centre is 10.1 km to the west. The A511 (Ashby Road) which runs to the south of the site leads to the A42 at Ashby, and towards Swadlincote in the other direction.

The site comprises of agricultural fields interspersed with hedgerows and trees along its boundaries and extends some 16.1ha. There are telegraph poles that lie across the site. There is residential development around the majority of the site boundaries, though not to the north east which is bordered by open countryside. The site is in single ownership and there is a high level of developer interest in this site.

### Key

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- The site is adjacent to Woodville Railway Cutting County Wildlife Site (SD026), and a small area of this site is located within the site boundary.	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 300m of the site. <b>Based on incomplete data. Will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. 20% of the sites would need to be passed over to tree planning and landscaping give the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disable people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide new open and recreational facilities on site, including through National Forest tree planting.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- The site is located around 1200m (depending on access) from the Burton Road Health Centre. Development could help fund improvements to local medical facilities.	
	Will it promote healthy lifestyles?		- Site is located within 800m of local centre and 800m of a primary school (although this is unlikely to be able to accommodate growth) and 1000m of a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- There are no identified impacts from site development in respect of this issue - Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact of accident numbers is unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary schools, is Granville (1km) which has some capacity to accommodate growth. - There is no capacity to expand Woodville Primary, may be potential to expand Hartshorne School although this is unclear (this school is around 1.8km from the site)	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at round 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area,	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site adjoins the existing Goseley Estate and the urban area of Swadlincote. The nearest local centre is Woodville within 800m of the site. Bus stops are located just outside the site on the A514 and A511 within 400m of the site. - There are some local facilities (including convenience and other shops, cashpoint, outdoor sports provision and health centre within 800m) - Secondary school provision Granville (1.0km) - There are employment opportunities within 2km of the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Strategic growth could support the provision of new education, open space and sports provision and would support existing health care provision and shops in Woodville.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Impact unknown, although it is likely that there would be an impact on traffic congestion at the A511/A514 Clock roundabout junction.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Swadlincote and Derby and between Burton and Coalville. There are no established off road cycle routes in this location, although development of the site could assist in the delivery of such a link.	
	Will it make the best use of other infrastructure?		- Milton WWTW which would serve this site is currently operating above its consented headroom and further development would need to be supported by capacity improvements - There are no known requirements for additional water supply or electricity network improvements in this area. - Superfast broadband to be delivered commercially in this area by 2016.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth in this area is unlikely to have any discernible effect in respect of supporting the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Site is not previously developed and will not regenerate existing built up areas - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<p>It is unclear whether water quality benefits will be delivered due to the lack of detail about design of the scheme.</p> <ul style="list-style-type: none"> <li>- Nitrate Vulnerable Zone = Surface and Ground Water</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority land would be Grade 4. And is not Best and Most Versatile.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within flood zone 1.</li> <li>- Within the majority of the site there is no indication of surface water flooding however there is an area of less and intermediate susceptibility to surface water flooding (within the north of the site).</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is well related to an hourly bus service (bus stops within 400m), local centre within 800m and employment land (site within 2km).</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Multiple HERS records within site including HERS 28129, 28121, 28111, 28120, 28110.</li> <li>- There is potential for below ground archaeology in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- New development in this area could connect to the National Forest which is an increasingly important cultural ad leisure resource within the District</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is productive agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of primary and secondary sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- Development in this location would be visible from higher ground to the north, due to local landform</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- There are a number of well-established hedgerows or tree belts on the eastern edge of the site, which could help tie new development into the wider landscape.</li> <li>- Development could negatively impact local landform which may not be amenable to development. There are topographical constraints as the site slopes down towards Vale Road and steeply up towards the A511.</li> </ul>	

Version 1a

# **DERBY URBAN AREA**

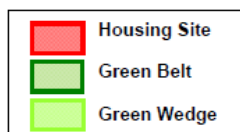

## Site XX: S0206: Land north of Witton Court, Stenson Fields

### Description:

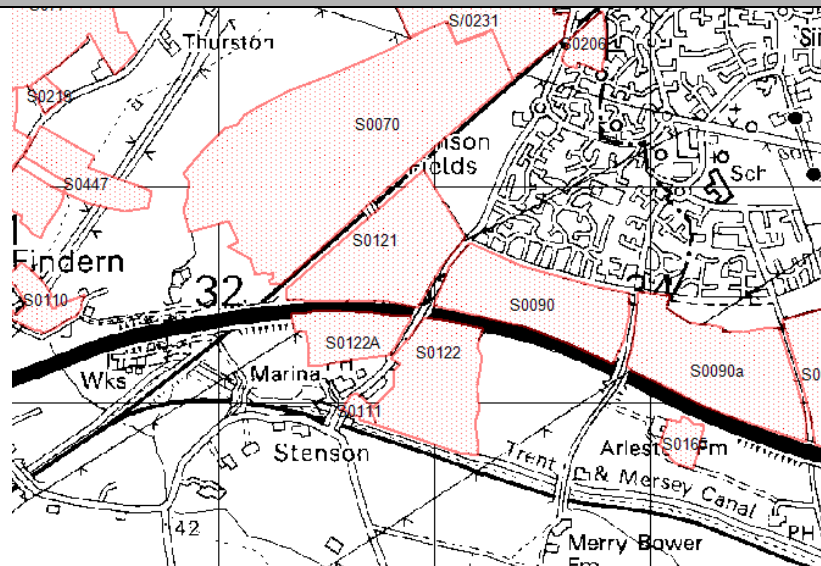

The site is located within the north of the District, 7.5km from Derby City Centre and 17.1km from Swadlincote Town Centre.

The site comprises grassland and an existing building to the north of the site. It extends some 3.55ha and is in single ownership. There is medium develop interest in the site.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Site is not located within 1km of a statutory wildlife site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 700m of DE041 Sinfin Moor Lane Meadows.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held the developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development may make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open space and leisure provision both on site and within 1200m. However, development of the site would lead to the loss of amenity greenspace.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. - Development could make contribution towards the expansion of healthcare facilities within the local area. The nearest GP is located in Sinfin 1.1km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch, a primary school and within 800m of a local centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Sinfin Community School, Noel Baker Community School and Merrill College may be able to accommodate some secondary age pupils from this area. - The nearest secondary school within South Derbyshire is John Port School, Etwall. This school is reasonably close to capacity. - The nearest primary schools to the site are Grampian Primary and Stenson Fields Primary, both of which are over-capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although given the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is located within 400m of an hourly bus service. - The site is located within 800m of a local centre. - There is a metalled footpath adjacent to the site which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education, open space and sports provision and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could sustain existing services. - No information regarding sit services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The development of this site in addition to those identified for strategic development in the Part 1 Local Plan could have a notable effect on congestion unless additional mitigation measures were proposed. However the potential for effects would be limited by the scale of proposed Part 2 Sites	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. - There are no off-road cycle routes adjacent to the site, although the Derby Local plan proposes links nearby.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with sites the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to increased incidence of sewer overflowing. - Superfast broadband likely to be delivered commercially in this area	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is predominantly greenfield and will not help regenerate existing built up area. The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site almost entirely greenfield, however there may be limited potential from to use materials during the construction phase from the existing development on the site. - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain.	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is limited potential to reuse waste onsite. - The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

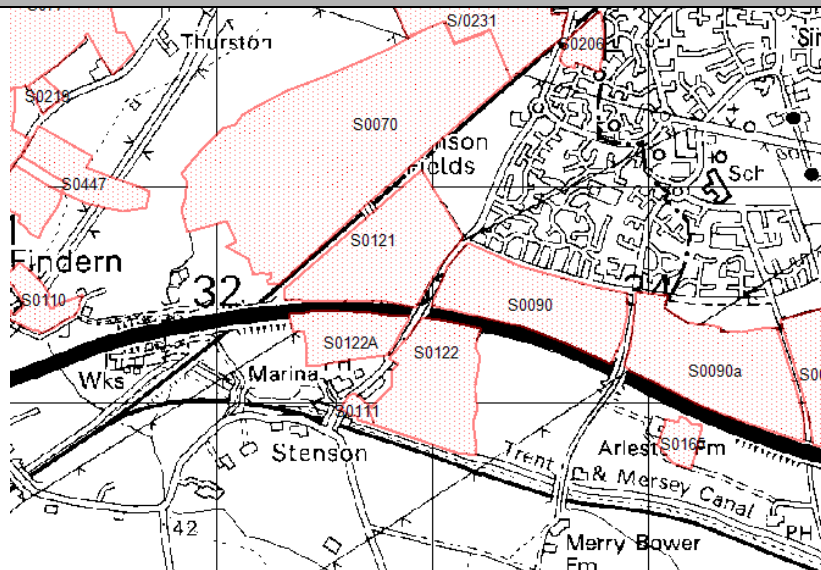

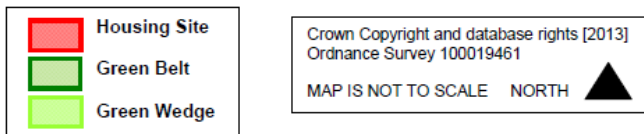

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Depending on scale, may have limited potential to facilitate improvements to the local combined sewer network and could reduce the frequency of overflows locally although this is unclear.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area, given the scale of development proposed through the Part 2 Local Plan and the distance of this site from the Inner Ring Road in Derby City (the closest AQMA).	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- The proximity of the site to the Derby to Birmingham Railway line could lead to an increase in noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is mainly greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There is no indication of surface water flooding within the majority of the site. However there is an area less susceptible to surface water flooding within the north of the site and to the south of the site there is an area of less and intermediate susceptibility to surface water flooding.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service, is within 800m of a primary school and within 800m of a local centre (including supermarket).</li> <li>- Site lies within 2km of the nearest major employment site.</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other strategic developments within and adjacent to Derby City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area.</li> <li>- No HERS are located within the site</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- The site is predominantly greenfield. 3.40ha is greenfield and 0.15 is brownfield.	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- Trees are located within the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by a railway line to the north west, existing development and hedgerows to the east, existing road to the west and existing development to the south.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential design and layout.</li> </ul>	

Version 1a

**Description:**

The site comprises greenfield land and extends some 3.29ha. The site is in single ownership and there is low developer interest.

### Key

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory wildlife site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	<ul style="list-style-type: none"> <li>- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3</li> </ul>
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- Site is located within 200m of County Wildlife Site SD110 Arleston Canal and Pond.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site Based on incomplete data will need updating	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- Site is located within 250m of Sinfir Moor Rigs site. The A50 separates the site from the RIG site. This site forms part of a glacial lake bed and covers an area of 2 square km to the south of Derby.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20</li> </ul>
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a arrange of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other development in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include on site open or recreation space provision. Open Space will also be contained within the Wragley Way allocation to the north of the site,	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Sinfen 1.8km from the site.	
	Will it promote healthy lifestyles?		- Site is in excess of 1200m from a sports pitch, local centre and primary school. - A primary School and local centre will be provided in the Wragley Way development to the north of the site, however the exact location of these facilities is currently unknown.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this site.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Sinfen Community School, Noel Baker Community School and Merrill College may be able to take come secondary age pupils from this area - The nearest secondary school within South Derbyshire is John Port School, Etwell. - A new primary is proposed at Wragley Way. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term, jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact on viability of the creation of an access would require further assessment. - This site would ensure affordable housing delivery close to an area with higher than average house prices within the city.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is in excess of 800m from an hourly bus service and is in excess of 1200m of Sinfen Local Centre. - There is no footpath on Arleston Lane which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The development of this site in addition to those identified for strategic development in the Part 1 Local Plan could have a notable effect on congestion unless additional mitigation measures were proposed. However the potential for effects would be limited by the scale of proposed Part 2 Sites	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m from an hourly bus service. - There is no off-road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- The combination of growth on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to increased incidence of sewer overflowing, however it is unclear whether this site would connect to the foul sewer network in the City - Superfast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is not previously developed and will not regenerate the existing area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by site developers.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain.	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impacts on local water quality</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development and proximity to the A50 (T) impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- The proximity of the site to the A50 could lead to an increase in noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- Within the majority of the site there is no indication of surface water flooding within the majority of the site, There is a very small area within the north of the site less susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located in excess of 1200m from a primary school and local centre. In addition the site is in excess of 800m of an hourly bus service.</li> <li>- The nearest employment site is within 3km.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City including Infinity Park</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development may affect the setting of Trent and Mersey Canal Conservation Area</li> <li>- No HERS on site/</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could offer potential to improve access to the Trent &amp; Mersey Canal</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent and Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Trees and hedgerows to the north, hedgerows to the east, a road to the south and west.</li> <li>- Hedgerows are located within the site.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to lack of information held regarding site design and layout.</li> </ul>	

Version 1a

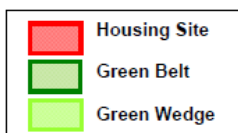

## Site XX: S0122a: Stenson Road, Derby

### Description:

The site is located within the north of the District 9.7km from Derby City Centre and 15.2km from Swadlincote Town Centre.

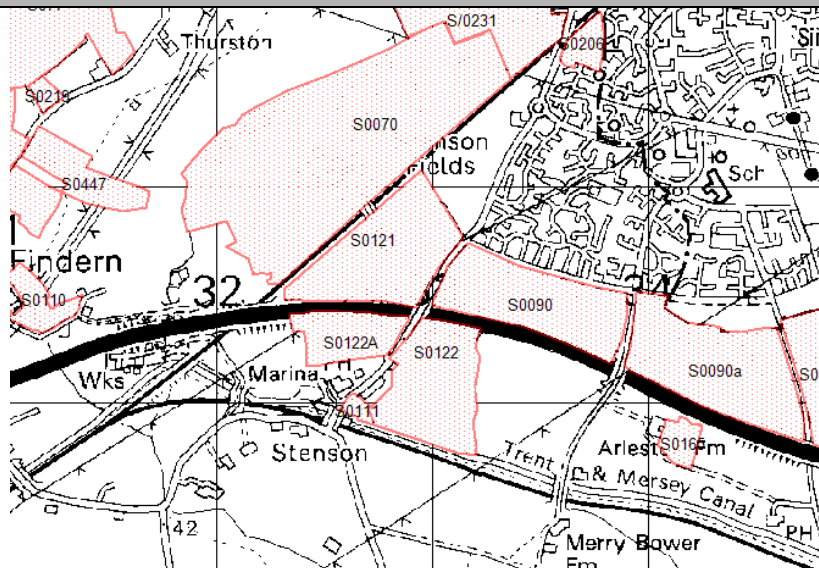

The site comprises agricultural land. It extends some 10.12ha and is in single ownership. There is high developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory wildlife site and would not affect the integrity of any Site of Special Scientific Interest of Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 650m of SD155 Kirbys Triangle.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- Site is located 400m of Sinfin Moor Rigs site, however is separated from the site by the A50. This site forms part of a glacial lake bed and covers an area of 2 square km to the south of Derby.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide open space and leisure provision on site and within 1200m.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Sinfin 2.6km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1200m of a sports pitch. - Site is currently in excess of 1200m of primary school and local centre. However Wragley Way (Part 1 allocation) to the north of the site poses a primary school and local centre on site (location currently unknown).	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Sinfin Community School, Noel Baker Community School and Merrill College may be able to take some secondary age pupils from this area - The nearest secondary school within South Derbyshire is John Port School, Etwell. - A new primary is proposed at Wragley Way. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site located within 800m of an hourly bus service. - Site is in excess of 1200m from Sinfin Local Centre.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development would be unlikely to improve public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The development of this site in addition to those identified for strategic development in the Part 1 Local Plan could have a notable effect on congestion unless additional mitigation measures were proposed. However the potential for effects would be limited by the scale of proposed Part 2 Sites	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site within 800m of an hourly bus service. - There is no off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- The combination of growth on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to increased incidence of sewer overflowing, however it is unclear whether this site would connect to the foul sewer network in the City - Superfast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site would be unlikely to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is not previously developed and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield so there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site masterplan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations .	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use if materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes (part of the site)</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- The proximity of the site to the A50 could lead to an increase in noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Site is likely to be grade 3 good to moderate quality agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- A small area of the site along the western boundary is less susceptible to surface water flooding, however within the majority of the site there is no indication of surface water flooding.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 800m of an hourly bus service; however is in excess of 1200m of a local centre and primary school. However a local centre (including supermarket) and primary school will be located within the Wragley Way strategic allocation to the north of the site (the exact locations for these services are currently unknown).</li> <li>- The nearest major employment site is within 4km.</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City including Infinity Park	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development of the site may affect the setting of nearby Grade II listed buildings and Trent and Mersey Canal Conservation Area.</li> <li>- No HERS are located within the site, however HERS27419 is adjacent to the west of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- There may be potential for development to improve access to the RIGs which covers much of the Sinfin Moor Area and The Trent and Mersey Canal.	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is wholly greenfield.	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- TPO51 is located within the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by the A50 to the north, hedgerows to the north, east, south and west of the site, There are hedgerows through part of the site.</li> <li>- TPO51 trees are located within the site.</li> <li>- This land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

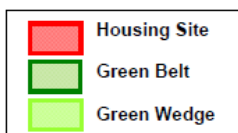

## Site XX: S0122: Stenson Road, Derby

### Description:

The site is located within the north of the District 9.7km from Derby City Centre and 15.2km from Swadlincote Town Centre.

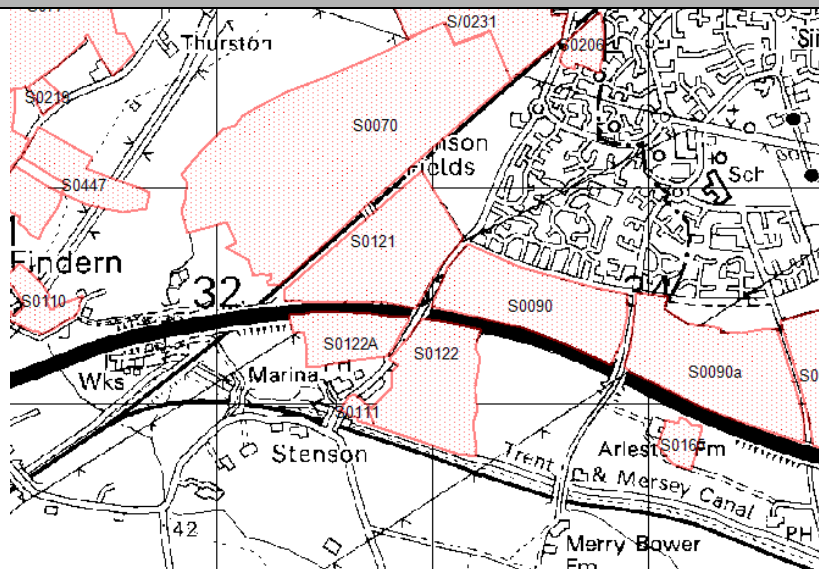

The site comprises agricultural land. It extends some 22.72ha and is in single ownership. There is high developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory wildlife site and would not affect the integrity of any Site of Special Scientific Interest of Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 500m of SD110 Arleston Canal and Pond	
	Could development affect protected species or BAP priority species?	No	- Site is located within 100m of a recording of a water vole. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- Site is located within 120m of Sinfin Moor Rigs site, however is separated from the site by the A50. This site forms part of a glacial lake bed and covers an area of 2 square km to the south of Derby.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open space and leisure provision on-site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Sinfin 2.6km from the site.	
	Will it promote healthy lifestyles?		- Site is currently in excess of 1200m of primary school and local centre. However Wragley Way (Part 1 allocation) to the north of the site poses a primary school and local centre on site (location currently unknown). <i>(Review once more information on Wragley Way is known)</i>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Sinfin Community School, Noel Baker Community School and Merrill College may be able to take come secondary age pupils from this area - The nearest secondary school within South Derbyshire is John Port School, Etwell. - A new primary is proposed at Wragley Way. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs or improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site located within 800m of an hourly bus service. - Site is in excess of 1200m from Sinfin Local Centre.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development would be unlikely to improve public transport provision but could help sustain existing services where these penetrate the Wragley Way scheme. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The development of this site in addition to those identified for strategic development in the Part 1 Local Plan could have a notable effect on congestion unless additional mitigation measures were proposed. However the potential for effects would be limited by the scale of proposed Part 2 Sites	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site lies within 800m of an hourly bus service. - There is no off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- The combination of growth on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to increased incidence of sewer overflowing, however it is unclear whether this site would connect to the foul sewer network in the City - Superfast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site would be unlikely to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is not previously developed and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield so there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site masterplan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations .	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes (part of the site)</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to significant.</li> </ul>

	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- The proximity of the site to the A50 could lead to an increase in noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Site is likely to be grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- To the south of the site a small area is less susceptible to surface water flooding and to the north a small area has a less and intermediate susceptibility to surface water flooding. However there is no indication of surface water flooding within the majority of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 800m of an hourly bus service; however is in excess of 1200m of a local centre and primary school. However a local centre (including supermarket) and primary school will be located within the Wragley Way strategic allocation to the north of the site (the exact location for these services are currently unknown).</li> <li>- The nearest major employment site is within 4km.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City including Infinity Park</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development of the site may affect the setting of nearby Grade II listed buildings and Trent and Mersey Canal Conservation Area.</li> <li>- HERS2741 is located within the site, HERS16706 is located to the east of the site and HERS99002 is located to the south of the site and could be affected by development depending on its location and scale</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- There may be potential for development to improve access to the RIGs which covers much of the Sinfin Moor Area and The Trent and Mersey Canal.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by the A50 and hedgerows to the north, hedgerows to the east, trees, hedgerows and the canal to the south, a road and hedgerows to the west.</li> <li>- This land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

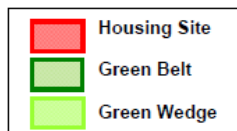

## Site XX: S0111: Land south east of Stenson Road

### Description:

The site is located within the north of the District, it is located within 8.9km from Derby City and 15km from Swadlincote.

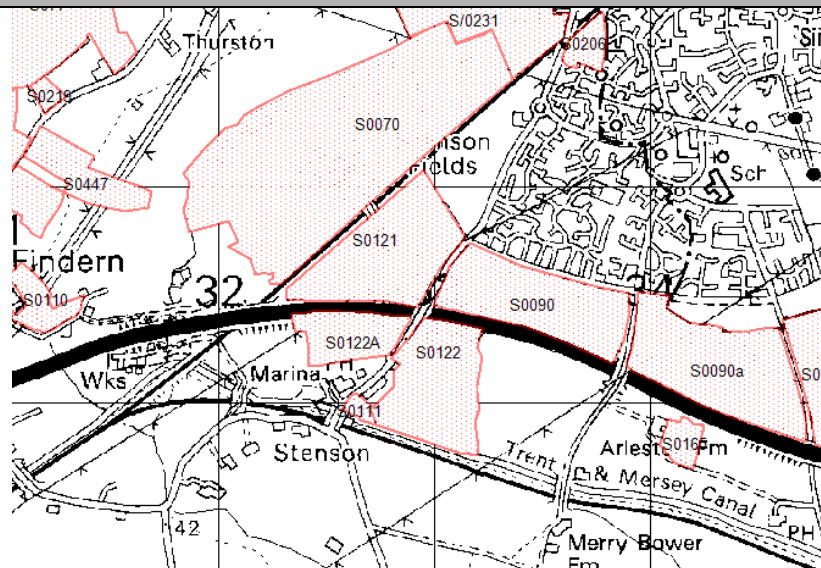

The site comprises car park and amenity space. The site extends some 1.2ha and is within single ownership. There is high developer interest.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory wildlife site and would not affect the integrity of any Site of Special Scientific Interest of Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 800m of SD155 Kirbys Triangle	
	Could development affect protected species or BAP priority species?	No	- Site is located within 100m of a recording of a water vole. Based on incomplete data will need updating	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. Unclear if there is potential for any notable creation given scale of the site.	
	Will it protect sites of geological importance?	Yes	- Site is located within 750m of Sinfin Moor Rigs site, however is separated from the site by the A50. This site forms part of a glacial lake bed and covers an area of 2 square km to the south of Derby.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include limited on site open and recreation space provision and may be located within 1200m of open space within the Wragley Way strategic housing allocation.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Sinfin 2.8km from the site.	
	Will it promote healthy lifestyles?		- Site is currently in excess of 1200m of primary school, a sports pitch and local centre. However Wragley Way (Part 1 allocation) to the north of the site poses a primary school and local centre on site (location currently unknown).	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Sinfin Community School, Noel Baker Community School and Merrill College may be able to take come secondary age pupils from this area - The nearest secondary school within South Derbyshire is John Port School, Etwell. - A new primary is proposed at Wragley Way. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs or improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is in excess of 800m of an hourly bus service - Site is in excess of 1200m from Sinfin Local Centre.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education and healthcare. Development would be unlikely to improve public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development would have an uncertain impact on the highways network	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m of an hourly bus service. - There is no off road cycle route adjacent to this site	
	Will it make the best use of other infrastructure?		- The combination of growth on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to increased incidence of sewer overflowing, however it is unclear whether this site would connect to the Foul Sewer network in the City - Superfast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site would be unlikely to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is predominantly greenfield and will not help regenerate existing built up areas, but could reinforce local design and character depending on the detailed design of homes	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- There is some potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site masterplan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations .	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is some potential to reuse demolition waste onsite, although the use if materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is predominantly greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is a small area within the west of the site less susceptible to surface water flooding. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development on greenfield land would be required to conform to existing requirements to retain runoff rates at greenfield field levels. Redevelopment of brownfield land would normally be expected to result in reduced runoff rates, although this will be dependent upon detailed design.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is in excess of 800m of an hourly bus service and in excess of 1200m of a local centre and primary school. Although these facilities could be delivered on the proposed Wragley Way Site. (the exact location for these services are currently unknown).</li> <li>- Site is less than 4km from the nearest major employment site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City including Infinity Park</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development of the site may affect the setting of nearby Grade II listed buildings and Trent and Mersey Canal Conservation Area.</li> <li>- No HERS are located on site, however HERS99002 is located to the south of the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- There may be potential for development to improve access to the Trent and Mersey Canal.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield. 0.45ha of the site is brownfield and 0.75ha is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- Trees are located within the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Stenson Road to the west, trees to the north, hedgerow to the east and trees and canal to the south.</li> <li>- This land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

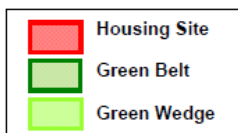

## Site XX: S0100 Lowes Lane (Sites West of Chellaston)

### Description:

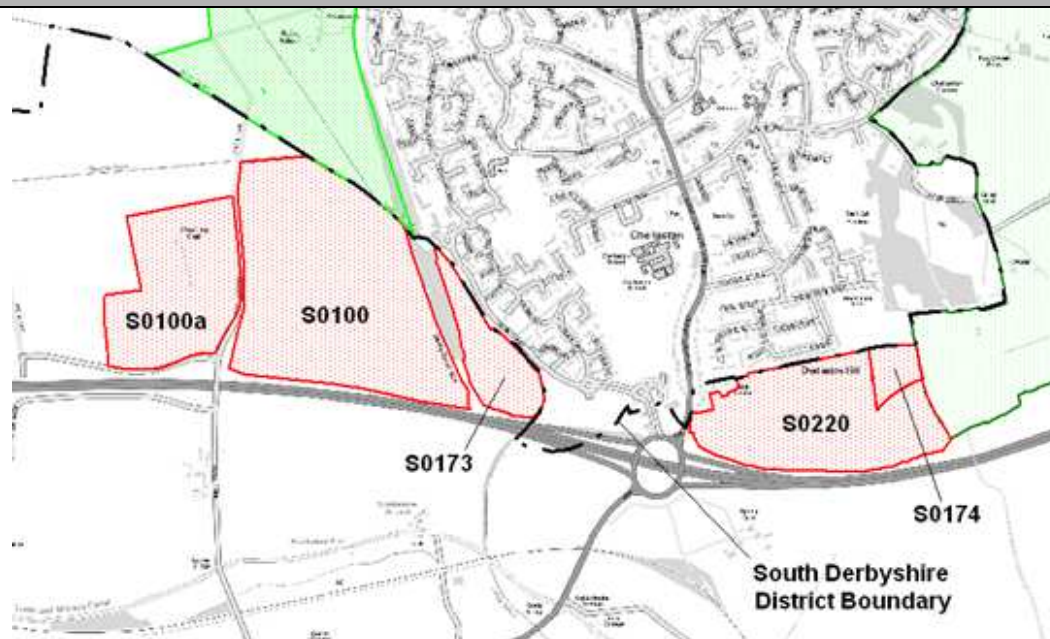

The site comprises agricultural land. It extends some 37.03ha and is currently in single ownership. There is high developer interest in the site.

The site lies to the south of the Allenton/Sinfin Green Wedge in Derby City. The east of the site contains a section of the protected alignment of the Derby/Sandiacre Canal. The site is to the immediate east of a smaller site (S0173) which has outline planning consent for around 150 homes.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory wildlife site, nor could affect integrity of a Statutory Site	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- Site is immediately adjacent to wildlife site SD134 (Derby Canal).	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- There is potential for biodiversity gain on the site given the scale of the site.	
	Will it protect sites of geological importance?	No	- Site is located on Sinfin Moor RIGs site. This site forms part of a glacial lake bed and covers an area of 2 square km to the south of Derby.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and may deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in South Derbyshire and Derby City in combination with other developments in South Derbyshire and the City and is potentially deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Potential for development to include open space provision on the western part of the site and to make proposed landscaping public access	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Chellaston around 1500m from the site.	
	Will it promote healthy lifestyles?		- Sports pitches and local centre could potentially be provided on site, although this is unlikely to be as part of a non-strategic site. Sports pitch is South Derbyshire located 900m to the south. - An existing local centre is less than 400m from the eastern edge of the site - Schools provision within 800m of the site, although may be potential to accommodate new primary and potentially secondary school on site	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- There are no identified impacts from site development in respect of this issue - Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Development would have an uncertain effect in respect of dealing with safety issues around the site	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Chellaston Academy is full and could not accommodate pupils from this area - The nearest secondary school within South Derbyshire is John Port School, Etwall. This school is at capacity but there may be potential to expand. - A new secondary school is proposed for the DUA, it may be possible to locate it in this area	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- This site would ensure affordable housing delivery close to an area with higher than average house prices within the city.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is well related to existing services which could be accessible by foot and cycle following completion of the T12 link road - This area is currently is well served by public transport and bus stops are located within 400m of the eastern edge of the site - Local centre within 400m of the site	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Potential for new informal open space and/or sports provision.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The development of this site in addition to those identified for strategic development in the Part 1 Local Plan could have a notable effect on congestion unless additional mitigation measures were proposed. However the potential for effects would be limited by the scale of proposed Part 2 Sites	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There are currently 2 buses an hour along Rowallen Way, within 400 of the site boundary, (depending on access arrangements). - National Cycle Route 6 runs along the eastern boundary.	
	Will it make the best use of other infrastructure?		- Development on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to increased incidence of sewer overflowing. - Superfast broadband likely to be delivered commercially in this area	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is predominantly greenfield and will not help regenerate existing built up areas, but could reinforce local design and character depending on the detailed design of homes	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site almost entirely greenfield although there is notable potential reuse secondary aggregates or other materials on site during construction phase owing to the significant amount of bunding material around the existing shooting club - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain.	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations and Schedule 3 of the Flood and Water Management Act.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse waste onsite The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Large scale development could facilitate improvements to the local combined sewer network and could reduce the frequency of sewer overflows locally.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development could lead to an overall decrease in noise pollution or a reduction in noise complaints owing to the loss of the shooting club on site</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use,</li> <li>- Based on agricultural land classification maps held by the Authority land is mainly Grade 3b. However there are pockets of land within the site which are grade 2. These cover around 10-15% (which is Best and Most Versatile).</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Sites are located outside of areas at fluvial flood risk (aside from a small area adjacent to the Cuttle Brook and Trent Mersey Canal) and is unlikely to have significant effects in respect of surface water flooding subject to the design and implementation of an appropriate SUDS.</li> <li>- The site contains some areas of less and intermediate susceptibility to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located less than 400m from an existing local centre to the east of the site. Public transport is located within 400-800m of most the site along Rowallan Way, depending on access arrangements. Primary school is within 800m. The nearest large scale employment area (Wilmore Road) is located in excess of 5km from site, although this will be within 2km following completion of the funded link road identified as T12 in the Derby Local Plan.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City including Infinity Park</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- The land lies partially within Sinfin Moor RIGS and has potential for Palaeolithic evidence and very close to the barrow cemetery of Swarkestone Lowes, a Scheduled Monument and an area of regional importance for Bronze Age archaeology (HERS 27031)</li> <li>- There is high potential for prehistoric archaeology in this area</li> <li>- May be potential for this development to affect the reinstatement of the Trent &amp; Mersey Canal, especially where roads cross the historical canal basin.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the Trent &amp; Mersey Canal</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not within an area of primary or secondary sensitivity according to Derbyshire Areas of Multiple Environmental Sensitivity</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Existing landscape elements are limited although field margins are usually defined by hedgerows and trees</li> <li>- Opportunity exists to significantly increase strategic landscape buffer along the proposed T12 link road and A50 (as set out in master plan) to the south and create new ponds and other landscape features</li> </ul>	

Version 1a

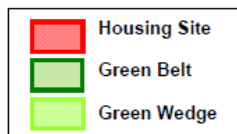

## Site 18: S0070 Stenson Road (West of Railway), Stenson Fields

### Description:

The site (S0070) lies on the southern side of the city and is dislocated from the southern part of the City by site S0231. The site comprises of arable agricultural land, which is interspersed with trees and hedgerows. The site is not located within the Green Belt, or immediately adjacent to a Green Wedge in Derby City.

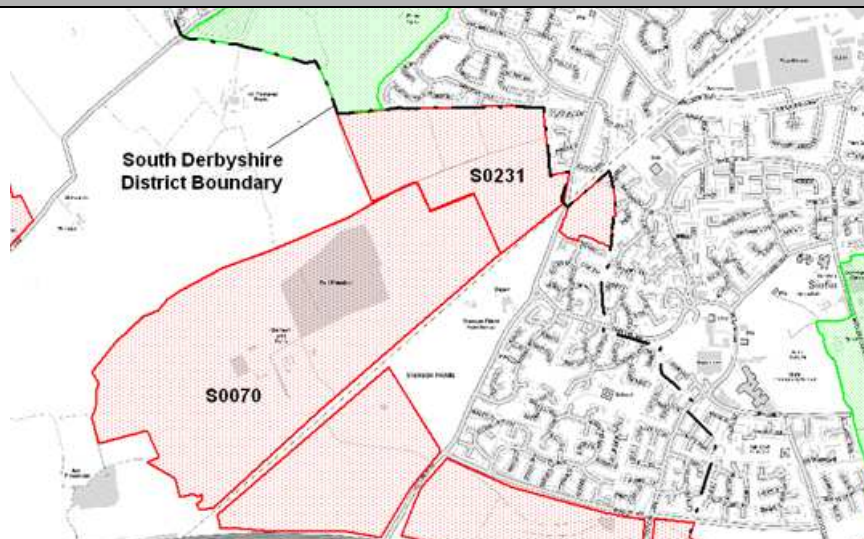

The Derby to Birmingham railway line forms the eastern boundary of the site and separates the site from the residential community of Stenson Fields. The site to the east of the railway has planning permission for up to 500 dwellings as part of the conjoined inquiry (9/2007/0020).

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District.	Will it conserve and enhance internationally or nationally important wildlife sites?	Yes	- The site is not located within 1km of a statutory wildlife site, or could affect integrity of a Statutory Site.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory) wildlife sites?	No	- Hell Meadow Wood (SD157), a non-statutory County Wildlife Site is located within site S0070. This is secondary woodland, which has developed on a ridge and furrow site.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- There is potential for biodiversity gain on the site given the scale of the site, although no information or site master plan has been submitted by the developer to inform an appraisal. - A number of trees are protected in the southern part of the site.	
	Will it protect sites of geological importance?	Yes	- No RIGS site within 1km.	
To provide decent and affordable homes that meet local needs.	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Development has potential to deliver a mix of homes in respect of tenure and housing type. - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in South Derbyshire and Derby City, in combination with other developments in South Derbyshire and the City and is potentially deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- The site is urban extension and will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- No, site would be an urban extension and would be very unlikely to includes provision for travelling communities	

To improve the health and well-being of the population.	Will it improve people's health or wellbeing?		- Development is likely to include open space and recreation provision within the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Could help fund improvements to local medical facilities, although the nearest health centre is around 2.0km (depending on access) from site S0070.	
	Will it promote healthy lifestyles?		- The closest primary school, local centre and sports pitches are located in excess of 1500m from the site.	
To improve community safety and reduce crime and fear of crime.	Will it reduce crime and fear of crime?		- There are no identified impacts from site development in respect of this issue. - Would be largely determined by design and layout of any site.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- Development would have an uncertain effect in respect of dealing with safety issues around the site.	
To improve educational achievement and improve the District's skills base.	Will it improve educational attainment amongst young people?		- Sinfon Community School, Noel Baker Community School and Merrill College may be able to accommodate some secondary age pupils from this area. - The nearest secondary school within South Derbyshire is John Port School, Etwell. This school is close to capacity but may have potential to expand - The nearest primary schools to the site are Grampian Primary and Stenson Fields Primary, both of which are over-capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no, or lower level qualifications?		- Development would have no effect against this objective.	
To promote social inclusion and reduce inequalities associated with deprivation across the District.	Will it narrow the inequality gap between the richest and poorest in the District?		- This site would ensure affordable housing delivery close to one of the most deprived wards in the city.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices.	Will it make access easier for those households who do not have a car?		- The site is poorly related to existing services by foot within Sinfon Local centre, located 1500m to the west. - Depending on access and development to the north, the site could be within 400-800m of the nearest bus stops, with access to a four times hourly bus service.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Little is known about development proposals for the site; development of the site may help protect existing local services and facilities, although any support would be limited given the scale of sites proposed through the Part 2 Local Plan,	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling).	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is likely that development of this site in addition to the proposed strategic allocations in the Draft Local Plan could lead to highway congestion without additional mitigation measures.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There are currently 4 buses an hour along Stenson Road accessible from between 400-800m. - There is no off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development on the southern edge of Derby will lead to a requirement for major strategic capacity improvements to the foul sewer network. Without this, the existing network will become overloaded and could lead to increased incidents of sewer overflows. - Superfast broadband coverage is available in this area	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness.	Will it encourage the creation of new businesses or existing businesses to grow?		- Possibility of supporting the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have fewer significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local, urban and rural Economies.	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing towns and village centres.	Will it improve existing shopping facilities?		- Retail vacancy rates in Sinfyn District Centre are currently around 20%. This is significantly higher than other local centres. New development in this location could provide limited support and increase the vitality of the centre, by increasing the number of local residents who could use the centre. Although the nature of the site may mean homes are located a significant distance from the local centre.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment.	Will it improve the quality of new development?		- This is a greenfield site so it will not help regenerate existing built up areas, but could reinforce local design and character.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials, including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials.	Will it lead to the reduced consumption of materials?		- The site is almost entirely greenfield and there is no potential to reuse waste materials on site during construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain.	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space that is beyond the standard requirements to accommodate all of the necessary recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources.	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques, beyond minimum standards set out in the building regulations and Schedule 3 of the Flood and Water Management Act.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure that the use is below what is required by building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution.	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Depending on scale, may have limited potential to facilitate improvements to the local combined sewer network and could reduce the frequency of overflows locally although this is unclear.</li> <li>- Nitrate Vulnerable Zone = Surface water only.</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with surrounding land uses.	
	Will it improve air quality?		- Development is unlikely to have any notable air quality impacts in this area, given the scale of development proposed through the Part 2 Local Plan and the distance of this site from the Inner Ring Road in Derby City (the closest AQMA).	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- The proximity of the site to the Derby to Birmingham Railway line could lead to an increase in noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land.	Will it reduce the loss of agricultural land to new development?		<ul style="list-style-type: none"> <li>- The site is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority, the land is Grade 3b and would not result in the loss of best and most versatile land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off.	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The Hell Brook forms the northern boundary of the site and there is limited flooding around this watercourse, although given the scale of flooding and the size of the site it is likely development in areas of flood risk can be avoided.</li> <li>- There are no significant areas of pluvial flooding away from areas identified at risk around Hell Brook.</li> <li>- Sequential test could be passed subject to appropriate design and layout.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site, an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes.	Will it reduce the causes of climate change?		- Sinfen Local Centre is more than 1200m away. Public transport is located 400-800m away depending on site access. The nearest major employment area is within 3km.	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No designated sites of cultural heritage importance such as listed buildings or conservation areas in this area.</li> <li>- There is remnant ridge and furrow in this area, including within the wildlife site.</li> <li>- HERS 27430 (ridge and furrow within site)</li> <li>- The potential for below ground archaeology within the site is unknown</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes.	Will it improve access to the public and understanding of the District's historic and cultural features?		- There is limited potential to improve access to cultural heritage features in this area, due to the lack of identified features.	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character.	Will it reduce the amount of derelict and degraded land within the District?		- The site is greenfield.	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site falls partially within an area of secondary sensitivity according to Derbyshire Areas of Multiple Environmental Sensitivity.</li> <li>- Development of the site could result in a long vertical development along the railway line, from the urban area into the open countryside.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds?		<ul style="list-style-type: none"> <li>- Existing landscape elements such as trees, hedgerows and Hell Meadow County Wildlife site and hedgerows could help integrate new development into the local landscape.</li> <li>- There is an outgrown hedgerow and a small water course (Hell Brook) located on the northern boundary of the site and railway line, which in places is screened by an existing tree belt.</li> <li>- It is uncertain whether landscape elements will be retained within development.</li> </ul>	

Version 1a

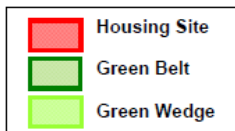

## Site XX: S100a Lowes Lane (Sites West of Chellaston)

### Description:

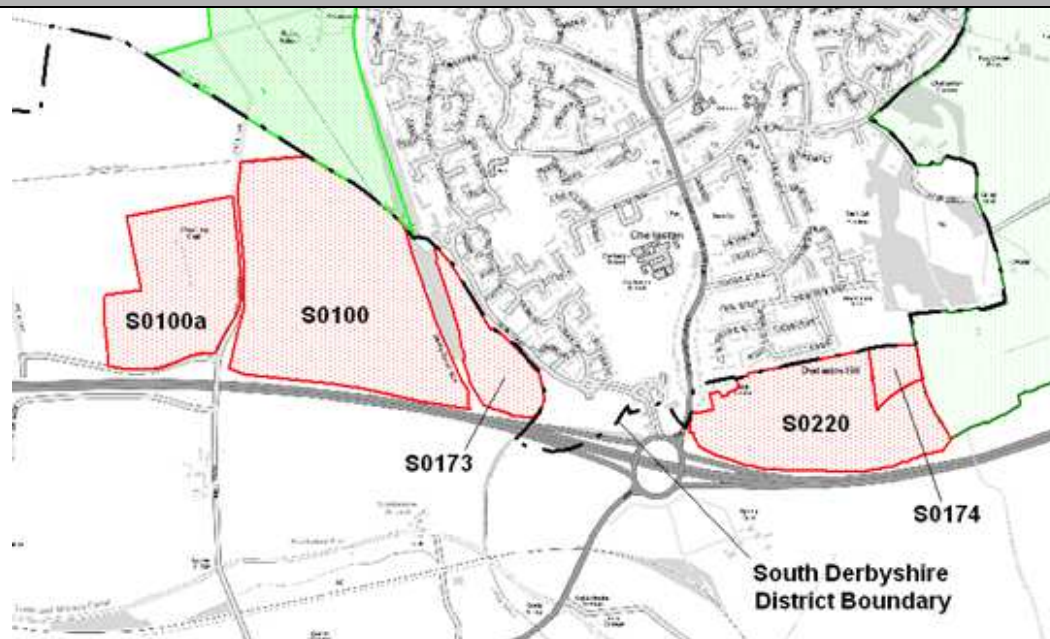

The site comprises agricultural land and contains a shooting club. It extends some 16.77ha and is currently in single ownership. There is high developer interest in the site.

The site lies to the south of the Allenton/Sinfin Green Wedge in Derby City.

### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory wildlife site, nor could affect integrity of a Statutory Site	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- The site is located within 300m of County Wildlife Site SD134 (Derby Canal)	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- There is potential for biodiversity gain given the scale of the site.	
	Will it protect sites of geological importance?	No	- Site is located on Sinfin Moor Rigs site. This site forms part of a glacial lake bed and covers an area of 2 square km to the south of Derby.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and may deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in South Derbyshire and Derby City in combination with other developments in South Derbyshire and the City and is potentially deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would be likely to include on site open and recreation space provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Chellaston 2.1km from the site.	
	Will it promote healthy lifestyles?		- Site is located in excess of 1200m of Chellaston Primary School. - Existing local centre in Chellaston is less than 1.2km from the eastern edge of the site and could be served by a metalled footpath (the T12 route) currently under construction - Nearest sports pitch are located within 1200m in South Derbyshire and Derby City - There are no identified impacts from site development in respect of this issue	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Would be largely determined by design and layout of any site	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Development would have an uncertain effect in respect of dealing with safety issues around the site	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Chellaston Academy is full and could not accommodate pupils from this area - The nearest secondary school within South Derbyshire is John Port School, Etwall. This school is at capacity but there may be potential to expand. - Chellaston Primary School is at capacity with 483 pupils attending the school with a capacity of 480 pupils.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the removal of the earth bind around the shooting club may need further assessment in viability terms. - The site close to an area with higher than average house prices within the city.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site will be within 1200m and possibly within 800m of an hourly bus service following completion of T12 route, although the area is not currently well served by public transport (Review following T12 Completion) - Existing local centre in Chellaston is within 1.2km from the eastern edge of the site.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Potential for new informal open space and/or sports provision.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The development of this site in addition to those identified for strategic development in the Part 1 Local Plan could have a notable effect on congestion unless additional mitigation measures were proposed. However the potential for effects would be limited by the scale of proposed Part 2 Sites	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There are currently 2 buses an hour along Rowallen Way. Depending on access arrangements services could be either just within or just beyond 800m walking distance. - There is no cycle route adjacent to the site at present, although National Cycle Route 6 passes close by to the east. Furthermore, the South Derbyshire Link Road will provide enhanced cycle provision and will provide opportunity to connect to other strategic sites proposed in the Part1 Local Plan.	
	Will it make the best use of other infrastructure?		- Superfast broadband likely to be delivered commercially in this area - Development on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network, without which the existing network would be overloaded and could lead to increased incidence of sewer flooding.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is greenfield and will not help regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site almost mostly greenfield although there is notable potential reuse secondary aggregates or other materials on site during construction phase owing to the significant amount of bunding material around the existing shooting club - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is potential to reuse waste onsite (associated with material currently used in the large bunds surrounding the shooting club). - The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impacts on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with existing or proposed land uses in the vicinity of the site</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area, given the scale of development proposed through the Part 2 Local Plan and the distance of this site from the Inner Ring Road in Derby City (the closest AQMA).</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development could lead to an overall decrease in noise pollution or a reduction in noise complaints owing to the loss of the shooting club on site</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps the land is Grade 3, good to moderate.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is within flood zone 1.</li> <li>- There site contains areas of less and intermediate susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located 1.2km from an existing local centre to the east of the site. Public transport is located close to 800m of the site along Rowallan Way. The nearest primary school is within 1km from the site. The nearest large scale employment area (Wilmore Road) is located in excess of 5km from site, although the new link road, identified as "T12" in the adopted Derby City Local Plan, will bring it within 3km.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City including Infinity Park</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- The land lies partially within Sinfin Moor RIGS and has potential for Palaeolithic evidence and very close to the barrow cemetery of Swarkestone Lowes, a Scheduled Monument and an area of regional importance for Bronze Age archaeology (HERS 27031)</li> <li>- There is high potential for prehistoric archaeology in this area</li> <li>- May be potential for this development to affect the reinstatement of the Trent &amp; Mersey Canal, especially where roads cross the historical canal basin.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the Trent &amp; Mersey Canal</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is mostly greenfield, although there is shooting club located on a small portion of the western site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not within an area of primary or secondary sensitivity according to Derbyshire Areas of Multiple Environmental Sensitivity</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Existing landscape elements are limited although field margins are usually defined by hedgerows and trees</li> </ul>	

Version 1a

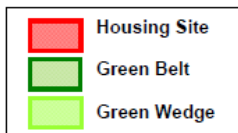

## Site xx: Land adjacent Fourway, Little Derby Hill, Burnaston

### Description:

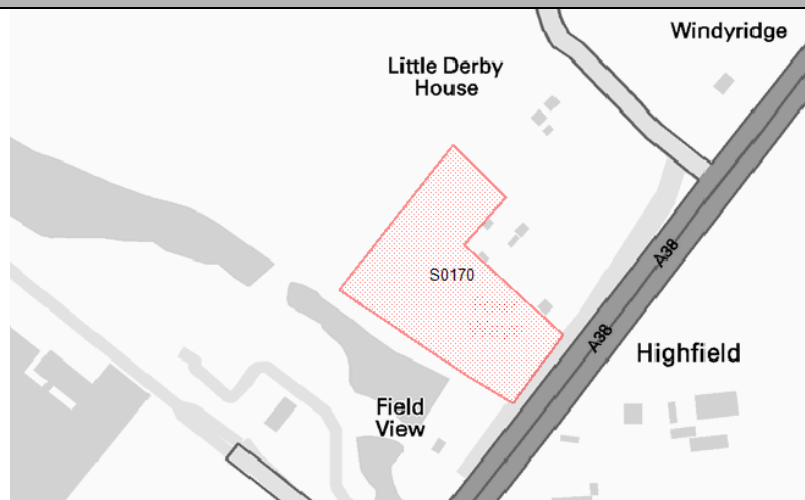

The site is located within the north west of the District and is located 9.9km from Derby City.

The site comprises of agricultural land and outbuildings. It extends some 1.66ha and is currently in single ownership. There is no developer interest.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interests of Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is within 1200m of SD401 Toyota Balancing Pond.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of gypsies or travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could contribute towards improving open space and leisure provision on-site	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Littleover Derby 3.2km from the site.	
	Will it promote healthy lifestyles?		- Site is within excess of 1200m of key services including school, sports pitch and village centre,	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The normal primary school for the site is Etwall Primary School which is exceeding capacity with 279 children attending the school with a capacity of 259 pupils. - The normal area secondary school for the site is John Port School within Etwall, which is nearing capacity within 1957 pupil's attending the school which has a capacity of 2070 pupils.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development - There is no affordable housing need within Burnaston.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is not located within 1200m of an hourly bus service. - There is an existing PROW within the eastern boundary of the site. - There are limited facilities within Burnaston – Village Hall. - There are no metalled footpaths which would connect the site to Burnaston.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education provision. Development on this scale is unlikely to deliver improved public transport provision. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is not located within 1200m of an hourly bus service - There is an established off-road cycle route running parallel to the A38, adjacent to the site. - There are no metalled footpaths which could connect the site to Burnaston.	
	Will it make the best use of other infrastructure?		- The site is not served by a sewage treatment works. - There are no known water or electricity supply constraints. - Super Fast broadband is likely to be in place in this area by 2017.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and could create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth could help sustain existing shop and other businesses located within Burnaston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site contains some agricultural buildings, however is not run down and development of the site will not regenerate existing built up area. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- There is very limited potential to reuse waste materials on the site during the construction phase – from the agricultural buildings. - New development would lead to a general increase in waste generation during construction and operation phase of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters with this information provided).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is very limited potential to reuse waste on site (from the agricultural buildings and ground) although the use if materials used overall could be reduced through the adoption of site management plans. - Site is located in an area which may be suitable for commercially economic minerals extraction check against minerals safeguarding maps once received.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area.	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- Due to the proximity of the site to the A50 there maybe increased noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site lies within Flood Zone 1</li> <li>- There is no indication of surface water flooding on the site,</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform to existing requirements to retain run off rates at greenfield levels.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is detached from the main built up area of Burnaston. The site is poorly related to day to day needs, primary and secondary school provision and is in excess of 1200m of an hourly bus service.</li> <li>- The nearest major employment site is Toyota, which lies more than 5km away by road (need to travel north on the A38 to the Mickleover roundabout before doubling back), but the journey back is only 1.5km. By cycle, using the off-highway route running parallel with the A38, the journey is 1.5km in each direction.</li> <li>- New housing development is likely to lead to an increase in energy use in aggregate terms homes in villages could perform less well in respect of this objective due to increased reliance on private transport to access local services and facilities.</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings or conservation areas.</li> <li>- No HERS are located within the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is wholly greenfield, although there are agricultural buildings on the site.	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area,</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by trees to the west, Little Derby Hill to the south, trees and hedgerows to the north and east, with existing development also containing part of the site to the east.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

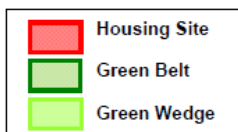

## Site xx: S0270: Land to the west of Rykneld Road, Littleover

### Description:

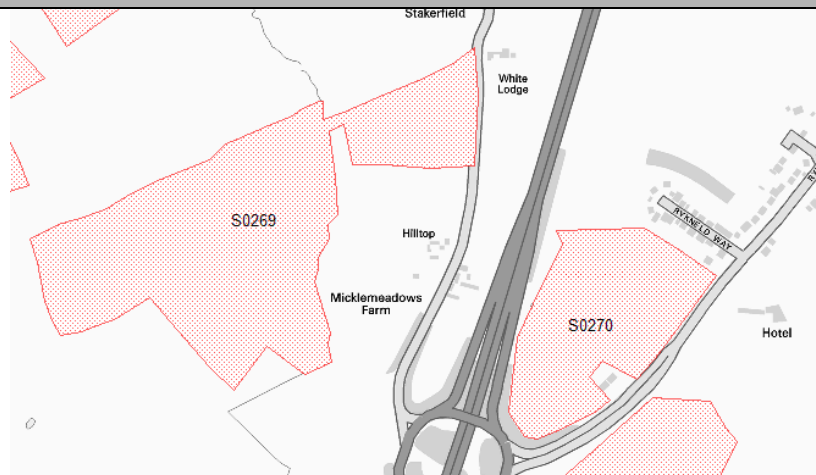

The site is located within the north of the District. It is located 8.9km from Derby City Centre and 16km from Swadlincote Town Centre.

The site comprises agricultural land, agricultural buildings and a farm dwelling. It extends some 6.73ha and is in single ownership. There is no developer interest.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1km of DE038 Rykneld Hospital Grounds.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include on site open and recreation space provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Mickleover within 900mkm from the site.	
	Will it promote healthy lifestyles?		- The site is located within 1200m of a local centre, however is in excess of 1200m of a primary school and sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Littleover Community School which is exceeding capacity with 1683 pupils attending the school with a capacity of 1342. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Littleover Local Centre is located within 1.2km of the site. - Site is within 400m of an hourly bus service - There is a metalled footpath adjacent to the site connecting the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development of this scale in this location (close to strategic levels of development in the DUA) would have an uncertain impact of the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?	TBC	- Site is within 400m of an hourly bus service. - Awaiting cycle path information for this site	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to fitter rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This majority of the site is not previously developed land, the element of the site which is previously developed is in good condition and development of the site will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield however there is minimal potential to reuse demolition waste materials on site during the construction phase, from the existing dwelling on the site. - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is very limited potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes .</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints due to the proximity of the site to the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield and is in agricultural use.</li> <li>- Land is classified as being good to moderate agricultural land or Grade 3.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- There is no indication of surface water flooding within the majority of the site, however there is an area less, intermediate and more susceptible to surface water flooding within the south of the site and area less susceptible within the north of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?	TBC	<ul style="list-style-type: none"> <li>- Site is located within 1200m of a local centre and in excess of 1.2km from a primary school.</li> <li>- The site is within 400m of an hourly bus service.</li> <li>- The site is 2.2km from Littleover Community School.</li> <li>- <b>Employment</b></li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation on site.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- HERS19908 is located adjacent to the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the east west and south, and partly by existing development to the north and hedgerows.</li> <li>- There are existing hedgerows within the site.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site xx: S269

### Description:

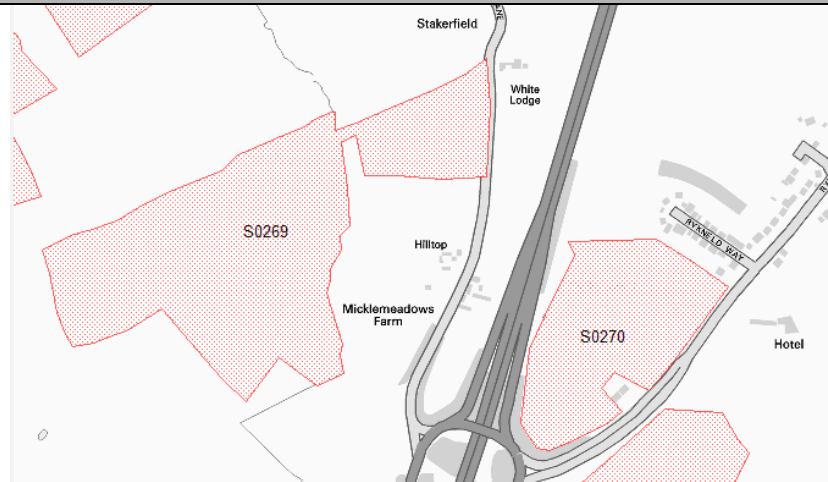

The site is located within the north of the District. It is located 9.6km from Derby City Centre and 16.1km from Swadlincote Town Centre.

The site comprises agricultural land. It extends some 14.94ha and is currently in single ownership. There is no developer interest.

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km of DE038 Rykneld Hospital Grounds.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide open and recreation space on site	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Mickleover 1.9km from the site.	
	Will it promote healthy lifestyles?		- The site is in excess of 1200m of a Primary School, sports pitch and local centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity 841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Existing Local Centre in excess of 1.2km from site - Site is in excess of 800m of an hourly bus service - There is no metalled footpath adjacent to the site, connecting the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m of an hourly bus service. - There is no off road cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to funder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is not previously developed and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes .</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield and in agricultural use.</li> <li>- Land is classified as being good to moderate agricultural land or Grade 3.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1</li> <li>- There is no indication of surface water flooding within the majority of the site, however there is less and intermediate areas susceptible to surface water flooding along the eastern boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is in excess of 1200m of a local centre and primary school.</li> <li>- The site is in excess of 800m of an hourly bus service and in excess of 1200m of a sports pitch.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation on site.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The majority of the site is located within the Needwood and South Derbyshire Claylands Landscape Character Area and part of the site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site is contained by existing development and hedgerows to the north, hedgerows and trees to the east, hedgerows to the south and Staker Lane and hedgerows to the west.</li> <li>- Hedgerows are located within the site and a group of trees are located from north to south within part of the site.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

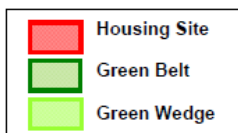

## Site xx: S0261: Land west of Lady Bank Road, Mickleover

### Description:

The site is located within the north west of the District. The site is located within 8.7km of Derby City Centre and 18.5km from Swadlincote Town Centre.

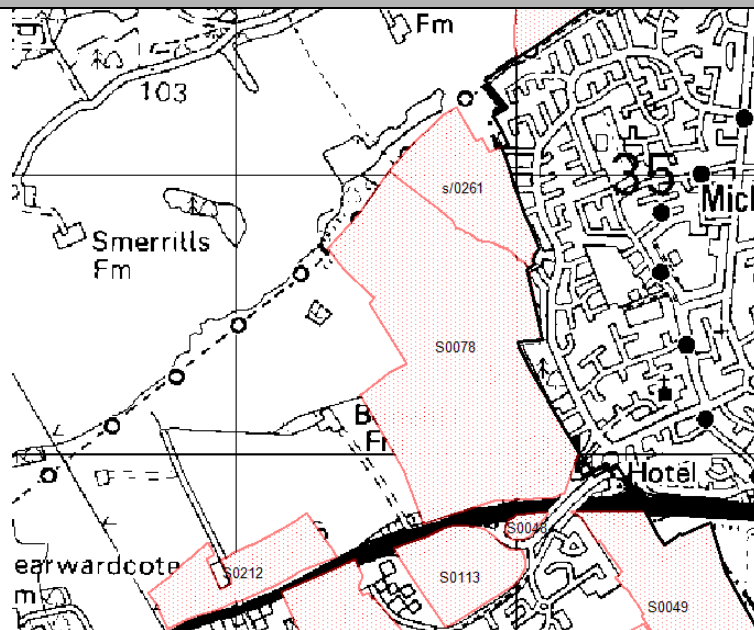

The site comprises agricultural land and one small plantation. It extends some 13.94h and is currently in single ownership. There is high developer interest.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- Site is immediately adjacent to County Wildlife Site SD388 Mickleover Etwell Trail.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Planning application indicates potential to deliver 252 homes on this site which will be of mixed tenure and type	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would be likely to include open and recreation space provision within the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Mickleover 1.6km from the site.	
	Will it promote healthy lifestyles?		- The site is located within 1.2km of a primary school, however is in excess of 1200m of a local centre and a sports pitch, although would deliver facilities on site if allocated as a comprehensive scheme through the Part 1 Local Plan.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Unknown impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. However the impact of viability of the gradient of the site would require further assessment. - Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010). - Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Existing Local Centre in excess of 1.2km from site - Site is within 400m of an hourly bus service. - There is an metalled footpath adjacent to the site which could connect the site to the surrounding area. - There's a PROW through the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development would have a severe impact on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 400m of an hourly bus service - There is a metalled footpath adjacent to the site which could connect the site to the surrounding area. - The Mickleover to Hilton cycle route forms the northern edge of the site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to funder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - <b>Superfast Broadband</b>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to local centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters containing this information).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with neighbouring land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is within flood zone 1.</li> <li>- Within the majority of the site there is no indication of surface water flooding. However there are a few small low and intermediate susceptible areas within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 1200m of a primary school and within 400m of an hourly bus service. The site is in excess of 1200m of a local centre and sports pitch.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting of Radbourne Hall, Silverhill Farm and Potlocks Farm</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>- The gradient of the site would need to be taken into account.</li> <li>- The site contains trees and hedgerows.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the east, trees and hedgerows to the north west and south.</li> <li>- Tree and hedgerows are located within the site.</li> <li>- The land parcel could contribute towards green infrastructure provisions.</li> <li>- Uncertain effect identified due to lack of information held regarding potential design and layout.</li> </ul>	

Version 1a

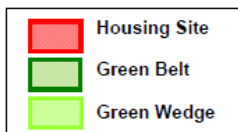

## Site xx: S0212 Pastures Hospital (west), Mickleover

### Description:

This is a greenfield site which lies immediately west of the existing Pastures Hospital site. The site is located 8.9km from Derby and 18.7km from Swadlincote.

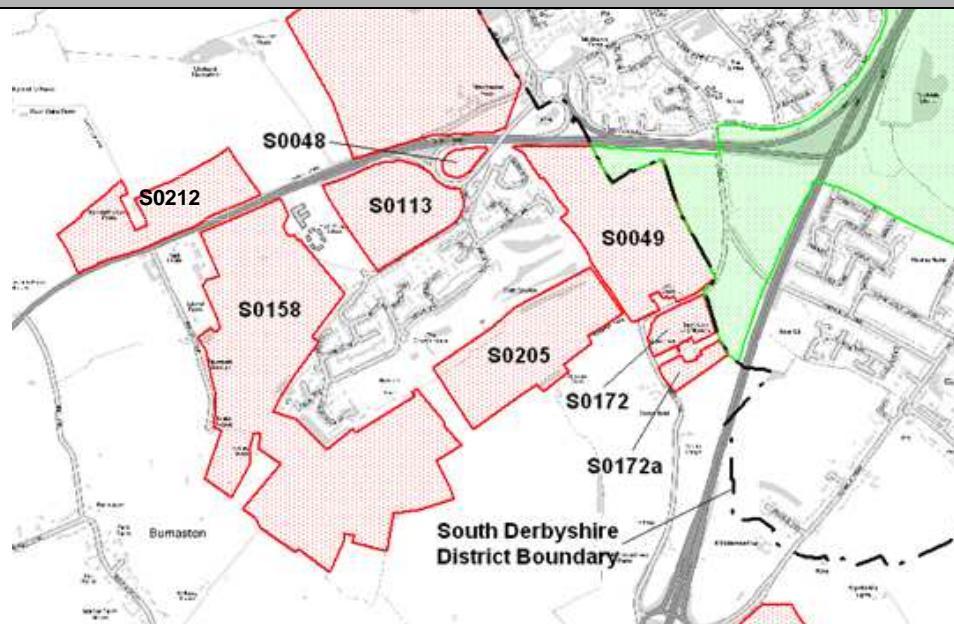

The site extends some 10.88ha and is currently used as agricultural land. The site is in single ownership and there is no developer interest in the site.

#### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for Nature Conservation (County Wildlife Site) is located within 1km of DE026 Ladybank Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site would be likely to include on site provision for leisure and recreational open space.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Mickleover 1.7km from the site.	
	Will it promote healthy lifestyles?		- Site is located in excess of 2.5km from nearest primary school. - Site is located within 2.5km of local centre. - The site is in excess of 1200m from a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - Mickleover is Derby's most affluent community and house prices are on average 25% higher the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Local Centre 2.5km from site - Bus stops on the A516, Merlin Way. The closest bus stops are located less than 400m from the boundary of the site.	Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of healthcare, Development on this scale is unlikely to deliver public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel
	Will it increase the proportion of journeys using modes other than cars?		- Site is likely to be within 400m of a frequent bus service - There is no off road cycle route adjacent to the site although one passes close by to the north.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to funder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Mickleover District Centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes immediately adjacent to A516.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- Within the majority of the site there is no indication of surface water flooding. There is however small areas of low susceptibility to the south and south west.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is within 400m of a better than hourly bus service.</li> <li>- Site located in excess of 2.5km from local primary school and local centre</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect the setting of any listed buildings or conservation areas.</li> <li>- No HERS within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be development on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within Neeedwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site contains a number of agricultural fields and contained by existing landscaping features such as trees and hedgerows. Etwall Road is located to the south of the site.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified use to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

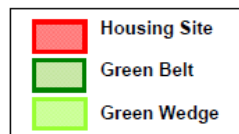

## Site xx: S0172a: Staker Flatt Farm, Staker Lane, Mickleover

### Description:

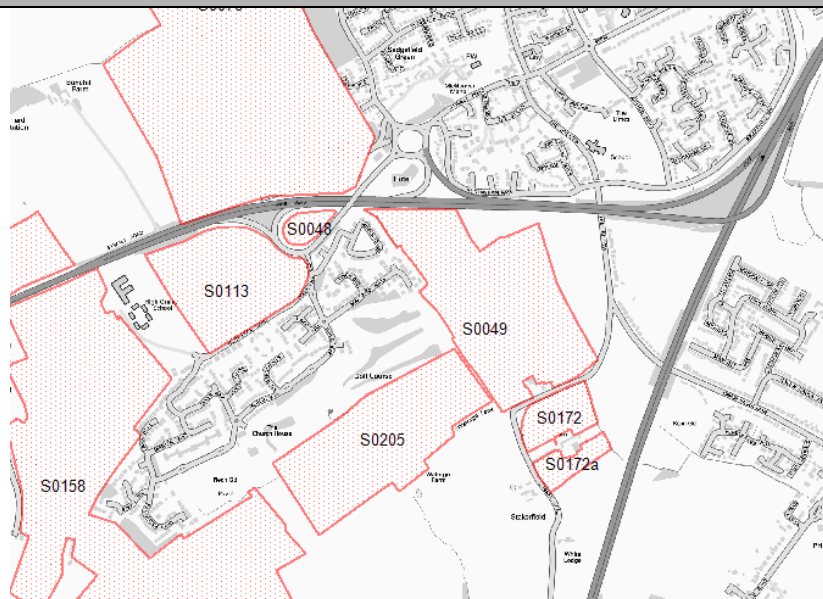

The site is located within the north of the District. It is located 9.1km from Derby City Centre and 15.6km from Swadlincote Town Centre.

The site comprises agricultural lane. It extends come 1.56ha and is in single ownership. There is high developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 800m of DE038 Rykneld Hospital Grounds.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would be likely to include on site open and recreation space provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Mickleover 2.3km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1.2km of the nearest Primary School. The site however is in excess of 1200m of a sports pitch and local centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity. 841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - Mickleover is Derby's most affluent community and house prices are on average 25% higher than the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Existing Local Centre in excess of 1.2km from site - Site is in excess of 800m of an hourly bus service	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development on this scale is unlikely to have a significant impact of the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m of an hourly bus service. - There is no off road cycle route adjacent to the site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby may need to be supported by major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to finders rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This site is not previously developed and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes .</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints due to the proximity of the site to the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1, however the eastern boundary adjoins an area located within Flood Zone 3a + climate change.</li> <li>- There is no indication of surface water flooding within the majority of the site, however there are areas less susceptible to surface water flooding along the eastern boundary of the site.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located in excess of 1200m of a local centre and within 1200m of a primary school. The site is in excess of 800m of an hourly bus service.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		- Site is contained by existing development and hedgerows to the north, hedgerows and trees to the east, hedgerows to the south and Staker Lane and hedgerows to the west.	

Version 1a

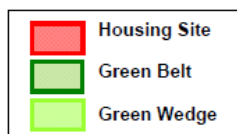

## Site xx: S0172: Staker Flatt Farm, Staker Lane, Mickleover

### Description:

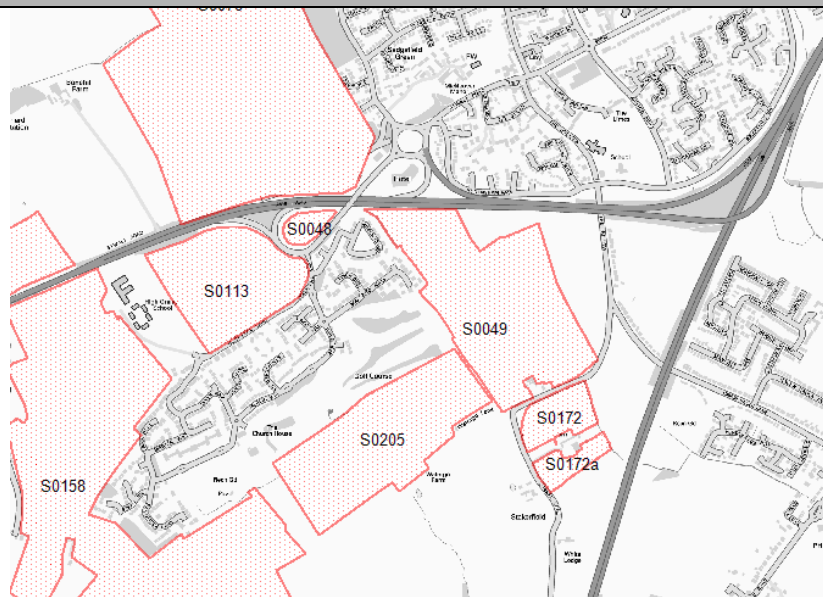

The site is located within the north of the District. It is located 9.1km from Derby City Centre and 15.6km from Swadlincote Town Centre.

The site extends some 2.62ha and comprises agricultural land. The site is in single ownership and there is high developer interest.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- The closest site of local importance for nature conservation (County Wildlife Site) is located over 880m of DE038 Former Rykneld Hospital Grounds.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would be likely to include on site open and recreation space provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Mickleover 2.3km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1.2km of Mickleover Local Centre and the nearest Primary School. The site however is in excess of 1200m of a sports pitch	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - Mickleover is Derby's most affluent community and house prices are on average 25% higher than the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Existing Local Centre within 1.2km from site - Site is in excess of 800m of an hourly bus service	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m of an hourly bus service. - There is no off-road cycle route adjacent to the site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to fitter rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints due to the proximity of the site to the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1, however the eastern boundary adjoins an area located within Flood Zone 3b.</li> <li>- There is no indication of surface water flooding within the majority of the site, however there is areas less susceptible to surface water flooding along the eastern boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is more than 800m from an hourly bus service.</li> <li>- Site located within 1200m of Mickleover Local Centre and a Primary School, however is in excess of 1200m from sports pitch and is in excess of 800m of an hourly bus service.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Staker Lane and hedgerows to the north and west, hedgerows to the east and existing development and hedgerows to the south.</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

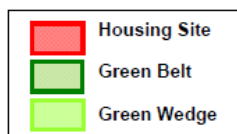

## Site xx: S0158 Pastures Hospital (west), Mickleover

### Description:

This is a greenfield site which lies immediately west of the existing Pastures Hospital site. The site is located 8.9km from Derby and 18.7km from Swadlincote.

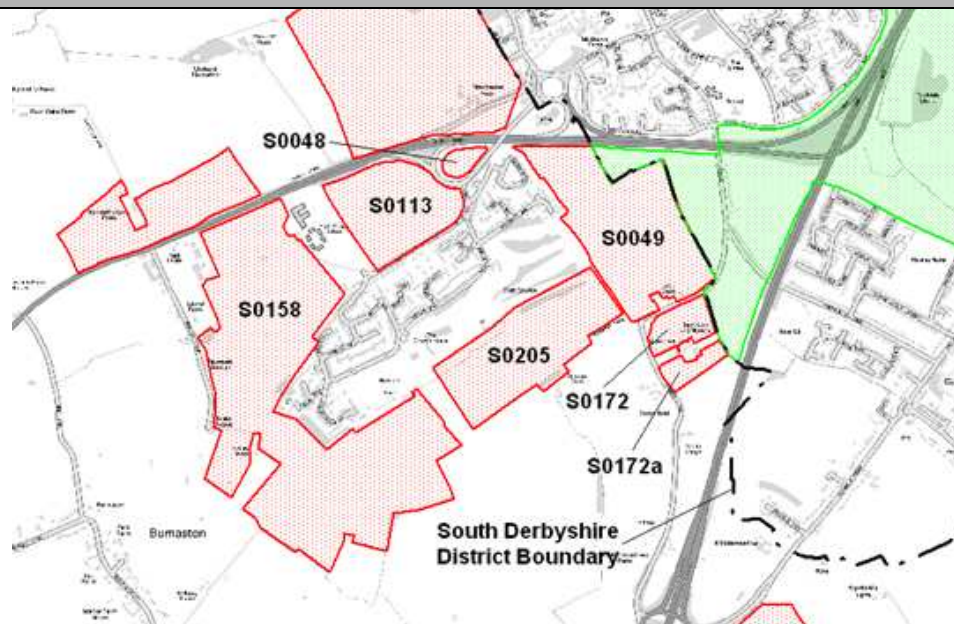

The site extends some 49.04ha and is currently used for agriculture. The site is in multiple ownership, however all sites are willing to develop the site for residential development. There is no developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1km of DE02 Ladybank Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site would provide open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Mickleover 1.7km from the site.	
	Will it promote healthy lifestyles?		- Site is located in excess of 2.5km from nearest primary school. - Site is located within 2.5km of local centre and within 800m of a sports pitch	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - Mickleover is Derby's most affluent community and house prices are on average 25% higher the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Local Centre 2.5km from site - Bus stops on the A516, Merlin Way. The closest bus stops are located less than 400m from the boundary of the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of healthcare and open space and sports provision. Development on this scale is unlikely to deliver public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is likely to be within 400m of a better than hourly bus service - There is no off-road cycle route adjacent to the site..	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to funder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Mickleover District Centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes immediately adjacent to A516.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the authority the site is Grade and as such is not best and most versatile agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within Flood zone 1.</li> <li>- There is no indication of surface water flooding within the majority of the site, however there are small areas of less and intermediate susceptibility to surface water flooding within the site.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site located in excess of 2.5km from local primary school and local centre</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> <li>- Part of site is within 400m of an hourly bus service</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting the former Pastures Hospital, which includes the Grade II Winter Garden and the Grade II listed former chapel.</li> <li>- No HERS within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Areas of Multiple Environmental Sensitivity.</li> <li>- Development in this area could decrease the separation between the pastures site and Burnaston Village</li> <li>- The site is located within Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site includes a number of agricultural fields which retain well defined field boundaries – these could be integrated into any development</li> <li>- Some existing tree planting around Sandpipier Lane to the west</li> <li>- New peripheral planting could provide screening for development already located around the pastures site</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

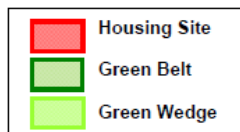

**Site xx: S079, Land off Radbourne Lane, Mickleover**

**Description:**

The site is located within the north west of the District. It is located 6.4km from Derby City and 24.1km from Swadlincote Town Centre.

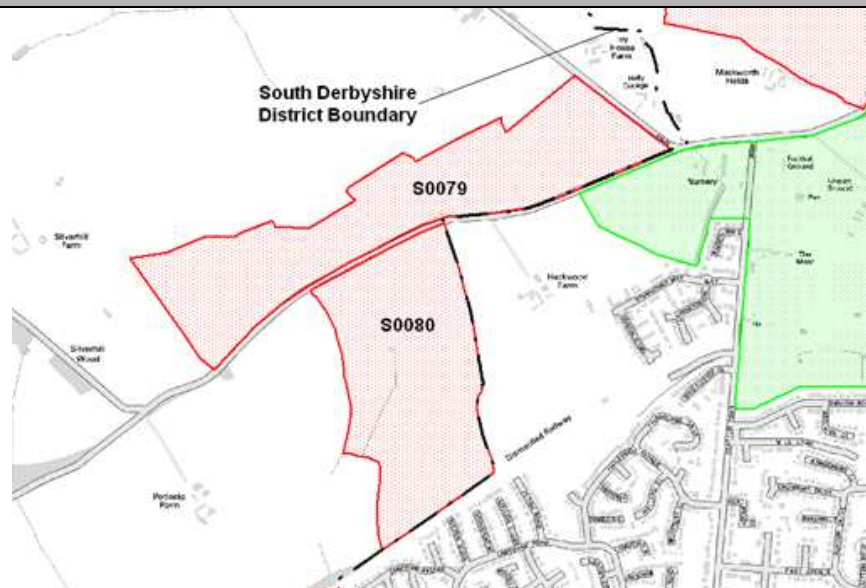

The site comprises agricultural land. It extends some 24.4ha and is in single ownership.

Ordnance Survey 100019461

MAP IS NOT TO SCALE    NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- Radbourne Lane Hedge DE036 is located to the south of the site, however is separated from the site by a road.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide open space and leisure provision both on site and within 1200m. Open Space is proposed within the Hackwood Farm allocation adjacent to the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision of healthcare facilities within 3km of the site. The nearest GP is 2.5km from the site.	
	Will it promote healthy lifestyles?		- Site would be within 800m of a primary school, local centre and sports pitch. The key services would be located within the consented development at Hackwood Farm adjacent to the site	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Noel Baker Community School and Merrill College may be able to take some, secondary age pupils from this area, although it is unlikely that these schools could accommodate growth of this scale in combination with development already consented in this area - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development - Mickleover is Derby's most affluent community and house prices are on average 25% higher the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site would be within 800m of the local centre within the proposed Hackwood Farm allocation adjacent to the site, but more than 1200m of the nearest established local centre. - There are no bus services serving the Radbourne Lane Area. The nearest bus stops are on Ladybank Road in excess of 800m from the site, although the Derby City application for Hackwood Farm will extend this service into the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unclear whether this scale of growth in combination with development already consented on this transport corridor could be accommodated. - Development is likely to have less impact following the completion of grade separation works to the A38 and a number of local routes expected in 2021. - Construction of a new roundabout on Radbourne Lane will have a temporary benefit towards reducing delays during early phase of site development.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There are no bus services serving the Radbourne Lane Area. The nearest bus stops are on Ladybank Road in excess of 800m from the site, although the Derby City application for Hackwood Farm is looking to extend this service into the site. (Review performance once further information on public transport route is known). - There is no cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to funder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is in progress,	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Mickleover District Centre and proposed local centre in Derby City part of site
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the service.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within floodzone 1</li> <li>- There are small area less susceptible to surface water flooding along the southern boundary of the site, however within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site would be within 800m of a local centre and primary school, within the Derby City element of the Hackwood Farm development to the south of the site.</li> <li>- To date the site is in excess of 1200m of an hourly bus service. Although the Derby City application for Hackwood Farm is looking to extend this service into the site. (Review performance once further information on public transport route is known).</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting of Radbourne Hall, Silverhill Farm and Potlocks Farm.</li> <li>- No HERS site within the site.</li> <li>- There may be potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- There may be potential for development to improve access via the public rights of way network to Radbourne Hall</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of secondary sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Assessment.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Radbourne Lane to the south, B5020 to the east and hedgerows and trees, Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1d

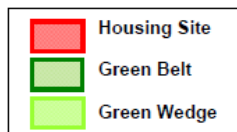

## Site xx: S0048: Land at Hospital Lane, Mickleover

### Description:

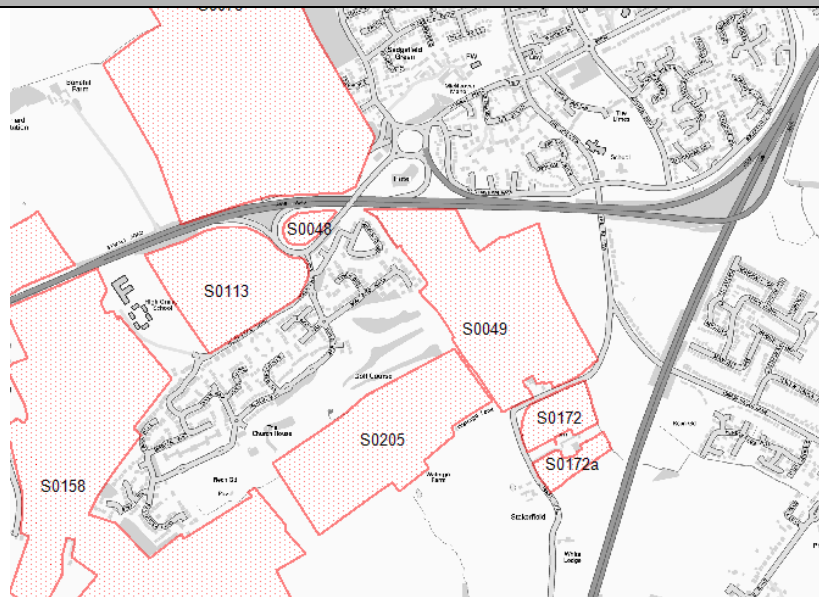

The site is located within the north of the District, 8.2km from Derby City and 18km from Swadlincote.

The site comprises agricultural land. It extends some 0.97ha and is in single ownership. There is high developer interest.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 450m of DE026 Ladybank Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would make some contribution towards improving open space and leisure provision both on site and within 1200m.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision of healthcare facilities within 3km of the site. The nearest GP is located within Mickleover 1.4km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sports pitch, within 1200m of the nearest primary school and local centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. However the impact on viability of the sites access would require further assessment, Mickleover is Derby's most affluent community and house prices are on average 25% higher than the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is located within 1200m of a local centre - The site is within 400m of an hourly bus service.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of healthcare and open space and sports provision. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant highway impact.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 400m of an hourly bus service. - There is no off road cycle route adjacent to the site..	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available. - Access to the site could be constrained due to the site's location close to the A516 slip road	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints due to proximity of the site to A516.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site located within 1200m of local primary school within Derby City.</li> <li>- The site is located within 1200m of a local centre and within 400m of an hourly bus service.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the county Councils Areas of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is bounded by roads including the A516 and trees and hedgerows.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

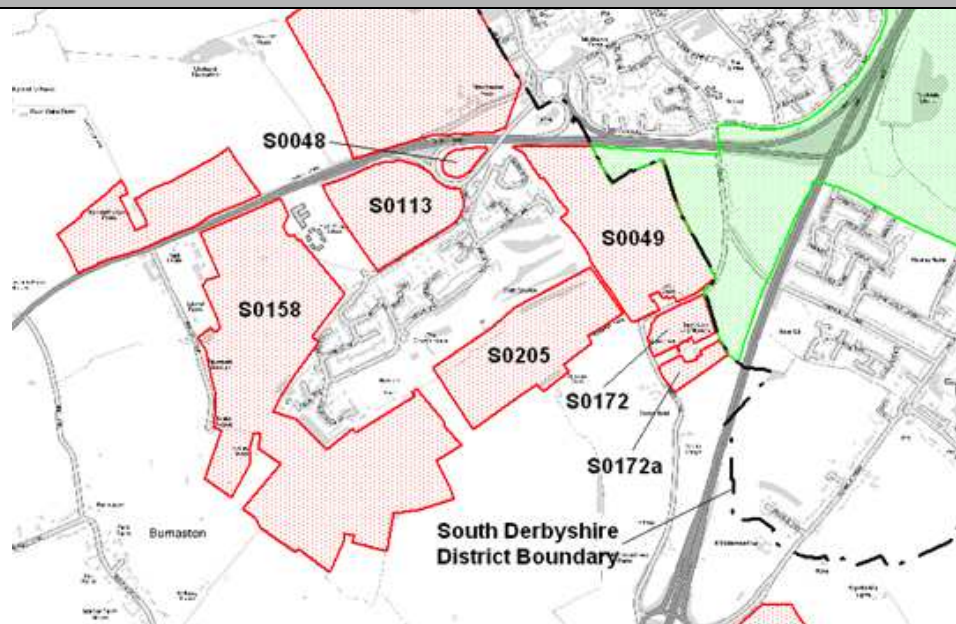

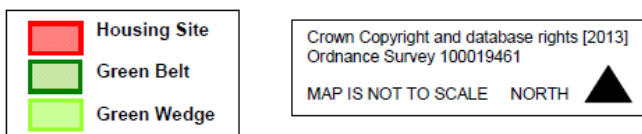

## Site xx: S0205 Pastures Hospital (east), Mickleover

### Description:

The site is located within the north of the District and is located 9.1km from Derby City Centre and 15.6km from Swadlincote Town Centre.

The site comprises agricultural land, it extends some 14.4ha. The site is in multiple ownership however all parties are willing to develop the site for residential use. There is no developer interest.

#### Key

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1km of DE026 Ladybank Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision of healthcare facilities within 3km of the site. The nearest GP is located within Mickleover 2.3km from the site.	
	Will it promote healthy lifestyles?		- Site is located in excess of 1.5km from nearest primary school. - Site is located in excess of 1.5km of local centre and within 800m of a sports pitch	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - Mickleover is Derby's most affluent community and house prices are on average 25% higher than the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Local Centre >1.5km from site - The site is in excess of 800m of an hourly bus service.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of healthcare and open space and sports provision. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not clear what impact development will have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m of an hourly bus service. - Unclear whether there is any potential to connect to cycle routes locally.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to sewer rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Mickleover District Centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight increase in noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the authority the site is Grade 3b and as such is not best and most versatile agricultural lane.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- Within the majority of the site there is no indication of surface water flooding. There is small areas of less susceptible surface water flooding within the south of the site and small and an area of less and intermediate surface water flooding within the north of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is in excess of 800m from an hourly bus service.</li> <li>- Site located in excess of 1.5km from local primary school and local centre</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km from secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting the former Pastures Hospital, which includes the Grade II Winter Garden and the Grade II listed former chapel. Further large-scale growth could further erode the setting of these features</li> <li>- No HERS within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts would be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by trees and hedgerows to the north, hedgerows to the east and west and trees and hedgerows along part of the southern boundary of the site.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential design and layout.</li> </ul>	

Version 1a

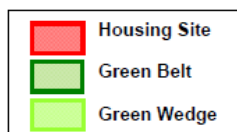

## Site xx: S0113 Pastures Hospital, Mickleover

### Description:

This is a greenfield site which lies immediately adjacent to the existing Pastures Hospital site. The is bounded by the A516 to the north and homes to the south

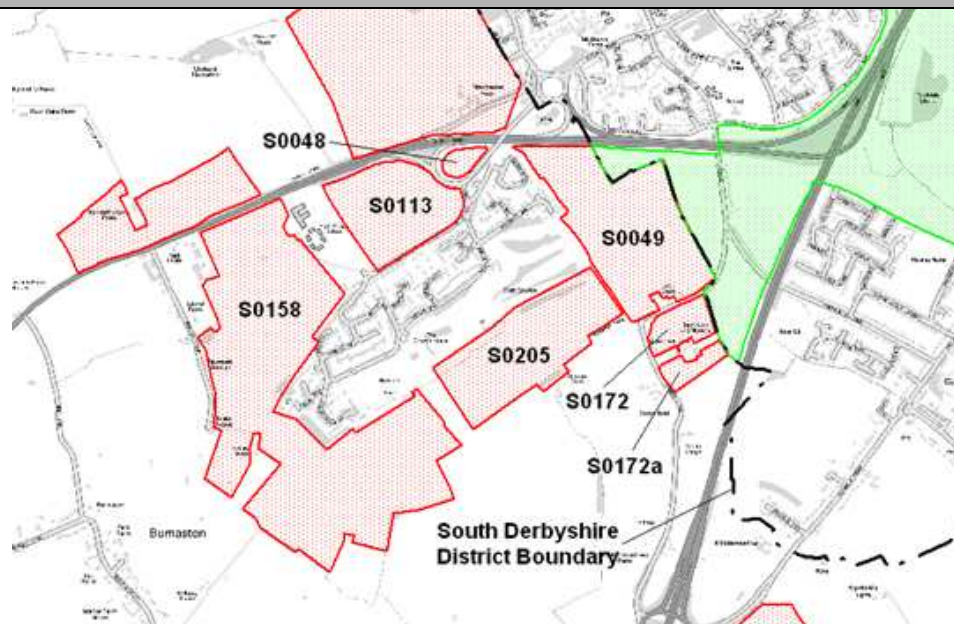

The site extends 10.2 and is currently in use for agriculture. The site is identified in the Council's Strategic Housing Land Availability Assessment as being in single ownership. There is a high level of developer interest in this site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 600m of DE026 Ladybank Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development will be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open space and leisure provision both on site and within 1200m.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision of healthcare facilities within 3km of the site. The nearest GP is located within Mickleover 1.7km from the site.	
	Will it promote healthy lifestyles?		- Site is located in excess of 1200m from nearest primary school. - Site is located within 1200m of local centre and 800m of a sports pitch	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Unknown impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear as to where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - Mickleover is Derby's most affluent community and house prices are on average 25% higher the the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Local Centre 1200m from boundary of site - Bus stops on the A516, Merlin Way and Etwall Road. The closest bus stops are located less than 400m from the site	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of healthcare and open space and sports provision. Development on this scale is unlikely to deliver improved public transport provision but could hale sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on the operation of the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 400m of an hourly bus service - There is no cycle route adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to finder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Mickleover District Centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail and design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and sue, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes immediately adjacent to A516.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site lies within flood zone 1.</li> <li>- Within the majority of the site there is no indication of surface water flooding. However within the north east corner there is an area which is less, intermediate and more susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site located in excess of 1.2km from local primary school (which couldn't accept growth) and within 1.2km of the local centre</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting the former Pastures Hospital, which includes the Grade II Winter Garden and the Grade II listed former chapel. Further large-scale growth could further erode the setting of these features</li> <li>- No HERS on site</li> <li>- Potential for in ground archaeology in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the county Councils Areas of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site is largely enclosed by existing development</li> <li>- Some existing tree planting around A516 to north, and existing field tree to the north and west of the site</li> <li>- New peripheral planting could provide screening for development already located around the pastures site</li> <li>- Limited opportunity exists to deliver biodiversity gain and habitat creation on site</li> </ul>	

Version 1d

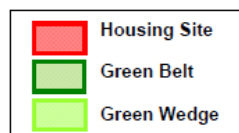

## Site xx: S0078. Land at New House Farm, Mickleover

### Description:

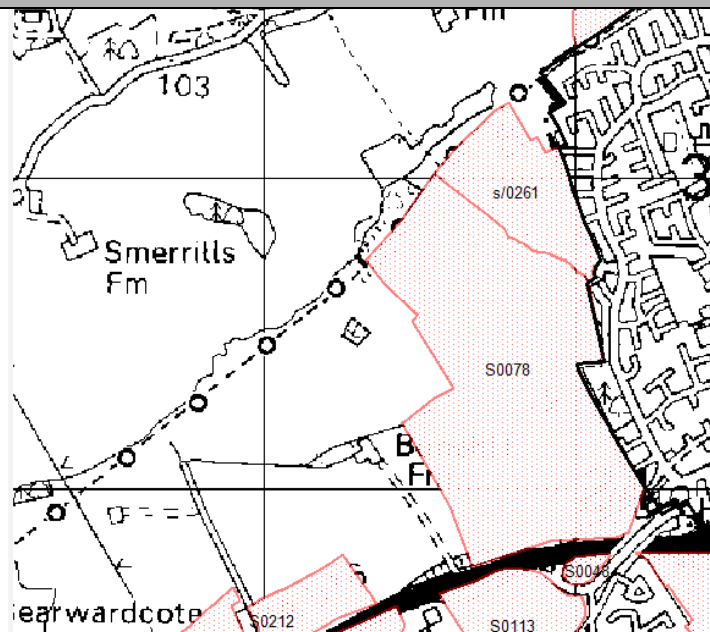

The site is located within the north west of the District. The site is located within 9km of Derby City Centre.

The site comprises agricultural land, agricultural buildings and small plantation. It extends some 64.74ha and there is high developer interest. The southern part of the site was granted planning permission at appeal in 2015.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- There are two non-statutory wildlife sites which share a boundary with this site SD388 Mickleover Etwall Trail and Ladybank Wood/Four acre plantation (DE026).	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- Given the scale of the site there is potential to deliver significant tree planting and habitat creation on site - Master plan submitted by promoters indicates that a significant area of open space would extend centrally throughout the site. SUDS and tree planting would also contribute towards habitat creation.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Development has potential to deliver a mix of homes in respect of tenure and housing type.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would deliver new informal and formal open space within the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Existing healthcare facilities are located 1km from the site based on footpath connection from Greenside Court or 1.6km by road based on proposed access - Site could contribute to new health facilities although it is unclear if any facilities are required, or promoted	
	Will it promote healthy lifestyles?		- Given the scale of the site there is significant potential to accommodate new facilities within the development site. - Site could potentially include primary school, local centre and sports pitch(es) - Mickleover Local Centre is within 1200m of the southern part of the site.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity. 841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwall (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. However the impact of viability of the gradient of the site would require further assessment. - Mickleover is Derby's most affluent community and house prices are on average 25% higher than the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Local Centre proposed on site. Mickleover local centre within 1200m of southern part of site. - Better than hourly bus services are located on Ladybank Road. Bus stops are within 400m of site. There is off road cycling provision immediately outside this site along the adjacent Sustrans Route between Etwall and Derby City Centre.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could potentially deliver new shops, primary school, open space.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Development could be accommodated without giving rise to severe congestion on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 400m of a better than hourly bus service - The Mickleover to Hilton cycle route passes adjacent to the northern part of the site and new walking and cycling routes could potentially be provided within the site.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband will be delivered commercially in this area.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be of sufficient scale to deliver new shops or services within the site, although would be dependent of the scale of any development.	- Ensure good connectivity to Mickleover District Centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain.	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with neighbouring land uses within Mickleover.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b, although some could be 3a.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1</li> <li>- There is no indication of surface water flooding within the majority of the site, however there is areas of less and intermediate susceptibility to surface water flooding along the eastern boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- There is likely to be potential for a new local centre and primary school on a site of this scale.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting of Radbourne Hall, Silverhill Farm and Potlocks Farm</li> <li>- Potential for in ground archaeology in this area and ridge and furrow on site</li> <li>- No HERS within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- There may be potential for development to improve access via the public rights of way network to Radbourne Hall</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not in an area of primary or secondary sensitivity according to the County Council's Area of Multiple Environmental Sensitivity work.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>- The Southern element of the site contains TPO97 trees.</li> <li>- The gradient of the site and radio mast would need to be taken into account when developing the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Strong field boundaries consisting of hedgerow and tree belts to the west of the site</li> <li>- New peripheral planting could strengthen planting adjacent to Radbourne Lane and the greenway to the north</li> <li>- Significant opportunity exists to deliver biodiversity gain and habitat creation on site</li> </ul>	

Version 1a

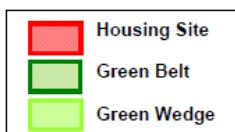

## Site xx: S0049 Pastures Hospital (east), Mickleover

### Description:

The site is located within the north of the District and is located 8.4km from Derby City Centre and 18.3km from Swadlincote Town Centre.

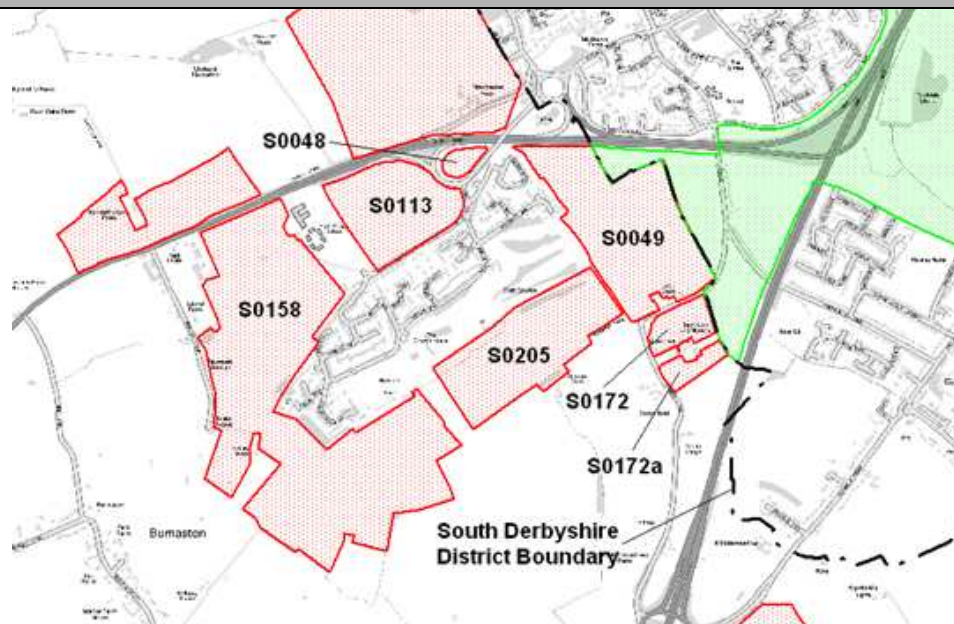

The site comprises agricultural land and extends some 18.7ha. The site is in single ownership and there is medium developer interest.

#### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 500m of DE026 Ladybank Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site,	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely include provision or travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Site would be likely to include on-site open space and leisure provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision of healthcare facilities within 3km of the site. The nearest GP is located within Mickleover 1.7km from the site.	
	Will it promote healthy lifestyles?		- Site is located in excess of 1200m of nearest primary school. - Site is located within 1200m of Mickleover local centre and 800m of a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Closest school in the City is Murray Park, which has some capacity.841 pupils attend the school with a capacity of 1100 pupils. - The nearest secondary school in South Derbyshire is John Port at Etwahl (>4km), which has some spare capacity with 1957 pupils attending the school with capacity of 2070 pupils. - A new secondary school is proposed for the DUA, although it is unclear where this will be located.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improves the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. However the impact on viability of the gradient and electricity pylons would need further assessment. - Mickleover is Derby's most affluent community and house prices are on average 25% higher the the City Average at 5.6 times average earnings (at 2010). Housing in this location could contribute to the delivery of new affordable and market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Mickleover local centre is within 1200m of the site - Site is more than 800m on foot from an accessible hourly bus service.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of healthcare. Development on this scale is unlikely to deliver improved public transport provision but could hale sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is likely to be within 400m of a frequent bus service - Unclear whether there is any potential to connect to cycle routes locally.	
	Will it make the best use of other infrastructure?		- Development of this site in combination with other sites on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer overflows, however there may be potential to connect this area to finder rather than the City's sewerage network. - It is understood that growth from a combination of sites on the western edge of Derby would need to be supported by strategic enhancements to the local electricity supply network. - Superfast Broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Mickleover District Centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight increase in noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes immediately adjacent to A516.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the authority the site is Grade 3b and as such is not best and most versatile agricultural land.</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- There is no indication of surface water flooding within the majority of the site, however there is areas less susceptible to surface water flooding within the site.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is more than 800m on foot from an accessible hourly bus service.</li> <li>- Site located in excess of 1200m from local primary school, but within 1200m of the local centre.</li> <li>- Site would be in excess of 4km from a major employment area.</li> <li>- Site would be in excess of 4km of secondary school provision in South Derbyshire</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development would be unlikely to affect any Conservation Area or Listed Buildings.</li> <li>- No HERS within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detail design and layout the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>- Any development would need to take account of the slope on the site from south to north and the pylons running across the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site includes a number of agricultural fields which retain well defined field boundaries – these could be integrated into any development</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

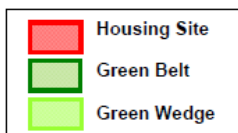

## Site xx: S0228: Oakdene, 82 Burton Road, Findern

### Description:

The site is located within the north of the District. It is located 1.2km from Findern, 15.1km from Swadlincote Town Centre and 9.1km from Derby City Centre.

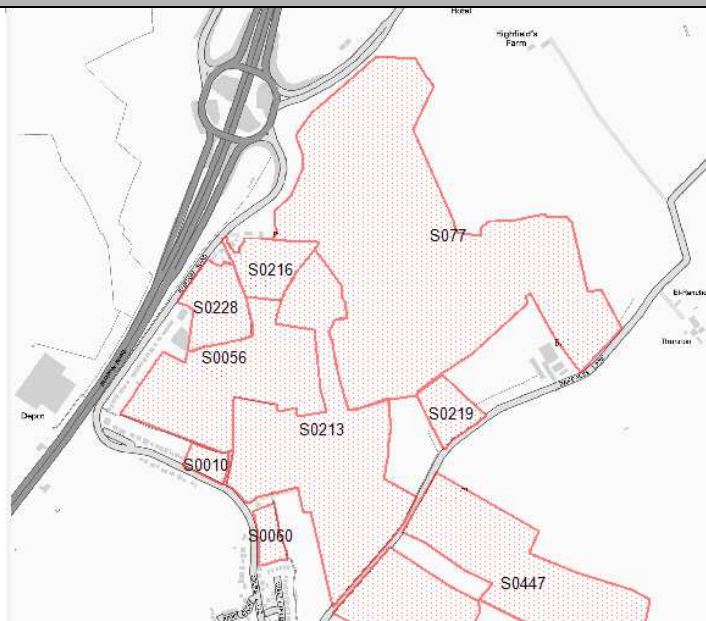

The site comprises agricultural land and extends some 2.5ha. The site is in single ownership and there is no developer interest in the site.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km from SD086 Findern Meadows	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would be likely to include on-site open space and recreation provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Littleover 2.3km from the site	
	Will it promote healthy lifestyles?		- The site is located in excess of 1200m from a sports pitch, local centre and primary school.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identifies impacts from site development in respect of this issue.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site indicates that the site could be viable for housing development. - There is an identified need for affordable housing within the area. Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is in excess of 1200m from a local centre - Site is located within 400m of an hourly bus service.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards healthcare. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The impact of development on the highway network is unknown.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is located within 400m of an hourly bus service - Unclear whether there is any potential to connect to cycle routes locally.	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, although this is not considered likely given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally using site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect of encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate the existing built up area - The contribution the site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues have been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes immediately adjacent to Doles Lane immediately beyond which is the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield and is in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1 and will have no discernible impact on flood risk.</li> <li>- The site contains areas less susceptible to surface water flooding and areas with no indication to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within excess of 1200m from a local centre and primary school.</li> <li>- The site is located within 400m of an hourly bus service.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not within an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> <li>- Half of the site is covered by TPO70.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by landscape features such as trees and hedrows and existing development.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding site design and layout.</li> </ul>	

Version 1a

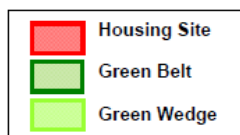

## Site xx: S0219: Land at Bakeacre Lane, Findern

### Description:

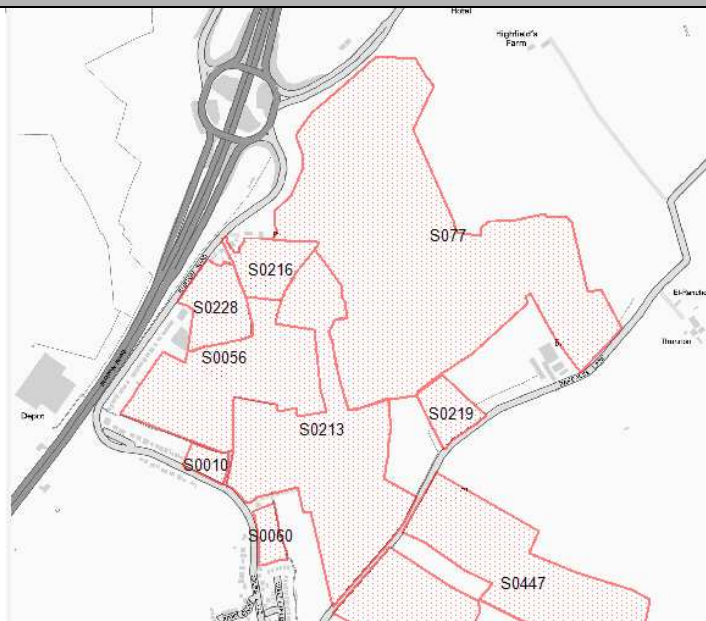

The site is located within the north of the District. The site is located 0.85km from Findern, 11.3km from Derby City Centre and 14.4km from Swadlincote City Centre.

The site comprises agriculture land. It extends some 1.47 ha. The site is in multiple ownership however all parties are willing to develop the site. There is no developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- The closest sit of local importance for nature conservation (County Wildlife Site) is located over 1km away from SD157 Hell Meadow Wood.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Littleover 4.1km from the site	
	Will it promote healthy lifestyles?		- Site is located within 1200m of Findern Village Centre and within 1200m of sports pitches proposed within the Highfields Farm development to the north of the site. - Site is excess of 1200m of the nearest primary school	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Findern Primary School, which currently offers spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings, subject to wider viability issues, although the SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area. Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is in excess of 800m from an hourly bus service - There are some local facilities within Findern (including shops, a post office, a village hall, outdoor sports provision and a mobile library service). - The site is located within 1200m of Findern village centre, however there is no metalled footpath adjacent to the site on Bakeacre Lane, which could connect the site to the surrounding area, Bakeacre Lane is a narrow Road.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- The development would make some contribution towards the provision of open space and sports provision. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is in excess of 800m from an hourly bus service. - There is no off-road cycle route adjacent to the site..	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, although this is not considered likely given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and not will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is almost entirely greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located in excess of 800m of an hourly bus service, is within 1200m of Findern Village Centre, however is in excess of 1200m of a primary school.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- Site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site is contained by Bakeacre Lane to the south, hedgerows to the north, east and west.</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

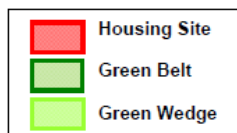

## Site xx: S0216: Wyevale Garden Centre, Burton Road, Findern

### Description:

The site is located within the north of the District. The site is located from 1.2km from Findern, 15.1km from Swadlincote Town Centre and 9.1km from Derby City Centre.

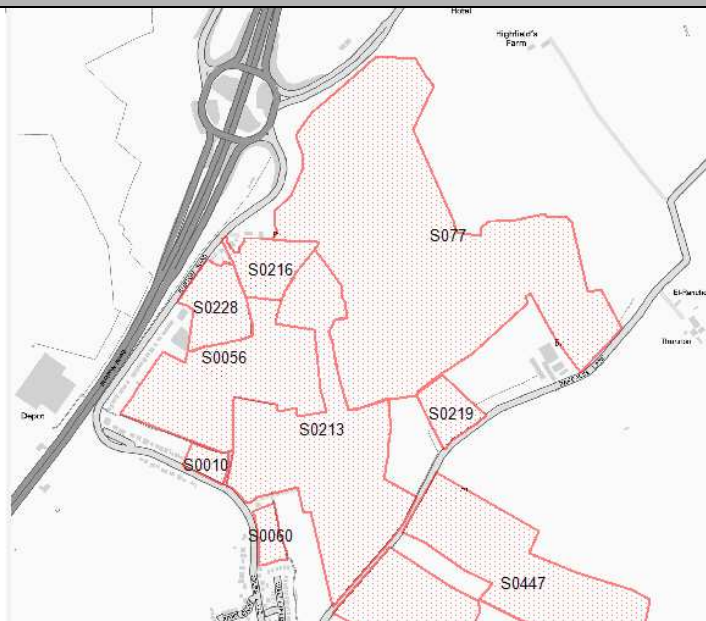

The site is brownfield land used a nursery. The site measures 2.11 ha and is in single ownership. There is no developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km from DE038 Former Rykneld Hospital grounds.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development may make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would provide on-site open and recreational space provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Littleover, 2.3km from the site.	
	Will it promote healthy lifestyles?		- The site is in excess of 1200m of a primary school, a sports pitch and a local centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Findern Primary School, which currently offers spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact on viability of the clearing of the garden centre would require further assessment. - There is an identified need for affordable housing within the area. Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site located within 400m of an hourly bus service - The site is in excess of 1200m of a local centre.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards healthcare, Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact the development will have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 400m of an hourly bus service - Unclear whether there is any potential to connect to cycle routes locally.	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, although this is not considered likely given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is brownfield - The contribution the site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is brownfield and there is potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- The site is brownfield and there is potential to reuse demolition waste on site. - The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes within close proximity to Burton Road immediately beyond which is the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		- Site is brownfield	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- The site contains areas of less and intermediate susceptibility of surface water flooding.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- The redevelopment of a brownfield could potentially result in reduced rates of run off although this will be dependent upon the detailed design of the proposal.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site located within 400m of an hourly bus service, however is in excess of 1200m of a local centre.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- None identified	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is brownfield.	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the County Councils Areas of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by trees and hedgerows around the perimeter of the site and existing development on part of the north and east if the site.</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

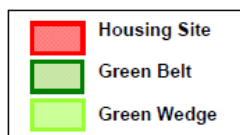

## Site xx: S0213:Land at Bakeacre Lane, Doles Lane, Findern

### Description:

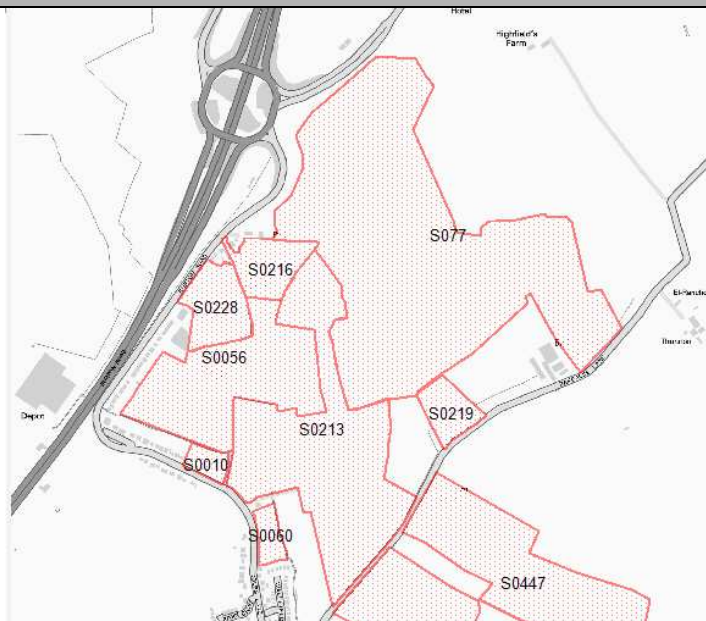

The site is located within the north of the District. The site is approximately 0.4km from Findern, 9.9km from Derby City and 13.6km from Swadlincote.

The site is predominantly greenfield comprising agricultural land and a dwelling. It extends some 14.78 ha and is within single ownership. There is low developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site is Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km away at SD086 Findern Meadows.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Littleover 3.2km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1200m of a sports pitch and Findern Village Centre, however is in excess of 1200m of Findern Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Findern Primary School, which currently offers spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact on viability of the access provision would require further assessment. - There is an identified need for affordable housing in this area. Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service. - The site is located within 1200m of Findern Village Centre. However there are no metalled footpaths adjacent to the site, which could connect the site to the surrounding area. The closest footpath is on the opposite side of the road to the site. - There are some local facilities within Findern (including shops, a post office, a village hall, outdoor sports provision and a mobile library service).	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of open space and sports provision. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The impact of development on the highway network is unknown.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is likely to be within 400m of an hourly bus service. - There is no off road cycle route adjacent to this site..	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, It is unclear whether such works would be required to accommodate this scale of development - Superfast Broadband is available - Access to the site by Bakeacre Lane is constrained due to the road being narrow. However potential access could be made on Doles Lane.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involve in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/pr otect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within this site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is predominantly greenfield and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to de be determined by the detailed layout, design and contribution put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield, however there may be potential for very limited amount of demolition waste material to use on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- The site is predominantly greenfield, however there may potential for a very limited about of demolition waste onsite to reuse. - The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The northern part of the site lies within Flood Zone 1, whilst the southern part lies within Flood Zones 2 and 3a. A small element within the south of the site lies within flood zone 3b (flood zone 3b dissects the site from the west to the east), however housing development could be located outside of land within flood zone areas at high/medium risk,</li> <li>- The site lies contains areas less, intermediate and more susceptible to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of an hourly bus service.</li> <li>- Site is located within 1200m of Findern Village Centre and a sports pitch. However is in excess of 1200m of a primary school.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands and Trent Valley Washlands Landscape Character Area</li> <li>- TPO70 covers the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape features, such as roads and hedgerows.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

Note: this site is proposed for allocation in the Part 1 Local Plan. Should this site be allocated then this proforma will be deleted from the Part 2 work.

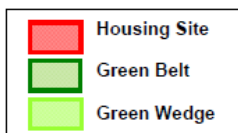

## Site xx: S0077: Land at Highfields Farm, Bakeacre Lane Findern

### Description:

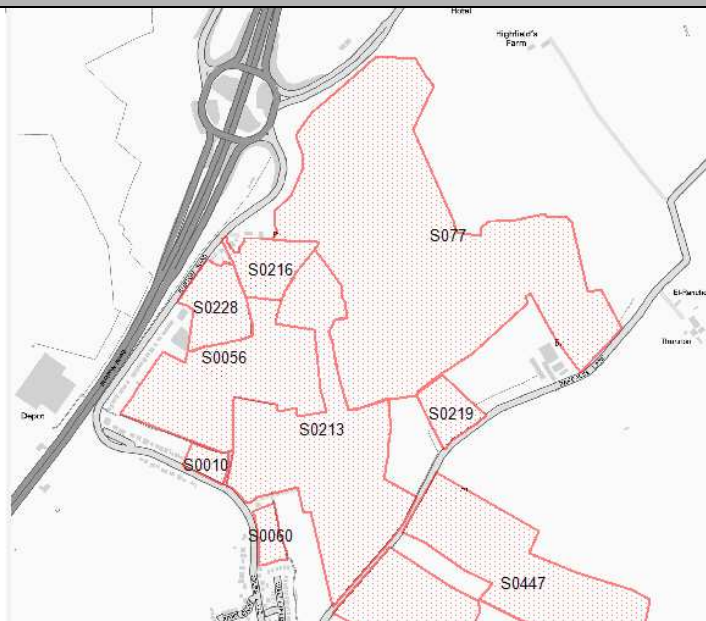

The site is located within the north of the District. It is located 1.2km from Findern, 91.km from Derby and 15.1km from Swadlincote.

It extends some 32.82ha and comprises agricultural land. The site is in single ownership and there is high developer interest.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1km of SD157 Hell Meadow Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would deliver open and recreational space on site given its scale.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Littleover 2.1km from the site.	
	Will it promote healthy lifestyles?		- As the built form within the surrounding area currently stands the site exceeds 1200m from a local centre, sports pitch and primary school. However if the Highfields Farm development is constructed the northern edge of the site could potentially be located within 1200m of a local centre, sports pitch and primary school. Furthermore, a site of this size could potentially deliver such facilities within its boundaries.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However the impact on viability of the overhead power lines on the site would need further assessment. - Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Site is located within 400m of an hourly bus service. - The site is in excess of 1200m of an existing local centre, however the northern element of the site could potentially be within 1200m of the local centre at Highfields Farm. However a site of this size may be able to deliver new services and facilities within its boundary.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The impact of development on the strategic highway network is unknown.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is within 400m of an hourly bus service. - Unclear whether there is any potential to connect to cycle routes locally (review Highfields Scheme and change rag colour if necessary)	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant,</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be limited potential for increased noise complaints from homes immediately adjacent to Burton Road immediately beyond which is the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There are some areas of less and intermediate susceptibility to surface water flooding within the site. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is within 400m of a bus service.</li> <li>- Site currently exceeds 1200m from a sports pitch a local centre and primary school. Once the Highfield Farm development is built there is potential that the northern edge of the site could be located within 1200m of sports pitch, local centre and primary school. However this would be dependent upon the provision of links to the neighbouring site. (review)</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the design.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located in an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>- TPO70 is located within the site to the south east and small element is located within the west of the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by trees and hedgerows.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

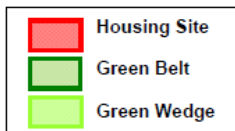

## Site xx: S0060: Doles Lane, Findern

### Description:

The site is located within the north of the District approximately 0.3km from Findern. The site is located 13.6km from Swadlincote Town Centre and 9.9km Derby City Town Centre.

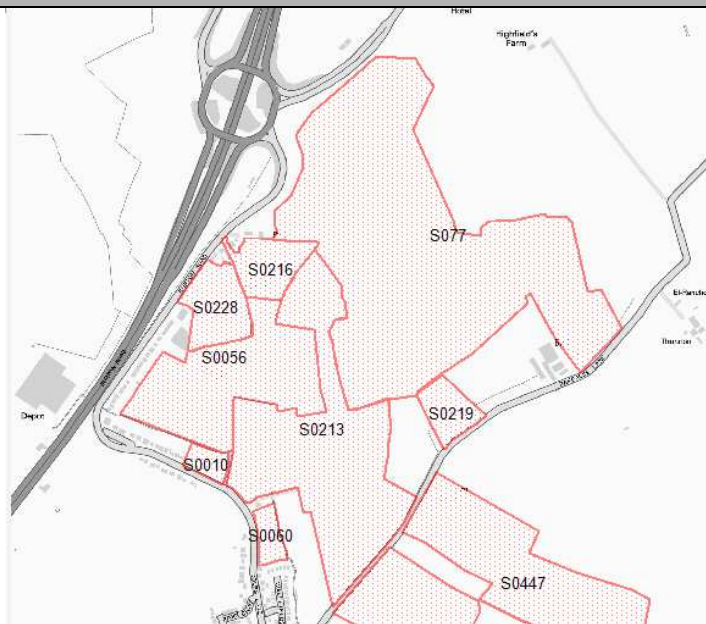

The site comprises agricultural land. It extends some 0.76ha and is currently in single ownership. There is medium developer interest in the site.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1.2km of SD086 Findern Meadows,	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Site would make an uncertain contribution towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site. However given the size of the site, development would make an uncertain contribution towards the delivery of affordable housing. Although given local plan requirements development would be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could include open and recreation space on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Littleover 3.2 km from the site.	
	Will it promote healthy lifestyles?		- Site located within 1200m of Findern Village Centre and sports pitch however is in excess of 1200m of a primary school.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Findern Primary School, which currently offers spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Due to the size of the site, development would make an uncertain contribution towards the delivery of affordable housing. - There is an identified need for affordable housing within the area. Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service - There are some local facilities within Findern (including shops, a post office, a village hall, outdoor sports provision and a mobile library service). - The site is located within 1200m of Findern village centre. - There is no metalled footpath adjacent to the site, which could connect the site to the surrounding area. The closest footpath is on the opposite side of the road to the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education and open space and sports provision. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant impact on the highway network.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is likely to be within 400m of a frequent bus service - There is no metalled footpath adjacent to the site, which could connect the site to the surrounding area. The closest footpath is on the opposite side of the road to the site - There are no off road cycle routes adjacent to the site.	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, although this is not considered likely given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/pr otect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is unlikely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate an existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues have been put forward by site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The majority of the site lies within Flood Zone 1, but the north east of the site lies within Flood Zones 2 and 3a. A very small area of the eastern boundary of the site lies within flood zone 3b, however housing development could be located outside of land in moderate/high flood risk</li> <li>- The site contains areas of less, intermediate and more sustainable to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of an hourly bus service. The site is located within 800m of Findern village centre and a sports pitch, however is in excess of 1200m of a primary school.</li> <li>- Site is in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the County councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>- TPO70 covers the site</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Site is contained by Doles Lane and Hedgerows to the west, existing development and hedgerow to the north, tress to the east and trees and existing development to the south.</li> <li>- The land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

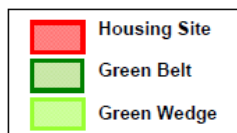

## Site xx: S0056: Field Farm, Doles Lane, Findern

### Description:

The site is located within the north of the District. The site is approximately 0.5km from Findern, 10km from Derby City and 13.7km from Swadlincote.

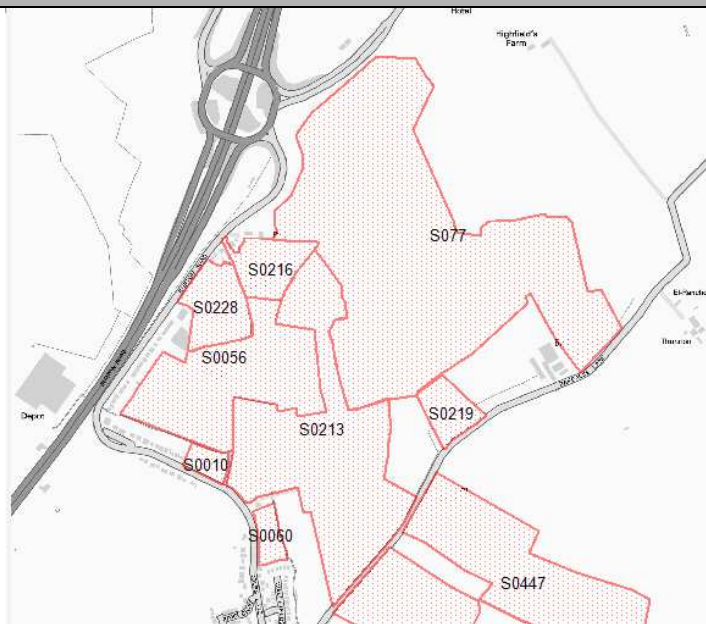

The site is predominantly greenfield, comprising of agricultural land and buildings and contains a farmhouse. The site extends some 8.92ha is and is in single ownership. There is no developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km of SD157 Hell Meadow Wood	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements could make provision for affordable home subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could contribute toward open space and recreation provision on site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision of expansion of healthcare facilities within 3km of the site. The nearest GP is located within Littleover 3.3km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1200m of Findern village Centre, however in excess of 1200m of a primary school and a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Impact unknown	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Findern Primary School, which currently offers spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Due to the size of the site, development is likely to make a contribution towards the delivery of affordable housing. - There is an identified need for affordable housing within the area. Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service - There are some local facilities within Findern (including shops, a post office, a village hall, outdoor sports provision and a mobile library service). - The site is located within 1200m of Findern village centre. - There is no metalled footpath adjacent to the site, which could connect the site to the surrounding area. The closest footpath is on the opposite side of the road to the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what development will have on the highway network impact	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Site is likely to be within 400m of an hourly bus service. - There are no established cycle routes adjacent to the site. - PROW goes through the site.	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, although this is not considered likely given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is predominantly greenfield, however there may be potential for very limited amount of demolition waste material to use on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- The site is predominantly greenfield, however there may potential for limited reuse of demolition waste onsite.. - The use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- May be potential for increased noise complaints from homes immediately adjacent to Doles Lane immediately beyond which is the A38.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is predominantly greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- A large part of the site to the south lies within flood zones 2 and 3a. A very small element of the southern boundary of the site, lies within flood zone 3b, however some development could be located outside of land within flood zone 3b.</li> <li>- The site contains area of less and intermediate susceptibility to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service, within 1200m of Findern Village Centre and. The site however is in excess of 1200m of a primary school and sports pitch.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield, with 7.65ha of the site greenfield and 1.27ha is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the County Councils Area of Multiple Environmental Sensitivity.</li> <li>- The site is located within the Trent Valley Washlands and Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>- TPO70 covers the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape features, such as hedgerows and trees and existing development.</li> <li>- The site could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout</li> </ul>	

Version 1a

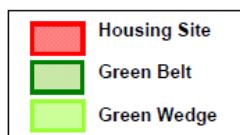

## Site xx: S0010: Doles Lane, Fidern

### Description:

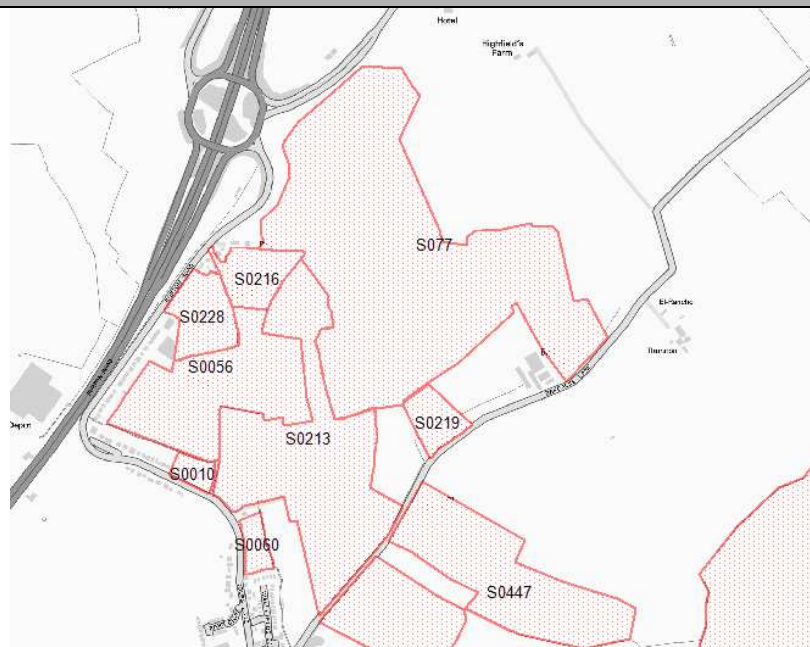

The site is located within the north of the District approximately 0.4km from Findern. The site is located 13.6km from Swadlincote Town Centre and 9.9km Derby City Town Centre.

The site comprises of garden land and farmland. It extends some 0.66ha. The site is in multiple ownership, however all parties are willing to develop the site. There is no developer interest.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1.4km of SD086 Findern Meadows.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Sites could contribute towards the delivery of 30% affordable housing, with the remainder market housing depending on the number of homes that could be accommodated on the site.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site. However due to the size of the site, the site would make an uncertain contribution towards the delivery of affordable housing. Although given local plan requirements it will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could provide for open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility too healthcare for existing residents and provide additional facilities for new residents?		- Development could make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Littleover 3.2km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 1200m of Findern Village Centre and sports pitch, however is located in excess of 1200m of a primary school.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- Uncertain impact	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Findern Primary School, which currently offers spare capacity.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- The site would make an uncertain contribution towards the delivery of affordable housing due to the size of the site. - There is an identified need for affordable housing within the area, Littleover is Derby's most affluent community and house prices are on average 45% higher than the City Average and are 6.3:1 times average earnings compared to the city average of 4.4:1 (at 2010).	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 400m of an hourly bus service - There are some local facilities within Findern (including shops, a post office, a village hall, outdoor sports provision and a mobile library service). - The site is located within 1200m of Findern village centre. - There is no metalled footpath adjacent to the site, which could connect the site to the surrounding area. The closest footpath is on the opposite side of the road to the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education and open space and sports provision. Development of this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have a significant impact on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service. - There are no established cycle routes adjacent to this site.	
	Will it make the best use of other infrastructure?		- Development would be served by Etwall WWTWs. There is capacity to accommodate growth at this works. - It is understood that growth from a combination of sites on the western edge of Derby could need to be supported by strategic enhancements to the local electricity supply network, although this is not considered likely given the scale of this site - Superfast Broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involves in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to Littleover
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is unlikely to have any significant effects in respect of noise pollution in this location.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority the site is Grade 3b and as such is not best and most versatile agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The southern part of the site lies within Flood Zone 1, but the north east of the site is within Flood Zones 2 and 3a. A very small element of the northern boundary of the site is located within flood zone 3b, however housing development could be located outside of land within flood zone 3b.</li> <li>- The north east of the site contains an area less susceptible to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of an hourly bus service, within 1200m of Findern Local Centre, however is in excess of 1200m of a Primary School.</li> <li>- Site would be in excess of 4km from an employment area of 10ha or more.</li> <li>- Site would be in excess of 4km secondary school provision in South Derbyshire</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation or distributed energy network due to its proximity to other development in the City.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No identified sites of cultural heritage importance such as listed buildings or conservation areas in this area</li> <li>- No HERS records within site area</li> <li>- Potential for in ground archaeology in this area</li> <li>- Impacts could be dependent on the detail design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- None identified</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is located within an area of lower sensitivity according to the County councils Area of Multiple Environmental Sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by trees to the north and west, a road and hedgerows to the east and south.</li> <li>- The land parcel could contribute towards green infrastructure provision</li> <li>- Uncertain effect identified due to lack of information held regarding site design and layout.</li> </ul>	

Version 1a

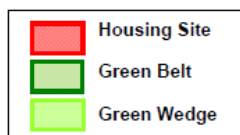

## Site 27: S0162 Thulston Fields Farm, Thulston Derbyshire

### Description:

This is a greenfield site which lies to the immediate south of the phase 1 and 2 Boulton Moor Sites. To the east is the A6 whilst to the south eastern lies the A50. To the south west and south western boundaries is open countryside. The site is located within the greenbelt

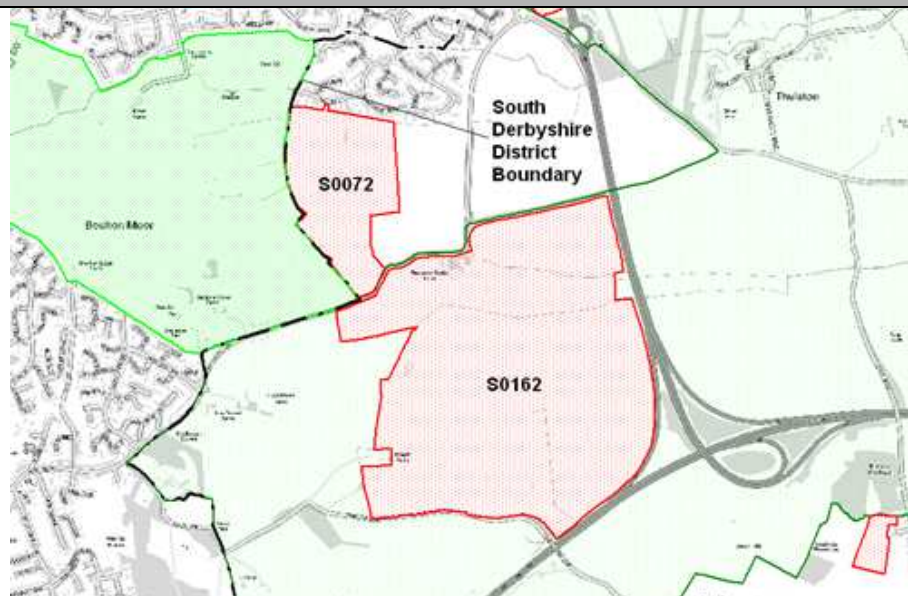

In total the site extends some 107ha and is understood to be in single ownership. There is a high level of developer interest in the site.

### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- There are no statutory wildlife sites within 1km of this site	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	Yes	- There are no non statutory wildlife sites within 300m of the sites.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- Given the scale of the site there is potential to deliver significant tree planting and habitat creation on site - However it is unclear whether such potential still exists where only a small proportion of the site is allocated for development.	
	Will it protect sites of geological importance?	Yes	- Site is not located within 1km of a Regionally important geological site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	Yes	- Development has potential to deliver a mix of homes in respect of tenure and housing type. No - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held on potential housing mix on this site.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in South Derbyshire and Derby City in combination with other developments in South Derbyshire and the City and is potentially deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Sites are urban extension and will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- No, site would be an urban extension and would be very unlikely to includes provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- New informal open and recreational space could be delivered on site or used to support qualitative improvements to open space included in the consented/proposed Boulton Moor sites to the north.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Existing healthcare facilities are located 2.5km from the site on Keldholme Lane</li> <li>- Site could contribute to new health facilities either on this site or on the Boulton Moor Site to the north if needed.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- Site is located within 1200m of proposed sport pitches, local centre and primary school consented within the phase 1 Boulton Moor Site</li> <li>- Given the scale of the site there is potential to accommodate new facilities within the development site.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue</li> <li>- Would be largely determined by design and layout of any site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2.</li> </ul>
	Will it reduce the number of people involved in accidents		<ul style="list-style-type: none"> <li>- Uncertain impact</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- Noel Baker Community School and Merrill College may be able to take some, secondary age pupils from this area, although it is unlikely that these schools could accommodate growth of this scale in combination with development already consented in this area</li> <li>- A new secondary school is proposed for the DUA, although it is unclear where this will be located.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaison with local Schools and LEAs to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		<ul style="list-style-type: none"> <li>- There are significant pocket of deprivation in Boulton Ward (within the city) according to the Boulton neighbourhood profile. Growth would increase affordable housing provision locally in an area with Boulton had the fifth lowest number of house sales in Derby City (in 2010) and prices are well below the city average and are comparatively affordable.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with H19 and H20.</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Site would around 400m from an established or proposed local centre and it is likely that one would be provided within a development of this scale.</li> <li>- There are currently no bus services serving the A6, A52 or Snelsmoor Lane, although the phase 1 Boulton Moor site will improve bus access adjacent to the site</li> <li>- Off road cycle routes will be provided through the Boulton Moor Phase 1 development, adjacent to this site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport</li> </ul>
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development would help sustain proposed shops and services in the phase 1 Boulton Moor site</li> <li>- Given the scale of the site there is a likelihood that housing would be supported by new shops, community facilities and public transport although no detail on these is held</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- It is unclear whether this scale of growth in combination with development consented on this transport corridor could be accommodated and</li> <li>- Development could support the delivery of a park and ride to serve the A6 transport corridor</li> <li>- The site would be able to connect to existing off road cycling routes along and around the A6.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- Site is likely to be within 800 of a proposed hourly or better bus service</li> <li>- Development could support the delivery of the park and ride site to serve the A6 Corridor</li> <li>- Development could connect to existing cycling routes around the site</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- Development of this scale on the southern edge of Derby will require major strategic capacity improvements to the foul sewer network without which the existing network would be overloaded and could lead to sewer flooding</li> <li>- Superfast Broadband likely to be delivered commercially by 2016</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 1 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth on the edge of Derby City is unlikely to have any tangible effect in respect encouraging the growth of the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is likely that development would support the delivery of additional shops and services on site, - Housing in this area could also help sustain a proposed local centre to be located in the Boulton Moor Phase 1 site.	- Ensure good connectivity to the centre,
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- This is a greenfield site so it will not help regenerate existing built up areas, but could reinforce local design and character	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse demolition waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations and Schedule 3 of the Flood and Water Management Act.	- Development would need to reflect Policy SD1 and SD2 of the emerging Part 1 Local Plan.
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Large scale development could facilitate improvements to the local combined sewer network and could reduce the frequency of sewer overflows locally.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan,
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses.</li> <li>- Proximity of the site to the A6 and A50 could lead to increase number of noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Sites is greenfield and in agricultural use.</li> <li>- Based on agricultural land classification maps held by the Authority land the eastern half of the site is identified as being Grade 2 agricultural land and is best and most versatile. Elsewhere land is grade3b</li> </ul>	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is outside of an area at fluvial flood risk (except for a very small area of land close to the farmhouse) and is unlikely to have any discernible impact on flood risk locally.</li> <li>- Site would pass sequential test subject to appropriate site layout</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform to existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		- New local centre consented as part of the phase 1 Boulton Moor site and primary school within 800m of the site, public transport within 800m? The nearest large scale employment is Raynesway and Derby Commercial Park both within 4km of the site.	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation, especially after 2016 when new homes may need to incorporate on site renewables to achieve zero carbon status.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Could affect the setting of Elvaston Castle Historic Park and Garden</li> <li>- No HERS sites within site area</li> <li>- There may be potential for in ground archaeology in this area</li> </ul>	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan,
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- There may be potential for development to improve access to Elvaston Castle Historic Park and Garden to new and existing residents living in the city to the immediate north of the site	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not within an area of primary or secondary sensitivity according to Derbyshire Areas of Multiple Environmental Sensitivity</li> <li>- The site is located within the Green Belt</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Strong field boundaries consisting of hedgerow and tree belts around the north, south and east of the site and between field parcels in the site</li> <li>- New peripheral planting could strengthen planting adjacent to the A6 and A50</li> <li>- Significant opportunity exists to deliver biodiversity gain and habitat creation on site</li> <li>- No site master plan setting out potential for biodiversity gain or habitat gain on site submitted by site promoters.</li> </ul>	

Version 1a

# **EDGE OF BURTON UPON TRENT**

## Site xx: S0169: Hawfield Lane Burton.

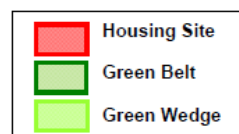

### Description:

This site would be an urban extension to Winhill, Burton upon Trent, East Staffordshire. Winhill district centre is close to the site, and Burton upon Trent town centre is approximately 5 km away to the south west.

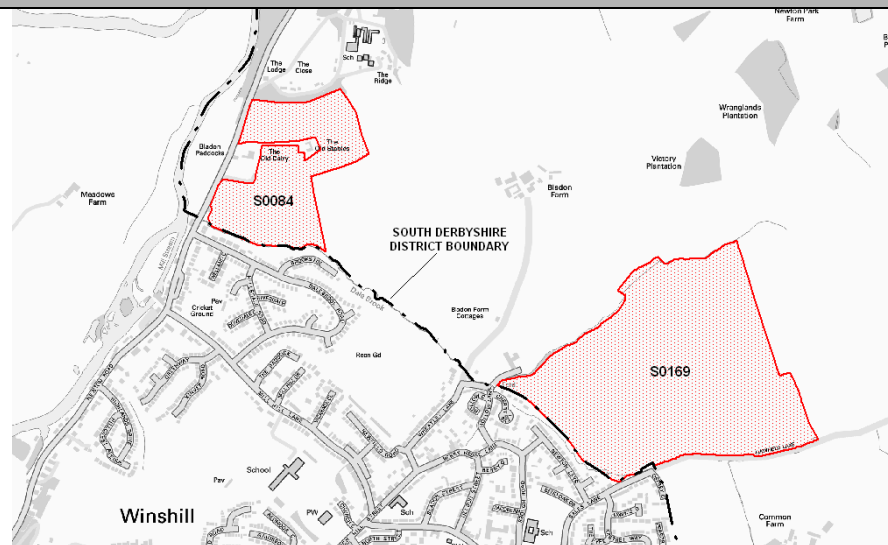

The site extends some 30ha and currently used for agricultural purposes. The land to the south comprises established residential development.

The site is in single ownership and there is thought to be a high level of developer interest.

### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- There is a non-statutory wildlife site (SD219 – Dale Brook Meadow) within 300m of the site	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 300m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Development has potential to deliver a mix of homes in respect of tenure and housing type. - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disable people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Sites are urban extension and will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- No, site would be an urban extension and would be very unlikely to includes provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Existing healthcare facilities are located at Winhill), (around 1km)</li> <li>- Development could help fund improvements to local medical facilities</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- Site is located within 1200m of local recreation provision and 1200m of a local centre</li> <li>- Primary schools are within 400m although it is unclear whether there is any potential to accommodate growth in east staffs schools and the nearest Primary school in South Derbyshire would be around 4km</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue</li> <li>- Would be largely determined by design and layout of any site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents		<ul style="list-style-type: none"> <li>- Development would have an uncertain effect</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school in South Derbyshire is the William Allitt School, which is currently at capacity and has no room for expansion.</li> <li>- Granville and Pingle schools do have some spare capacity and could potentially accommodate the additional pupils from this development, although other developments in Swadlincote would need to be taken into account.</li> <li>- It is unclear whether there is any spare capacity within Burton secondary schools.</li> <li>- The nearest primary age schools in South Derbyshire are in Newton Solney although capacity details are unknown.</li> <li>- The nearest primary school in East Staffordshire is the Winhill Village Primary School.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective</li> <li>- Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		<ul style="list-style-type: none"> <li>- Development could deliver new affordable housing to this area and could help meet affordable housing need both in nearby South Derbyshire villages and Burton on Trent.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- The sites are dislocated from the main urban area of Swadlincote but is adjacent to the edge of Burton on Trent. The nearest local centre is 1200m (Winhill).</li> <li>- Bus stops are located 400m from the site and served by a four times hourly service</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development could make some contribution toward the provision of education open space and sports provision and would support existing health care provision and shops in Winhill.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- Development could worsen the existing congestion at the junction of Bretby Lane and the A511. The roundabout junction of Bretby Lane and Melbourne Avenue could also be impacted. The junction of the A511, Stapenhill Road and the B5008 is also congested and the traffic generated at these sites could contribute to the problem.</li> <li>- Access into the site could be problematic.</li> <li>- There could be implications from strategic growth for the already high level of congestion on the Trent River crossing into Burton on Trent.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- There is an four times hourly bus service serving this area,</li> <li>- Off road cycling provision in this area is undeveloped although there are a number of public rights of way locally.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- Site is likely to be served by Claymills WWTW which has capacity to accommodate growth</li> <li>- It is unclear whether capacity improvements would be required within the sewerage network around Winhill.</li> <li>- There are no known requirements for additional strategic water supply or electricity network improvements.</li> <li>- Superfast broadband is likely to be delivered commercially in this area by 2016</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth in this area is unlikely to have any discernible effect in respect of supporting the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is unknown whether this proposal would deliver additional shops or services within the site. Site could help sustain existing services within Winhill nearby.	- Ensure good connectivity to Winhill Local centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Site is not previously developed and will not regenerate existing built up areas - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		Development will have no significant impact on local water quality. - Nitrate Vulnerable Zone = Surface and Ground Water - Ground Water Protection Zone = No	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area	
	Will it reduce noise pollution?		- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		Based on agricultural land classification maps held by the Authority land is likely to be classed as Grade 2 agricultural land which is Best and Most Versatile.	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		- The site is not at fluvial flood risk - Limited pluvial flood risk on site.	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		- The site poorly located in respect of the urban edge of Swadlincote, but is well related to shops and facilities in Winshill. - The site is well related to an for times hourly bus service (bus stops within 400m) and local centre and health centre (within 1200m), but strategic employment is located >2km.	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		- Site will not affect an identified listed buildings - No HERS records within site - there is limited potential for in ground archaeology in this area.	- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- Impacts are uncertain	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is greenfield	- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		- Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		- Existing landscape elements such as woodlands and hedgerows and a minor watercourse are present on site. There is potential to integrate existing landscape elements into the site, although would be dependent on the design and implementation of sites - All sites could contribute towards green infrastructure provision.	

Version 1a

**Site 51: S0084: Land at Newton Road, Burton on Trent**

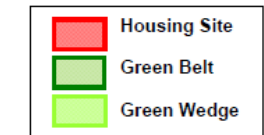

**Description:**

This site would be an urban extension to Winshill, Burton upon Trent, East Staffordshire. Winshill district centre is close to the site, and Burton upon Trent town centre is approximately 5 km away to the south west.

The site extends some 10ha (although only 7.5ha is identified as developable) and currently used for agricultural purposes. The land to the south comprises established residential development. Bladon House School is to the north of the site.

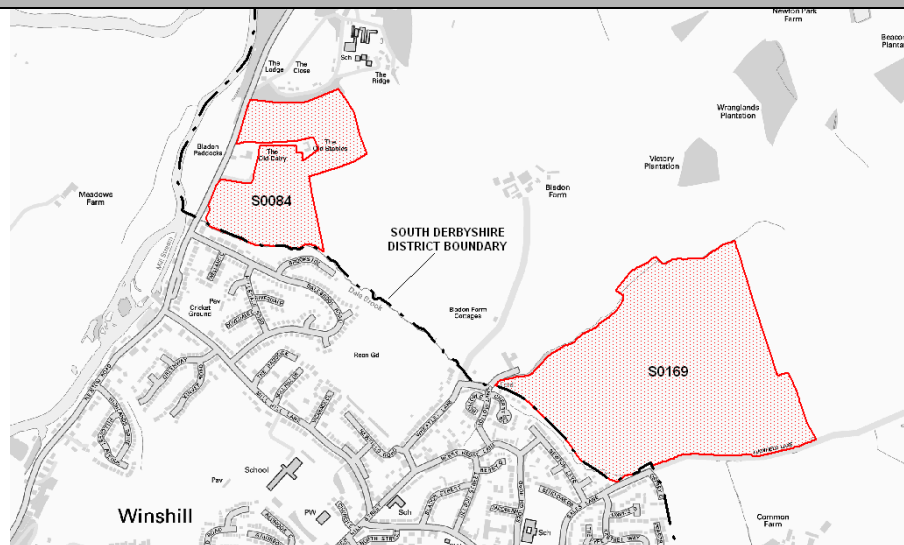

The site is in single ownership and there is thought to be a high level of developer interest.

### Key

MAP IS NOT TO SCALE NORTH 

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- There is a non-statutory wildlife site (SD219 – Dale Brook Meadow) adjacent to the south eastern edge of the site, although it is likely that no built development would be located close to this area due to existing land levels and watercourse present on site	
	Could development affect protected species or BAP priority species?	Yes	- There are no recording of BAP or Protected species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site including National Forest Planting (where relevant)?	Yes	- Illustrative masterplan for application 9/2014/0139 proposes tree planting on site.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological sites within this area or within 1km of the site	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- The design and access statement for application 9/2014/1039 states that a mix of dwelling types would be provided and up to 30% affordable housing on the site.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disable people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Sites are urban extension and will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- No, site would be an urban extension and would be very unlikely to includes provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Outline application 9/2014/1039 proposes open space on the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Existing healthcare facilities are located at Winhill around 1km distant - Development could help fund improvements to local medical facilities	
	Will it promote healthy lifestyles?		- Site is located within 800m of local recreation provision and 1200m of a local centre - Primary schools are within 1600m although it is unclear whether there is any potential to accommodate growth in east staffs schools and the nearest Primary school in South Derbyshire would be 2200m.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime		- The Crime Prevention Design Adviser for application 9/2014/1039 considers there are no reasons why residential development should not be acceptable from a community safety perspective, with the indicative layout suggested having the potential to provide a secure and outward looking scheme - particularly overlooking open space	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents		- The committee report for application 9/2014/1039 states that South Derbyshire And Staffordshire Highways make no objection on safety grounds, subject to conditions	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school in South Derbyshire is the William Allitt School, which is currently at capacity and has no room for expansion. - Granville and Pingle schools do have some spare capacity and could potentially accommodate the additional pupils from this development, although other developments in Swadlincote would need to be taken into account. - It is unclear whether there is any spare capacity within Burton secondary schools. - The nearest primary age schools in South Derbyshire are in Newton Solney although capacity details are unknown.	Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective - Development of this specific site is unlikely to create long term jobs and in turn improves the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District		- Application 9/2014/1039 proposes up to 30 affordable housing on site and could help meet affordable housing need both in nearby South Derbyshire villages and Burton on Trent.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The sites are dislocated from the main urban area of Swadlincote but is adjacent to the edge of Burton on Trent. The nearest local centre is 1200m (Winhill). - Bus stops are located just outside the site on Newton Road (bus services are hourly).	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Application 9/2014/1039 states that development of the site could make some contribution towards open space, education and healthcare.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Application 9/2014/1039 Transport Assessments concludes that the proposed development does not significantly impact on surrounding junction's performance and hence no mitigation is proposed. SCC Highway Authority considers there is not sufficient evidence to demonstrate otherwise and raises no objection. - The committee report for application 9/2014/1039 states that South Derbyshire And Staffordshire Highways make no objection on safety grounds, subject to conditions	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Derby and Burton serving this area. - Off road cycling provision in this area is undeveloped although there are a number of public rights of way locally.	
	Will it make the best use of other infrastructure?		- Site is likely to be served by Claymills WWTW which has capacity to accommodate growth - It is unclear whether capacity improvements would be required within the sewerage network around Winhill. - There are no known requirements for additional strategic water supply or electricity network improvements. - Superfast Broadband to be delivered commercially in this area by 2016	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth in this area is unlikely to have any discernible effect in respect of supporting the rural economy.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Development would not provide additional shops or services but could help sustain existing services within Winshill nearby.	- Ensure good connectivity to Winshill Local centre
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Site is not previously developed and will not regenerate existing built up areas - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site greenfield and there is no potential to reuse waste materials on site during construction phase - New development would lead to a general increase in waste generation during construction and operation phases of development	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space beyond stand requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1 SD2, SD3 and SD5 of the emerging Part 1 Local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans - Review minerals safeguarding information on receipt.	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure use below that required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Surface and Ground Water</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development although post development noise generation would be consistent with surrounding land uses</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Based on agricultural land classification maps held by the Authority land is likely to be classed as Grade 2 agricultural land which is Best and Most Versatile.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is at limited flood risk on the southern boundary of the site, although new development is could be steered away from this part of the site owing to its limited extent and proximity to a gas pipeline which traverses the site close to the brook. Limited pluvial flood risk on site.</li> <li>- Sequential test likely to be passed subject to design and layout of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site poorly located in respect of the urban edge of Swadlincote, but is well related to shops and facilities in Winshill.</li> <li>- The site is well related to an hourly bus service (bus stops within 400m) and local centre and health centre (within 1200m), but strategic employment is located &gt;2km.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- The setting of Bladon Cottage and Bladon Castle, which are to the north of the smaller site, could be affected by housing development to the north of Winshill.</li> <li>- NO HERS records within site</li> <li>- It is unclear whether there is potential for in ground archaeology in this area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Impacts are uncertain</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Existing landscape elements such as woodlands and hedgerows and a minor watercourse are present on both sites. There is potential to integrate existing landscape elements into the site, although would be dependent on the design and implementation of sites</li> <li>- All sites could contribute towards green infrastructure provision.</li> </ul>	

Version 1a

# **KEY SERVICE VILLAGES**

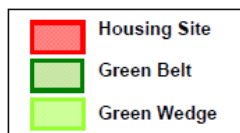

## Site X: S00272. Moor Lane, Aston On Trent

### Description:

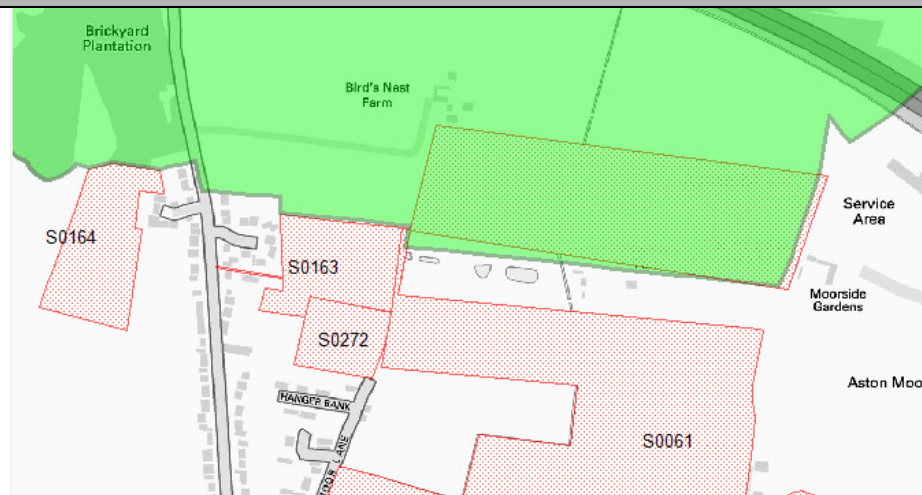

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

The site comprises agricultural land. It extends some 1.05ha and is currently in single ownership. There is medium developer interest.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 200m away at SD167 Brickyard Plantation.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston, however the surgery is only part times.	
	Will it promote healthy lifestyles?		- Site is within 800m of the village centre, Primary School and sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known whether development will affect accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located adjacent to the existing village. Bus stops are located within 400m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service).	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenways adjacent to the site,	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conform with policies AD1, SD2 and SD3 of the emerging part 1 local plan..</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1 and will have no impact on flood risk.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is within 400m of an hourly bus service and within 800m of the village centre. Although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of the village conservation area or any listed buildings.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but there may be potential to significantly improve connectivity of this part of the village to the Trent and Mersey Canal to the south, by better signposting of existing routes.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site is located in an area of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- The site is contained by existing development to the south and west</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing development and, hedgerows close to the village edge.</li> <li>- Hedgerows trees and other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 500m of SD167 Brickyard Plantation.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston, however the surgery is only part times.	
	Will it promote healthy lifestyles?		- Site is within 800m of the village centre, Primary School and sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known whether development will affect accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located adjacent to the existing village. Bus stops are located within 400m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is a metalled footpath adjacent to the site on Manor Farm Road	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenways adjacent to the site, although one is proposed to connect to the nearby Trent and Mersey Canal towpath. - There is an existing PROW adjacent to the southern boundary of the site - There is a metalled footpath adjacent to the site on Manor Farm Road	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conform with policies AD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There are less and intermediate areas of surface water flooding within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is within 400m of an hourly bus service and within 800m of the village centre. Although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but there may be potential to significantly improve connectivity of this part of the village to the Trent Mersey Canal to the south, by better signposting of existing routes.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is contained by existing development to the south and west and trees to the north,</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> <li>- Part of the site is located within the Green Belt.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscaping elements, such as existing development, hedgerows and field trees close to the village edge.</li> <li>- Hedgerows trees and other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

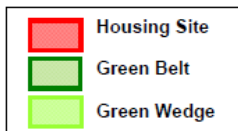

## Site 8: S0164. Site at Northern Fringe of Derby Road, Aston On Trent

### Description:

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

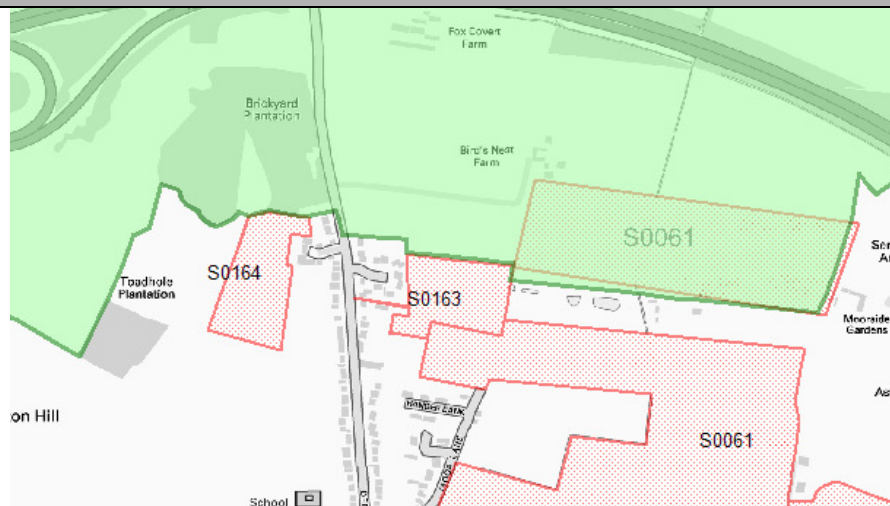

The site comprises of agricultural land. It extends some 2.2ha and is currently in single ownership. There is high developer interest. In addition the site is adjacent to the Green Belt.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located immediately adjacent to County Wildlife Site SD167 Brickyard Plantation and Clay pit.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by the site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Aston, 1.4km from the site, however the surgery is only part times.	
	Will it promote healthy lifestyles?		- Site is located within 800m of the village centre, however is within 1200m of Aston Primary School and sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- The impacts of the development would be uncertain and would be largely determined by the detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether development will impact accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the SHLAA proposes by the Authority indicates that the site could be viable for housing development. Although the impact on viability of the creation of an access would require further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The sites are located adjacent to the existing village. Bus stops are located within 400m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is a metalled footpath adjacent to the site in Derby Road, which could connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education, open space and sports provision and healthcare - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenways adjacent to this site. - There is a metalled footpath adjacent to the site in Derby Road, which could connect the site to the village.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available. - Access to the site is constrained due to the access being between a small gap between two dwellings.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- The provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by the developers. No information regarding these issues has been submitted by the site promoters to date.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during the construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by the site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to increase noise complaints as a result of the proximity of sites to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- There is no indication of surface water flooding on the site</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform to existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is within 400m of an hourly bus service and within 800m of the village centre. Although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS is located within 200m of the site (HERS16609 Aston Hill: Enclosure Pit and Alignment)</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal to the south of the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is open to the north and contained by trees to the south, hedgerows to the west and hedgerows and existing development to the east.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

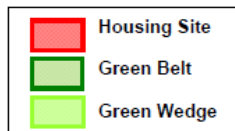

## Site 6: S0093. Site at Land to the rear of 51 Chellaston Lane, Aston On Trent

### Description:

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

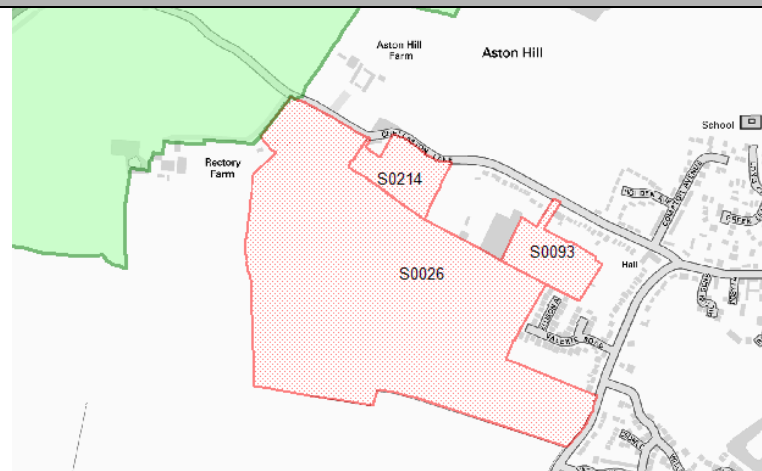

The site comprises agricultural land and a dwelling and its curtilage. It extends some 1.77ha and is currently in single ownership. There is medium developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 500m of SD163 Long Walk Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- The site would contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given the local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- The development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would contribute towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston however is part time.	
	Will it promote healthy lifestyles?		- Site is located within 800m of the village centre, however is within 1200m of Aston Primary School and a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However further assessment would be required on the demolition of the residential dwelling for access and its impact on viability. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The sites are located adjacent to the existing village. Bus stops are located within 400m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is a metalled footpath adjacent to the site on Chellaston Lane which could connect the site to the village services.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare in the village. - No information regarding site services or facilities has been provided in respect of this site by site promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenways adjacent to this site. - There is a metalled footpath adjacent to the site on Chellaston Lane, which could connect the site to the village services.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available. - The site requires demolition of the existing dwelling to gain access to the site.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials, including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield and there is very limited potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques the beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is very limited potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - There is potential for the inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- The development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to an increase in noise complaints as a result of the proximity of site to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is predominantly greenfield</li> <li>- Site is likely to be Grade 2 agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- This will depend on design, but the predominant greenfield element of the development would be expected to maintain greenfield runoff rates.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is located within 400m of an hourly bus service and within 800m of the village centre. Although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS site is located within 200m of the site (HERS16614 Aston Hall, Ridge and Furrow)</li> <li>- No details on the site layout and design have been submitted by site promoters.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal to the south of the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is predominantly greenfield. 0.08ha is brownfield and 1.69 is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing development, hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

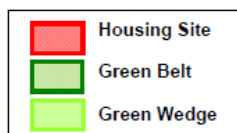

## Site x: S0073. Site at Land at Glebe Farm, London Road, Shardlow

### Description:

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

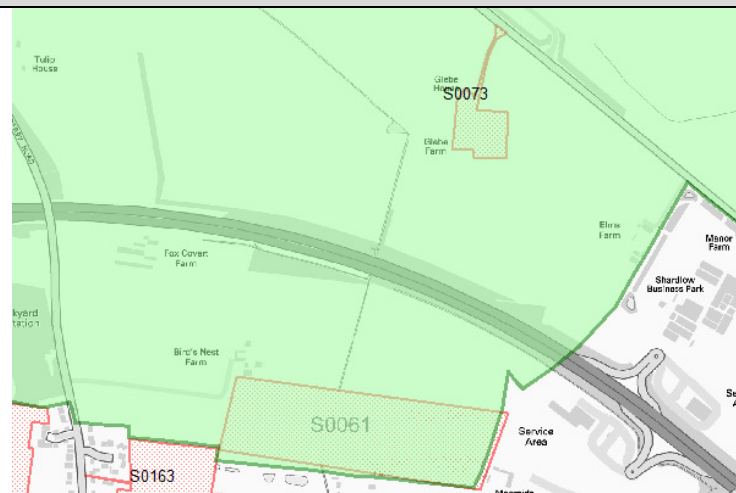

The site comprises agriculture land and buildings and a Farm House and curtilage. It extends some 1.3ha and is currently in single ownership. There is no developer interest in the site. In addition the site is located within the Green Belt.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closet site of local importance for nature conservation (County Wildlife Site) is located within 500m of SD169 Bellington Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evince to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on-site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Aston on Trent. 4.4km from the site.	
	Will it promote healthy lifestyles?		- There is no village centre within Shardlow, however the site is located within 1200m of the village school, recreation ground and Post Office. The site however is located over 1200m from Shardlow Village Hall.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure development reflects policy BEN1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether development will impact accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest primary school is located within Shardlow, capacity for the school is currently unknown. - The Long Eaton School is currently at capacity with 1285 pupils attending the school which has a capacity of 1237.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from the existing village. Bus stop is located adjacent to the site and provides an hourly bus service to Derby and Leicestershire, including a Sunday service. - There are some facilities within the village including a shop, post office, primary school, recreation ground and village hall. - There is no metalled footpath adjacent to the site, which could connect the site the village. - The nearest major employment site is more than 4km away.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make come contribute toward the provision of education and open space and leisure provision - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that a site of this scale will impact highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located adjacent to an hourly bus service to Derby and Leicestershire. - There is no metalled footpath adjacent to the site, which could connect the site to the village. - There are no proposals for new greenways adjacent to the site.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth and development in this area and can be accommodated without further strategic infrastructure provision in respect of the sewerage network. Some local improvements would however, be required. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband expected 2015	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Shardlow and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduced consumption of materials?		- The site is predominantly greenfield. There is limited potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is limited potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is predominantly greenfield.</li> <li>- Site is likely to represent either Grade 2 very good quality or Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 2 and 3a</li> <li>- There are areas less susceptible to surface water flooding along the western and southern boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- This would be dependent on the design of any development proposal, but runoff would normally be expected to be reduced to below current rates on the brownfield part of the site and to greenfield rates on the remainder.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of a bus service (within 400m of an hourly services, primary school provision and open space provision (within 1200m ).</li> <li>- The site is more than 4km from the nearest major employment site.</li> <li>- The site is more than 6km from the nearest supermarket, at Castle Donington.</li> <li>- Secondary School provision is located 8km from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (IN2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS site is located 400m from HERS16606 Fox Covert Farm.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflect policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield. 0.98ha of the site is greenfield and 0.15ha is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 Local Plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity.</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- The site is located within the Green Belt.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- Part of the northern edge of the site is contained by trees and hedgerows.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

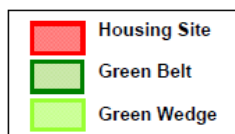

## Site 2: S0026. Valeries Road/Chellaston Lane Aston On Trent.

### Description:

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

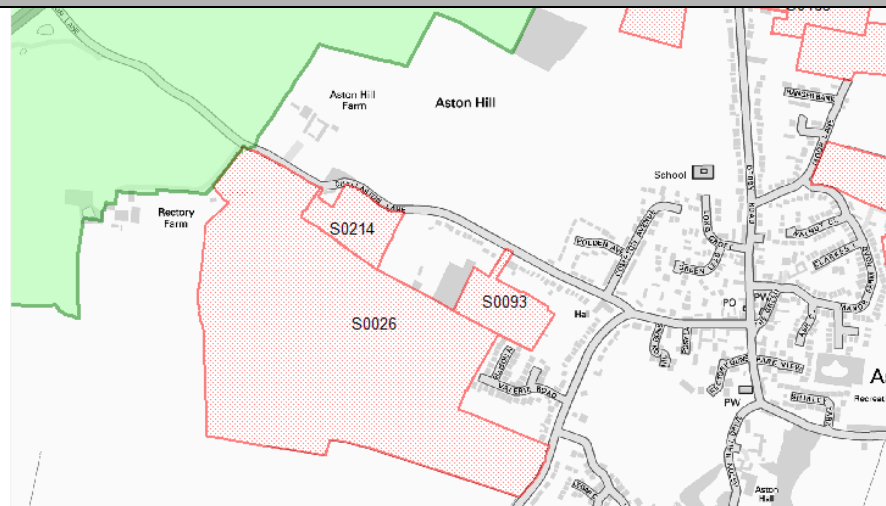

The site comprises agricultural land. It extends some 24.92ha and is currently in multiple ownership, however all parties are willing to develop the site for residential development. There is high developer interest. In addition a small part of the site was a former landfill site.

### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located within 300m of County Wildlife Site SD163 (Long Walk Wood).	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating.</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evince to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of the likely mix proposed on site. Although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would contribute towards the provision of or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston on Trent within 250m of the site. Facilities however are part time.	
	Will it promote healthy lifestyles?		- Site is located within 800m of the village centre and within 1200m of sports pitch and Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure development reflects policy BEN1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on traffic accidents.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However, the impact of the gradient on viability would need further assessment. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is adjacent to the existing village. - Bus stop is located within 400m of the site. The service is hourly between Aston and Derby, however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop and outdoor sports provision). - There is no metalled footpath immediately adjacent to the site. However the nearest footpath ends close by to the site at 128 Weston Road which is the dwelling next to the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make come contribute toward the provision of education, open space and sports provision and healthcare. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 400m of an hourly bus service between Aston on Trent and Derby, however there is no evening services. - There is no metalled footpath immediately adjacent to the site. However the nearest footpath ends close by to the site at 128 Weston Road which is the dwelling next to the site. - There are no proposals for new greenways adjacent to the site.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and surrounding villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site allocation in the Part 2 Local plan is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduced consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Historic landfill site. It is unclear whether this could have implications in respect of waste generation. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- Development could lead to increase noise complaints as a result of the proximity of sites to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield, although part of the site has formally be used for landfill, although site has been restored and is greenfield.</li> <li>- Site is likely to be Grade 2 very good quality and Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is an area of less and intermediate susceptibility to surface water flooding within the south east of the site. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect if day to day retail needs and primary school provision. The site is located within 400m of an hourly bus service and within 800m of the village centre. Although the site is in excess of 4km away from the nearest large scale employment areas. The site is also poorly relates in respect of supermarkets and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (IN2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could potentially be supported by on site renewable or low carbon energy generation,</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS site is located 60m of the site HERS16614 Aston Hall, Ridge and Furrow.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflect policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly green field.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 Local Plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity.</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- The ground rises through the site in a westerly direction.</li> <li>- Part of the western boundary of the site is adjacent to the Green Belt.</li> <li>- However, impacts could be significant due to the loss of the 'gap' between Aston and Weston on Trent, which would occur. This would affect the visual separation of both communities.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing development, hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

## Site x: S0230. Field No.2871, Shardlow Road, Aston On Trent

### Description:

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

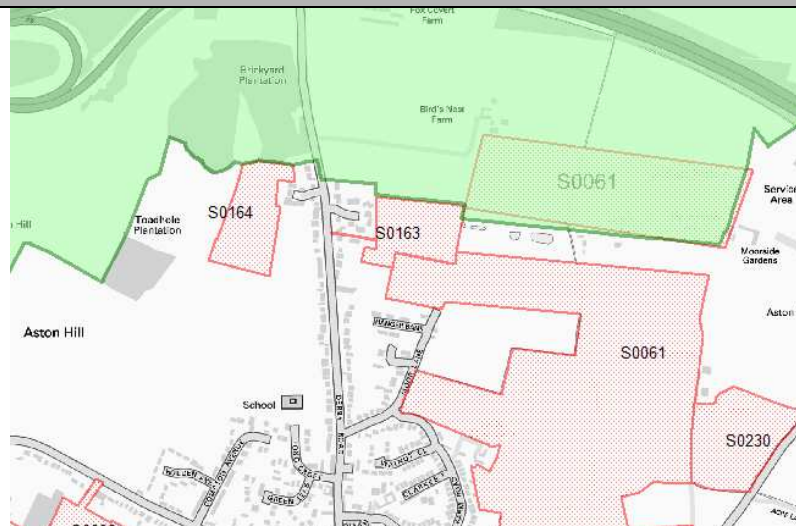

The site comprises of agricultural land. It extends some 3.09ha and is currently in single ownership. There is medium developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 1km of SD167 Brickyard Plantation and Claypit.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make limited contribution towards improving open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Aston 1.7km from the site, however the surgery is only part times.	
	Will it promote healthy lifestyles?		- Site is within 800m of a sports pitch, within 1200m of the village centre and over 1200m from Aston Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide the opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from the main built up area of Aston on Trent. Bus stops are located within 1200m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is no metalled footpath from the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby within 1200m. However, there is no evening service. - There are existing PROW within the eastern and western boundary of the site. - There is no metalled footpath from the site to the village. - There are no proposals for new greenways adjacent to this site, although there is a proposed greenway link to the Trent and Mersey Canal towpath, nearby.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by the site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for the inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to an increase in noise complaints as a result of the proximity of sites to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- Within the majority of the site there is no indication of surface water flooding however there are small areas less susceptible to surface water flooding along the eastern boundary and within the northern boundary of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs; however primary school provision is 1.5km from the site. The site is located within 1200m of an hourly bus service and the village centre. In addition the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- HERS16603 Moorside Cottage: Aston Cursus Complex covers the site.</li> <li>- An ancient monument is situated adjacent to the site, however is separated from the site by Shardlow Road</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan,</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal to the south of the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Shardlow Road and trees and hedgerows to the east, hedgerows to the north, a track to the west and hedgerows to the south.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

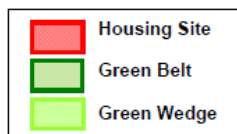

## Site 9: S0214. Site at Chellaston Lane, Aston On Trent

### Description:

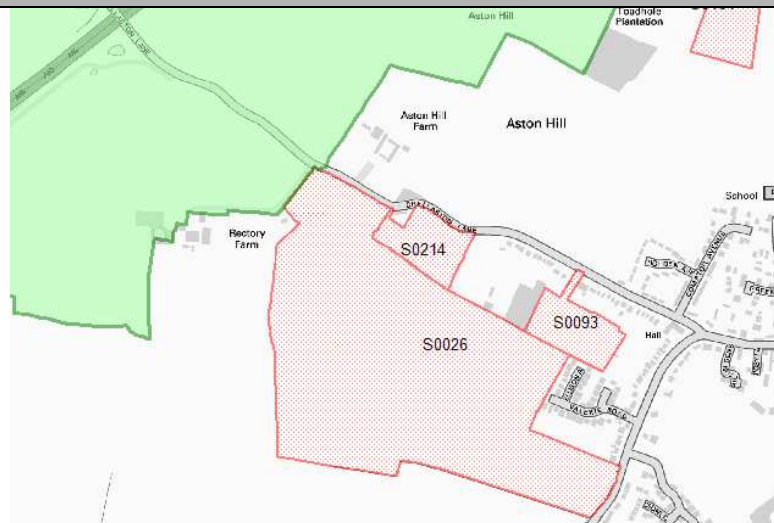

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

The site comprises of agricultural lane. It extends some 1.69ha and is currently in one ownership. There is no developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 800m of SD163 Long Wood Walk and SD167 Brickyard Plantation and ClayPit.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston within 1km of the site. However the surgery is only part time.	
	Will it promote healthy lifestyles?		- Site is within 1200m of the village centre, sports pitch and Aston Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether development would impact accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from the main built up area of the village. Bus stops are located within 800m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is no metalled footpath from the site to the village	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenways adjacent to the site - There is no metalled footpath from the site to the village.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by the site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for the inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts re unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to an increase in noise complaints as a result of the proximity of sites to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield.</li> <li>- Site is likely to be Grade 2 very good quality or Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is in Flood Zone 1</li> <li>- There is no indication of surface water flooding within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is within 800m of an hourly bus service, and within 1200m of the village centre. Although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> <li>- No site layout or design has been submitted by site promoters.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan,</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal to the south of the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape elements, such as Chellaston Road to the north and hedgerows to the east, south and west.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Sites 7: S0163. Site at Northern Fringe of Derby Road, Aston On Trent

### Description:

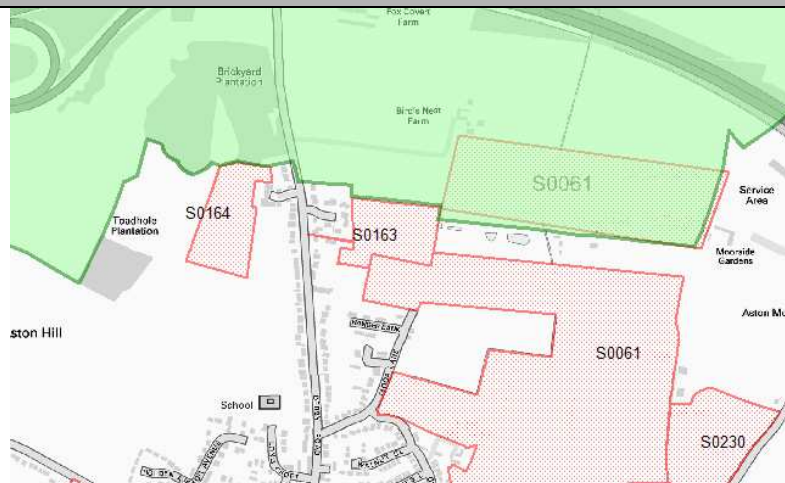

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

This site comprises of agricultural fields. It extends some 2.03ha and is currently o in single ownership. There is a high level of developer interest. In addition the site is adjacent to the Green Belt.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located within 300m of County Wildlife Site SD167 (Brickyard Plantation)	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given the local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring back empty homes into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Aston, 1.3km from the site, however the surgery is only part times.	
	Will it promote healthy lifestyles?		- Site is located within 800m of the village centre, Aston Primary School and within 1200m of a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known whether development would impact accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The sites are located adjacent to the existing village. Bus stops are located within 400m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is a metalled footpath adjacent to the site on Derby Road, which could connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of new education, open space and sports provision and healthcare. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There is a PROW within the east edge of the site. - There are no proposals for new greenways adjacent to the site. - There is a metalled footpath adjacent to the site on Derby Road, which could connect the site to the village.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available. - Access to the site is constrained due to the access being between a small gap between two dwellings.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help to sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduced consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - There is potential for the inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 Local Plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to increase noise complaints as a result of the proximity of sites to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield.</li> <li>- Site is likely to be Grade 2 very good quality, or Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is within 400m of an hourly bus service and within 800m of the village centre, although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> <li>-</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS site is located within 300m of the site (HERS16606 Foxcovert Farm)</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but there may be potential to significantly improve connectivity to the Trent Mersey Canal to the south by better signposting of existing routes.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing residential properties to the west of the site and hedgerows and field trees to the north, east and south of the site.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

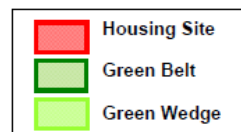

## Site 5: S0062. Site at Land to the East of Weston Road, Aston On Trent

### Description:

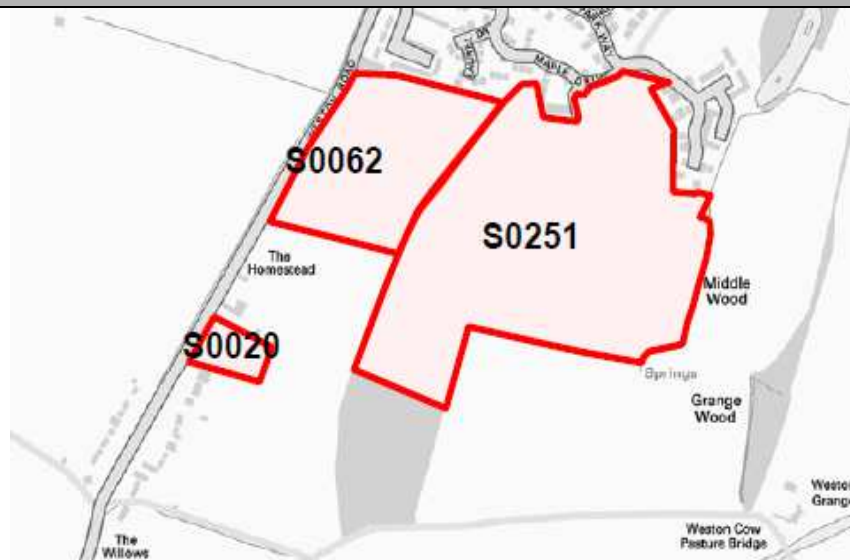

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

The site comprises agricultural land. It extends some 4.1ha and is currently in single ownership. There is medium developer interest.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located immediately adjacent to County Wildlife Site SD163 Long Walk Wood. .	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would be expected to make a contribution towards improving open space and leisure provision on site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within 550m from the site. The GP however is part time.	
	Will it promote healthy lifestyles?		- The site is within 1.2km of Aston Primary School and Village Centre, however exceeds 1.2km of a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known whether development will impact accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development/ - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located adjacent to the existing village. Bus stops are located within 400m of the site. The bus service is hourly throughout the day, however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and). - There are employment opportunities in Derby City around Raynesway, and in Castle Donington. - There is a metalled footpath adjacent to the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education and health provision - No information regarding site services and facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenway provision adjacent to the site. - There is a metalled footpath adjacent to the site.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conform with policies AD1, SD2 and SD3 of the emerging part 1 local plan..</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to an increase in noise complaints as a result of the proximity of the site to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is located within 400m of an hourly bus service and 1.2km of the village centre. Although the site is in excess of 4km away from the nearest large scale employment areas. The site is also poorly related in respect of supermarkets and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation,</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS site is located 150m away (HERS27706 Cropmarks north east of Weston On Trent)</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- TPO45 is located to the east to the east of the site.</li> <li>- However, impacts could be significant due to the loss of the 'gap' between Aston and Weston on Trent, which would occur. This would affect the visual separation of both communities.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing development to the north, woodland to the east, hedgerows to the south and hedgerows and Weston Road to the west.,</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the Landscape.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site 5: S0061. Aston Land and Moor Lane, Aston On Trent

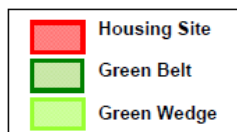

### Description:

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

The site comprises agricultural land. It extends some 32.92ha and is currently in single ownership. There is medium developer interest.

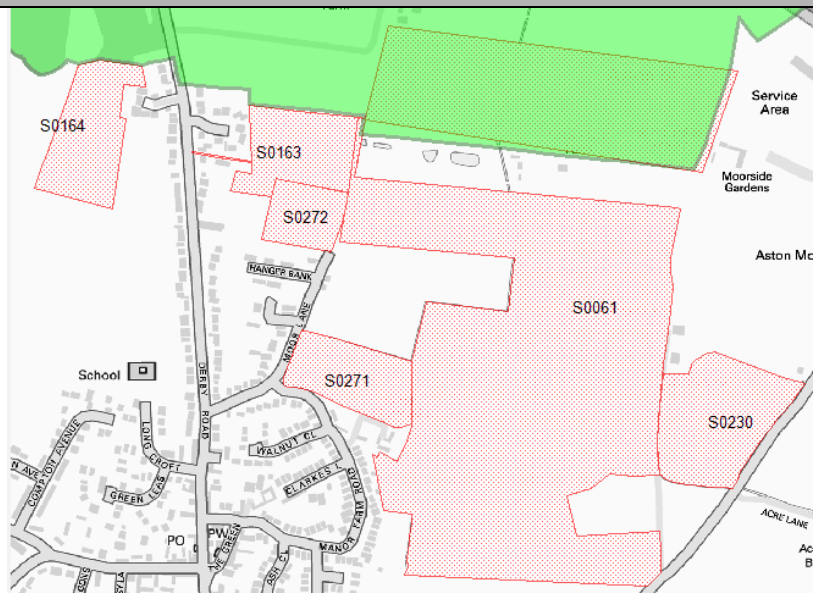

The northern part of the site is located within the Green Belt.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 400m of SD167 Brickyard Plantation.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston, however the surgery is only part times.	
	Will it promote healthy lifestyles?		- Site is within 800m of the village centre, Primary School and sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known whether development will affect accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located adjacent to the existing village. Bus stops are located within 400m of the site. The service is hourly through the day however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service). - There is no metalled footpath adjacent to the site, connecting the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development would make some contribution towards the provision of education, open space and sport provision and healthcare in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Aston on Trent and Derby However, there is no evening service. - There are no proposals for new greenways adjacent to the site, although one is proposed to connect to the nearby Trent and Mersey Canal towpath. - There are existing PROW through the site and locate to the east of the site. - There is no metalled footpath adjacent to the site, connecting the site to the village.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conform with policies AD1, SD2 and SD3 of the emerging part 1 local plan..</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to an increase in noise complaints as a result of the proximity of the site to the airport, the Donington Park Race Circuit and Shardlow Quarry and A50 trunk road.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The majority of the site lies within Flood Zone 1. A small area within the north of the site lies within flood zone 2 and 3a.</li> <li>- A large amount of the site is covered by less and intermediate areas susceptible to surface water flooding within the site. There is a small area more susceptible to surface water flooding within the middle of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. The site is within 400m of an hourly bus service and within 800m of the village centre. Although the site is in excess of 4km from the nearest large scale employment areas, the site is also poorly related in respect of supermarket and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- HERS16603 Moorside Cottages, Aston Cursus Complex is located within the site.</li> <li>- The site is located within 20m of an ancient monument. The site is separated from the ancient monument by a road.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but there may be potential to significantly improve connectivity of this part of the village to the Trent Mersey Canal to the south, by better signposting of existing routes.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is largely contained by the existing village boundary and the A50, although careful landscaping would be required, due to the flat and relatively open nature of this area.</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> <li>- Part of the site is located within the Green Belt.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscaping elements, such as existing development, hedgerows and field trees close to the village edge.</li> <li>- Hedgerows trees and other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

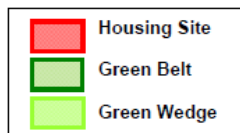

## Site 2: S0020. Site at Weston Road, Aston On Trent

### Description:

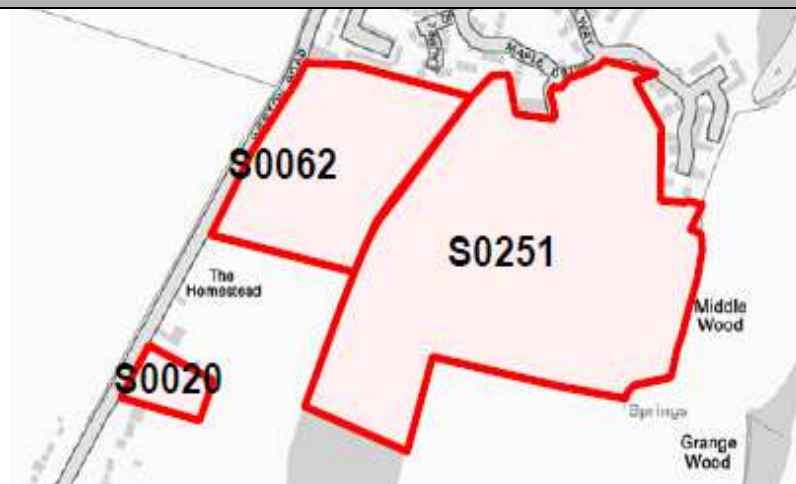

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

The site comprises of grazing land. It extends some 0.53 ha and is currently in single ownership. There is no developer interest.

### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located within 300m of County Wildlife Site SD163 (Long Walk Wood).	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evince to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Development would make an uncertain contribution towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of the likely mix proposed on site. However given the local plan requirement development will be likely to deliver a range of house sizes. Although due to the site size, development would make an uncertain contribution towards the delivery of affordable housing.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would make no contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would contribute towards the provision of or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston on Trent within 900m of the site. Facilities however are part time.	
	Will it promote healthy lifestyles?		- Site is in excess of 1200m of the village centre, Aston On Trent Primary School and a sports pitch. The site however is within 1200m of Weston On Trent Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure development reflects policy BEN1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on numbers of accidents.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- Due to the size of the site development would provide an uncertain contribution towards the delivery of affordable housing. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from main built up area of Aston on Trent. - Bus stop is located within 150m of the site. The service is hourly between Aston and Derby, however there is no evening service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop and outdoor sports provision). - There is a metalled footpath adjacent to the site which would connect the site to Aston On Trent and Weston On Trent.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make come contribute toward the provision of education and healthcare. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale will have a significant impact on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is located within 150m of an hourly bus service between Aston on Trent and Derby, however there is no evening services. - There is a metalled footpath adjacent to the site which would connect the site to Aston On Trent and Weston On Trent. - There are no proposals for new greenways near this site.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and surrounding villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduced consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- Development could lead to increase noise complaints as a result of the proximity of sites to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is within Flood Zone 1.</li> <li>- There is no indication of surface water flooding within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is within 400m of an hourly bus service. However the site is poorly related to Aston on Trent Primary School and Village Centre (in excess of 1200m of these facilities).</li> <li>- The site is also poorly related in respect of secondary school provision (Chellaston Academy) which is 5.3km away</li> <li>- The nearest supermarket is more than 6km away at Castle Donington</li> <li>- The nearest major employment site is more than 4km away.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (IN2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development has potential to support on site renewable or low carbon energy generation</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site. The closest HERS site is located 250m of the site HERS27724 Ridge and Furrow Gap at Weston On Trent</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflect policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly green field.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 Local Plan will help ensure key values landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity.</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- However, impacts could be significant due to the loss of the 'gap' between Aston and Weston on Trent, which would occur. This would affect the visual separation of both communities.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained to the north and south by neighbouring residential properties and hedgerows (ribbon development along Weston Road) and Weston Road and hedgerows to the west. The site is open to the rear and appears to be contained by fencing.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

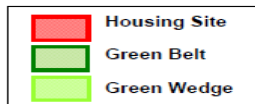

## Sites 1: S0002. Site at Shardlow Road, Aston On Trent

### Description:

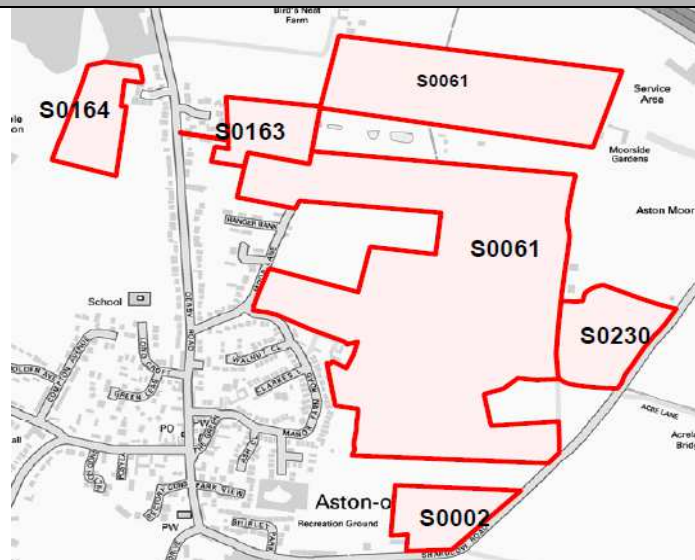

The village of Aston on Trent lies towards the north east of the District, and is located approximately 11km south east of Derby. Aston on Trent is a small village that is varied in character.

The site is predominantly greenfield with a single dwelling in the south west corner. It extends some 2.14ha and is currently in single ownership. There is high developer interest.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 800m of SD163 Long Wood Walk.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held to indicate. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring back empty homes into use or improve unfit homes	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site. The recreation ground is adjacent to the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Aston; however the GP is part time.	
	Will it promote healthy lifestyles?		- Site is located within 800m of a sport pitch, the village centre however is within 1200m of Aston On Trent Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known whether development would impact on accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is Chellaston Academy which is at capacity and cannot expand to accommodate growth, although the scale of the site is unlikely to have significant impact on the school - There are two schools within Derby City that have some spare capacity which are: Noel Baker Community School and Merrill College. However, these schools would not be able to take all of the secondary school growth predicted within the City and South Derbyshire. - The nearest Primary School is located within Aston on Trent. The school is exceeding capacity with 206 children attending the school with a capacity of 189 children	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepares by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located within 800m to bus stop to an hourly bus service to Derby. There is however no evening or Sunday service. - There are some local facilities (including shops and a primary school, community centre, post office, convenience shop, outdoor sports provision and). - There are employment opportunities in Derby City around Raynesway, and in Castle Donington. - There is a metalled footpath adjacent to the site.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of new education, open space and sports provision within the village. - No information regarding site services or facilities has been provided in respect of this site by promoters	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The impact on the local and strategic highway network is unknown, although it is unlikely to be significant, given the scale of the site.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service (within 800m of the site) between Aston on Trent and Derby However, there is no evening service. - The provision of additional pedestrian/cycle links could improve the local PROW network. There is a proposal to establish a new greenway connecting to the Trent and Mersey Canal towpath - There is a metalled footpath adjacent to the site.	
	Will it make the best use of other infrastructure?		- There is headroom at Shardlow WWTW to accommodate growth. - There are no known requirements for additional water supply or electricity network improvements. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits site build out.	- Inclusion of general rural diversification policy in the plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and could create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Aston and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is predominantly greenfield. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield and there is very minimal potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There us very limited potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to an increase in noise complaints as a result of the proximity of the site to the airport, the Donington Park Race Circuit and Shardlow Quarry.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is mostly greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is in Flood Zone 1.</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The nearest supermarket is 6km away at Castle Donington</li> <li>- The nearest major employment site is more than 4km away.</li> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision. Secondary School Provision is 4.8km from the site. The site is within 800m of an hourly bus service and 1200m of the village centre.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development has potential to support on site renewable or low carbon energy generation</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- There is an ancient monument is adjacent to the site east of the site, however is separated by a road.</li> <li>- No HERS sites are located within the site, but HERS16601 Cropmark Complex located adjacent to the site (separated by a road).</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact but could offer limited potential to enhance local PROW access towards the Trent and Mersey Canal to the south of the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield. 1.9ha is greenfield 0.24ha is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- The site is disconnected from the built up area of Aston.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site contained by trees to the west, hedgerows, trees and a road to the south, hedgerows and a road to the east and a post and rail fence to the north.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

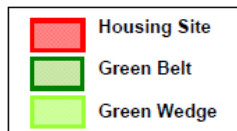

## Site xx: S0265. Land north of Derby Road and east of the A516, Etwall

### Description:

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50 to the south.

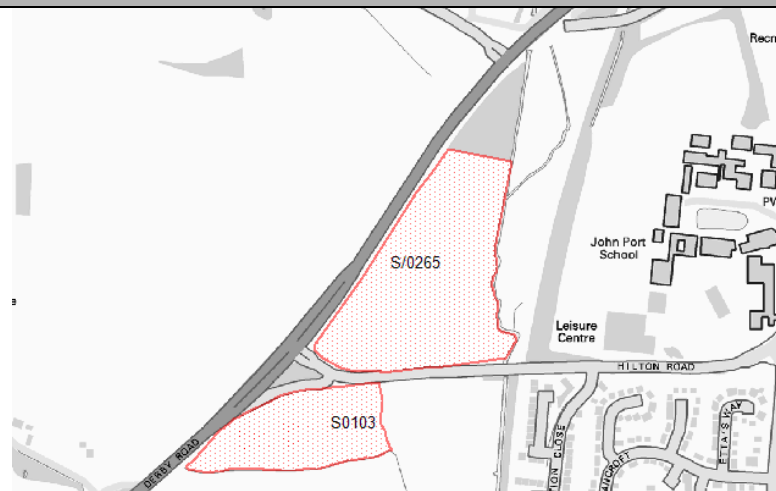

The site comprises agricultural land. It extends some 5.5ha and is currently in single ownership. There is high developer interest.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is located within 900m of an SSSI.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 400m of SD388 Mickleover Etwall Trail.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by the site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given local plan requirements would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Hilton 2.2km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of Etwall Primary School and a sports pitch and is within 1200m of the village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070. - Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is adjacent to a bus stop which provides an hourly service to Derby and Burton. There is a Sunday bus service every two hours. - There are the following local facilities within Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house, mostly within 800m of the site. - There is no metalled footpath adjacent to the site, which could connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and leisure provision and healthcare. - The SHLAA submission suggests that part of SHLAA site could be released to John Port School to enable the expansion and enhancement of the school facilities.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development might have on traffic congestion	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours. - There is no metalled footpath adjacent to the site, which could connect the site to the village. - The site lies within 800m of access to an established greenway.	
	Will it make the best use of other infrastructure?		- There site would be serviced by Etwall WWTW, which has spare capacity. - There are no known water and electricity supply constraints - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield so there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation, during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have a significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to an increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to increase noise complaints as a result of the proximity of sites to the A516</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 4 poor quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The majority of the site lies within flood zone 1, however the northern and eastern part of the site lies within flood zone 3a and 2.</li> <li>- The site contains areas of less, intermediate and more susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs, and primary school and secondary school provision. The site is within 400m of an hourly bus service. The nearest supermarket is located within Hilton, 2.1km from the site. The site is located within 4km of the nearest employment sites over 10 ha (Hilton Depot).</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> <li>- May need to check views from Ashe Hall potentially could mitigate through design and screening</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The west of the site is located in an area of secondary sensitivity to the County Councils Areas of multiple environment sensitivity, and the east of the site is located within an area of primary sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area,</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape elements: by dense trees to the north, hedgerows, trees and A516 to the west, trees, hedgerows and Derby Road to the south and trees at Etwall Brook to the east.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

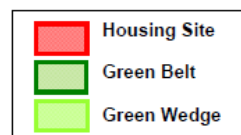

## Site xx: S0253. Land off Willington Road, Etwall

### Description:

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50 to the south.

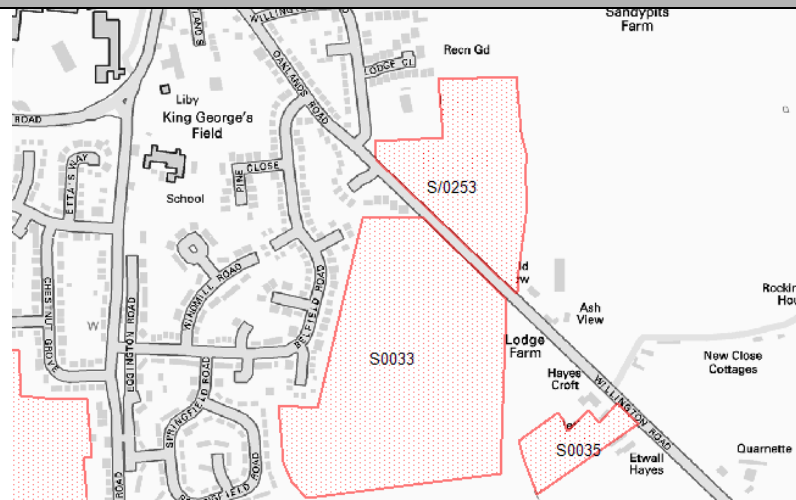

The site comprises agricultural land. It extends some 3.4ha and is currently in single ownership. There is low developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 900m of SD0388 Mickleover Etwall Trail.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by the site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site, including open space adjacent to the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Hilton 3.8km from the site.	
	Will it promote healthy lifestyles?		- Site is within 800m of a sports pitch, a primary school and the village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070. - Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is adjacent to Etwall Village and is within 800m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours. - There are the following local facilities within the Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house. - There is a metaled footpath adjacent to part of the south west of the site, which could connect the site to the village. There is no metaled footpath adjacent to most of the site.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of education and open space and sports provision in the village. - No information regarding services has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is no greenway or cycle route adjacent to the site. - There is an hourly bus service between Etwall and Derby within 800m of the site. There is a Sunday bus service every two hours. - There is a metaled footpath adjacent to part of the south west of the site, which could connect the site to the village. There is no metaled footpath adjacent to most of the site.	
	Will it make the best use of other infrastructure?		- There site would be serviced by Etwall WWTW, which has spare capacity. - There are no known water and electricity supply constraints. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site built out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/pr otect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not generate existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and with there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation, during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have a significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although given the scale and nature of development impacts re unlikely to be significant.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs and primary and secondary school provision. The site is located within 800m of an hourly bus service. The site is located in Hilton 3.7km from the site. The nearest employment site over 10ha is in excess of 4km of the site (Hilton Depot)</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will affect the setting of grade II Listed Building Etwall Lodge which is adjacent to the site.</li> <li>- No HERS sites are located within the site</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as trees and hedgerows and Willington Road to the south.</li> <li>- Hedgerows, substantial areas of trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

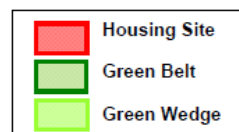

## Site xx: S0103. Land at Egginton Road, Etwall

### Description:

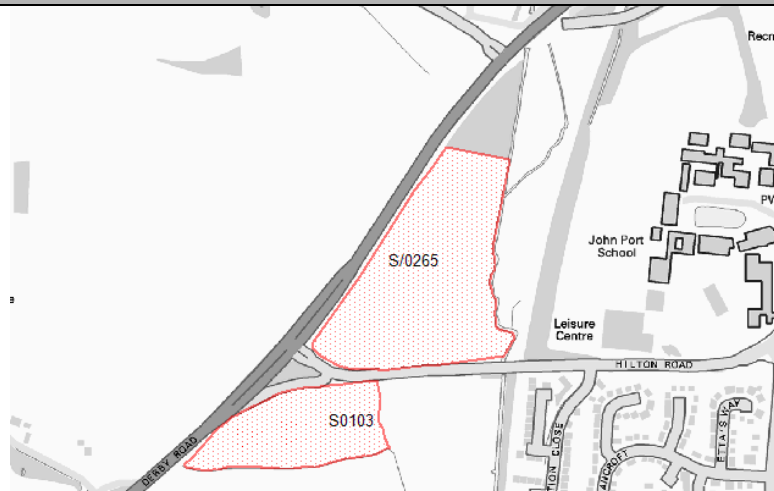

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50 to the south.

The site, measuring 2.46ha, comprises agricultural land and buildings and, residential dwellings and curtilages. There is high developer interest in the site and the site is currently in multiple ownership. However all parties are willing to develop the site for residential use.

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is located within 700m of a SSSI.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 800m of SD388, Mickleover Etwall Trail.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site masterplan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by the site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision, both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make contribution toward the provision or expansion of healthcare facilities within 3km. The nearest GP is located within Hilton 2.2km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of Etwall Primary School and a sports pitch and is within 1200m of the village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether development will affect accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070. - Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However, further assessment of the impact of the existing buildings on viability would be required. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from the main built up area of Etwall. The site is adjacent to a bus stop which provides an hourly service to Derby and Burton. There is a Sunday bus service every two hours. - There are the following local facilities within the Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house - There is a metalled footpath adjacent to the site on Derby Road which connects the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education, open space and sports provision and healthcare facilities. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours. - There is a metaled footpath adjacent to the site on Derby Road which connects the site to the centre of the village, which lies within 800m. - Site lies within 800m of an access to an established greenway.	
	Will it make the best use of other infrastructure?		- There site would be serviced by Etwall WWTW, which has spare capacity. - There are no known water and electricity supply constraints. - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site built out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Given the existing use on site and conditions of the dwellings, development is unlikely to generate the existing built up are. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- There is potential to reuse waste materials on site, (from the existing dwellings) during the construction phase. - New development would lead to a general increase in waste generation, during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is potential to reuse demolition waste on site (from the existing dwellings). The use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- Development could lead to an increase in noise complaints, as a result of the proximity of the site to the A516.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Half of the site is brownfield and other half is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land and/or Grade 2 poor quality land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- The site contains a small area of less and intermediate susceptibility to surface water flooding within the south west of the site. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- Runoff for the previously undeveloped part of the site will be expected to match greenfield rates. Redevelopment of the brownfield area would normally be expected to result in a reduced run-off rate.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- New housing development is likely to lead to an increase in energy use in aggregate terms. Homes in villages could perform less well in respect of this objective due to increased reliance on private transport to access local services and facilities.</li> <li>- The site is relatively well located in respect of day to day retail needs, and primary school and secondary school provision. The site is within 400m of an hourly bus service. The nearest supermarket is located within Hilton, 2.1km from the site. The site is located within 4km of the nearest employment sites over 10 ha (Hilton Depot).</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> <li>- May need to check views from Ashe Hall potentially could mitigate through design and screening</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improves access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- 1.23ha of the site is brownfield and 1.23ha of the site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of secondary sensitivity according to the County Council's Areas of multiple environment sensitivity.</li> <li>- The majority of the site is located within the Needwood and South Derbyshire Claylands Landscape Character Area, however part of the southern edge of the site are located within the Trent Valley Washlands Landscape Character Area.</li> <li>- There are field trees within the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by the A516 to the west, a road to the north and hedgerows and trees to the south and east.</li> <li>- Hedgerows, substantial areas of trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

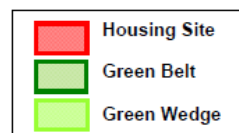

## Site 19: S0063. Land adjacent Sutton Lane and Hill Pasture, Etwall

### Description:

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre, and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50, a little way to the south, with open countryside to the east and the west.

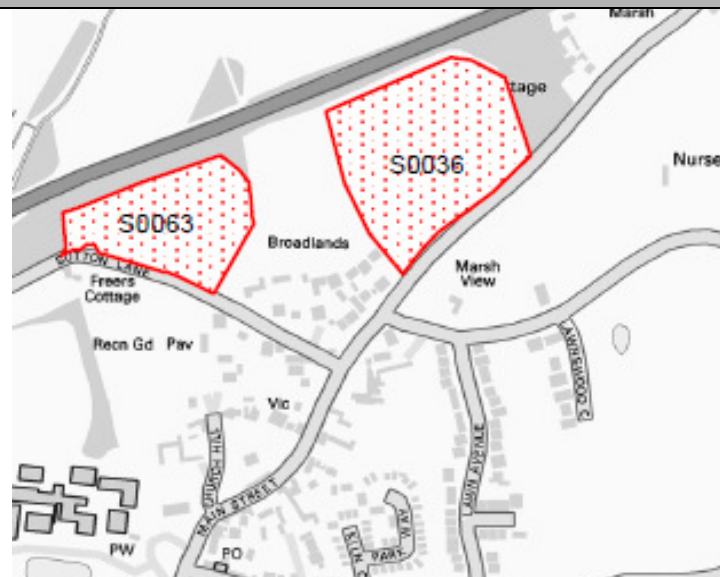

The site comprises a dwelling and its curtilage and a paddock. The site extends some 2ha and is currently in single ownership. There is a high level of developer interest on the site.

### Key

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located within 300m of County Wildlife Site SD388 (Mickleover Etwall Trail)	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	No	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by the site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve communities.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Hilton 3.3km from the site.	
	Will it promote healthy lifestyles?		- Site is located within 800m of the village centre, sports pitch and Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether accident numbers would be affected, although notable affects are unlikely having regard to the TA for a nearby site of a similar scale.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070. - Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However, the impact on viability of the gradient and need further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- There are the following local facilities within the Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house. - There is no metalled footpath adjacent to the site on Sutton Lane. - The site is adjacent to the village and is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of new education, open space and sport provision in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on traffic congestion, although notable affects are unlikely having regard to the TA for a nearby site of a similar scale.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours. - There is no metalled footpath adjacent to the site on Sutton Lane - Site lies within 800m of access to an established greenway - An existing PROW is located to the east of the site.	
	Will it make the best use of other infrastructure?		- There site would be serviced by Etwall WWTW , which has spare capacity. - There are no known water and electricity supply constraints - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is predominantly greenfield, with one dwelling on the site and will not regenerate the site - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield and very limited potential to reuse waste materials on the site during the construction phase arises from the existing dwelling on the site. - New development would lead to a general increase in waste generation, during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is very limited potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is not known whether development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is predominantly greenfield.</li> <li>Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site lies within Flood Zone 1</li> <li>There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>For The majority of the site development will be expected to reflect greenfield run off rates. For the previously developed part of the site, redevelopment would normally be expected to deliver better run-off rates than at present.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is relatively well located in respect of day to day retail needs, primary school and secondary school provision. The site is located with 800m of the village centre and within 400m of an hourly bus service. The site is 3.1km from a supermarket in Hilton and 4.1km from the nearest employment site over 10ha (Hilton Depot).</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development may affect the setting of the village conservation area.</li> <li>No HERS sites are located within the site.</li> <li>Impacts could be dependent on the detailed design and layout of the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is predominantly greenfield.1.96ha of the site is greenfield 0.04ha is brownfield</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>The site is located within the Needwood and South Derbyshire Claylands Landscape Character Area.</li> <li>The site slopes to the north east.</li> <li>Hedgerow faces Sutton Lane.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is well contained by A516 and tree to the north, trees and hedgerows to the east, Sutton Lane to the south and trees/woodland to the west.</li> <li>Hedgerows, substantial areas of trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>This land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

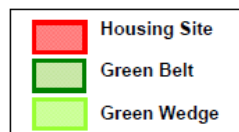

## Site 18: S0036. Land at OS part 1547, Derby Lane, Etwall

### Description:

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50 to the south.

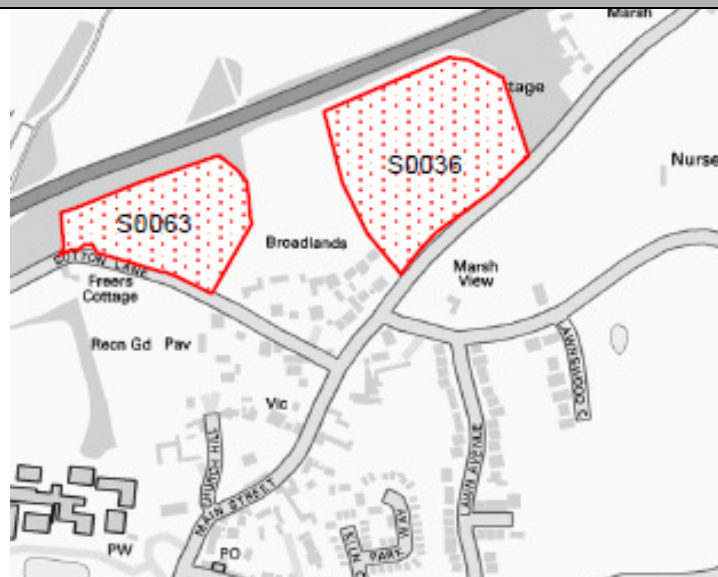

The site comprises of agricultural land. It extends some 3.38ha and is currently in single ownership. There is high developer interest.

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located 350m from the site SD388 Mickleover Etwall Trail.	
	Could development affect protected species or BAP priority species?	No	- Potential for a number of protected or BAP Species within the site, or within 100m including Bats, Breeding Birds and hedgerows.	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- site master plan submitted with a recent application indicates the provision of open space mainly to the north east of the site. <b>Based on incomplete data will need updating</b>	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs, although previous submissions have indicated that this could be via contributions to offsite provision.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	Yes	- Site would include plots for self build homes, residential care homes and dwellings for over 55s including one and two bed bungalows	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- As above	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would not include provision for travelling communities based on most recent plans	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both within the site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision of healthcare facilities within 3km of the site. The nearest GP is located within Hilton 3.4km from the site.	
	Will it promote healthy lifestyles?		- Site is within 800m of the village centre, sports pitch and primary school.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- The impacts would be uncertain and would be largely determined by the detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- Accident records show there has been only one slight accident on Main Street in the eight years between 2005 and 2012. This shows that there is no existing local accident problem. Because the development will not materially increase the traffic flows no accident problem would be introduced. - Introduction of priority controlled junction could have an uncertain effect in respect of improving safety around the site.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070. - Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely through off site contributions - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- There are the following local facilities within the Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house. - There is a metalled footpath adjacent to the site on Derby Road which could connect the site to the village. - The site is adjacent to the village and is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours.	- Ensure development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development will make some contribution toward the provision of new education, open space and sport provision in the village. - Built community facility is intended to be provided, managed privately, and made available for public use on site in the form of the gatehouse community hub	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Transport Assessment for the site indicates that development would have a limited impact on a lightly trafficked road	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours. - There is a metalled footpath adjacent to the site on Derby, which could connect the site to the village. - There are no established or proposed greenways adjacent to the site.	
	Will it make the best use of other infrastructure?		- There site would be serviced by Etwall WWTW , which has spare capacity. - There are no known water and electricity supply constraints - SuperFast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis. - Proposed 60 bed Care home could support approximately 13 qualified nurses and 31 care assistants according to recent planning submission	
	Will it improve average incomes in the District?		- The proposed development is unlikely to have any material effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services. - Development would also deliver jobs in the 'health sector'	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- The provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops on site but could deliver a new 'community hub' in the village.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is greenfield.</li> <li>- Site is likely to include Grade 3 agricultural land of moderate quality.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels taking account of climate change.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs, Etwall village centre, primary school and secondary school provision and the site is within 400m of an hourly bus service. The site is 3.2km from a supermarket in Hilton and 4.2km from the nearest employment site over 10ha (Hilton Business Park).</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is likely to affect the setting of the village conservation area, views to and from the conservation area and the approach to the conservation area. .</li> <li>- No HERS sites are located within the site, although the site is within 20m of HERS19801 Etwall, Polished Stone Axe</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 Local Plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Needwood and South Derbyshire Claylands.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by the A516 and trees to the north, hedgerow to the east and west and Derby Road and hedgerows to the south.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

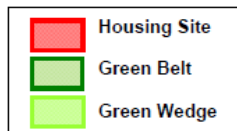

## Site xx: S0035. Nether Hayes, Willington Road Etwall

### Description:

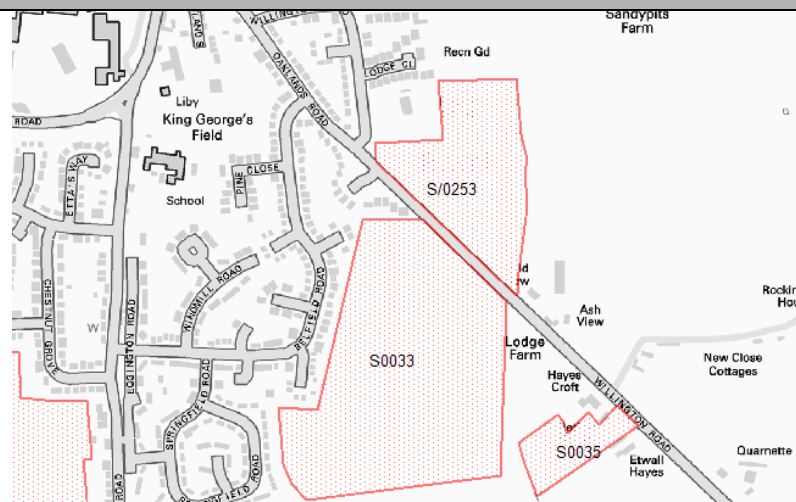

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50 to the south.

The site comprises agricultural land and residential curtilage. It extends 1.04ha and is currently in single ownership. There is low developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located 1.4km away of SD401 Toyota Balancing Pond.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not proved the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by the site promoters in respect of the likely mix proposed on site, although given the scale of the scheme and given the local plan requirements development would be expected to make provision for affordable home subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution toward the provision or expansion of healthcare facilities within km of the site. The nearest GP is located within Hilton 3.7km from the site.	
	Will it promote healthy lifestyles?		- The site is located within 1200m of the village centre and sports pitch, however is more than 1200m to Etwall Primary School.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether development would affect accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070. - Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new additional housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicated that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- There are the following local facilities within the Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house. - There is no metaled footpath adjacent to the site on Willington Road which could connect the site to the village. The nearest footpath is approximately 400m from the site on Willington Road. - The site is detached from the main built up area of Etwall. The site is in in excess of 800m of an hourly bus service between Etwall, Burton and Derby. There is a Sunday bus service every two hours	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of new education, open space and sports provision in the village. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development of the site would have on traffic congestion, although it is unlikely to be significant on a site of this size.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service between Etwall, Burton and Derby. There is a Sunday bus service every two hours. The site however is in excess of 800m from the service. - There is no metaled footpath adjacent to the site on Willington Road which could connect the site to the village. The nearest footpath is approximately 400m from the site on Willington Road. - There are no existing or proposed cycle routes adjacent to the site,	
	Will it make the best use of other infrastructure?		- There site would be serviced by Etwall WWTW , which has spare capacity, although there is no mains sewage. - There are no known water or electricity supply constraints - Super Fast broadband is available.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regnant existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation, during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is not known whether development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>Site is greenfield.</li> <li>Site is likely to include some grade Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>Site is in Flood Zone 1.</li> <li>The site contains a small area of less susceptibility to surface water flooding, however within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>The site is detached from main built up area of Etwall. The site is located in excess of 800m from an hourly bus service, however is within 1200m of the village centre. The site however is in excess of 1200m of Etwall Primary School and is more than 4km (4.3km) of an employment site greater than 10ha (Hilton Depot). The site is 3.5km from a supermarket in Hilton.</li> </ul>	<ul style="list-style-type: none"> <li>Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>No HERS sites are located within the site.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity.</li> <li>The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>There are field trees across the site from north to south.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>The site is contained by Willington Road to the east, trees and hedgerows to the north and west and trees, hedgerows and existing development to the south.</li> <li>Hedgerows, substantial areas of trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>This land parcel could contribute towards green infrastructure provision.</li> <li>Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

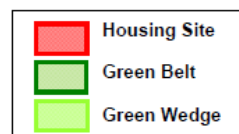

## Site xx: S0006. Land at Egginton Road, Etwall

### Description:

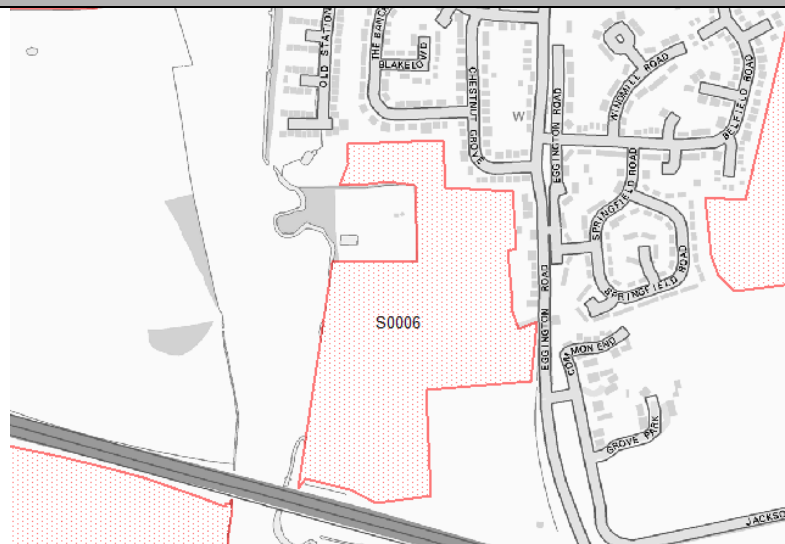

Etwall lies towards the north west of the District, and is located approximately 12km from Derby city centre and 19km and 12km to Swadlincote and Burton town centres respectively. The village is bordered by the A516 to the north and the A50 to the south.

The site comprises agricultural land. It extends 15.42ha and there is high developer interest in the site. The site is in multiple ownership, however all parties are willing to develop the site for residential use. A sewage treatment lies to the north of the site and the site slopes to the west.

### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The site is located within 300m of County Wildlife Site S201 Land off Lucas Lane, Linton Common. The County Wildlife Site however is separated from the site by the A50. - The site is located within 200m of Potential Wildlife Site AD048 Etwall Sewage Works; however the site separated from the Potential Wildlife Site by the A50.	
	Could development affect protected species or BAP priority species?	No	- BAP and protected species on site or potentially onsite include, Bats, Hedgehog, polecat, Great Crested Newt, Common Toad, Breeding Birds. There are also mature trees and BAP hedgerow.	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- Limited information held. The concept master plan for the site suggests additional planting and landscaping buffers	
	Will it protect sites of geological importance?	Yes	- The site is located within 1km of a regionally important geological site. Development of the site however would not affect the RIG.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	Yes	- Information held indicates that a mix of homes including tenure types will be located on site.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- The concept master plan for the site suggests that the site would be able to accommodate open space, in the form of 500m2 play area and an open space with play area 500m2. In addition there is open space between the housing development and the sewage treatment works.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Hilton 3.2km from the site.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- Site is located within 800m of Etwall Primary School and a sports pitch and is within 1200m of the village centre.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development.</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2.</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- Transport Assessment for the site indicates that development will not have any impact on existing road traffic accidents levels around the site</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- John Port School is nearing capacity with 1957 children attending the school which has a capacity of 2070.</li> <li>- Etwall Primary School is exceeding capacity with 279 children attending the school with a capacity of 259.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However, the impact on viability of the gradient and flood risk would need further assessment.</li> <li>- There is an identified need for affordable housing in this area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- There are the following local facilities within the Etwall: Convenience Store, Primary School, Village Hall, Dentist surgery, indoor/outdoor leisure, Post Office and public house.</li> <li>- There is a metalled footpath adjacent to the site on Egginton Road which connects the site to the village.</li> <li>- The site is adjacent to the village and is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development could make some contribution toward the provision of new education, open space and sport provision in the village.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- Development could have limited effects on the local highways network, although the TA to support the planning application indicate that these can be mitigated.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 400m of an hourly bus service between Etwall and Derby. There is a Sunday bus service every two hours.</li> <li>- There is a metalled footpath adjacent to the site on Egginton Road which connects the site to the village.</li> <li>- An established greenway runs along the western boundary of the site.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There site would be serviced by Etwall WWTW, which has spare capacity.</li> <li>- There are no known water and electricity supply constraints</li> <li>- Super Fast broadband is available.</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Etwell and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not generate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. To date information to support an outline application have been submitted.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield so there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation, during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout showing this information)	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>It is not known whether development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Site is adjacent to a Severn Trent Waste Water Treatment Works</li> <li>- Based on odour assessment included in the planning application for the site it is concluded that it is unlikely that an unacceptable odour impact from the STW will occur at the proposed site during normal operating and maintenance conditions</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> <li>- Development could lead to increase noise complaints as a result of the proximity of sites to the site to the A50. Subject to design new dwellings could be reduced sufficiently to achieve internal and external noise levels</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield</li> <li>- No land has been identified as being BMV land in the agricultural land classification report submitted with the planning application.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The majority of the site lies within flood zone 1. The westernmost part of the site lies within Flood Zones 3a and 2, although this does not form part of the application for new homes</li> <li>- The westernmost and northernmost part of the site contains areas of less, intermediate and more susceptibility to surface water flooding. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs, primary school and secondary school provision. The site is located with 1200m of the village centre and within 400m of an hourly bus service. The site is 3.2km from a supermarket in Hilton and 4km from the nearest employment site over 10ha (Hilton Depot).</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of the village conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site, However HERS19804 Etwall Ridge and Furrow is located just over 100m to the west of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The majority of the site is located within the lower sensitivity according to the County Council's Areas of multiple environment sensitivity. However a small section of the western boundary of the site (set aside for landscaping) is located within secondary sensitivity...</li> <li>- The site is located within the Trent Valley Washland Landscape Character Area.</li> <li>- There are field trees located within the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing development to the north, existing development and Egginton Road to the east, trees and the A50 to the south and Etwall Brook and trees to the west.</li> <li>- Hedgerows, substantial areas of trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding detailed design and layout.</li> </ul>	

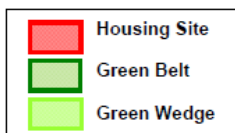

## Site 32: S0203. Land west of Station Road, Hatton

### Description:

The site is located on the north west of Hatton village, which is around 15 km to Derby city centre and just over 17 km to Swadlincote town centre. The A511 runs along the northern boundary of the site, which accesses the A50 to the west.

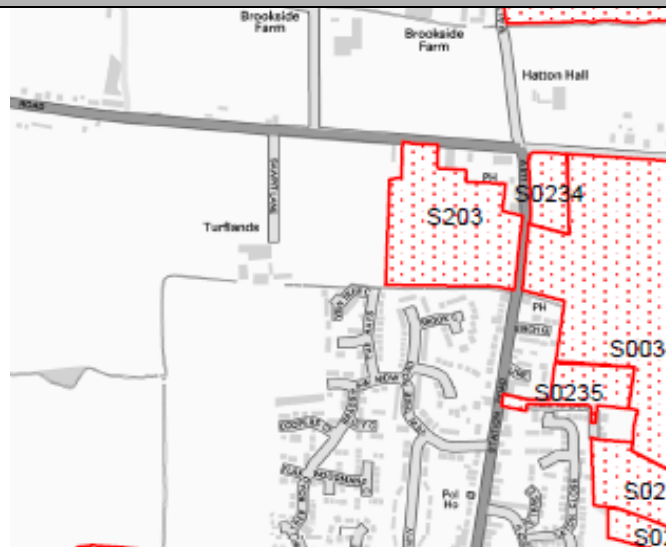

The site extends some 3.6ha, however it has been suggested that the developable area of the site is 2.8ha. The site is currently in single ownership and there is a high level of developer interest on the site.

### Key

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km away of SD203 Pennywaste Wood. - Potential Wildlife Site R6237 Yew Tree Farm Brook is located along the southern boundary and partly within the south boundary of the site.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of the likely mix of on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in 1.9km from the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m of key services including school, sports pitch and village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from the site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port at Etwell, which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is located within Hatton, which is nearing capacity with 237 pupils attending the school with a capacity of 240.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is a known need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located away from the existing village. - Bus stops are located close to the site on Station Road (within 400m). The service provides an hourly service to Derby and Burton and a service every two hours on Sundays. - There are some local facilities, including a primary school, convenience store, village hall, outdoor leisure, post office and public house. - The site is within 1200m of the village Centre, although there are a number of shops/facilities located within 800m of the site. - There is a footpath adjacent to the site on Station Road, which would connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Small scale growth could help to support the provision of health, open space and sports provision. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by the site promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion, although the delivery of a new road to service Hatton as part of the Local Plan Part 1 Should help improve congestion locally.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly service between Hatton and Burton and Derby - There is a footpath adjacent to the site on Station Road, which would connect the site to the village. - There are PROW through the site. - There is a greenway within 800m of the site	
	Will it make the best use of other infrastructure?		- There are known capacity issues of electricity distribution in this area and development could require improvements to local distribution network. - Development may also require improvements to the local water supply network, which would be serviced by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or sewage network - Super Fast broadband expected 2015	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hatton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have asignificant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is mainly in Flood Zone 3a for the River Dove</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding</li> <li>- Site could generate additional contributions towards flood defences around the village, however recent modelling work on the Salt Brook indicates that a number of culverts under Station Road, could if blocked lead to significant flooding within the site with water depths in this area ranging from approximately 10-20cm on average, reaching up to approximately 40cm immediately upstream of the Station Road.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is within 400m of an hourly bus service, and within 1200m of the village centre and primary school. The site is within 2km of a major employment area (greater than 10ha) (located within Hatton)</li> <li>- Secondary School provision is 5.8km away and the nearest supermarket is located within Hatton.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- No HERS sites are located within the site. However HERS20309 is locates adjacent to the site, however separated by Station Road.</li> <li>- Impacts could be dependent on the detailed design and layout if the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Station Road to the east and Uttoxeter Road to the north, with existing landscape elements such as hedgerows and field trees to the west and east and existing development to the south of the site.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site xx: S0171. Land at Breach Lane- Malhouse Lane, Hatton

### Description:

The site is located on the north west of Hatton village, which is around 15 km to Derby city centre and just over 17 km to Swadlincote town centre.

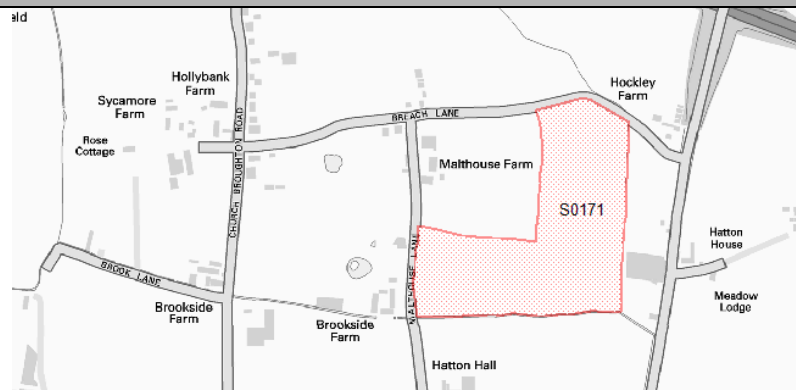

The site comprises of agricultural land. It extends some 7.14ha and is currently is single ownership. There is low developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km away of SD203 Pennywaste Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of the likely mix of on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would make a contribution to on-site open space and leisure provision, but no contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in 2.4km from the site.	
	Will it promote healthy lifestyles?		- Site is within excess of 1200m of key services including school, sports pitch and village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from the site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development would have on accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port at Etwell, which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is located within Hatton, which is nearing capacity with 237 pupils attending the school with a capacity of 240.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is a known need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Bus stops are located within 400m. The service provides an hourly service to Derby and Burton and a service every two hours on Sundays. - There are some local facilities, including a primary school, convenience store, village hall, outdoor leisure, post office and public house. - The site is in excess of 1200m of the village Centre. - There are no footpaths adjacent to the site, which could connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Small scale growth could help to support the provision of health and education. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by the site promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly service between Hatton and Burton and Derby - There is no footpath adjacent to the site, which could connect the site to the village. - There are PROW through the site from west to east - There are no greenways adjacent to this site.	
	Will it make the best use of other infrastructure?		- There are known capacity issues of electricity distribution in this area and development could require improvements to local distribution network. - Development may also require improvements to the local water supply network, which would be serviced by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or sewage network - Super Fast broadband expected 2015	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hatton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Part of the site lies within Flood Zone 2.</li> <li>- Within the majority of the site there is no indication of surface water flooding. However the site does contain areas less susceptible to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- New housing development is likely to lead to an increase in energy use in aggregate terms, home in villages could perform less well in respect of this objective due to increased reliance on private transport to access local services and facilities.</li> <li>- The site is within 400m of an hourly bus service; however is in excess of 1200m of the village centre and primary school. The site is within 2km of a major employment area (greater than 10ha) (located within Hatton)</li> <li>- Secondary School provision is 6.1km away and the nearest supermarket is located within Hatton.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archaeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- No HERS sites are located within the site.</li> <li>- Impacts could be dependent on the detailed design and layout if the scheme in particular buildings to malt house lane</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is by existing landscape features such as roads and trees and hedgerows.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1da

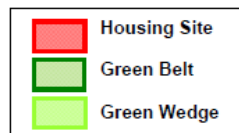

## Site xx: S0152. Scropton Road, Hatton

### Description:

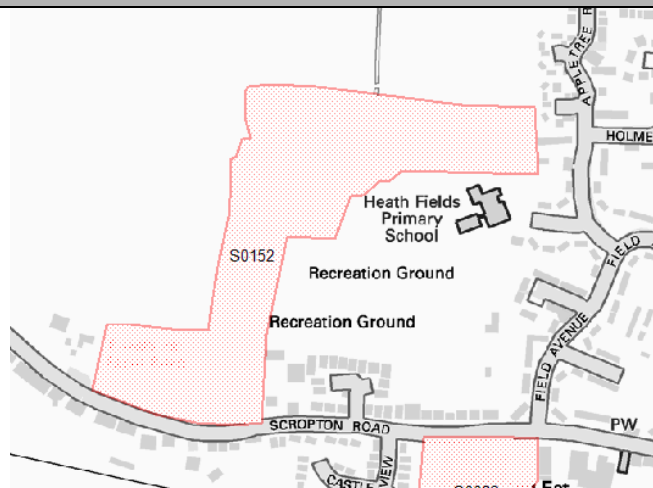

The site is located on the south west of Hatton village, which is around 15 km to Derby city centre and just over 17 km to Swadlincote town centre.

The site comprises agricultural land. It extends some 5.52ha and is currently in one ownership. There is high developer interest.

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km away of SD203 Pennywaste Wood.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of the likely mix of on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a contribution towards improving open space and leisure provision both on-site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make no contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in 1.4km from the site.	
	Will it promote healthy lifestyles?		- Site is within 800m of key services including school, sports pitch and village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of the development. - There are no identified impacts from the site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port at Etwell, which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is located within Hatton, which is nearing capacity with 237 pupils attending the school with a capacity of 240.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is a known need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located adjacent to the existing village. - Bus stops are located within 800m on Station Road. The service provides an hourly service to Derby and Burton and a service every two hours on Sundays. - There are some local facilities, including a primary school, convenience store, village hall, outdoor leisure, post office and public house. - The site is within 800m of the village Centre. Although there is no footpath immediately adjacent to the site. The closest footpath is on the opposite side of Scropton Road.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Small scale growth could help to support the provision of health, open space and sports provision. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by the site promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on traffic congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly service between Hatton and Burton and Derby within 800m of the site. - There is no footpath immediately adjacent to the site. The closest footpath is on the opposite side of Scropton Road. - There is an existing PROW along part of the eastern boundary of the site - There is no existing or proposed greenway adjacent to the site.	
	Will it make the best use of other infrastructure?		- There are known capacity issues of electricity distribution in this area and development could require improvements to local distribution network. - Development may also require improvements to the local water supply network, which would be serviced by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or sewage network - Super Fast broadband expected 2015	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hatton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have a significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = Yes</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 3a and 2</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding</li> <li>- Development could contribute towards maintaining flood defences around the village and could help reduce flood risk locally.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is within 800m of an hourly bus service, and within 800m of the village centre and large scale employment provision is located within the village.</li> <li>- Secondary School provision is 7.2km away and the nearest supermarket is located within Hatton</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- However HERS20112 Cropmark Complex is located within the site.</li> <li>- Impacts could be dependent on the detailed design and layout if the scheme.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Scropton Road to the south, trees and hedgerows to the north and west and part of the eastern boundary of the site is contained by existing development and hedgerows.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

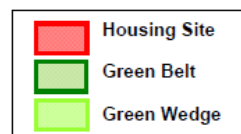

## Site 41: S0236. Site at Derby Road, Hilton

### Description:

Hilton lies to the north west of the District. The village is 14 km to Derby and 16km to Swadlincote.

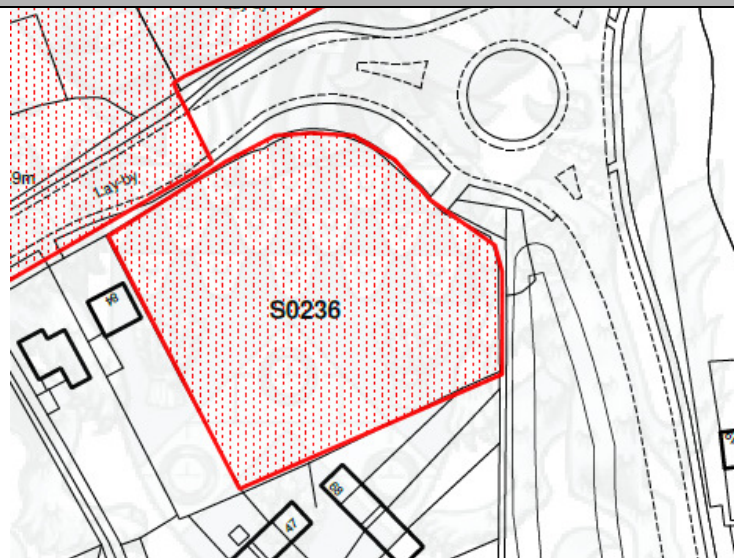

The site comprises a paddock area. It extends some 0.43ha, is currently in single ownership and there is high developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is located within 1km of a Site of Special Scientific Interest, although the site is located to the north of the A50 and A516 interchanges.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located over 1km away at SD067 Etwall Railway Pond.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. This is reinforced by ecological appraisal of the site in support of application 9/2013/0111	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- Supporting evidence submitted with outline planning application 9/2013/0111 states that any additional planting required will be as part of a landscaping scheme submitted at reserved matters.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- No affordable housing is proposed with granted outline permission 9/2013/0111.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- Outline planning permission proposes only 4 bed dwellings.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make limited contribution towards improving open space and leisure provision within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development could make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Hilton 700m from the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m of key services including primary school, sports pitch and village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- The development will have no impact in respect of road safety according the transport note submitted with the planning application for the scheme.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - A new primary school is proposed on the consented Hilton Depot Site	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- Outline permission 9/2013/0111 proposes no affordable housing on the site. Due to the sites size development would not be required to provide affordable housing. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Bus stop is within 400m of bus stop V1, which provides an hourly service to Burton and Derby and an evening and weekend bus service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house. - There is a footpath adjacent to the site on Derby Road which would connect the site to the existing village.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Developers of outline permission 9/2013/0111 offers contributions for education, health and off site open space provision. Additional development in Swadlincote could help to support existing bus services.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- The site will have no significant impact on highway congestion due to the minimal scale of the development proposal. This is conformed in transport note supporting planning submission.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Bus stop is within 400m of bus stop V1, which provides an hourly service to Burton and Derby and an evening and weekend bus service. - There is a footpath adjacent to the site on Derby Road which would connect the site to the existing village. - There is no greenway adjacent to the site.	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and surrounding villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site. Outline permission 9/2013/011 does not propose additional shops or services on site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding design of dwelling can construction materials have been suggested by site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout providing this information).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan..</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to represent Grade 3 good to moderate quality agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1 and will have no discernible impact on flood risk.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan. In accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is within 1200m of most local services and facilities.</li> <li>- The site is located within 400m an hourly bus service; however is in within 1200m to the village centre.</li> <li>- The site is within 2km of an employment area greater than 10ha, at Hilton Depot.</li> <li>- The site is 0.7km from a supermarket within Hilton and John Port Secondary School is 2.4 from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent valley washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing development including roads and housing development and by hedgerows and trees.</li> <li>- There are hedgerows within the site.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout. Reserved matters of application 9/2013/0111 would address landscaping of the site.</li> </ul>	

Version 1a

## Site 40: S0224. Site at Elm Tree Farm, Lucas Lane, Hilton

### Description:

Hilton lies to the north west of the District. The village is 14 km to Derby and 16km to Swadlincote.

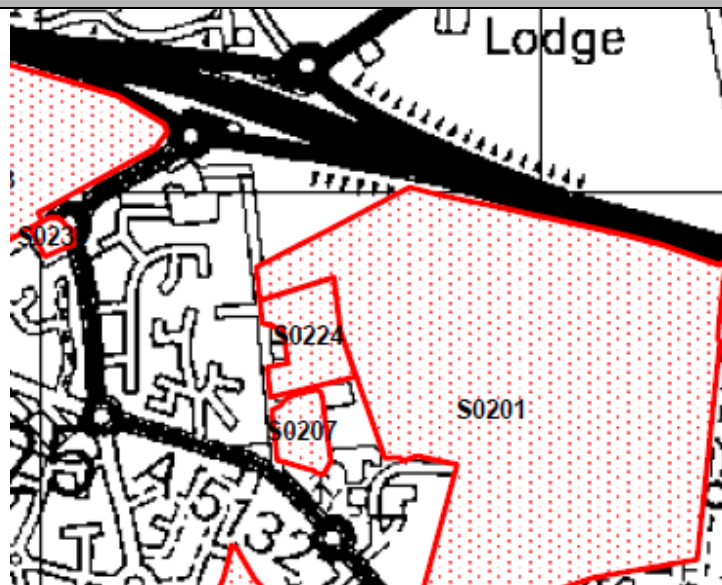

The site comprises pasture lane. It extends some 2.84ha and is currently in single ownership. There is low developer interest.

MAP IS NOT TO SCALE NORTH 

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is located within 1km of a Site of Special Scientific Interest.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 700m of SD067 Etwall Railway Road. - Potential Wildlife Site SD R260 Elm Tree Farm Meadow is located immediately to the north of the site.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make an on-site contribution toward open space or recreation provision.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Hilton within 900m of the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m of key services including village centre and primary school, however is in excess of 1200m from a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - A new primary school is proposed as part of the consented Hilton depot Housing Scheme	- Continue liaising with local Schools and LEA to establish impact. - Ensure Development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However, the impact on viability of the potential contamination would require further assessment. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from the main built up area of Hilton. Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service). There is no evening and weekend service. Bus Stop for V1 is within 1200m away. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house all within 1200m. - There is a footpath adjacent to the site on Lucas Lane, which would connect the site to the existing village. An established greenway lies within 600m to the south	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education, open space and sports provision and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by the site promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service to Burton and Derby within 400m of the site, which does not provide an evening and weekend service. Bus Stop for V1 is within 1200m of the site and provides an evening and weekend service. - There is a footpath adjacent to the site on Lucas Lane, which could connect the site to the existing village. - An established greenway lies within 600m to the south	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Part of the site is located within the Nitrate Vulnerable Zone.</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is in Flood Zone 1.</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m an hourly bus service; however is in within 1200m to the village centre. The site is within 2km of an employment area greater than 10ha, at Hilton Depot.</li> <li>- The site is 0.9m from a supermarket within Hilton and John Port Secondary School is 3.4 from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- It is unclear if there is potential for below surface archaeology on this site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE1, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- There are trees and hedgerow located within the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as hedgerows and field trees. And Lucas Lane to the west.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

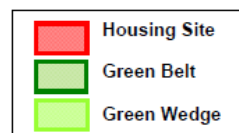

## Site 39: S0207. Site at Hargate Lodge, Lucas Lane, Hilton

### Description:

Hilton lies to the north west of the District. The village is 14km to Derby and 16km to Swadlincote.

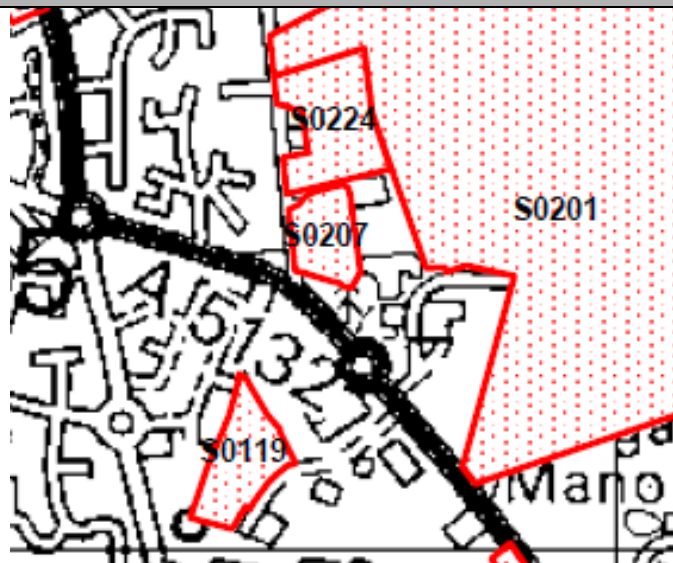

The site comprises a dwelling and its curtilage. The site 1.48ha, of which, 1.44ha of the site is greenfield and 0.04ha of the site is brownfield (extent of existing dwelling house). The site is currently in single ownership and there appears to be no developer interest on the site currently.

### Key

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is located within 1km of a Site of Special Scientific Interest.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located within 600m of SD067 Etwall Railway Road. - Potential Wildlife Site SD903 Lucas Lane Pond, is located within the southern edge of the site.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision both on site and within 1200m of the site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Hilton within 800m of the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m of key services, including primary school, sports pitch and village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils - A further primary school is proposed on the consented Hilton Depot Site.	- Continue liaising will local Schools and LEA to establish impact. - Ensure Development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is located adjacent to the existing village. Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service), which does not provide an evening and weekend service. Bus Stop for V1 is within 1200m away and provides evening and weekend service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house within 1200m of the site. - There is a metalled footpath adjacent to the site on Lucas Lane and Egginton Road, which could connect the site to the village.	- Ensure development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education, open space and sports provision and healthcare, Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is unlikely that development on this scale would have any significant impact on highway congestion	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service), which does not provide an evening and weekend service. Bus Stop for V1 is within 1200m away which provides evening and weekend service. - There is a metalled footpath adjacent to the site on Lucas Lane and Egginton Road, which could connect the site to the village - There is no greenway adjacent to the site, although one lies within 500m, to the south..	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involves in marketing and selling new homes locally during site build out. Would have mess significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/pr otect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The majority of the site is greenfield and development of the site will not regenerate the area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield, there is potential (however very limited) to reuse waste materials on site from the existing dwelling, during the construction phases. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Esure development conform to emerging policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is potential (however very limited) to reuse demolition waste from the existing dwelling on the site. Although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality agricultural land.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- The site contains a small area of less and intermediate susceptibility to surface water flooding. However there is no indication of surface water flooding on the majority of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- Development of the greenfield part of the site would be expected to mimic greenfield runoff rates. Redevelopment of the brownfield part of the site would normally be expected to result in a reduction in run off rates, although this will be dependent upon detailed design.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m an hourly bus service and is within 1200m of most village services and facilities. The site is within 2km of an employment area greater than 10ha, at Hilton Business Park.</li> <li>- The site is 0.8km from a supermarket within Hilton and John Port Secondary School is 3.2km from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development may affect the setting of Hargate farmhouse a listed building.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflect policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield. 0.04ha is brownfield and 1.44ha is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- The site contains field trees and a pond.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as hedgerows and field trees and by Egginton Road to the south and Lucas Lane to the west.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

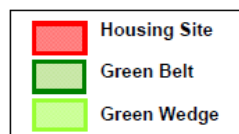

## Site xx: S0201.Land off Lucas Lane, Hilton

### Description:

Hilton lies to the north west of the District. The village is 14 km to Derby and 16km to Swadlincote.

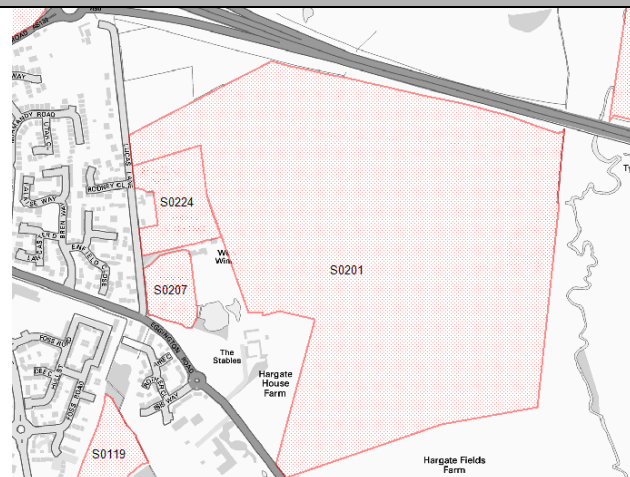

The site comprises agricultural land. It comprises 50.4ha and is currently in single ownership. There is medium developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is located within 1km of a Site of Special Scientific Interest, although the site is located to the north of the A50 and A516 interchanges.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- County Wildlife Site SD067 Etwell Railway Pond is located within the eastern side of the site. - Potential Wildlife Site SD R260 Elm Tree Farm Meadow is located within the north west of the site and Potential Wildlife Site SD040 Etwell Sewage Works is located within 50m of the eastern boundary of the site.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not provided the Council with a site a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- The site is located more than 600m from the nearest Regionally Important Geological Site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?		- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a significant contribution towards improving open space and leisure provision on site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution toward the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located in Hilton within 110m of the site.	
	Will it promote healthy lifestyles?		- Site is in excess of 1200m from key services including village centre, primary school and a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - Additional primary school to be built in the village as part of the consented Hilton Depot Site.	- Continue liaising with local Schools and LEA to establish impact. - Ensure Development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service), which does not provide an evening and weekend service. Bus Stop for V1 is within 1200m away, which provides an evening and weekend bus service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house, although most of these are more than 1200m away by road or on foot. Additional facilities including a leisure centre and library, exist in Etwell, although these too are more than 1200m from the centre of the site. - There is a footpath adjacent to the site on Egginton Road which would connect the site to the existing village. An established greenway forms the eastern boundary of the site, connecting to the centre of Hilton and to Etwell and Derby.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards education and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by the site promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service to Burton and Derby within 400m of the site, which does not provide an evening and weekend service. Bus Stop for V1 is within 1200m of the site and provides an evening and weekend bus service. - There is a footpath adjacent to the site on Egginton Road which would connect the site to the existing village. - An established greenway forms the eastern boundary of the site.	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conforms to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have a significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development although post development noise generation would be consistent with nearby land uses. However proximity to the A50 could increase noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield.</li> <li>- Agricultural land classification maps indicate that the site is lower quality agricultural land and is grade 3b across the site.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The majority of the site is located within flood zone 1, however a small amount of the eastern boundary of the site is located within flood zone 2 and 3a.</li> <li>- There is no indication of surface water flooding within the majority of the site. However the site does contain areas of less, intermediate and more susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m an hourly bus service; however is in within 1200m to the village centre. The site is within 2km of an employment area greater than 10ha, at Hilton Business Park. The nearest supermarket, At Hilton, is some 1.6km from the centre of the centre of the site. John Port Secondary School is some 1.9km from the centre of the site by greenway.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development could affect the setting of Hargate farmhouse a listed building.</li> <li>- Hargate Lodge appears on 1<sup>st</sup> edition OS and may be a heritage asset</li> <li>- HERS19804 Etwell Ridge and Furrow is located within the north east of the site.</li> <li>- Development will have unknown effects</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE1, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing development and hedgerows and field trees. And the A50 to the North, existing development and Lucas Lane to the east.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

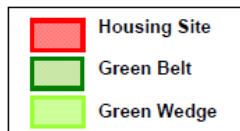

## Site 37: S0119. Land off Egginton Road, Hilton

### Description:

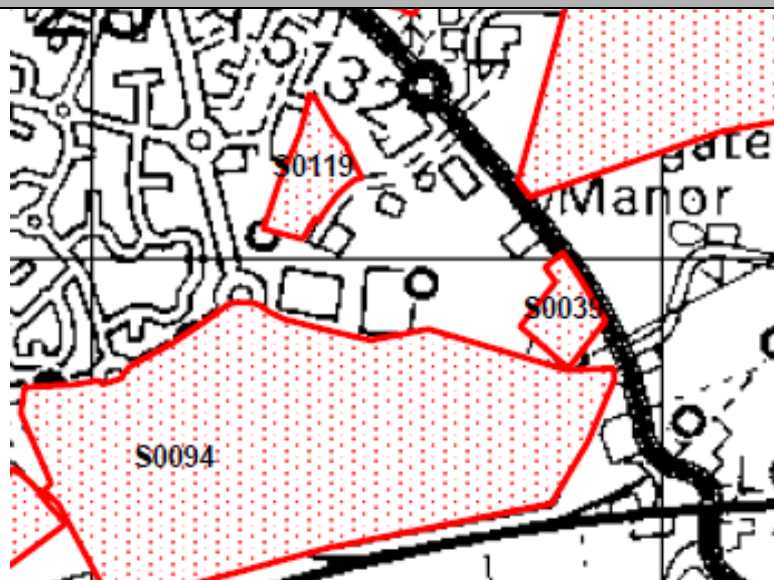

Hilton lies to the north west of the District. The village is 14 km to Derby and 16km to Swadlincote.

The site is currently vacant land, however forms part of the former MOD depot. The site is brownfield and extends up to 2.3ha, however it has been suggested that 2ha is developable. The site is in single ownership and there is high developer interest.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation. The site however is located within 1100m of a Site of Special Scientific Interest.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is located over 600m away at SD335, Egginton Junction Gravel Pit.	
	Could development affect protected species or BAP priority species?		- Potential Wildlife Site SD383 Don Amotts Site covers the site.	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No records held indicating protected or BAP species within 100m of the site. <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it protect sites of geological importance?		- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- There is no regionally important geological site within this area or within 1km of the site.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?		- Site could contribute towards the delivery of affordable housing to meet local needs.	
	Will it improve the suitability of new homes for older and/disabled groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it provide sufficient housing to meet existing and future need?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it reduce the number of unfit or empty homes?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it meet the needs of travelling show people?		- Site will not bring empty homes back into use or improve unfit homes.	
			- Site would be unlikely to include provision for travelling communities.	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development could make a limited contribution towards improving open space and leisure provision on site and within 1200m of the site.	- Ensure new development conforms with the policy INF9 of the Part 1 Local Plan.
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 1.2km of the site. The nearest GP is located within Hilton 620m from the site. (This distance is however subject to a footpath from the site to Foss Road, the distances to the key services would increase).	
	Will it promote healthy lifestyles?		- Site is within 800m of a sports pitch, and 1200m of a primary school and village centre. However if there is no footpath from the site to Foss Road, the distances to the key services would increase.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known whether development will affect accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - A further primary schools will be built as part of the consented Hilton Depot scheme.	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is adjacent to the existing village. Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service), which does not provide an evening and weekend service. Bus stop for V1 is within 1200m of the site, which provides and evening and weekend service. (These distances are however subject to a footpath from the site to Foss Road, the distances to the key services would increase) - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house. - There is a metalled footpath on Foss Road which could connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward the provision of education, open space and sports provision and healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what affect development will have on highway congestion.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it increase the proportion of journeys using modes other than cars?		- The site is adjacent to the existing village. Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service), which does not provide an evening and weekend service. Bus stop for V1 is within 1200m of the site and provides and evening and weekend service. (These distances are however subject to a footpath from the site to Foss Road, the distances to the key services would increase). - There is a metalled footpath on Foss Road which could connect the site to the village. - Site lies adjacent to an established greenway and this can be used, together with connecting metalled paths, to access most village services	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in Part 2 Local Plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- Whilst the site is brownfield, there appear are no existing buildings contained within the site. Therefore, the proposed development will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- Despite the site being brownfield, there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The site is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- The site contains small area of less susceptibility to surface water flooding. However within the majority of the site there is no indication of surface water flooding.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- Site will include a sustainable drainage system that mimics natural drainage and seeks to attenuate and release water on site.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m of an hourly bus service; however is within 1200m to the village centre. Site lies adjacent to a major employment site. The site is 0.5km from a supermarket within Hilton and John Port Secondary School is 3.2km from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation, especially after 2016, when new homes may need to incorporate on site renewables to achieve zero carbon status.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed building.</li> <li>- No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is brownfield and is currently vacant.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> <li>- TPO 253 is located along the northern and western boundary of the site.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by substantial trees to the north of the site and hedgerows, field trees and existing development to the east and west. It is necessary for the designation of Tree Preservation Orders (TPO's) to be assessed on site.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

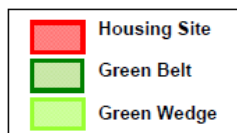

## Site 36: S0039. Land adjacent to the Mandarin, Egginton Road, Hilton

### Description:

Hilton lies to the north west of the District. The village is 14 km to Derby and 16km to Swadlincote.

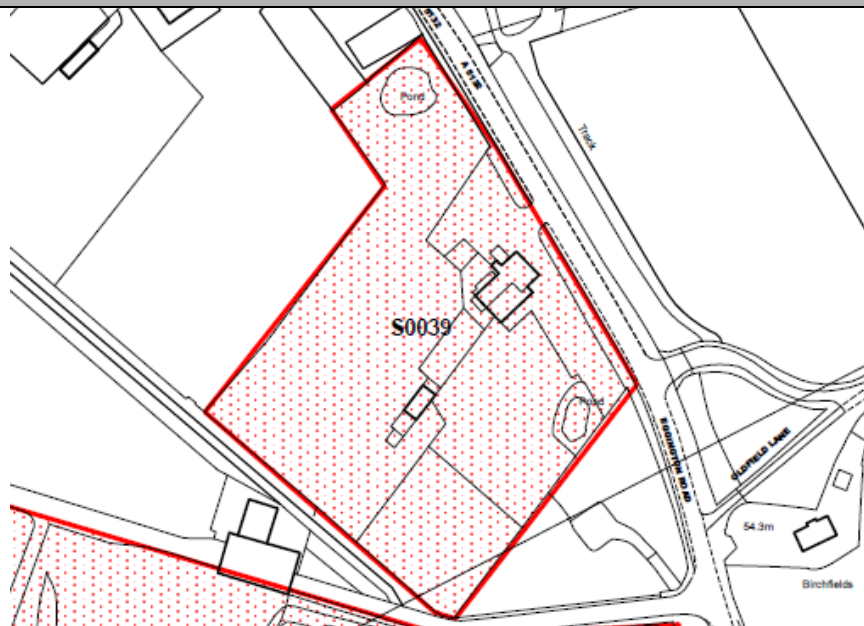

The site is a predominantly greenfield site, which contains a restaurant. It extends come 1.44ha, however the site area that is developable is 1.22ha (the restaurant would be retained). The site is currently in multiple ownership, but the owners are willing to develop the site for residential use and there is a high level of developer interest.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 400m of SD335 Egginton Junction Gravel Pit. - Potential Wildlife Site SD383 Don Amotts site is within 250m of the site.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site. However the closeted regionally important geological site is just over 1km away.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development would make a limited contribution towards improving open space and leisure on-site.	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would make some contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located within Hilton 1.3km from the site.	
	Will it promote healthy lifestyles?		- Site is within 1200m key services, including sports pitch, primary school and the village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by the detailed design and layout of development. - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - A further primary school will be constructed on the consented Hilton Depot Site	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However, the impact of the physical constraints on viability would need further assessment. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is detached from the main built up area of Hilton. Bus stop is within 400m of V2 bus service to Burton and Derby (an hourly service), which does not provide an evening and weekend service. Bus Stop for V1 is over 1200m away, which provides and evening and weekend service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house, although most lie further than 1000m from the site. - It is possible to reach the shops at the village centre using the adjacent greenway and metalled footpath.	- Ensure Development reflects policy Inf2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution towards the provision of healthcare. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it increase the proportion of journeys using modes other than cars?		- There is an hourly bus service to Burton and Derby within 400m of the site, which does not provide an evening and weekend service. Bus Stop for V1 is over 1km away, which provides and evening and weekend service. - It is possible to reach the village centre and other facilities via the greenway and metalled footways. - There is an established greenway adjacent to the site.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

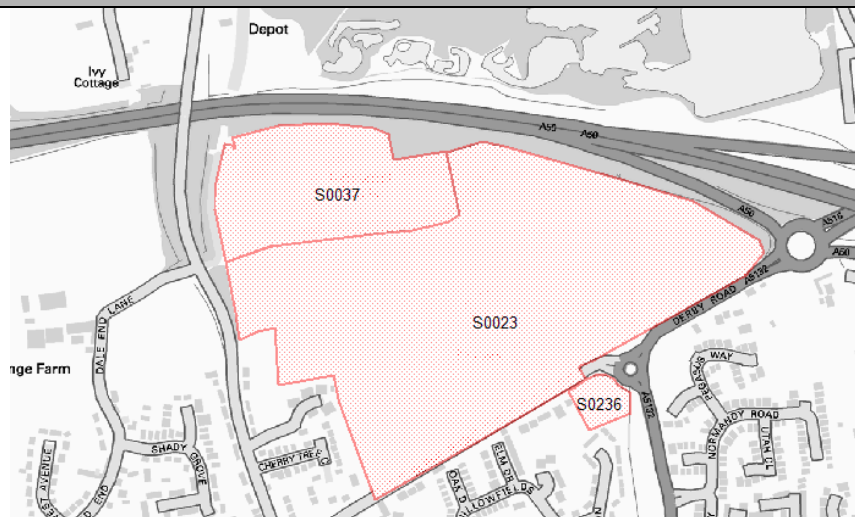

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other business involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employments sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The developable area of the site is greenfield and therefore will not regenerate the existing built up area. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The developable area of the site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conforms to emerging policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond the minimum standards set out in the building regulations .	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There developable area is greenfield and there is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not known whether development will have a significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase in noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- The developable area of the site is greenfield.</li> <li>- Site is likely to be Grade 3 good to moderate quality, and Grade 4 poor quality, agricultural land</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site lies within Flood Zone 1</li> <li>- The site contains a small area of less and intermediate susceptibility to surface water flooding (within the north of the site. However there is no indication of surface water flooding within the majority of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m an hourly bus service; however is in excess of 1200m to the village centre. The site is within 2km of an employment area greater than 10ha, at Hilton Depot.</li> <li>- The site is 1km from a supermarket within Hilton and John Port Secondary School is 2.4 from the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The developable area of the site is greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by Egginton Road to the east, an unnamed road to the south and partially contained by hedgerows to the east and west.</li> <li>- The site is contained by existing landscape elements, such as hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

**Description:**

The site comprises an industrial estate and is brownfield land. The site extends some 4.72ha and is currently in single ownership. There is high developer interest.

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?		- The site is within 1km of Hilton Gravel Pits Site of Special Scientific Interests (SSSI), although this is located to the north of the A50.	<ul style="list-style-type: none"> <li>- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible in accordance with BNE3.</li> </ul>
	Will it conserve and enhance locally important non-statutory wildlife sites?		- The closest site of local importance for nature conservation (County Wildlife Site) is over 1km away at SD065 Willowpit Pond.	
	Could development affect protected species or BAP priority species?		- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?		- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?		- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?		- Site could contribute towards the delivery of affordable housing to meet local needs	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20</li> </ul>
	Will it increase the range and affordability of housing for all social groups?		- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?		- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?		- The site could contribute to overall housing need in combination with other developments in South Derbyshire and could be deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?		- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of gypsies or travelling show people?		- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development on this scale could make a contribution towards improving open space and leisure provision both on-site and within 1200m of the site	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would contribute to the delivery of new healthcare facilities or support the expansion of facilities within 3km of the site. The nearest GP is located within Hilton, 1400m from the site.	
	Will it promote healthy lifestyles?		- Site is within 800m of key services including school and village centre; however is within 1200m of a sports pitch.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - A further primary schools is planned as part of the consented Hilton Depot site	- Continue liaising will local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. However potential contamination from the existing use would need further investigation to understand the impact on viability. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is within 800m of an hourly bus service to Burton and Derby, which provides an evening and weekend service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house. - There is no metalled footpath adjacent to the site, which could connect the site to the village.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward new education, open space and sports provision and health. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development will have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is within 800m of an hourly bus service to Burton and Derby, which provides an evening and weekend service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house. - There is no cycle route adjacent to the site.	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and could create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth could help sustain existing shops and other businesses located within Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is brownfield and will generate the site. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is brownfield and there is potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- The site is brownfield and there is potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. <b>Add data on minerals safeguarding issues on receipt</b>	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not clear whether the development would deliver water quality benefits.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- The proximity of the site to the A50 could increase noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is brownfield</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is within flood zone 1</li> <li>- There is no indication of surface water flooding within the majority of the site. However there are small areas of less and intermediate susceptibility to surface water flooding*</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- *Redevelopment of brownfield sites would normally be expected to result in a reduction in run-off rates, although this will be determined by the detailed design of the scheme.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 800m an hourly bus service and the village centre. The site is within 2km of an employment area greater than 10ha, at Hilton Depot.</li> <li>- The site is 1.2km from a supermarket within Hilton and John Port Secondary School is 3.2 from the site</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation,</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- No listed buildings or other heritage assets are likely to be affected by the development of this site.</li> <li>- No HERS sites are located within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing development and the A50.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		- Development on this scale could make a contribution towards improving open space and leisure provision both on-site and within 1200m of the site	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- Development would contribute to the delivery of new healthcare facilities or support the expansion of facilities within 1.2km of the site. The nearest GP is located within Hilton, 760m from the site.	
	Will it promote healthy lifestyles?		- Site is within 800m of key services including school, sports pitch and village centre.	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		- Impacts would be uncertain and would be largely determined by detailed design and layout of development - There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2
	Will it reduce the number of people involved in accidents?		- It is not known what impact development will have on accident numbers.	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity with 1957 pupils attending the school with a capacity of 2070. - The nearest primary school is Hilton Primary School, which is exceeding capacity with 845 pupils attending the school with a capacity of 770 pupils. - An additional primary school will be developed in the village as part of the consented Hilton Depot site.	- Continue liaising with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective. - Development of this specific site is unlikely to create long term jobs and in turn improve the skills of local people.	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would provide opportunity to deliver new affordable housing in this area most likely at around 30% on sites of over 15 dwellings subject to wider viability issues, although the site SHLAA prepared by the Authority indicates that the site could be viable for housing development. - There is an identified need for affordable housing in this area	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		- The site is adjacent to the existing village. The site is within 400m of an hourly bus service to Burton and Derby, which provides an evening and weekend service. - There are good local service facilities within the village: convenience store, primary school, village hall, doctor's surgery, outdoor leisure facilities, post office and public house. - There is a metalled footpath adjacent to the site on Derby Road which could connect the site to the surrounding area.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Development could make some contribution toward new education, open space and sports provision and health. Development on this scale is unlikely to deliver improved public transport provision but could help sustain existing services. - No information regarding site services or facilities has been provided in respect of this site by promoters.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		- It is not known what impact development would have on highway congestion.	- Requirements for Green Travel Plans, or other measures to secure non-car travel.
	Will it increase the proportion of journeys using modes other than cars?		- The site is adjacent to the existing village. The site is within 400m of an hourly bus service to Burton and Derby, which provides an evening and weekend service. - There is a metalled footpath adjacent to the site on Derby Road which could connect the site to the surrounding area. - There's an existing PROW within the site within the site to the east. - The site lies adjacent to an off-highway cycle route.	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband expected 2015.	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could provide limited support to the construction industry and other businesses involved in marketing and selling new homes locally during site build out. Would have less significant benefits following site build out.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and could create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth could help sustain existing shops and other businesses located within Hilton and nearby villages.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Site is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not predominantly greenfield and will not regenerate existing built up area. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is predominantly greenfield. There may be potential for very limited reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- The site is predominantly greenfield, there may be very limited potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is not clear whether the development would deliver water quality benefits.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and use, although given the scale and nature of development impacts are unlikely to be significant.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to a slight temporary increase noise levels locally during site development, although post development noise generation would be consistent with nearby land uses.</li> <li>- The proximity of the site to the A50 could increase noise complaints.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield</li> <li>- Agricultural land classification maps indicate the greenfield element of the site is lower quality agricultural land and is grade 3b across the whole site.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1</li> <li>- Within the majority of the site there is no indication of surface water flooding. However the site contains small areas of less and intermediate susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- The previously undeveloped part of the site will be expected to emulate greenfield runoff rates. Previously developed areas are normally expected to result in a reduction in run-off rates</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is located within 400m an hourly bus service; however is within 800m of a village centre. The site is within 2km of an employment area greater than 10ha, at Hilton Depot.</li> <li>- The site is 0.7km from a supermarket within Hilton and John Port Secondary School is 2.4 from the site</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of nay listed building</li> <li>- No HERS sites are located within the site.</li> <li>- Impacts could be dependent on the detailed design and layout of the scheme</li> <li>- Potential impact on heritage assets on Derby road could be mitigated through design and layout,</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact. No notable opportunities to improve access to local heritage have been identified.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is predominantly greenfield. 18ha of the site is greenfield and 0.64ha of the site is brownfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of Multiple Environmental Sensitivity</li> <li>- The site is located within the Trent Valley Washlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing development and the A50.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site 9: S0014 Land South of the Mease Hilton.

### Description:

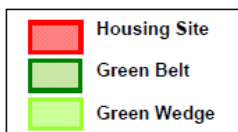

Potential Strategic sites are located on the outskirts of Hilton to the north, east and south.

This site comprises of agricultural grazing land and extends some 23.1ha. The site is largely defined by natural features such as filed boundaries or watercourses, although to the north it lies adjacent to the Mease.

The site is largely located in an area of high flood risk, although the completion of recent flood defences will protect the site from flood events up to and including 1:100 year events.

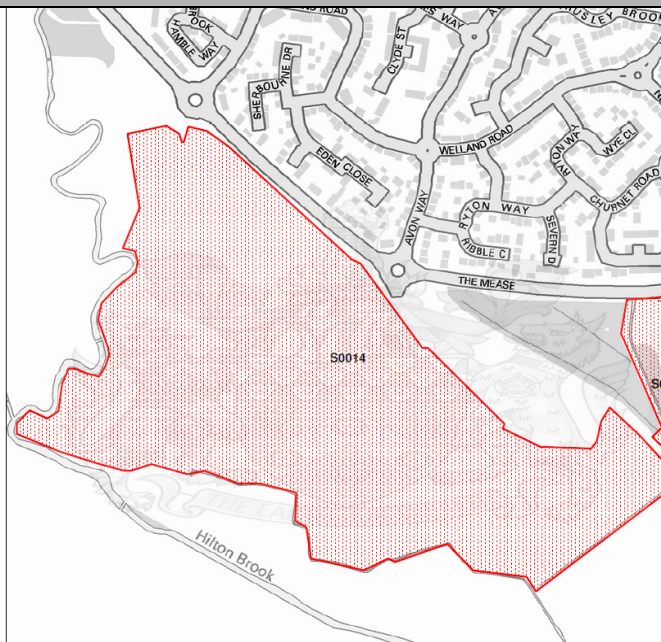

The sites is within single ownership and there is limited developer interest in the site.

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District.	Will it conserve and enhance internationally or nationally important wildlife sites?	Yes	- The site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats and protection of habitats and species including hedgerows and trees wherever possible is in accordance with BNE3,
	Will it conserve and enhance locally important (non-statutory wildlife sites)?	No	- SD302 (Egginton Disused Railway Line) and SD335 (Egginton Junction Gravel Pit) is located within 300m of the southern edge of the site. No part of the site is immediately adjacent to the CWS and is separated by a road.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There are no regionally important geological sites within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs.	Will it reduce the number of households waiting for accommodation?	Yes	- Sites would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20.
	Will it increase the range and affordability of housing for all social groups?	No	- Development has potential to deliver a mix of homes in respect of tenure and housing type. No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need, in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- The site is an urban extension and will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- No, site would be an urban extension and would be very unlikely to include provision for travelling communities	

To improve the health and well-being of the population.	Will it improve people's health or wellbeing?		- Site would be likely to deliver open space on site and potentially improvements within 1200m	- Ensure new development conforms with policy INF9 of the Part 1 Local Plan,
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		- There are existing healthcare facilities are located In Hilton (Welland Road) (1200m) and Tutbury (>3km) (Monk Street). Both are accepting new patients. - Development could help fund improvements to local medical facilities.	
	Will it promote healthy lifestyles?		- The site is located within 400m of a sport pitch and within 1200m of the village school and local centre. - Could connect to an existing PROW network in this area.	
To improve community safety and reduce crime and fear of crime.	Will it reduce crime and fear of crime?		- There are no identified impacts from site development in respect of this issue.	- Ensure that development reflects policy BNE1 and INF2.
	Will it reduce the number of people involved in accidents?		- Impacts are uncertain in respect of this objective.	
To improve educational achievement and improve the District's skills base.	Will it improve educational attainment amongst young people?		- The nearest secondary school is John Port which is nearing capacity, - The nearest primary school is Hilton Primary School. This school is at capacity and has no capacity to expand. - It is unknown whether this site would include proposals to bring forward a new primary school.	- Continue liaison with local Schools and LEA to establish impact. - Ensure development reflects requirements of Policy INF6 of the Plan.
	Will it reduce the number of working age residents who have no or lower level qualifications?		- Development would have no effect against this objective.	
To promote social inclusion and reduce inequalities associated with deprivation across the District.	Will it narrow the inequality gap between the richest and poorest in the District?		- New housing would deliver additional affordable housing in a location identified in the Strategic Housing Market Assessment, as in need of further homes.	- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20.
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices.	Will it make access easier for those households who do not have a car?		- The nearest bus stop is located less than 400m away from the site on Avon Way. - Local facilities include; shops, primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service. - Secondary School provision is at John Port.	- Ensure Development reflects policy INF2 Sustainable Transport.
	Will it help deliver new or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		- Strategic growth could support the provision of new education, open space and sports provision and would support existing health care provision and shops in the village.	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport walking and cycling).	Will it minimise the impact of traffic congestion on the strategic and local road network?		- Hilton has good access to the A50 and the A516. Development of this site could affect the junctions leading onto these roads. - The junction of the A5132 and The Mease would be unlikely to have sufficient capacity to accommodate all proposed development to the south of the village.	- Requirements for Green Travel Plans, or other measures to secure non car travel.
	Will it increase the proportion of journeys using modes other than cars?		- There is a multi-user greenway that connects Hilton to Etwall and Mickleover. - The village has relatively good service provision and is well related to nearby employment sites which could help reduce the need to travel. - The site is well related to local bus service provision.	
	Will it make the best use of other infrastructure?		- There are known capacity issues in respect of electricity distribution in this area and development could require improvements to the local distribution network. - Development may also require improvements to the local water supply network which would be served by South Staffordshire Water. - There are no identified constraints in respect of Waste Water Treatment capacity or the sewerage network, although capacity improvements would be required to support growth if a number of sites come forward in this area. - Superfast broadband coverage expected to be delivered commercially by 2016	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness.	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the plan.
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies.	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises.
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Hilton and surrounding villages.	
To enhance the vitality and viability of existing towns and village centres.	Will it improve existing shopping facilities?		- It is unknown whether this proposal would deliver additional shops or services within the site. The site could help sustain existing services within the village centre located nearby.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment.	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials, including aggregate won locally or locally produced construction materials such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials.	Will it lead to the reduced consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management such as composting bins, or space that is beyond the standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources.	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques, beyond minimum requirements set out in national policy.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site to ensure that use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution.	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 local plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with surrounding land uses.</li> </ul>	
	Will it improve air quality?		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land.	Will it reduce the loss of agricultural land to new development?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield.</li> <li>- Agricultural land classification maps indicate this is lower quality agricultural land and is grade 4 across the whole site.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off.	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within 3a and 2</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Plan.</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels. In the absence of any drainage strategy or master plan for the site, an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes.	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- The site is relatively well located in respect of day to day retail needs; supermarket, health centre and employment (within 1200m) and is located within 400m of an hourly, or better bus service.</li> <li>- There is a strategic employment site within 2km of this site.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development is unlikely to affect the setting of any listed buildings.</li> <li>- It is unclear whether there is potential for in ground archaeology in this area.</li> <li>- No HERS on site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes.	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development will have an unknown or uncertain impact.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character.	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- The site is wholly greenfield and will not reduce the amount of derelict or degraded land within the district.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) of the part 1 local plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- The site is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity (list any other sensitivities).</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds?		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements such as existing development, hedgerows and field trees close to the village edge.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effects identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site XX: S0252. Land to the Rear of 76 Main Street, Linton

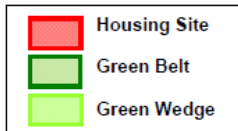

### Description:

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

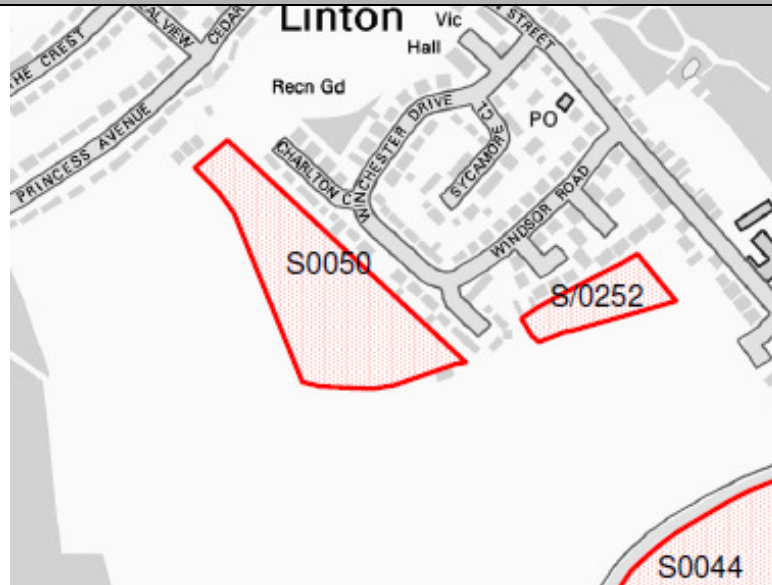

There are a number of further sites in the village capable of accommodating growth.

This site comprises Residential land, vacant workshop and greenfield land. The site area is around 0.54ha of which around a third is identified as brownfield. There are no physical, or environmental constraints identified although access is constrained. have been identified. There is a high level of developer interest in the site.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- No County Wildlife Sites have been identified within 500m of this site	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	No	- No site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	No	- Site unlikely to contribute toward affordable housing provision as the promoter estimates that it is suitable for only ten dwellings.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- Development has potential to deliver a mix of homes in respect of tenure and housing type. - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to includes provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development has limited potential to deliver new or improve existing facilities located within Linton Recreation Ground</li> <li>- Site could deliver informal open space provision through National Forest tree planting.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF8 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- There are existing healthcare facilities which are located in Church Gresley (3km). Development could potentially help fund improvements to local medical facilities where these do not have capacity to accommodate growth,</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- There is no defined village centre in Linton</li> <li>- Site is located within 800m of the village hall, the village school, the store and post office and sports pitch/park.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- Development will have uncertain effects in respect of the highways safety within the village, it is unclear whether an adequate visibility splay could be provided onto Main Street</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- Homes are relatively affordable in this area standing at £147,031 in May 2015 according to rightmove</li> <li>- There is an identified need for affordable housing in this area and across the District as a whole although this scheme is unlikely to contribute to additional affordable housing provision given its scale.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- The site is located in close proximity to main facilities in the village which are within 800m of the site.</li> <li>- There are some local facilities (including a primary school, community centre, post office, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is at Pingle, Swadlincote</li> <li>- The nearest major employment sites are at Tetton Point and Cadley Hill in Swadlincote, 4km from the site.</li> <li>- There is a twice hourly bus service serving the village which serves Burton and Swadlincote. Evening and bank holiday services are less frequent.</li> <li>- Site is not served by an existing footpath and it is unclear whether a footpath could be delivered on this site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- No information provided, but a site of this scale is unlikely to deliver significant new services or facilities on site or support the provision of additional public transport services.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- The impacts of the development of this site on highway congestion are unknown.</li> </ul>	<ul style="list-style-type: none"> <li>- Where appropriate larger developments to be supported by a travel plan in accordance with policy INF2.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- There is twice hourly bus service between Linton and Burton and Swadlincote within 400m of the site. However, evening services are more limited.</li> <li>- There are nearby public rights of way, although these do not connect directly to the site. There is no footpath along Main Street / Windsor Road and both roads may not be capable of being widened to accommodate increased traffic or pedestrian access.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- Coton Park WWTWs is operating above capacity and could require changes to the consent or increased capacity to accommodate new development, although it is likely that development on this scale could be accommodated.</li> <li>- There are no known requirements for additional water supply or electricity network improvements.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the limited creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a limited and temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in Part 1 Local Plan (E3) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth could help sustain existing rural shop and other services in Linton.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is unlikely that this proposal would deliver additional shops or services within the site given the scale of the proposal. The site could help to sustain existing services within the village.	- Ensure good connectivity to the village
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is part previously developed and will provide limited potential to regenerate an existing area. - The contribution this site could make in respect of urban design is unknown and will be determined by the detailed layout, design and construction put forward by developers.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development is partially brownfield. It is unclear whether existing materials are available on site which can be reused on site.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- Given the scale of the site there is unlikely to be significant potential to accommodate waste infrastructure on site such as bring sites - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There may be potential to reuse demolition waste onsite. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<p>It is unclear as to whether water quality benefits will be delivered due to lack of detail about design of the scheme.</p> <ul style="list-style-type: none"> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 Local Plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with neighbouring land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is partially brownfield and could allow some intensification of use on this part of the site</li> <li>- Greenfield land component of the site is likely to be good quality agricultural land Grade 2 or 3A</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- There is no indication of surface water flooding on the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Local Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels or a reduction of brownfield rates. In the absence of any drainage strategy or masterplan for the site, an engineered SUDS solution is assumed.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- Site is located within 400m of a half hourly bus service.</li> <li>- The site is relatively well located in respect of day to day retail needs and primary school provision, although the site is 4km from the nearest large scale employment areas. The site is also poorly related in respect of supermarkets and secondary school provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of a conservation area or listed buildings.</li> <li>- No HERS sites are located within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the National Forest which is an important cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is around one third brownfield and two thirds greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) in the Part 1 Local Plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape elements, such as existing development, and outgrown hedgerows to the south.</li> <li>- Hedgerows, could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site 45: S0107. Land off High Street, Linton

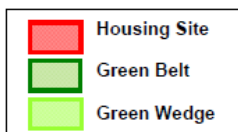

### Description:

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

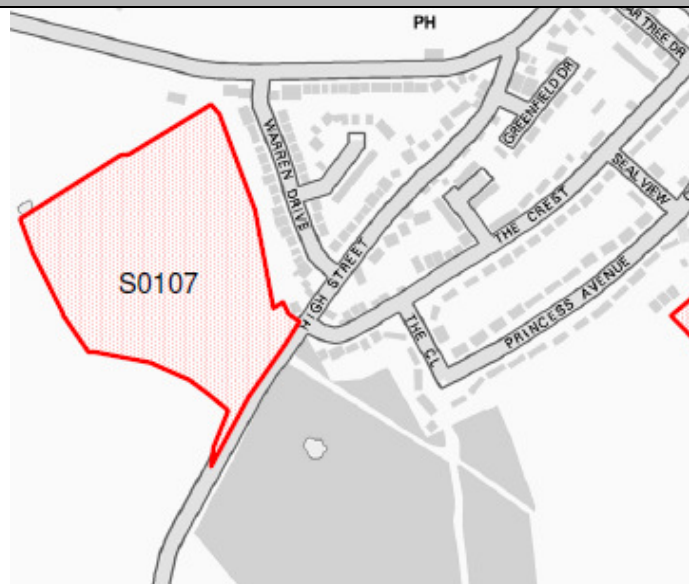

There are three further sites in the village capable of accommodating growth; the first is located on the north side of Linton Heath, the second is off Windsor Road, and the third is land adjacent Heath Close, Colliery Lane.

This site comprises agricultural land and domestic curtilage. There are footpaths that cross the site. The site area is 4.84ha and no physical, environmental or access constraints have been identified. The site is in single ownership and there is a medium level of developer interest in the site.

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located within 300m of SD166 (Netherseal Colliery Line)) from its closest edge, although no part of the site is immediately adjacent to the CWS and is separated by a road.	
	Could development affect protected species or BAP priority species?	No	- Evidence submitted with planning application 9/2013/0689 indicates that there is a Great Crested Newt breeding pond some 80m from the site. Hedgerows and ditches along the eastern boundary of the site present potential sheltering and foraging habitat. There is also some hibernation habitat along the southern edge of the site. Mitigation proposed to ensure that no protected species will be harmed and compensatory habitat provided to mitigate habitat loss.	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- Planning application 9/2013/0689 indicates that the development will include a diverse range of habitats including additional native trees, grassland and hedgerows.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Planning application 9/2013/0689 indicates that development will provide a mix of housing to meet the needs of the area. Other than extent of affordable housing, overall mix to be determined at the reserved matters planning application stage	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. This will be determined at the reserved matters planning application stage.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Planning application 9/2013/0689 indicates that the development will include the provision of an area of public open space measuring approximately 1.20 hectares, which would also include a play area, located towards the middle of the site and a balancing pond at the southern corner.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- There are existing healthcare facilities which are located in Church Gresley (3km).</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- There is no defined village centre in Linton,</li> <li>- Site is located within 800m of the village sports pitch/park and within 1200m of the store/post office, village hall and school</li> <li>- Planning application 9/2013/0689 indicates that a 2m wide footway will be provided along the site frontage.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- In relation to planning application 9/2013/0689, the Crime Prevention Design Adviser has no issues with the principle of residential development in this area and supports the intended location of the area of public open space and play area as it would integrate better into the development and have better supervision.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- The Transport Assessment submitted with planning application 9/2013/0689 indicates a very low incidence of road accidents, indicating that the development of the site does not present a material road safety issue.</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of INF6</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing will deliver new affordable housing in this area, for which there is an identified need in this area.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Bus service more frequent than hourly, but the nearest bus stop is within 800m from the site.</li> <li>- There are some local facilities (including convenience store/post office, a primary school, village hall, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is at Pingle in Swadlincote, which has spare capacity.</li> <li>- The nearest major employment sites are at Cadley Hill and Tetton Point, less than 4km away.</li> <li>- There are three public footpaths within the site; FP 14 follows the eastern boundary, FP 15 crosses the site diagonally on a northwest/southeast axis and FP 16 follows the northern boundary.</li> <li>- Planning application 9/2013/0689 indicates that a 2m wide footway will be provided along the site frontage.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects INF2</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Conditions and obligations associated with planning consent 9/2013/0689 make provision for open space provision. Development will help support the existing store and post office in the village.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- The Transport Assessment submitted with planning application 9/2013/0689 indicates that there are no material traffic impacts associated with the residential development of this site.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- There is a half hourly bus service between Linton and Swadlincote, within 800m of the site.</li> <li>- There are three public footpaths within the site; FP 14 follows the eastern boundary, FP 15 crosses the site diagonally on a northwest/southeast axis and FP 16 follows the northern boundary.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There is no headroom at Coton Park WWTW although it is likely that development on the scale proposed could be accommodated.</li> <li>- Planning application 9/2013/0689 indicates that there are no concerns or engineering difficulties anticipated with serving the new development with gas, water, electricity or telecommunication connections.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing village store, post office and other services located in Linton.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- Planning application 9/2013/0689 does not make provision for the development of shops and services within the site.	- Ensure good connectivity to the village centre.
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers to be addressed at the reserve matters planning application stage.	- Ensure development conforms to BNE1
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conforms to BNE1
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites.	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- Planning application 9/2013/0689 indicates that the development will include measures to control water demand and use. - Planning application 9/2013/0689 provides for the inclusion of a SUDS scheme within the development.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- Development will have no significant impact on local water quality.</li> <li>- Nitrate Vulnerable Zone = No</li> <li>- Ground Water Protection Zone = No</li> </ul>	- Ensure development fully conforms with SD1, SD2 and SD3.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with adjoining land uses.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area.	
	Will it reduce noise pollution?		- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		- Site is greenfield, Planning application 9/2013/0689 indicates that almost half of the land is of moderate quality in sub-grade 3b. The rest is of best and most versatile quality in grade 2 and sub-grade 3a.	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- The site contains a small area less susceptible to surface water flooding. However there is no indication of surface water flooding within the majority of the site.</li> </ul>	- Inclusion of SUDS in accordance with SD2 and SD3.
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels and a SUDS solution is incorporated.	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- There is a half hourly bus service, within 800m of the site. A two hourly service runs within 400m of the site.</li> <li>- The site is within 1200m of the local store/post office and primary school and within 4km of the nearest major employment areas at tetron Point and Cadley Hill. The site is also poorly related in respect of supermarkets and secondary school provision.</li> <li>- There are three public footpaths within the site; FP 14 follows the eastern boundary, FP 15 crosses the site diagonally on a northwest/southeast axis and FP 16 follows the northern boundary.</li> </ul>	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- Planning application 9/2013/0689 makes an uncertain contribution for renewable energy generation on site. This is likely to be addressed at the reserved matters planning application stage..	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of any conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> </ul>	- Ensure development reflects BNE2, INF6 and INF7
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- Development could improve access to the National Forest which is an important cultural and leisure resource within the District	- Ensure development reflects BNE2
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is wholly greenfield.	- BNE1 will help ensure key landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located in an area of lower sensitivity according to the County Council's Areas of multiple environment sensitivity</li> <li>- The site is located within the Mease/Sence Lowlands Landscape Character Area.</li> <li>- Planning application 9/2013/0689 proposes the retention of existing landscape features such as hedgerows and trees.</li> <li>- Planning application 9/2013/0689 indicates that the development will include a contribution toward National Forest planting</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is well contained by existing landscape elements, such as existing development, hedgerows and field trees. New trees and hedgerows will assist in the integration of the development.</li> <li>- Planning application 9/2013/0689 indicates that hedgerows, trees or other landscape elements will contribute towards integrating new development into the landscape.</li> <li>- It indicates that the development will provide a central green corridor.</li> </ul>	

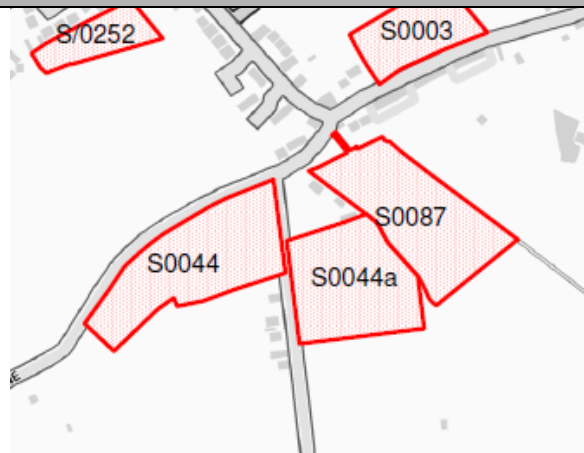

## Site 44: S0087. Land adjacent to Heath Close, Colliery Lane, Linton

### Description:

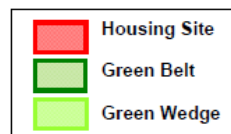

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

There are several other sites in the village capable of accommodating growth including nearby sites at Sealwood Lane, Heath Close and Linton Heath, with others off Windsor Road, High Street and Warren Drive.

This site is in agricultural use and currently occupied by a caravan, scaffolding and vacant single storey agricultural buildings. The site area is 1.75ha and no physical or environmental constraints have been identified, however the access to the site is considered to be constrained as the current access would require widening. The site is currently in single ownership and there is high developer interest in the site.

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located more than 300m from the nearest non statutory wildlife site or Local Nature Reserve.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- Development has potential to deliver a mix of homes in respect of tenure and housing type. No - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development has potential to deliver new on site provision or improve existing facilities located 700m away at Linton Recreation Ground</li> <li>- Site would deliver informal open space provision through National Forest Tree Planting</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF8 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- There are existing healthcare facilities which are located in Church Gresley (3km) and Overseal (2.5km) Development could help fund improvements to local medical facilities where these do not have capacity to accommodate growth,</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- There is no defined village centre in Linton</li> <li>- Site is located within 800m of the village store/post office, the village school and sports pitch/park.</li> <li>- The site lies adjacent to an established public right of way connecting to the wider network.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth subject to the provision of developer obligations</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing would deliver new affordable housing in this area, although homes are relatively affordable in this area standing at £153,255, in July 2015, according to rightmove</li> <li>- There is an identified need for affordable housing in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Half hourly bus service to Swadlincote and Burton within 400m.</li> <li>- The site is well related to main facilities in the village which are within 800m of the site.</li> <li>- There are some local facilities (including a primary school, village hall, post office, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is The Pingle School in Swadlincote some 7 km from the site.</li> <li>- There are employment opportunities at Cadley Hill and Tetton Point, some 4km from the site.</li> <li>- There is a metalled path from opposite the site access point to the village High Street.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development will help sustain existing local shops, community facilities and could support existing public transport provision locally.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- The impacts of the development of this site on highway congestion are unknown.</li> </ul>	<ul style="list-style-type: none"> <li>- Where appropriate larger developments to be supported by a travel plan in accordance with policy INF2.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 400m of a half hourly bus service between Linton and Swadlincote.</li> <li>- A public right of way passes adjacent to the site, connecting to the wider network.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There is no headroom at Coton Park WWTW although it is likely that development on the scale proposed could be accommodated.</li> <li>- There are no known requirements for additional water supply or electricity network improvements.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- Development would support the creation of construction based jobs on a temporary basis.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in Part 1 Local Plan (E3) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Linton.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is unknown whether this proposal would deliver additional shops or services within the site. The site could help to sustain existing services within the village.	- Ensure good connectivity to the village
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear as to whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> <li>- Surface water drains to the River Mease SAC, the integrity of this Sac is affected by poor water quality</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 Local Plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with adjacent land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield, and is likely to be classified as Grade 3, good to moderate.</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- Site is located within flood zone 1.</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Local Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- There is an hourly or better bus service to Swadlincote within 400m. The site is relatively well located in respect of day to day retail needs and primary school provision, although it is in excess of 4km from the nearest large scale employment areas at Tetron Point and Cadley Hill. The nearest supermarket is in Swadlincote, over 4 km away and the secondary school is Pingle, over 6 km away..</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of a conservation area but may impact upon setting of Sealwood Cottage a listed building.</li> <li>- No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the National Forest which is an important cultural and leisure facility within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) in the Part 1 Local Plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not located in an area of multiple sensitivity according to County Council records.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape elements, such as existing development, hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site 43: S0050. Land off Windsor Road, Linton

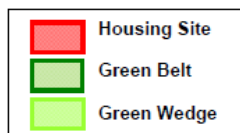

### Description:

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

There are three further sites in the village capable of accommodating growth; the first is located on the north side of Linton Heath, the second is off the High Street, and the third is land adjacent Heath Close, Colliery Lane.

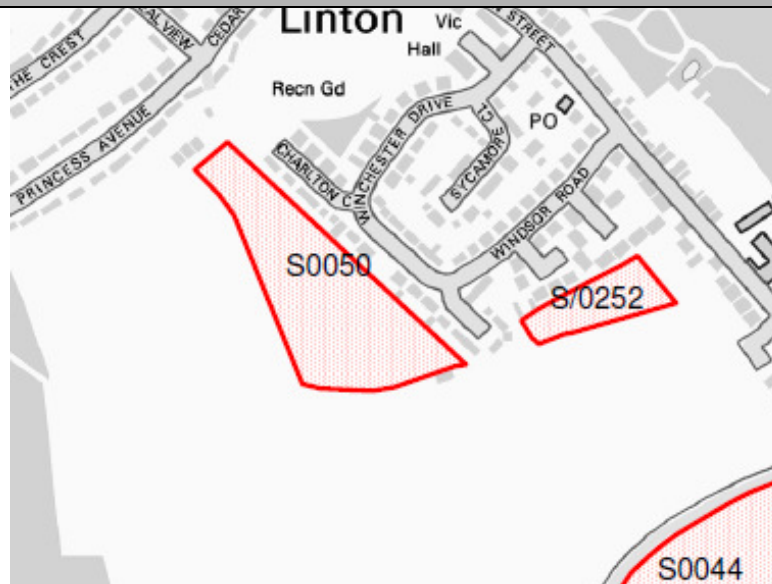

This green field site is agricultural land surrounded by residential development. The site area is 2.15ha and no physical, environmental or access constraints have been identified. The site is in single ownership and there is a medium level of developer interest.

### Key

Ordnance Survey 100019461

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3..
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- Site is located more than 500m from the nearest non statutory wildlife site or Local Nature Reserve.	
	Could development affect protected species or BAP priority species?	Yes	- No BAP or protected species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest Location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Given the scale of the site it is likely that it would contribute towards the provision of affordable housing to meet local need.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Development has potential to deliver a mix of homes in respect of tenure and housing type. No - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- No, site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development has potential to deliver new on site provision and/or improve existing facilities located at the adjacent Linton Recreation Ground</li> <li>- Site would deliver informal open space provision including through National Forest tree planting</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF8 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- There are existing healthcare facilities which are located in Church Gresley (3km). Development could potentially help fund improvements to local medical facilities where these do not have capacity to accommodate growth,</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- Site is located within 800m of the village store/ post office, school and sports pitch/park.</li> <li>- A public right of way passes through the site, connecting to the wider network</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth.</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing would deliver new affordable housing in this area, although homes are relatively affordable in this area standing at £153,255, in July 2015, according to rightmove</li> <li>- There is an identified need for affordable housing in this area toward which a site of this scale could contribute.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Half hourly bus service to Swadlincote and Burton within 400m.</li> <li>- The site is well related to main facilities in the village which are within 800m of the site.</li> <li>- There are some local facilities (including a primary school, village hall, post office, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is The Pingle School in Swadlincote some 7 km from the site.</li> <li>- There are employment opportunities at Cadley Hill and Tetton Point, less than 4km from the site.</li> <li>- There is a metalled path from the site to the village</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development will help sustain existing local shops, community facilities and could support existing public transport provision locally.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- The impacts of the development of this site on highway congestion are unknown</li> </ul>	<ul style="list-style-type: none"> <li>- Where appropriate larger developments to be supported by a travel plan in accordance with policy INF2.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 400m of a half hourly bus service between Linton and Swadlincote.</li> <li>- A public right of way passes through the site, connecting to the wider network.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There is no headroom at Coton Park WWTW although it is likely that development on the scale proposed could be accommodated.</li> <li>- There are no known requirements for additional water supply or electricity network improvements.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- Development would support the creation of construction based jobs on a temporary basis.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in Part 1 Local Plan (E3) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Linton.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is unknown whether this proposal would deliver additional shops or services within the site. The site could help to sustain existing services within the village.	- Ensure good connectivity to the village
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear as to whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> <li>- Surface water drains to the River Mease SAC, this integrity of this Sac is affected by poor water quality</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 Local Plan.</li> </ul>
	Will it reduce light pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with adjacent land uses.</li> </ul>	
	Will it improve air quality		<ul style="list-style-type: none"> <li>- Development is unlikely to have any notable air quality impacts in this area.</li> </ul>	
	Will it reduce noise pollution?		<ul style="list-style-type: none"> <li>- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.</li> </ul>	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		<ul style="list-style-type: none"> <li>- Site is greenfield,</li> <li>- Land likely to be classified as Grade 2 (good) or 3 (good to moderate)</li> </ul>	<ul style="list-style-type: none"> <li>- None identified.</li> </ul>
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- The is no indication of surface water flooding within the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Local Plan</li> </ul>
	Will it reduce unmitigated release surface water runoff?		<ul style="list-style-type: none"> <li>- New development would be required to conform with existing requirements to retain runoff rates at greenfield field levels.</li> </ul>	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		<ul style="list-style-type: none"> <li>- There is an hourly or better bus service to Swadlincote is located within 400m of the site. The site is relatively well located in respect of day to day retail needs and primary school provision, although it is in excess of 4km from the nearest large scale employment areas at Tetron Point and Cadley Hill. The nearest supermarket is in Swadlincote, over 4 km away, and the secondary school is Pingle, over 6 km away.</li> </ul>	<ul style="list-style-type: none"> <li>- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.</li> </ul>
	Will it provide opportunity for additional renewable energy generation in the District?		<ul style="list-style-type: none"> <li>- New development could support on site renewable or low carbon energy generation.</li> </ul>	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect a conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure development reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.</li> </ul>
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		<ul style="list-style-type: none"> <li>- Development could improve access to the National Forest which is an important Cultural and leisure resource within the District.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.</li> </ul>
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		<ul style="list-style-type: none"> <li>- Site is wholly greenfield.</li> </ul>	<ul style="list-style-type: none"> <li>- Inclusion of landscape character policy (BNE4) in the Part 1 Local Plan will help ensure key valued landscape components are retained.</li> </ul>
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Area is located within an area of lower multiple environmental sensitivity</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape elements, such as existing development, hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

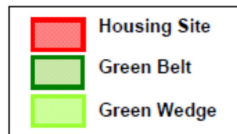

## Site 44: S0044a. Land adjacent to Sealwood Lane, Linton

### Description:

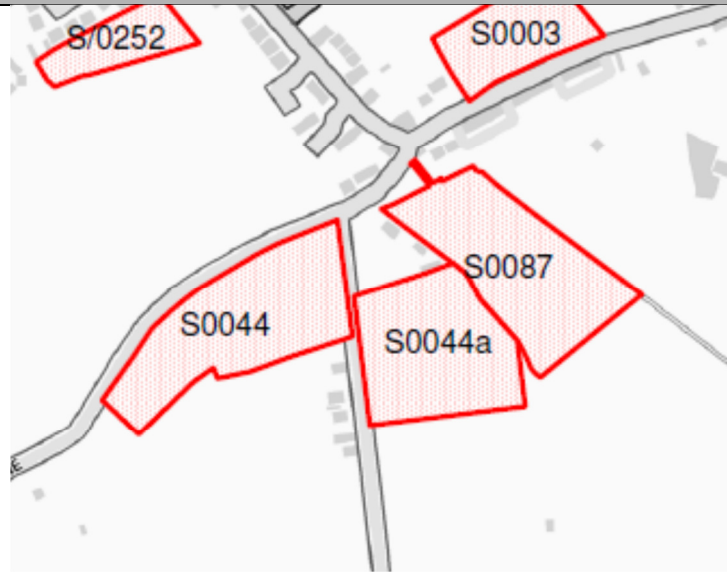

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

This site measures 1.56 ha and is currently in agricultural use and no physical, environmental or access constraints have been identified. It is in single ownership but there is currently no developer interest in the site.

#### Key

Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3..
	Will it conserve and enhance locally important non-statutory wildlife sites?	No	- Site is located more than 300m from the nearest non statutory wildlife site or Local Nature Reserve.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Sites would contribute towards the delivery of 30% affordable housing, with the remainder market housing.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	No	- Development has potential to deliver a mix of homes in respect of tenure and housing type. No - No data has been submitted by site promoters in respect of likely mix proposed on site	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development has potential to deliver new or improve existing facilities both on site and 700m away at Linton Recreation Ground</li> <li>- Site would deliver informal open space provision through National Forest Tree Planting and on-site open space provision.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF8 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- There are existing healthcare facilities which are located in Church Gresley (3km) and Overseal (2.5km)</li> <li>- Development could help fund improvements to local medical facilities where these do not have capacity to accommodate growth.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- There is no defined village centre in Linton</li> <li>- Site is located within 800m of the village store/post office, the village school and sports pitch/park.</li> <li>- Established public rights of way lie within a short distance of the site.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth subject to the provision of developer obligations</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing would deliver new affordable housing in this area, although homes are relatively affordable in this area standing at £153,255, in July 2015, according to Rightmove</li> <li>- There is an identified need for affordable housing in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Half hourly bus service to Swadlincote and Burton within 400m.</li> <li>- The site is well related to main facilities in the village which are within 800m of the site.</li> <li>- There are some local facilities (including a primary school, village hall, post office, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is The Pingle School in Swadlincote some 7 km from the site.</li> <li>- There are employment opportunities at Cadley Hill and Tetron Point, some 4km from the site.</li> <li>- There is a metalled path from the site to the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development will help sustain existing local shops, community facilities and could support existing public transport provision locally.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- It is not known what affect development will have on highway congestion.</li> </ul>	<ul style="list-style-type: none"> <li>- Where appropriate larger developments to be supported by a travel plan in accordance with policy INF2.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 400m of a half hourly bus service between Linton and Swadlincote.</li> <li>- Established public rights of way pass close to the site.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There is no headroom at Coton Park WWTW although it is likely that development on the scale proposed could be accommodated.</li> <li>- There are no known requirements for additional water supply or electricity network improvements.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- Development would support the creation of construction based jobs on a temporary basis.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in Part 1 Local Plan (E3) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Linton.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is unlikely that this proposal would deliver additional shops or services within the site, given its scale. The site could help to sustain existing services within the village.	- Ensure good connectivity to the village
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear as to whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> <li>- Surface water drains to the River Mease SAC, this integrity of this Sac is affected by poor water quality</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 Local Plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with adjacent land uses.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area.	
	Will it reduce noise pollution?		- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		- Site is greenfield, and is likely to be classified as Grade 3, good to moderate.	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1.</li> <li>- There is no indication of surface water flooding on the majority of the site. There contains a very small area of less susceptible to surface water flooding within the north east corner of the site.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Local Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		- There is an hourly or better bus service to Swadlincote within 400m. The site is relatively well located in respect of day to day retail needs and primary school provision, although it is in excess of 4km from the nearest large scale employment areas at Tetron Point and Cadley Hill. The nearest supermarket is in Swadlincote, over 4 km away and the secondary school is Pingle, over 6 km away.	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of a conservation area but may impact upon setting of Sealwood Cottage a listed building.</li> <li>- No HERS sites are located within the site</li> </ul>	- Ensure development reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- Development could improve access to the National Forest which is an important cultural and leisure facility within the District.	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is wholly greenfield.	- Inclusion of landscape character policy (BNE4) in the Part 1 Local Plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		- Site is not located in an area of lower multiple environmental sensitivity according to County Council records.	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The is well contained by existing landscape elements, such as existing development, hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> </ul>	
			- Uncertain effect identified due to the lack of information held regarding potential site design and layout.	

Version 1a

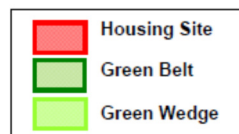

## Site 44: S0044. Land adjacent to Colliery Lane, Linton

### Description:

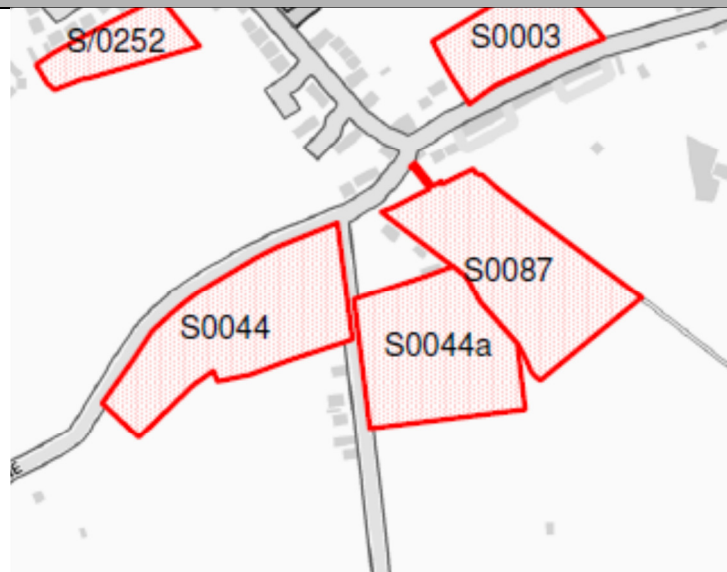

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

This site measures 1.78 ha and is currently in agricultural use and no physical, environmental or access constraints have been identified. It is in single ownership but there is currently no developer interest in the site.

#### Key

Crown Copyright and database rights [2013]  
Ordnance Survey 100019461  
MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Site is not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- The closest site of local importance for nature conservation (County Wildlife Site) is located within 650m of SD018 Sealwaoof Farm Embankments.	
	Could development affect protected species or BAP priority species?	Yes	- No records held indicating protected or BAP species within 100m of the site. <b>Based on incomplete data will need updating</b>	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the Council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site would need to be passed over to tree planting and landscaping given the National Forest location.	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 1km of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Site could contribute towards the delivery of affordable housing to meet local needs.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- No data has been submitted by site promoters in respect of likely mix proposed on site, although given the scale of the scheme and given local plan requirements development would be expected to make provision for affordable homes subject to viability and will be likely to deliver a range of house sizes.	
	Will it improve the suitability of new homes for older and/disabled groups?	Yes	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to include provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development could make a limited provision towards improving open space and leisure provision on site and within 1200m of the site.</li> <li>- Site would deliver informal open space provision through National Forest Tree Planting.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF8 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- Development would make contribution towards the provision or expansion of healthcare facilities within 3km of the site. The nearest GP is located in Overseal 2.5km from the site.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- There is no defined village centre in Linton</li> <li>- Site is located within 800m of the village store/post office, the village school and sports pitch/park.</li> <li>- The site lies adjacent to an established public right of way connecting to the wider network.</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects policy BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- There are no identified impacts from site development in respect of this issue</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth subject to the provision of developer obligations</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of Policy INF6 of the Plan.</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing would deliver new affordable housing in this area, although homes are relatively affordable in this area standing at £153,255, in July 2015, according to Rightmove</li> <li>- There is an identified need for affordable housing in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with policy H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Half hourly bus service to Swadlincote and Burton within 400m.</li> <li>- The site is well related to main facilities in the village which are within 800m of the site.</li> <li>- There are some local facilities (including a primary school, village hall, post office, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is The Pingle School in Swadlincote some 7 km from the site.</li> <li>- There are employment opportunities at Cadley Hill and Tetton Point, some 4km from the site.</li> <li>- There is a metalled path from the site to the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects policy INF2 Sustainable Transport.</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development will help sustain existing local shops, community facilities and could support existing public transport provision locally.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- The impacts of the development of this site on highway congestion are unknown, although they are unlikely to be significant, given the scale of the site.</li> </ul>	<ul style="list-style-type: none"> <li>- Where appropriate larger developments to be supported by a travel plan in accordance with policy INF2.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 400m of a half hourly bus service between Linton and Swadlincote.</li> <li>- A public right of way passes adjacent to the site, connecting to the wider network.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There is limited headroom at Coton Park WWTW although it is likely that development on the scale proposed could be accommodated.</li> <li>- There are no known requirements for additional water supply or electricity network improvements.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes during site build out. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- Development would support the creation of construction based jobs on a temporary basis.	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in Part 1 Local Plan (E3) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within rural areas could help sustain existing rural shops and other businesses located in Linton.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is unlikely that this proposal would deliver additional shops or services within the site, given its scale. The site could help to sustain existing services within the village.	- Ensure good connectivity to the village
To improve the quality of new development and the existing built environment	Will it improve the quality of new development?		- The site is not previously developed and will not regenerate existing built up areas. - The contribution this site could make in respect of urban design, is likely to be determined by the detailed layout, design and construction put forward by developers. No information regarding these issues has been submitted by the site promoters.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it provide potential to use locally available natural resources and materials?		- Development could support the use of locally produced and won materials including aggregate won locally, or locally produced construction materials, such as bricks or tiles.	
To minimise waste and increase the reuse and recycling of waste materials	Will it lead to the reduce consumption of materials?		- The site is greenfield and there is no potential to reuse waste materials on site during the construction phase. - New development would lead to a general increase in waste generation during construction and operation phases of development.	- Ensure development conform to emerging Policy BNE1 of the Part 1 Local Plan.
	Will it increase waste recovery and recycling?		- New development could support improvements to waste recovery and recycling through the provision of appropriate storage for bins and bring sites, although this is uncertain. (There is no site master plan or layout provided by site promoters).	
	Will it reduce the proportion of waste sent to landfill?		- It is unclear whether there is potential to accommodate on site waste management, such as composting bins, or space beyond standard requirements to accommodate all of the Districts recycling bins and receptacles.	
To promote sustainable forms of construction and sustainable use of natural resources	Will it promote the implementation of sustainable construction techniques?		- It is unclear whether the development would contribute to the delivery of sustainable construction techniques beyond minimum standards set out in the building regulations.	- Development would need to reflect Policy SD1, SD2 and SD3 and SD5 of the emerging Part 1 local Plan
	Will it help reduce the need for land won primary minerals, including sand and gravel?		- There is no potential to reuse demolition waste onsite, although the use of materials used overall could be reduced through the adoption of site waste management plans. - Add data on minerals safeguarding issues on receipt	
	Will it help ensure water resources are used efficiently?		- There may be potential to secure water efficiency measures on site, to ensure that the use is below what is required by part G of the building regulations. - Potential for inclusion of SUDS which could contribute towards ground water recharge, although this would be dependent on site geology and SUDS design.	

To reduce water, light, air and noise pollution	Will it reduce water pollution?		<ul style="list-style-type: none"> <li>- It is unclear as to whether water quality benefits will be delivered due to lack of detail about design of the scheme.</li> <li>- Nitrate Vulnerable Zone = Yes</li> <li>- Ground Water Protection Zone = No</li> <li>- Surface water drains to the River Mease SAC, this integrity of this Sac is affected by poor water quality</li> </ul>	- Ensure development fully conforms with policies SD1, SD2 and SD3 of the emerging part 1 Local Plan.
	Will it reduce light pollution?		- Development is likely to lead to increased illumination locally, during site development and occupation but this would be consistent with adjacent land uses.	
	Will it improve air quality		- Development is unlikely to have any notable air quality impacts in this area.	
	Will it reduce noise pollution?		- Development is likely to lead to increased noise levels locally during site development, although post development noise generation would be consistent with surrounding land uses.	
To minimise the irreversible loss of undeveloped (greenfield) land	Will it reduce the loss of agricultural land to new development		- Site is greenfield, and is likely to be classified as Grade 3, good to moderate.	- None identified.
To reduce and manage flood risk and surface water run-off	Will it reduce the impacts of flood risk?		<ul style="list-style-type: none"> <li>- The site is located within flood zone 1</li> <li>- The site contains areas of less and intermediate susceptibility to surface water flooding (along the North West boundary). However within the majority of the site there is no indication of surface water flooding.</li> </ul>	- Inclusion of SUDS policy in the Plan in accordance with policy SD2/SD3 of the Part 1 Local Plan
	Will it reduce unmitigated release surface water runoff?		- New development would be required to conform with existing requirements to retain runoff rates at greenfield levels	
To reduce and manage the impacts of climate change and the District's contribution towards the causes	Will it reduce the causes of climate change?		- There is an hourly or better bus service to Swadlincote within 400m. The site is relatively well located in respect of day to day retail needs and primary school provision, although it is in excess of 4km from the nearest large scale employment areas at Tetron Point and Cadley Hill. The nearest supermarket is in Swadlincote, over 4 km away and the secondary school is Pingle, over 6 km away.	- Appropriate transport policy (INF2) to be included in the plan to maximise travel choice.
	Will it provide opportunity for additional renewable energy generation in the District?		- New development could support on site renewable or low carbon energy generation.	
To protect and enhance the cultural, architectural and archeological heritage of the district.	Will it protect and enhance the setting of historic cultural, architectural and archaeological features in the District?		<ul style="list-style-type: none"> <li>- Development will not affect the setting of a conservation area or any listed buildings.</li> <li>- No HERS sites are located within the site</li> </ul>	- Ensure development reflects policy BNE2, INF6 and INF7 of the Part 1 Local Plan.
To improve access to the cultural heritage of the District for enjoyment and educational purposes	Will it improve access to the public and understanding of the District's historic and cultural features?		- Development could improve access to the National Forest which is an important cultural and leisure facility within the District.	- Ensure policy reflects policy BNE2 of the Part 1 Local Plan.
To conserve and enhance the District's landscape and townscape character	Will it reduce the amount of derelict and degraded land within the District?		- Site is wholly greenfield.	- Inclusion of landscape character policy (BNE4) in the Part 1 Local Plan will help ensure key valued landscape components are retained.
	Does it respect and protect existing landscape Character?		<ul style="list-style-type: none"> <li>- Site is not located in an area of lower sensitivity according to County Council records.</li> <li>- The site is located within the Mease/Sence Lowlands Landscape Character Area.</li> </ul>	
	Will it protect and create open spaces, landscape features, woodlands, hedges and ponds		<ul style="list-style-type: none"> <li>- The site is contained by existing landscape elements, such as existing development, hedgerows and field trees.</li> <li>- Hedgerows, trees or other landscape elements could contribute towards integrating new development into the landscape.</li> <li>- This land parcel could contribute towards green infrastructure provision.</li> <li>- Uncertain effect identified due to the lack of information held regarding potential site design and layout.</li> </ul>	

Version 1a

## Site 42: S0003. Site at north side of Linton Heath, Swadlincote

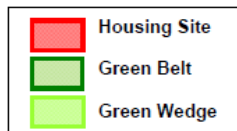

### Description:

The village of Linton lies towards the south of the District, and is located approximately 5km south west of Swadlincote. Linton is a relatively compact village and is surrounded by countryside.

There are several further sites in the village capable of accommodating growth; including sites nearby at Colliery Lane, Heath Close and Sealwood Lane and others at High Street, Windsor Road and off Warren Drive.

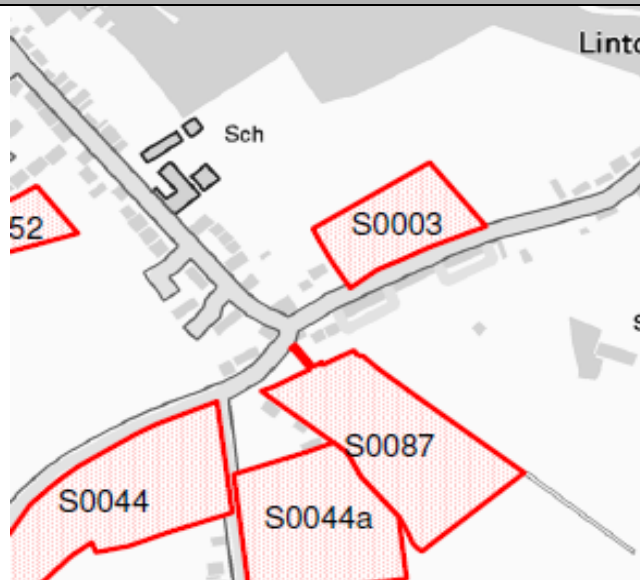

This site was previously used as allotments but is now vacant and heavily overgrown. The site area is 0.83ha and no physical, environmental or access constraints have been identified. The site is currently in multiple ownership, however all parties are willing to develop the site for residential use. There is a medium level of developer interest in the site.

### Key

MAP IS NOT TO SCALE NORTH

Sustainability Appraisal Objective	Detailed considerations	Yes/No	Comments	Notes on site based mitigation
To avoid damage to designated sites and species (including UK and Local BAP Priority Habitat and Species) and enhance biodiversity and geodiversity across the District	Will it conserve and enhance internationally/ nationally important wildlife sites?	Yes	- Sites are not located within 1km of a statutory site and would not affect the integrity of any Site of Special Scientific Interest or Special Area of Conservation.	- Retention of existing habitats including hedgerows and trees wherever possible in accordance with BNE3.
	Will it conserve and enhance locally important non-statutory wildlife sites?	Yes	- There are no County Wildlife sites within 500m of the site	
	Could development affect protected species or BAP priority species?	No	- No records held indicating protected or BAP species within 100m of the site. Potential for foraging bats and Mustelids (possibly polecat) on site.	
	Will it provide tree planting or other habitat creation on site, including National Forest Planting (where relevant)?	Yes	- No information held. The developer has not provided the council with a site master plan or any additional evidence to indicate whether the site will include the creation of new habitats or tree planting. - 20% of the site are would need to be passed over to tree planting and landscaping given the national Forest location	
	Will it protect sites of geological importance?	Yes	- There is no regionally important geological site within this area or within 750m of the site.	
To provide decent and affordable homes that meet local needs	Will it reduce the number of households waiting for accommodation?	Yes	- Given the scale of the site it is likely that it would contribute towards the provision of affordable housing to meet local need.	- Ensure policies support the delivery of appropriate mix and tenure of new homes in accordance with H19 and H20
	Will it increase the range and affordability of housing for all social groups?	Yes	- Development will deliver 3 and four bed homes across a range of tenures.	
	Will it improve the suitability of new homes for older and/disabled groups?	No	- Development would make an uncertain contribution towards delivering homes for older and/or disabled people. No information is currently held.	
	Will it provide sufficient housing to meet existing and future need?	Yes	- The site could contribute to overall housing need in combination with other developments in South Derbyshire and is deliverable within the plan period.	
	Will it reduce the number of unfit or empty homes?	No	- Site will not bring empty homes back into use or improve unfit homes.	
	Will it meet the needs of travelling show people?	No	- Site would be unlikely to includes provision for travelling communities	

To improve the health and well-being of the population	Will it improve people's health or wellbeing?		<ul style="list-style-type: none"> <li>- Development has potential to deliver limited new open space on site or improve existing facilities located 800m away at Linton Recreation Ground</li> <li>- Site would deliver informal open space provision including through National Forest tree planting</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure new development conforms with policy INF9 of the Part 1 Local Plan</li> </ul>
	Will it improve accessibility to healthcare for existing residents and provide additional facilities for new residents?		<ul style="list-style-type: none"> <li>- There are existing healthcare facilities which are located in Church Gresley (3km) and Overseal (2.5km) Development could help fund improvements to local medical facilities where these do not have capacity to accommodate growth.</li> </ul>	
	Will it promote healthy lifestyles?		<ul style="list-style-type: none"> <li>- There is no defined village centre in Linton</li> <li>- Site is located within 800m of the village store/post office, the village school and sports pitch/park. There are established public rights of way nearby, connecting to the wider network..</li> </ul>	
To improve community safety and reduce crime and fear of crime	Will it reduce crime and fear of crime?		<ul style="list-style-type: none"> <li>- Impacts would be uncertain and would be largely determined by detailed design and layout of development</li> <li>- There are no identified impacts from site development in respect of this issue.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure that development reflects BNE1 and INF2</li> </ul>
	Will it reduce the number of people involved in accidents?		<ul style="list-style-type: none"> <li>- Development will have uncertain effects in respect of the highways safety within the village</li> </ul>	
To improve educational achievement and improve the District's skills base	Will it improve educational attainment amongst young people?		<ul style="list-style-type: none"> <li>- The nearest secondary school is Pingle, Swadlincote, which has capacity to accommodate some additional growth.</li> <li>- The nearest primary school is Linton Primary school, which is likely to be able to accommodate limited growth subject to the provision of developer obligations</li> </ul>	<ul style="list-style-type: none"> <li>- Continue liaising with local Schools and LEA to establish impact.</li> <li>- Ensure development reflects requirements of INF6</li> </ul>
	Will it reduce the number of working age residents who have no or lower level qualifications?		<ul style="list-style-type: none"> <li>- Development would have no effect against this objective.</li> <li>- Development is unlikely to create long term jobs which will have any notable impact in improving the skills of local people</li> </ul>	
To promote social inclusion and reduce inequalities associated with deprivation across the District	Will it narrow the inequality gap between the richest and poorest in the District?		<ul style="list-style-type: none"> <li>- New housing would deliver new affordable housing in this area, although homes are relatively affordable in this area standing at £153,255, in July 2015, according to rightmove. There is an identified need for affordable housing in this area</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure policies support the delivery of appropriate mix and tenure of new homes consistent with H19 and H20</li> </ul>
To improve local accessibility to healthcare, education, employment, food shopping facilities, and recreational resources (including open spaces and sports facilities) and promote healthy and sustainable travel or non-travel choices	Will it make access easier for those households who do not have a car?		<ul style="list-style-type: none"> <li>- Half hourly bus service to Swadlincote and Burton within 400m</li> <li>- The site is well related to main facilities in the village which are within 800m.</li> <li>- There are some local facilities (including a primary school, village hall, post office, convenience shop, outdoor sports provision and a mobile library service).</li> <li>- Secondary School provision is The Pingle School in Swadlincote some 7 km from the site.</li> <li>- There are employment opportunities at Cadley Hill and Tetron Point, less than 4km from the site.</li> <li>- There is a metalled path from the site to the village.</li> </ul>	<ul style="list-style-type: none"> <li>- Ensure Development reflects INF2</li> </ul>
	Will it help deliver new, or protect existing local services and facilities and promote the provision of new facilities and public transport provision?		<ul style="list-style-type: none"> <li>- Development will help sustain existing local shops, community facilities and could support existing public transport provision locally.</li> </ul>	
To make best use of existing infrastructure and reduce the need to travel and increase opportunities for non-car travel (public transport, walking and cycling)	Will it minimise the impact of traffic congestion on the strategic and local road network?		<ul style="list-style-type: none"> <li>- Development on this scale would be unlikely to have a significant impact on congestion on the local and strategic highway networks.</li> </ul>	<ul style="list-style-type: none"> <li>- Requirements for Green Travel Plans, or other measures to secure non-car travel.</li> </ul>
	Will it increase the proportion of journeys using modes other than cars?		<ul style="list-style-type: none"> <li>- The site is within 400m of a half hourly bus service between Linton and Swadlincote.</li> <li>- The site does not offer opportunities to link in to the cycleway network nor the PROW network.</li> </ul>	
	Will it make the best use of other infrastructure?		<ul style="list-style-type: none"> <li>- There is no headroom at Coton Park WWTW although it is likely that development on the scale proposed could be accommodated.</li> <li>- There are no known requirements for additional water supply or electricity network improvements.</li> <li>- Super Fast broadband expected 2015</li> </ul>	

To achieve stable and sustainable levels of economic growth and maintain economic competitiveness	Will it encourage the creation of new businesses or existing businesses to grow?		- Could support the construction industry and other businesses involved in marketing and selling new homes. Would have less significant benefits following site build out, although new residents would help to support local shops and services.	- Inclusion of general rural diversification policy in the Part 2 Local Plan
	Will it reduce unemployment rates and disparities across the district?		- Development would support the creation of construction based jobs on a temporary basis.	
	Will it improve average incomes in the District?		- The proposed development will have no effect in respect of this objective	
To diversify and strengthen local urban and rural economies	Will it encourage economic diversification?		- Development would contribute towards increasing construction jobs locally (albeit on a temporary basis) and would create or support additional, or existing jobs related to finance, legal services and property services.	- Inclusion of appropriate policies in part 1 Local Plan (Employment) and Part 2 Local Plan (Retail) to encourage/sustain/protect existing employment sites and premises
	Will it ensure the provision of an adequate supply of employment land and protect existing viable employment sites?		- Provision of new housing sites could help reduce employment land losses, by ensuring sufficient housing supply (indirect effect).	
	Will it help support and encourage the growth of the Rural Economy?		- Further housing growth within the village could help sustain existing local shops and services.	
To enhance the vitality and viability of existing town and village centres	Will it improve existing shopping facilities?		- It is likely to be too small to deliver additional shops or services within the site.	- Ensure good connectivity to the village centre.
