This guidance supersedes the Affordable Housing Guidance published in March 2008.

Introduction

It is important that everyone living in South Derbyshire has the opportunity to live in a decent home they can afford. The District Council is committed to helping local people who cannot afford to buy or rent homes on the open market in the area.

At the heart of England and the National Forest, South Derbyshire has grown some 15.8% between 2001 and 2011. The adopted Local Plan Part 1 sets out the delivery of at least 12,618 additional dwellings between 2011 and 2028.

In recent years, average house prices in the District have been higher than the Regional and county-wide averages. The gap between the regional average and the South Derbyshire average is not reducing; figures published by the Office for National Statistics (ONS) in 2015 (Table 1) show that both East Midlands and South Derbyshire saw an increase in average house prices of 20% between 2005 and 2015.

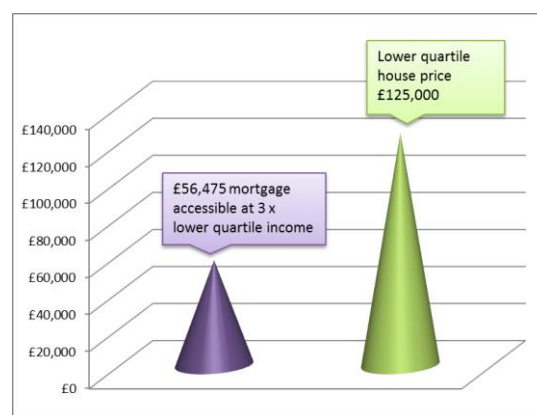

Table 1

Average House Prices	England	East Midlands	South Derbyshire
2005 Quarter 3	£189,130	£152,049	£158,309
2015 Quarter 3	£272,847	£183,284	£190,651

Source: ONS - House Price Statistics for Small Areas: Mean House Prices using Land Registry data

Lower quartile house prices provide a benchmark for first-time buyers and those on low incomes wishing to purchase a home. In 2015 the lower quartile house price in South Derbyshire was £125,000 – £10,000 higher than the Derbyshire average.

Diagram 1: Lower quartile house price against mortgage available at low quartile income

Lower quartile house prices within the District represent a 6.64 ratio of house prices to household income. Mortgages have traditionally been set at three times earnings. Therefore, without a significant deposit, home ownership is out of reach for many potential first-time buyers living in South Derbyshire.

The supply of appropriate and affordable housing impacts on the District's ability to retain and recruit skilled and talented people to support the economic growth of the local economy. Facilitating and delivering a range of integrated and sustainable housing is a key aim in the Council's Corporate Plan.

South Derbyshire Local Plan

There are five key policies across the Local Plan Parts 1 and 2 that work together to facilitate the delivery of affordable housing within the District.

Policy H1: Settlement Hierarchy sets out the appropriate scale of new development which can be accommodated based on the range of services and facilities in that settlement. This policy allows for the delivery of new housing sites adjacent to existing settlements/outside of settlement boundaries as an exceptional circumstance to normal policy, where they are delivering affordable housing on an exception or cross subsidy site. **Policy H21: Affordable Housing** requires 30% affordable housing on sites over 15 dwellings. The policy requires that this target be interpreted flexibly to reflect the local housing market, local needs and viability. This policy also includes the criteria which need to be met to justify the delivery of exception and cross subsidy sites allowed for in Policy H1. **Policy SDT1: Settlement Boundaries and Development** gives spatial effect to Policy H1 by defining settlement boundaries. Areas outside of settlement boundaries (and allocations) are known as Rural Areas; it is here that affordable exception or cross subsidy sites are located. **Policy BNE5: Development in Rural Areas** makes provision for development outside of settlement boundaries where this can be justified, including in accordance with policies elsewhere in the Local Plan. **Policy H20: Housing Balance** seeks to provide a balance of housing that includes a mix of dwelling type, tenure, size and density.

The District Council's own supply of land available for affordable housing is limited. Therefore, the Council will require developers of market housing to provide affordable housing within their schemes in accordance with Policy H21 of the Local Plan Part 1. The Council will also consider allowing exception sites for affordable housing to meet local needs in rural areas.

Affordable housing needs to be of good size and quality, fit for purpose and make a positive contribution to sustaining mixed and balanced communities. This document expands on the National Planning Policy Framework (NPPF) and the Council's affordable housing policies contained within the Local Plan, providing planning guidance for landowners, developers, applicant's agents and council officers regarding proposals for new residential development.

Negotiations for affordable housing provision will be considered on individual sites informed by up to date evidence including: the latest Strategic Housing Market Assessment (SHMA), information from South Derbyshire's Homefinder housing waiting list (choice based lettings) and, evidence of affordable housing provision needed in the locality of the site.

What is Affordable Housing?

The Council uses the Government's own definition of affordable housing, as detailed in the NPPF.

Affordable Housing is defined by the NPPF as:

- Social rented, affordable rented and intermediate housing, provided to eligible households whose needs are not met by the market. Eligibility is determined with regard to local incomes and local house prices.
- Provision should be included for the affordable housing to remain at an affordable price for future eligible households or for the subsidy to be recycled for alternative affordable housing provision.

Social rented housing is owned by local authorities and registered providers (as defined in section 80 of the Housing and Regeneration Act 2008), for which guideline target rents are determined through the national rent regime. It may also be owned by others and provided under equivalent rental arrangements to that above, as agreed with the local authority or with the Homes and Communities Agency (HCA).

Affordable rented housing is let by local authorities or registered providers to eligible households. Affordable rent is subject to rent controls that require a rent of no more than 80% of the local market rent. Homes let at affordable rent require approval from the HCA.

Intermediate housing is homes for sale and rent provided at a cost above social

rent, but below market levels subject to the criteria in the Affordable Housing definition (shown in the text box). These can include shared equity, shared ownership and discounted for sale in perpetuity.

What is not Affordable Housing?

Homes that do not meet the above definition of affordable housing, such as **Help to Buy** will not be considered as affordable housing for planning purposes.

Starter Homes - the requirement to provide Starter Homes was introduced as part of the Housing and Planning Act 2016. Such homes are defined as new homes, available for purchase by first-time buyers between the ages of 23 and 40, and are sold at a discount of at least 20% of the market value within the price cap (£250,000 for outside Greater London). A Starter Homes exception sites policy has been introduced with the intention that Local Authorities should provide Starter Homes on commercial and industrial land that is either under-used or unviable in its current or former use, and which has not currently been identified for housing. Guidance is provided in the NPPG with further detail expected in the forthcoming revised NPPF.

Housing Need

In 2012 the District population was 94,611. The population is expected to increase to approximately 123,000 by 2035 (an increase of 30%).

There is a need for affordable housing across South Derbyshire. As at September 2017 there were 782 households on the register and of this number, 538 had an identified housing need. This is further evidenced in the 2013 Strategic Housing Market Assessment (SHMA) which identified a need for 1,723 new affordable homes by 2017.

There are three sub market areas within South Derbyshire. Table 2 shows the additional affordable housing requirements within each of these sub areas. Whilst there is need across the whole District, it is clear that the greatest need is within Swadlincote as over 60% of the need is outstanding there.

In addition to the District housing need, as part of the Local Plan, South Derbyshire agreed to meet some of Derby City's housing need that it was unable to deliver in full itself. This means that when negotiating affordable housing in the Derby Fringe sub-housing market, regard will also be given to affordable housing needs arising from the City.

Table 2

South Derbyshire sub-market area *	Net Need	Affordable Housing Completions 2013 to 2015	Outstanding Need as at 1st April 2015
Derby Fringe	447	107	340
North West	248	0	248
Swadlincote South	1,028	69	959
Total	1,723	176	1,547

* See Annex 2 regarding make-up of each sub-market area

Source: 2013 Derby HMA Strategic Housing Market Assessment

Affordability and Tenure

Ensuring that homes are affordable to people within the District in housing need is crucial. The Council recognises that its housing needs are varied and best met through a balance of rented, intermediate tenure homes and starter homes.

The tenure mix will take into account the tenure profile of the surrounding area, and will be based on the prevailing need for affordable housing units with regards given to the current Strategic Housing Market Assessment, local evidence such as housing waiting lists and local housing research studies and transferability of the units to a Registered Provider.

- **Social rented homes.** The majority of social rented homes in the District are Local Authority owned and are let at around 70% of market value
- **Affordable rented homes** are built and rented at approximately 80% of market level and require permission from the HCA.
- **Intermediate housing** is assigned to households who can afford housing above 80% of market rents but cannot afford full market costs.

A proportion of affordable homes for rent, intermediate housing and starter homes will normally be sought on all sites where there is a requirement to provide affordable housing.

This means that developers are required to transfer affordable homes to not for profit Registered Providers or to the Council at a percentage discount of the market price or to sell on the open market at a substantial discount to ensure that they remain affordable to low income households in perpetuity.

In practice, transfer rates to Registered Providers are likely to be less than 50% of the open market value. Starter Homes and other discounted market products are likely to be restricted to an open market value or discounted more than 20% to be affordable to those eligible households who cannot afford to access the market.

In December 2015 the price of a lower quartile semi-detached home in South Derbyshire was £160,000. At 20% discount, a £128,000 starter home is not accessible to the majority of first-time buyers who require a deposit of at least 10% (£12,800) to be able to access a mortgage, in addition to other associated costs such as conveyancing and valuation fees.

Wherever possible, the Council will seek 1-bedroom properties suitable for 2 persons, 2-bedroom properties suitable for 4 persons and 3-bedroom properties suitable for 5 persons. The Council will also seek 4-bedroom properties for larger families and bungalows for households who require accessible or adapted homes.

Quality of Affordable Homes

The Council requires all affordable homes to be of good design and quality and fit for purpose.

To ensure the creation of sustainable and integrated communities, the affordable homes should be 'tenure blind'. This means that they should not be visually distinguishable from the market housing on the site in terms of build quality, materials, detailing, levels of amenity space and privacy including the treatment of gardens and boundaries.

It is advised that the homes should meet the Technical Housing Standards – Nationally Described Space Standard (March 2015, partially updated May 2016) as set out in Annex 2, or as can be demonstrated to be acceptable to Registered Providers. Good space standards are required as affordable homes will normally be let to maximum occupancy as a consequence of the Social Housing Size Criteria, which requires two children to share a bedroom up to the age of 10, and for two of the same sex children to share up to the age of 18.

The following boxes offer information on what is preferred by Registered Providers in the affordable homes that are built. Further information on design within South Derbyshire will be available in the Design SPD.

In addition, homes that are provided within a designated Conservation Area will require the associated level of design.

The Council will not support schemes where the affordable homes offered are:

- Over detached blocks of garages
- 2 or more bedroom flats
- Predominantly over undercrofts
- Predominantly over retail units
- In blocks of unbroken terraces or flats of more than four dwellings.
- Overlooking large areas of courtyard parking.
- Providing bedrooms not large enough for two children to share

Wherever possible, the Council require affordable homes to have:

- In-curtilage or nearby parking
- Gardens finished to the same standard and size as their private neighbours
- External materials and finishes to the same standard as the equivalent private dwellings.
- Sympathetic boundary treatment in keeping with private dwellings
- No shared highway access arrangements.
- A Lifetime Homes standard of build, or specifically built for disabled use.
- No service charges or management fees

Mechanisms for Delivering Affordable Housing

The Council uses four key mechanisms for delivering affordable housing:

- Negotiation of up to 30% affordable housing, as defined by the NPPF, on market sites for developments of over 15 dwellings.
- Registered Provider or Council-led schemes that come forward and achieve higher levels of affordable housing on sites that would not otherwise be viable, such as on brownfield sites.
- Provision of affordable housing on rural exception sites to meet a local identified housing need.
- Acquisition by the Council of new build homes built either as part of S106 agreements or purchased on the open market.

In exceptional circumstances, the Council may accept:

- Commuted sums in lieu of on-site provision to facilitate the delivery of affordable housing on an alternative site.

Affordable Housing Secured on Market Sites

Policy H21 of the Local Plan Part 1 seeks to secure up to 30% of new housing development as affordable housing on **market sites** of more than 15 dwellings. These shall be secured through agreements made under Section 106 of the Town and Country Planning Act 1990 (as amended).

Consideration will be given to:

- I. the local housing market;
- II. the viability of any proposed scheme which will be assessed through independent viability assessments;
- III. the tenure mix and dwelling type to be delivered on-site based on the SHMA or other up to date housing evidence prepared in conjunction with the Council;
- IV. the phases of development that are being proposed.

The onus is on the applicant to demonstrate if market conditions and extraordinary costs mean that there may be a case for reducing the proportion of affordable housing to less than 30%. The applicant will be expected to submit sufficient details in support of any claim for a reduction in the affordable housing, including an Economic Viability Assessment and agree to payment of all reasonable costs for the independent checking and verification by the District Valuer.

Registered Provider and Council-Led Schemes (Affordable Housing Provider)

The Council will support Registered Providers who wish to develop sites delivering affordable housing in accordance with Policy H21 where:

- I. there is an identified local housing need for affordable housing; or
- II. there is a brownfield site which is not viable for the delivery of market housing; or
- III. the site forms part of a regeneration programme involving the demolition of some or all of the existing affordable housing on the site.

Where the Council considers it is appropriate to permit the development of more than 30% of affordable housing on a site, the affordable housing provider will be required to provide other appropriate development contributions unless independent economic viability assessment demonstrates that it is not viable.

Rural Housing Exception Sites

A rural exception site is a site where planning permission will only be granted for small scale rural affordable housing, as an exception to normal planning policy, to meet an identified local need. Rural Exception Sites must be in scale and keeping with the settlement they are within or adjoining and its setting. The NPPF definition of Rural Exception Sites is:

‘Small sites used for affordable housing in perpetuity where sites would not normally be used for housing. Rural Exception Sites seek to address the needs of the local community by accommodating households which are either current residents or have an existing family or employment connection. Small numbers of market homes may be allowed at the local authority’s discretion, for example where essential to enable the delivery of affordable units without grant funding’.

Policy H21 permits the development of housing on rural exception sites that are kept in perpetuity as affordable housing for local people where sites adjoin existing Key Service Villages, Local Service Villages and Rural Villages. The number of dwellings must be in accordance with the settlement hierarchy set out in Policy H1 in the Local Plan, see Annex 3, and only in exceptional circumstances to normal policy where:

- i. the homes meet a clearly identified local need;
- ii. the development provides a majority of affordable homes;
- iii. the need cannot reasonably be met within the development limits of the village concerned and

- iv. the development is in a scale relative to the settlement size and facilities available particularly public transport and does not have any unacceptable adverse impacts on the natural and built environment.

An application for development on an exception site must be supported and based on robust evidence such as an up to date independent Local Housing Needs Study, reflecting the property types and tenure identified in that study and demonstrating why the need cannot be met from other more suitable sites either within or adjoining the village. The affordable housing must be transferred and managed by a Registered Provider (or the Council) and remain affordable in perpetuity and be available for local people as a matter of priority.

The development of rural exception sites are permitted to meet an identified housing need for the local community. On this basis local residents or those who can demonstrate a local connection to the community should be given first priority to either rent or purchase an affordable home and this principle should apply to any subsequent rental lets or sales.

The following definition of local connection (based on 2002 Housing Act) shall apply:

- a person has a local connection because he or she is, or was in the past, normally resident there, and that residence was of his or her own choice; or
- he or she is employed there; or
- because he or she has an immediate family association; or
- because of special circumstances he or she needs to live in the community.

In all circumstances local connection must be for a minimum of 6 continuous months

in the previous 12 month period or at least 3 years in the previous 5 years

There are restrictions placed on Registered Providers that limit the amount they can pay for land. Typically, this will be in the region of £10,000 to £14,000 per property. Where it can be demonstrated through a financial viability assessment that taking into account all of the available funding a scheme is not viable, then consideration will be given to a proportion of the site being developed with market housing. However, this will be limited to the amount of market housing which makes the scheme viable with the majority of housing provided being affordable homes.

Commuted Sum in Lieu of on-site Provision

Policy H20 (Housing Balance) of the Local Plan Part 1 seeks to provide a balance of housing that includes a mix of dwelling type, tenure, size and density. Therefore, it is expected that where affordable housing is required as part of a proposed development, it should be provided on-site.

The Council will only accept the payment of a commuted sum in lieu of on-site provision where it is demonstrated that the provision of affordable housing on-site makes the development unviable or where social housing would be inappropriate.

The payment of commuted sums in lieu of on-site provision may be considered in the following circumstances, but only where the Council is satisfied that such payment will actually result in the provision of affordable housing in the locality:

- I. where the Council considers it is more appropriate to provide the affordable housing on an

alternative site led by the Council or a Registered Provider;

- II. where the Council considers it is more appropriate to subsidise the delivery of affordable housing on an alternative market housing site whereby it has not been possible due to viability to secure 30% affordable housing;
- III. where the Local Housing Strategy has identified a need for specialist or support housing and the Council wishes to pool some or all of the contributions for affordable housing to meet that need;
- IV. where the Council considers it is more sustainable to provide the affordable housing by acquisition of existing homes for affordable use.

Where a commuted sum is acceptable to the Council, the amount payable per dwelling will be calculated and checked by the Council through the District Valuer. All sums received will only be used to subsidise affordable housing provision within the District.

A commuted sum can be used to fund the purchase of new build housing, to purchase existing dwellings for affordable use or contribute to the regeneration or redevelopment of existing housing within South Derbyshire.

Delivery Expectations

Clustering of Affordable Housing

In order to integrate different tenures, the Council will not support the principle of grouping all affordable dwellings together. Instead, new residential developments should be designed so that affordable housing is distributed across the whole site/phase amongst the open market housing in clusters of no more than 10 dwellings, with the exception of 100% schemes.

Clusters will be counted as follows:

- a cluster will include all affordable housing tenures including discounted low cost housing and starter homes.
- a cluster includes all affordable housing which is contiguous including the adjacent gardens and those properties immediately opposite each other divided by a road or car parking.
- a cluster includes any existing affordable homes or any affordable home proposed in an adjacent construction phase regardless as to who the developer is.

Design

As with all other forms of residential accommodation, the Council expects affordable housing to be built to a high standard of design and amenity.

Affordable dwellings provided within a new residential development should be visually indistinguishable, built to the same quality and using the same materials as open market homes; this includes all gardens and boundary finishes.

All affordable homes are expected to have their own front door directly leading to the outdoors.

Affordable dwellings should be well designed and preferably conform to the minimum space standards, as set out in Annex 2, providing a good level of living space for their maximum occupancy. Schemes should also accord with the Council's Design Guide SPD.

Layout Plans

For outline planning applications, the delivery of affordable housing must be agreed in principle. The Council will require details of the percentage of all homes proposed to be affordable homes, types and tenures to be provided and, once agreed, this will be set out in a Section 106 Agreement.

In the case of full and reserved matter planning applications, a site layout plan should be submitted showing the 'Affordable Housing Scheme' indicating the type, tenure and location of the affordable housing. Details of the gross internal floor area and number of bedrooms for each dwelling type should be provided in a schedule shown on the relevant site layout plan.

Property Type

In determining the property types, regard will be given to the current Strategic Housing Market Assessment and local housing needs evidence, including need identified through the district housing waiting list.

1-bed properties should preferably comprise 1 bed houses. Where 1-bed flats are permitted, these should be in blocks of no more than four properties with no internal communal spaces such as corridors and staircases.

2, 3, 4+ bed properties should be houses or bungalows (i.e. no flats) and should preferably be no more than 2-storey, suitable to meet the needs of a family and include a private garden space.

The District has an increasing older population with a 96% (4,489) expected increase in those over the age of 75 by 2031. Where there is evidence, the Council will seek a proportion of bungalows of a good size, suitable for wheelchair use and other adaptations, to be developed on all suitable sites.

Tenure

The affordable housing tenure will be broadly in line with that recommended in the current Strategic Housing Market

Assessment at a sub-housing market level.

Negotiations regarding the tenure split will be based on viability with regard given to the Government's intention to introduce a proportion of Starter Homes on sites.

South Derbyshire sub-market area	Percentage of Affordable homes for rent	Percentage of Intermediate affordable homes
Derby Fringe	75%	25%
North West	68%	32%
Swadlincote South	68%	32%

Tenure Split recommended in the 2013 Derby HMA Strategic Housing Market Assessment

Transfer Price to a Housing Provider

Registered Providers are restricted in what they can pay to developers for new homes, limited by the finance they can raise on the property, and the associated long term costs of financing the purchase and managing and maintaining the property. The maximum rents they can charge must be affordable, and intermediate tenure must be sold at a price that is affordable to those households not able to access full price market housing.

The Council does not specify a price at which a developer must transfer the affordable housing to a Registered Provider and does not limit developers' choice in whom they may wish to transfer the properties to. However the Council expects the developer to proactively seek a Provider and be willing to accept a transfer price less than 50% of the open market value. The developer will need to demonstrate through an independent Economic Viability Assessment if they consider the price offered by a Registered Provider renders the scheme unviable and

are seeking a variation to the overall percentage/ tenure split of the affordable housing as set out in the S106 legal agreement.

Service Charges

The developer should not apply service charges to a Registered Provider. On developments where there are communal areas such as car parking, the developer should transfer the freehold of the space/area to the Registered Provider to enable them to minimise future costs to the occupiers.

Phasing

Developers will be expected to complete the affordable units on site broadly in tandem with the delivery of market housing and this will be secured through a legal agreement. A 'Phasing Plan' will be required identifying the phases of the development (if the development is intended to be developed in phases), which will usually be part of the Section 106 Agreement. For single phase developments the proportion, mix (unit types, sizes and tenures) and locations (specific plot number) of the affordable housing will be agreed at the time of a full application or at the time of a reserved matters application for outline applications.

For multi-phase developments, the maximum and minimum amounts of affordable housing on each phase will be agreed at the time of the outline application. The proportion, mix (unit types, sizes and tenures) and locations (specific plot numbers) of affordable housing on each individual phase will then be agreed at the start of each phase.

Affordable Housing Providers

The Council works with a number of Affordable Housing Providers (Registered Providers- not for profit organisations) to develop and ensure the long term retention, management and availability of all affordable homes.

The Council recommends that, following pre-application discussions with the Council, that the applicant puts forward their proposals with an Affordable Housing Provider so they can be involved in the negotiation at the earliest possible stage and preferably be party to the required Section 106 Agreement.

A list of Affordable Housing Providers developing across the District is shown in the box opposite.

This list is not restrictive and applicants may work with an Affordable Housing Provider that is not included on this list. However, the proposed Affordable Housing Provider must be agreed in advance by the Council before any contract with the Provider is entered into, as all of the affordable housing units must be able to be allocated through the District's Choice Based Lettings scheme – Homefinder, or other arrangements approved by the Council.

Annex Two

Space Standards Required for Affordable Homes

Minimum space standards, based on DCLG Technical Housing Standards (March 2015, updated May 2016) and set out below, are recommended for all affordable homes regardless of tenure.

Number of Bedrooms	No of bed spaces (persons)	Minimum gross internal floor areas		
		1 storey dwellings (sq. metre)	2 storey dwellings (sq. metre)	3 storey dwellings (sq. metre)
1	1p	39		
	2p	50	58	
2	3p	61	70	
	4p	70	79	
3	4p	74	84	90
	5p	86	93	99
	6p	95	102	108
4	5p	90	97	103
	6p	99	106	112
	7p	108	115	121
	8p	117	124	130
5	6p	103	110	116
	7p	112	119	125
	8p	121	128	134
6	7p	116	123	129
	8p	125	132	138

Additional information

Wheelchair adapted properties should allow for a minimum turning circle of 1500 x 1500 and property type drawings submitted with a planning application should demonstrate that a wheelchair user can move freely around the property and including using toilet and bath/shower facilities.

The DCLG Technical Housing Standards are available at <https://www.gov.uk/government/publications/technical-housing-standards-nationally-described-space-standard>

Annex Three

The Settlement Hierarchy

Policy H1 'Settlement Hierarchy' of the adopted Local Plan is set out below:

1. Urban Areas – development of all sizes within the settlement boundaries will be considered appropriate and sites adjacent to settlement as an exception or cross subsidy site as long as not greater than 25 dwellings.

Swadlincote including Woodville	Adjacent to Burton upon Trent
Adjacent to Derby	

2. Key Service Villages– development of all sizes within the settlement boundaries will be considered appropriate and sites adjacent to settlement as an exception or cross subsidy site as long as not greater than 25 dwellings.

Aston on Trent	Etwall	Hatton
Hilton	Melbourne	Overseal
Repton	Shardlow	Willington
Linton		

3. Local Service Villages – development of sites within the settlement boundary will be considered appropriate and sites adjacent to settlement boundaries as an exceptions or cross subsidy site as long as not greater than 15 dwellings.

Coton in the Elms	Findern	Hartshorne
Mount Pleasant	Netherseal	Newton Solney
Rosliston	Ticknall	Weston on Trent

4. Rural Villages – development of a limited nature will be allowed as follows:
 - i. within the settlement boundary where applicable or adjacent to as an exceptions or cross subsidy site as long as not greater than 15 dwellings;
 - ii. or of limited infill and conversion of existing building where no settlement boundary.

Ambaston	Barrow upon Trent	Bretby
Burnaston	Cauldwell	Church Broughton
Coton Park	Dalbury	Drakelow Village
Egginton	Elvaston	Foremark
Foston	Ingleby	Kings Newton
Lees	Long Lane	Lullington
Marston on Dove	Milton	Radbourne
Scropton	Smisby	Stanton
Stanton by Bridge	Sutton on the Hill	Swarkestone
Thulston	Trusley	Twyford
Walton on Trent		

5. Rural Areas – areas outside of the defined settlements listed above. Due to the lack of services and facilities and defined settlement boundaries, only development of limited infill and conversions of existing buildings will be acceptable.

Annex Four

Affordable Housing Need identified in the 2013 Strategic Housing Market Assessment

Estimated level of Housing Need (2012-17) by Type of Affordable Housing (Numbers)

Area	Intermediate			Social/Affordable Rented			Total net need
	Total need	Supply	Net need	Total need	Supply	Net need	
Derby Fringe	130	16	114	480	147	333	447
North West	84	5	80	284	115	168	248
Swadlincote & South	361	33	328	1701	1001	700	1028
Total	575	54	522	2465	1263	1201	1723
