- 19. Health and Emergency Services Infrastructure
- 20. Education Infrastructure
- 21. Environmental Infrastructure

#### 1 Introduction

- 1.1. The Infrastructure Delivery Plan (IDP) sets out the infrastructure required to support the level of development proposed in South Derbyshire's Adopted Local Plan (2011-2028).
- 1.2. Over the Plan Period (up to 2028) there will be significant levels of growth in terms of housing, retail and employment and it is essential for the Council and its partners to deliver the services necessary to achieve timely, sustainable and effective infrastructure to meet the needs of all residents in the future.
- 1.3. The information in this document has been produced in collaboration with various infrastructure providers operating in the District, as discussed in more detail in section 8.
- 1.4. The 2008 Planning Act<sup>1</sup> and subsequent Regulations define infrastructure as including roads and other transport facilities; flood defences; schools and other educational facilities; medical facilities; sporting and recreational facilities; open spaces; and affordable housing. This list is not exhaustive; other types of infrastructure will be considered as part of this document.
- 1.5. Successful implementation of South Derbyshire's Local Plan depends therefore not only on the actions of the District Council but upon the co-ordinated and sustained action from a wide range of other organisations. This requires shared objectives and involves ensuring related strategies are consistent with the plan and that there is co-ordinated action to effectively deliver essential physical, social, environmental and economic infrastructure on time.
- 1.6. Therefore, the IDP:
  - Sets out the main infrastructure issues
  - Provides an overview of the action required to deliver the Local Plan
  - Identifies who is responsible for delivery; and
  - Gives a broad indication of phasing, costs and funding mechanisms

<sup>&</sup>lt;sup>1</sup> https://www.legislation.gov.uk/ukpga/2008/29/contents

- 1.7 The Derbyshire Infrastructure Delivery Plan and the South Derbyshire Core Strategy Infrastructure Topic Paper established a baseline for infrastructure capacity during preparation of the Part 1 Local Plan and helped to identify initial infrastructure needs associated with further growth. This initial scoping work also improved the understanding of infrastructure issues faced by a wide range of organisations and has encouraged partnership working, with the focus on delivery. The range of facilities required to support development in the Development Plan has been identified and used to develop an infrastructure schedule.
- 1.8 The IDP is a 'living' document which evolves in response to on-going monitoring of infrastructure requirements and dialogue with infrastructure providers up to 2028. This iteration of the IDP updates information previously published in the 2019 edition.

## 2. National Policy Context

- 2.1 The National Planning Policy Framework (NPPF), February 2019, states, in paragraph 16, that plans should "be shaped by early, proportionate and effective engagement between plan makers and communities, local organisations, businesses, infrastructure providers and operators and statutory consultees."
- 2.2 In para 20 it states that "strategic policies should set out an overall strategy for the pattern, scale and quality of development and make sufficient provision for....(b) infrastructure for transport, telecommunications, security, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat); (c) community facilities (such as health, education and cultural infrastructure); and (d) conservation and enhancement of the natural, built and historic environment, including landscapes and green infrastructure...."
- 2.3 In para 26, it states that "effective and on-going joint working between strategic policy-making authorities and relevant bodies is integral to the production of a positively prepared and justified strategy. It states that in particular, joint working should help to determine where additional infrastructure is necessary...".
- 2.4 In para 28 it states that "non-strategic policies should be used by local planning authorities and communities to set out more detailed policies for specific areas, neighborhoods or types of development. This can include...the provision of infrastructure and facilities at the local level...".

#### 3. A Spatial Portrait of South Derbyshire

- 3.1 South Derbyshire is a rural District in central England covering an area of over 112 square miles. It adjoins and is heavily influenced by the City of Derby to the north, Burton upon Trent to the west and Ashby-de-la-Zouch to the east. The town of Swadlincote, in the south of the District, is the main urban centre with a population of around 37,000.
- 3.2 For many years the District has been the fastest growing in Derbyshire and is currently one of the fastest growing areas in England. Its population is growing from the current 104,500<sup>2</sup> and is anticipated to be over 111,000 by 2028. The population is also becoming older and more diverse. Whilst this is not a unique pattern, this ageing of the population raises important questions about the types of housing, facilities and support services that will be needed in the future.
- 3.3 Despite strong population growth, South Derbyshire remains largely rural. Away from Swadlincote, the District is a scattered network of villages of varying sizes. South Derbyshire is home to 22 Conservation Areas including the Trent and Mersey Canal. The District also contains part of The National Forest.

## 4. Local Policy Context

- 4.1 South Derbyshire's Sustainable Community Strategy 2009-2029: 2017 Refresh (SCS), produced by the South Derbyshire Partnership, sets out a vision, strategy and associated challenges for the District over four themes: children and young people; healthier communities, safer and stronger communities and sustainable development. For each of the four themes priorities are identified and those relevant to the Development Plan and this IDP include:
  - Young people's aspirations are raised and they are supported to achieve their potential
  - Health inequalities between different communities are reduced
  - People make choices in their lifestyles that improve their physical and mental wellbeing.
  - Older people, people with dementia and other long term conditions and their carers have good quality of life, retain their independence for as long as possible, and receive the support they need at the end of their lives
  - More people feel safe and secure in their home and in the community, particularly those who are most vulnerable

<sup>&</sup>lt;sup>2</sup> 2018 mid-year population estimate for South Derbyshire

- A more prosperous, better connected, increasingly resilient and competitive South Derbyshire economy
- A better place to live, work and visit at the heart of the National Forest

## 5. Local Plan Strategic Objectives

- 5.1 The Local Plan sets out 13 objectives for the Local Plan itself. In brief these are to: ensure development is sustainable, achieving design excellence, addressing climate change and reducing waste and pollution; meet the needs of the whole population; strengthen and diversify the economy whilst respecting the environment and natural resources; ensure the District's housing stock is fit for purpose; ensure communities are a good and beneficial place to live; promote sustainable living and working; reduce the need to travel, encouraging necessary travel by sustainable modes; ensure infrastructure necessary to support development is provided; respect and enhance what makes our District unique; utilise opportunities provided by the District's location within the National Forest, promoting leisure and tourism; make optimum use of previously used land and buildings; enhance and develop Swadlincote Town Centre and; ensure growth is co-ordinated with development in adjoining areas.
- 5.2 This IDP is to enable the achievement of Local Plan Objective 8 and Objective 13. In full these policies seek:
  - To ensure the social, physical and green infrastructure needed to support strong growth levels is provided at an appropriate time and accessible to our communities.
  - To ensure growth in South Derbyshire is coordinated with the development of adjoining areas both within and outside of the HMA.

### 6. Local Plan: The Spatial Strategy

6.1 The Local Plan Part 1 states that "the Plan's Strategy is about harnessing the energy and opportunities of sustainable growth to secure positive benefits for the District's residents and employers. This means using development as a means of delivering not just much needed homes and business accommodation, but also other important community benefits where they are most needed such as reclaiming derelict land, supporting local shops and services, improving the local environment, providing required infrastructure and addressing the causes and effects of climate change."

6.2 The Local Plan contains policies regarding the amount of and locations for future large-scale development for both housing and employment. The overall strategy is one of ambitious growth and reflects the NPPF's requirement for a general presumption in favour of sustainable development. Derby City is unable to meet all of its housing needs within its own boundary. Around 3,000 new homes will be built in South Derbyshire to accommodate Derby City's housing needs. The overall strategy for the distribution of housing has been guided by the Settlement Hierarchy, which has been produced following an analysis of the settlements within the District in terms of what services each provides.

## 7. Scope of the Infrastructure Delivery Plan

- 7.1. The aim of the IDP is to establish what infrastructure needs to be delivered, when, and by which provider, to support future development, primarily as set out in the Local Plan. The best information available with regards to the sources of funding together with the possible cost of infrastructure is provided.
- 7.2. The IDP has to be integrated and co-ordinated with a range of national and local plans and programmes that impact on spatial planning. The IDP will be the instrument for meeting the infrastructure priorities of South Derbyshire. It should not be seen as a 'shopping list' of priorities but as a tool to ensure that the Local Plan and the strategic sites identified in it are deliverable.

## 8. Methodology

- 8.1 During the preparation of South Derbyshire's Adopted Local Plan Part 1 a Derby Housing Market Area Infrastructure Group was established to ensure consistency between each authorities IDP and the County Council's adopted Infrastructure Plan. An officer from Erewash Borough Council also attended.
- 8.2 The process began as a desk-based study to determine existing provision, plans and strategies for each infrastructure provider.
- 8.3 Alongside this, a review of existing planned capital and infrastructure investment, as detailed in various plans and strategies for each infrastructure category, was undertaken to identify existing plans for infrastructure investment and improvement within South Derbyshire.

8.4 Since the adoption of South Derbyshire's Local Plan and first IDP, dialogue with key infrastructure providers has remained ongoing.

## 9. Delivery Mechanism

- 9.1 For successful implementation of the IDP a number of challenges need to be overcome:
  - The need for a strong commitment to delivery across a wide range of organisations
  - The need for partner organisations and stakeholders to integrate and co-ordinate their investment decisions
  - The need for improved management of existing physical infrastructure assets and the way new assets are delivered
  - The need for investment in additional infrastructure to meet not only the challenges of growth but also that of deficiencies in existing infrastructure.
- 9.2 With public sector financial cuts and changing funding mechanisms it is less certain what resources will be available to spend on infrastructure in future. Nevertheless, the following possible sources of infrastructure funding have been identified:
  - New Homes Bonus
  - Single Local Growth Fund
  - Business rates and Tax Increment Financing (TIF)
  - Regional Growth Fund
  - Growing Places
  - Service-specific grants
  - Developer contributions
- 9.3 Reductions in the Council's Budget can have a significant impact on local service delivery. This IDP therefore provides an important means of co-ordinating resources between the Council, partners and developers to ensure timely and efficient delivery of infrastructure to support development.
- 9.4 Significant funding for infrastructure is anticipated to come from developer contributions. Policies in the Local Plan Part 1 explain the role of developer contributions. The IDP will inform what contributions towards infrastructure may be sought from development. At present, these are secured through Section 106 planning obligations which, in line with the CIL Regulations 2010

(as amended), must be:

- Necessary to make the development acceptable in planning terms
- Directly related to the development
- Fairly and reasonably related in scale and kind to the development
- 9.5 Although developer contributions are currently being raised through Section 106 planning obligations, the Council continues to keep under review the need to move towards a Community Infrastructure Levy based approach to collecting funds towards infrastructure. New CIL Regulations came onto force on 1<sup>st</sup> September 2019<sup>3</sup>, which removed Section 106 pooling restrictions, allowing authorities to use as many obligations required to fund a particular infrastructure project, instead of only five obligations allowed under the previous regulations.
- 9.6 New development will be expected to contribute to the provision of associated infrastructure, whether through Section 106, CIL or through on-site design. But it is crucial that current infrastructure deficiencies are also met. Therefore, it is important that partners and stakeholders commit resources to implement these programmes and co-ordinate delivery and development.

## 10. Monitoring and Review Process

- 10.1. The IDP is a 'living document' and has been updated on an annual basis to ensure that new information about plans and programmes is incorporated, so that development continues to remain viable and that infrastructure keeps pace with development.
- 10.2. In short the purpose of ongoing monitoring is to ensure that:
  - Risks are managed
  - Reports on the delivery of infrastructure are produced at regular intervals
  - The Infrastructure Schedule is updated regularly
  - Performance results are included in the Annual Monitoring Report

<sup>&</sup>lt;sup>3</sup> The Community Infrastructure Levy (Amendment) (England) (N0.2) Regulations 2019: <a href="http://www.legislation.gov.uk/ukdsi/2019/9780111187449/regulation/5">http://www.legislation.gov.uk/ukdsi/2019/9780111187449/regulation/5</a>

## 11. Development Strategy for South Derbyshire

- 11.1. The agreed position is for a minimum of 33,388 dwellings within the Derby Housing Market Area between 2011 and 2028, of which 12,618 dwellings would be provided within South Derbyshire. In planning for 12,618 additional dwellings in South Derbyshire, the Council had regard to the following:-
  - Completed dwellings since 2011,
  - Existing planning permissions for housing as at 01/04/2019
  - Sites already allocated for housing in the adopted Local Plan Part 1 and Part 2 that have not yet come forward for development
  - Making an allowance for housing on land which cannot be readily identified in advance (known as 'windfall')
  - An allowance for estimated future losses of the existing dwelling stock
- 11.2. In order to ensure that the Authority could demonstrate a five year supply of housing the Development Plan (the Local Plan Part 1 and Local Plan Part 2) has identified a range of housing sites across South Derbyshire to meet our own need as a well as a proportion of unmet need arising in Derby City. The majority of this housing provision is allocated on 18 strategic sites in the Part 1 of the Local Plan. The remainder is allocated on 14 smaller sites in the Part 2 Local Plan and via an allowance for "windfalls" (23 per annum).
- 11.3. The strategic sites allocated for housing in Part 1 Local Plan are:
  - Boulton Moor (around 1,950 dwellings)
  - Chellaston Fields (around 500 dwellings)
  - Hackwood Farm (around 290 dwellings)
  - Highfields Farm (around 1,041 dwellings)
  - Land off Holmleigh Way (around 120 dwellings)
  - Land West of Mickleover (around 1,650 dwellings of which 1,400 within Plan period)
  - Primula Way (around 500 dwellings)
  - Wragley Way (around 1,950 dwellings of which 1,000 within Plan period)
  - Aston Hall Hospital, Aston-on-Trent (around 74 dwellings)
  - Broomy Farm (around 400 dwellings)
  - Council Depot (around 158 dwellings)

- Drakelow Park (around 2,239 dwellings of which 1,200 within Plan period)
- Land to the north east of Hatton (around 400 dwellings)
- Land near Church St/Bridge St & Gresley FC (around 350 dwellings)
- Land north of William Nadin Way (600 dwellings)
- Land off The Mease, Hilton (around 485 dwellings)
- Land off Longlands, Repton (124 dwellings)
- Willington Road, Etwall (199 dwellings)

## 11.4. The non-strategic sites allocated for housing in Part 2 Local Plan are:

- Moor Lane, Aston on Trent (around 42 dwellings)
- Jacksons Lane, Etwall (around 50 dwellings)
- Derby Road, Hilton (around 43 dwellings)
- Station Road Melbourne (around 46 dwellings)
- Acresford Road, Overseal (around 70 dwellings)
- Valley Road, Overseal (around 64 dwellings)
- Milton Road, Repton (around 25 dwellings)
- Mount Pleasant Road, Repton (around 24 dwellings)
- Off Kingfisher Way, Willington (around 50 dwellings)
- Oak Close. Castle Gresley (around 55 dwellings)
- Midland Road, Swadlincote (around 57 dwellings)
- Land north of Scropton Road, Scropton (around 10 dwellings)
- Montracon (around 95 dwellings)
- Stenson Fields (around 70 dwellings)

#### 12. Water and Flooding Infrastructure

Main providers/partners: South Derbyshire District Council, Severn Trent Water, South Staffordshire Water, Environment Agency (EA) and Developers

**Existing capacity and recent provision**: South Derbyshire is an area at risk of flooding. Much of the District is located within the River Trent, Dove or Derwent corridors and therefore the flood risk to the majority of this area is high from fluvial as well as other sources. Nevertheless, an overview of flood risk in Derbyshire in 2011 assessed only 29% of the District's 395 kilometer grid squares as being at risk of future flooding.

The major reservoirs in the Derbyshire Derwent and Dove valleys augmented by a transfer from Rutland Reservoir (Anglian Water) and several river abstractions provide most of the water to the Derby HMA. The Environment Agency's Licencing Abstraction Strategies show that the East Midlands water resource situation is significantly constrained. The Derby Housing Market Area Water Cycle Study: Scoping and Outline Water Cycle Study (2010) shows that the vast majority of resource management units in the study area have no water available or are over licensed or over abstracted.

The Water Cycle Study found that many watercourses in South Derbyshire, including the River Mease, which is a Special Area of Conservation (SAC) under the European Habitats Directive, are failing to meet water quality standards under the Water Framework Directive.

**Specific provision initiatives**: In terms of wastewater treatment, a number of waste water treatment works were identified as lacking headroom to accommodate new growth without further investment.

Discussions have taken place between Derby HMA and water companies to explore the use of Sustainable Urban Drainage Systems (SuDS) to reduce the amount of surface water run-off.

The EA do not believe there to be spare capacity at Repton Sewage Pumping Station, which could affect sites H4 (Land at Broomy Farm, Woodville) and H9 (Land at Longlands, Repton). Furthermore the EA have identified issues concerning inadequate sewerage infrastructure that will serve the strategic sites to the south of Derby. This issue is particularly relevant for the following development sites - H12 (Highfields Farm); H13 (Boulton Moor); H14 (Chellaston Fields); H15 (Wragley Way); H16 (Primula Way); H17 (Holmleigh Way), H18 (Hackwood Farm), H19 (Land West of Mickleover), H23N (Stenson Fields) and; E4 (Strategic Location for Sinfin Moor Employment Site Extension).

Severn Trent Water state that the significant levels of planned new development to the South-East and South of Derby will require improvement work to the sewerage system to ensure the additional flows do not increase sewer flood risk or increased spills from sewer overflows. As part of their assessments Severn Trent Water have identified the need to provide strategic capacity improvements to reinforce capacity within the main trunk sewers in the South of Derby but also expect the need to provide more localised capacity improvements to make sure the smaller sewers in the immediate vicinity of the developments have sufficient capacity.

Implemented in a phased approach, this strategic project will ensure there is long term sewerage capacity when required and Severn Trent Water will also need to supplement this with development-specific localised improvements as and when required. These localised capacity schemes will be identified through direct discussions with developers and will be progressed to align with development occupancy. As the scope of this work is much smaller than strategic work the lead in times are less, so it is easier to align work to coincide with development.

Furthermore, Severn Trent Water state that whilst all the sewage treatment works listed in the schedule below have limited spare capacity available, additional capacity will be made available as and when required. Severn Trent Water has a general duty under section 94 (clauses 1a and 1b) of the Water Industry Act 1991:

- (a) to provide, improve and extend such a system of public sewers (whether inside its area or elsewhere) and so to cleanse and maintain those sewers and any lateral drains which belong to or vest in the undertaker as to ensure that that area is and continues to be effectually drained; and
- (b) to make provision for the emptying of those sewers and such further provision (whether inside its area or elsewhere) as is necessary from time to time for effectually dealing, by means of sewage disposal works or otherwise, with the contents of those sewers.

Severn Trent Water stress that this places an absolute obligation upon themselves to provide such additional capacity as may be required to treat additional flows and loads arising from new domestic development. As a business, Severn Trent Water are specifically funded to discharge this legal obligation through their charging mechanism, as overseen by OFWAT through the five yearly periodic review process. Severn Trent Water is also under a legal duty to comply with its sewage treatment works discharge permits, issued by the Environment Agency under the Water Resources Act 1991 (as amended by the Environment Act 1995 and the Environmental Permitting Regulations of 2010).

Should Severn Trent Water be in a position of being unable to comply with their permit to discharge as a consequence of growth within the sewerage catchment, they are obliged to remedy the situation using their own resources.

Severn Trent Water are not able to assess the impact on their assets of all the allocations proposed in the Local Plan at this stage, as their asset protection team look at each development on a case by case basis. However as a general rule, smaller developments would not normally cause issues (i.e. small infill or brownfield sites). Larger developments are more likely to, however again this will depend upon where the site is, what type and size of sewers are to be connected to (i.e. combined, foul or surface water). Where development is to take place in areas with predominantly combined sewer networks, generally these will impact the sewerage network because there will be little or no capacity in some storm events. The majority of sizeable developments in combined sewer areas go for sewer modelling and most will require improvement works.

Sustainable drainage methods should be used wherever possible. Most large scale housing sites include some form of sustainable urban drainage system. The costs of such systems can vary significantly depending on their design and scale. This requirement is further backed up by Severn Trent Water's own policies that require that developers look at discharging all surface water to watercourses, drainage ditches or soakaways wherever possible. Before Severn Trent Water agree to accepting surface water (particularly to combined sewers) they require evidence that the surface water cannot drain to soakaways, or that the watercourse is too far away to be a viable option; only then do Severn Trent Water allow surface water to their networks. For brownfield development Severn Trent Water expect developers to discharge 20% less of the previous surface water discharge and to attenuate that 20% on site. This is to enable betterment and a more sustainable drainage strategy for that site, again particularly where discharges are to combined sewers.

The Local Plan Part 1 includes a policy (Policy SD3) to ensure the Sustainable Drainage Systems are utilised in new development. In addition Policy SD3 also requires that new development include measures to reduce potable water use in new housing to ensure water usage is no more than 110 litres of water usage per person per day.

**Underlying Demand Trend**: In terms of water supply, treatment and quality there is a clear pressure on water resources and to support the water companies' management plans.

Due to the risk of exceeding water quality standards, measures are required to be in place before additional housing can be delivered. This is especially the case in the River Mease catchment area.

**Non-developer funding sources**: Various public and private bodies that are involved in the sector. Possibly some support from Derbyshire County Council's own resources, although there are budget restraints which have to be taken into account.

## **Developer funding arrangements in place:**

- River Mease Developer Contribution Scheme Individual contributions from planning applications
- Requirement for developers to meet the Optional Standard of 110/l/p/d as set out in Part G of the Building Regulations.

The condition requires the clear span bridge to be fully implemented prior to commencement of phases 3 and 4.

#### 13. Waste Infrastructure

Main providers/partners: South Derbyshire District Council, Derbyshire County Council

**Existing capacity and recent provision**: South Derbyshire District Council is a designated Waste Collection Authority (WCA) under the provisions of the Environmental Protection Act 1990 and is responsible for making arrangements for the collection of household waste within the District and commercial waste, when requested. Derbyshire County Council is a designated Waste Disposal Authority (WDA) and responsible for making arrangements for the disposal of household and commercial waste collected by the WCA. The WDA is also responsible for the provision of Household Waste Recycling Centres.

There is one household waste and recycling centre in South Derbyshire at Newhall, Swadlincote, provided by the WDA. This site is considered to be operating over capacity.

The WCA also provides one free "waste freighter" service on Saturdays, on a rota basis for areas that are more than five miles away from the Newhall civic amenity site.

There are eight small recycling bin sites in South Derbyshire, provided by the WCA.

Bulky household waste can be removed by requesting such action by South Derbyshire District Council. The Council also offers a non-hazardous commercial waste collection service.

Clinical waste is also collected by the authority and transferred to an incinerator or a suitable disposal site. No incinerators for clinical waste are located in Derbyshire.

**Specific provision initiatives**: The Waste Strategy, prepared in partnership by Derbyshire County Council, Derby City Council, and the eight Derbyshire District and Borough Councils, was adopted in 2014. This Strategy focuses on ways to prevent, reuse, recycle and compost more waste. The revised plan will set out how many and what types of new facilities are needed and where they should be located. It will deal with municipal, commercial and industrial, and construction and demolition waste.

**Underlying Demand Trend**: South Derbyshire operates a fortnightly refuse collection service, with compost bins and dry recyclable materials collected on the same day in the intervening weeks

The only household waste and recycling centre in South Derbyshire at Newhall, is over-capacity.

With the level of housing proposed in South Derbyshire, there is a need to re-assess the waste capacity of the District and attempt to increase the infrastructure capacity.

Non-developer funding sources: Derbyshire County Council, Private Organisations

**Developer funding arrangements in place**: Individual negotiations from planning applications

## 14. Transport Infrastructure

Main providers/partners: South Derbyshire District Council, Highways England, Derbyshire Council, Department for Transport, Network Rail

**Existing capacity and recent provision**: The key road infrastructure within South Derbyshire is: A50, A38, A511, A512, A444, A5132, A516 and A514 but outside the District the M1 (Junctions 22 to 24A) and A42/M42 are also very important.

Parts of the Derby HMA experience significant levels of congestion. In particular, delays occur at the A38 Derby junctions and congestion is expected to be a growing problem at the A50/A38 and A50/A514 junctions. The grade separation of three A38 Derby junctions (Kingsway, Markeaton, and Abbey Hill), to alleviate congestion, is proposed to begin in March 2021 and be completed by September 2024. Outside the HMA, and upgrading the M1 between Junction 23a and Junction 25 to a smart Motorway and extensive capacity improvements to junction 24 have been completed.

The urban areas beyond the District boundary are badly affected by congestion, in Burton upon Trent at the A511 (Burton Bridge) and A444/A5189 (St Peters Bridge) over the River Trent and on radial routes leading to the centre of Derby. Within South Derbyshire proposals to alleviate congestion at the A511/A514 'Tollgate' roundabout in Woodville, have taken a step forward through the granting, by the County Council, of planning consent for the Woodville to Swadlincote Regeneration Route, which will provide an alternative route for some of the traffic currently passing through this junction.

Derbyshire County Council has submitted a planning application to its own planning team and to Derby City Council for a new road with a parallel pedestrian and cycleway and a new A50 junction. If plans are approved, these will serve the proposed Infinity Garden Village, comprising housing, employment and supporting infrastructure, on the southern fringe of Derby City.

The Nottingham/Derby to Birmingham and Derby to Crewe railway lines run through the District, with small stations at Hatton and Willington, the latter offering relatively infrequent services. The service stopping at Hatton station is operated by East Midlands Railway, whilst that using Willington station is operated by Cross Country. The nearest station to Swadlincote is at Burton upon Trent. The proposed route for HS2 phase 2b, connecting Birmingham to Leeds, will run through Leicestershire, to the east of the District, with the nearest station at Toton Sidings,

near Long Eaton. It is currently expected to open in 2035-2040. Railway lines currently used purely for freight also pass through the northern and southern parts of the District. The District Council, along with Derbyshire County Council and other local authorities, has recently committed funding toward the commissioning of a study to look at the feasibility of re-establishing a passenger rail service along the Ivanhoe line, which passes through the south of the District connecting Burton upon Trent to Leicester, with potential stops at Drakelow and Castle Gresley.

South Derbyshire is relatively well served by airports, with Nottingham East Midlands Airport just outside the District to the east and the larger Birmingham Airport about 40 km (25 miles) to the south via the A42/M42. A new bus service linking Burton-on-Trent to East Midlands Airport via Swadlincote, Ashby de la Zouch and Melbourne, running on an hourly basis between 4:20am and 11:08pm (the earliest time of departure and the latest time of arrival at Burton-on-Trent) was established in late 2019, operated by Midland Classic.

Regular bus services run through the District, providing connections to Swadlincote, Derby, Burton-on--Trent and Ashby de la Zouch, although rural areas, including parts of the north-western, north eastern and southern parishes, are less well provided for, services having recently been reduced, particularly during evenings and at weekends. The Derbyshire Connect (shopping), Active Travel (medical) and school bus services help mitigate this to some degree, but are limited in frequency and/or destinations served.

**Strategic provision initiatives:** 

Derbyshire County Council began implementation of their Local Transport Plan 3 in 2011. The Rights of Way Improvement Plan Statement of Action 2013-2017 sets out proposals for footpaths and other public rights of way, whilst the Greenways Strategy for South Derbyshire sets out proposals for the development of a network of multi-user routes. The County Council is currently preparing and has consulted upon plans for a Key Cycle Network, identifying the most important routes in the County to be established or improved. It is also preparing a Cycle Infrastructure Development Plan to establish priorities for investment. East Midlands Airport Sustainable Development Plan sets out to support the East Midlands economy, whilst seeking to protect the environment and local amenity and improve surface access to the site.

**Underlying Demand Trend**: There is a general trend of increasing travel demand, resulting in growing volumes of movement on the transport network. .

The large strategic sites being proposed through the Derby City and South Derbyshire Local Plans will increase travel demand and highway infrastructure works, such as the proposed Walton-on-Trent Bypass, Woodville to Swadlincote Regeneration Route and the South Derby Integrated Transport Link, will be needed to provide additional capacity. .

**Non-developer funding sources**: Highways England, Derbyshire County Council, Department for Transport, Local Enterprise Partnership, Network Rail.

**Developer funding arrangements in place**: Individual negotiations from planning applications in terms of Section 106 contributions.

### 14. <u>Energy Infrastructure</u>

Main providers/partners: South Derbyshire District Council

**Existing capacity and recent provision**: South Derbyshire has installed renewable energy capacity of 22.1MW with landfill gas and Solar Photovoltaics accounting for most of this.

Western Power Distribution has highlighted some potential infrastructure and capacity constraints on the key strategic sites, which will need to be overcome to deliver the sites.

Specific provision initiatives: None at present

**Underlying Demand Trend**: Renewable and other energy generation capacity in the District remains limited.

**Non-developer funding sources**: UK Government Sources, National Grid, Derbyshire Council, South Derbyshire District Council, Weston Power

Developer funding arrangements in place: Individual negotiations from planning applications in terms of Section 106 and CIL.

Looking to commence work at the end of 2019.

#### 17. Communications Infrastructure

Main providers/partners: South Derbyshire District Council, Open Reach, Derbyshire County Council, Virgin Media, City Fibre, Royal Mail, Big Blur Rocket

**Existing capacity and recent provision**: Fibre broadband coverage is good in the region. Derbyshire County Council's 'Digital Derbyshire' initiative aims to achieve broadband coverage for 95% of the District with the programme due to be completed in 2020.

Royal Mail's collection and delivery service for South Derbyshire is provided from two properties: Swadlincote Delivery Office, Civic Way, Swadlincote and; Hatton Delivery Office, Station Road, Hatton. Through the consultation process on the Local Plan, Royal Mail have indicated that the scale of proposed growth may place a significant burden on the existing Delivery Offices and as consequence, it is possible that Royal Mail may require a new Delivery Office to handle the additional deliveries that will result from the planned growth.

**Specific provision initiatives**: The cost of building the network through the Digital Derbyshire Programme includes £9.58m from the UK Government through Broadband Delivery UK (BDUK), £6.01m from Open reach (formally BT), £4.89M from Derbyshire County Council, £2.5m from the European Regional Development Fund (ERDF) 2007-2013 and 2.19m from D2N2 Local Enterprise Partnership.

Non-developer funding sources: Derbyshire Digital, Open Reach, Virgin Media, Derbyshire County Council

**Developer funding arrangements in place**: Individual negotiations from planning applications in terms of Section 106 and CIL. Derbyshire County Council has highlighted Broadband as a key priority in it Developer Contribution Protocol.

Openreach now provide FTTP to new sites, details can be found at the following link; <a href="https://www.ournetwork.openreach.co.uk/property-developers/site-registration.aspx">https://www.ournetwork.openreach.co.uk/property-developers/site-registration.aspx</a>

Similarly, Virgin Media also provide fibre connectivity to new developments, please follow the link for more information; <a href="https://www.virginmedia.com/lightning/network-expansion/property-developers">https://www.virginmedia.com/lightning/network-expansion/property-developers</a>.

There are other suppliers which can be approached such as:

• Independent Fibre Networks Limited (INFL)

- https://www.ifnl.net/developers
- GTC Utility Network
- https://www.gtc-uk.co.uk/house-builders/fibre-to-the-home

The HBF is actively encouraging suppliers to install fibre as part of installation to new sites, please see the link for more information <a href="https://www.hbf.co.uk/search/?q=fibre">https://www.hbf.co.uk/search/?q=fibre</a>

# **Delivery Schedule of Communications Infrastructure within South Derbyshire**

							S106	Onsite/ Other	
To improve the provision of Broadband Infrastructure in South Derbyshire	Derbyshire County Council IDP	£19,000,000+ £9,580,000 from DUK, £6.01m from Open reach £2,500,000 from ERDF, £2,190,000 from D2N2 LEP, £4,890,000 from DCC)	(requires match funding)	2012 ongoing	BDUK, Openreach, Derbyshire County Council, ERDF, D2N2 LEP		×	x	There is currently a funding gap, the BDUK Funding has been secured but to ensure that high quality broadband is rolled out around the county and especially in places with infrastructure deficiencies, matching funding will be sought from public or private finances.  The programme has been very successful and will continue to invest and deliver fibre broadband infrastructure over the coming years.

## 18. Sport, Recreation, Open Space and Social Infrastructure

Main providers/partners: South Derbyshire District Council

**Existing capacity and recent provision**: Field in Trust recommends provision of 2.4 ha of accessible green space per 1000 population. This compares to the present level of 1.95 ha per 1000.

The current level of informal leisure open space provision in the District is 0.73 ha per 1000 population, representing a deficit of 0.32 ha per 1000.

The current level of formal open space provision is 1.17 haper 1000 population, representing a deficit of 0.13 haper 1000.

The current level of play space provision is 0.05 ha per 1000 population, representing a shortfall of 0.14 ha per 1000.

Therefore, based on existing open space provision, there is a requirement for 2.54 ha per 1000 population for new development.

South Derbyshire District Council manages eight local allotment sites, which have over 180 plots. Other allotments are managed by some of the parish councils.

There are 45 play areas managed by South Derbyshire District Council, with others managed by parish councils.

South Derbyshire District Council manages six cemeteries, which apart from providing a community service can also be a valued in terms of wildlife conservation and biodiversity. The District is also served by the privately run Bretby Crematorium.

Swadlincote market operates on Tuesdays, Fridays and Saturdays.

There are a number of cultural and leisure facilities, including four libraries (Etwall, Melbourne, Swadlincote and Woodville) and two leisure centres (Etwall and Swadlincote).

Within the District there is provision for swimming, golf, cricket, football, tennis, hockey, rugby union and dry-slope skiing, plus a number of private facilities and clubs.

There are a number of Christian places of worship in the District.

**Specific provision initiatives**: An Open space strategy has been adopted by the council to encourage open space provision.

**Underlying Demand Trend**: Sport England has produced guidance on how to undertake an assessment of needs and opportunities for sporting provision. The guide provides a recommended approach that will help the user undertake a robust assessment of need for indoor and outdoor sports facilities. The guide focuses on the practicalities of producing a clear and robust assessment to help develop and apply local planning policy. This guide and Sport England's playing pitch strategy guidance (PPS) are complimentary with the PPS guidance providing the recommended approach for assessing the need for pitch provision. Further information can be found on the following webpage: <a href="https://www.sportengland.org/facilities-and-planning/planning-for-sport/planning-tools-and-guidance/assessing-needs-and-opportunities-guidance/">https://www.sportengland.org/facilities-and-planning/planning-for-sport/planning-tools-and-guidance/assessing-needs-and-opportunities-guidance/</a>

Non-developer funding sources: Sport England , The Football Foundation , Landfill operators

Developer funding arrangements in place: Individual negotiations from planning applications in terms of Section 106 and CIL

The Information contained within the below table are obligations/contributions developers are required to provide/pay in relation to Sports, Recreation, Open Space and Built Facilities within signed S106 Agreements related to the Local Plan housing allocations.

Some housing allocations have yet to be granted planning permission and are therefore not listed within the below table. Where this is the case, the document called 'Section 106 Agreement – A Guide for Developers' will be used as a starting point for determining the contributions developers are required to pay/provide as part of a development.

For the delivery schedule of Sport, Recreation, Open Space and Social Infrastructure outside of the Local Plan housing allocations, the following documents and strategies should be referenced:

Open Space, Sport and Community Facility Strategy Playing Pitch Strategy South Derbyshire Cycle Action Plan 2016-2021 Local Football Facility Plan

		£10,140	-	Complete summer 2017	Council, Friends of Eureka Park	H5	x	х	contribution would add to the existing gymnasium completed in 2017.  £7146.61 of the built facilities contribution collected in relation to the S106 Agreement linked to housing allocation H5, was used towards providing an outdoor gymnasium at Eureka Park.

In addition to the above infrastructure projects listed, some of the S106 Agreements related to the housing allocations, do not list specific infrastructure projects, however state contributions will be collected for built facilities, open space and sports and recreation. Projects will then be allocated to these funds at a later date.

#### 19. Health and Emergency Services Infrastructure

Main providers/partners: South Derbyshire District Council, Derbyshire County Council, NHS England, NHS Derby and Derbyshire CCG, East Midlands Ambulance Service NHS Trust (EMAS), Derbyshire Fire and Rescue Service, Derbyshire Constabulary and Derbyshire Probation Service

Existing capacity and recent provision: There are no hospitals or community hospitals in South Derbyshire, the nearest ones being Queens Hospital, Burton upon Trent and Royal Derby Hospital and London Road Community Hospital, both in Derby. Swadlincote Health Centre provides an out of hours walk in service at evenings and weekends. GP surgeries within the District are located in Aston on Trent, Hilton, Melbourne, Overseal, Shardlow, Swadlincote, Willington and Woodville. Rosliston Medical Centre closed in May 2019, and patients have been transferred to a GP surgery in Stapenhill, Burton upon Trent.

EMAS covers Derbyshire, Leicestershire, Rutland, Lincolnshire, Northamptonshire and Nottinghamshire providing urgent 999 care and patient transport services. EMAS will share the new fire and ambulance station being developed at Swadlincote and officially opened in June, 2019 (see below).

Derbyshire Constabulary has a police station in Swadlincote plus a team office in Melbourne and Hilton.

The District has two fire stations, one at Swadlincote, currently being replaced by a more modern facility, due to open in January, 2019, and one at Melbourne. Currently Swadlincote has two fire engines, staffed by 2 whole time watches and one on-call watch, and Melbourne with one fire engine, staffed on an on-call basis.

Specific provision initiatives: All of these different emergency services work closely together and have formed partnerships to pursue various initiatives to make South Derbyshire a safer place to live. Derbyshire Fire and Rescue consider that it is vitally important that new housing is well-designed and addresses safety and the needs of vulnerable people. Houses must provide adequate safety for the occupant throughout the occupiers' life. Derbyshire Fire and Rescue Service are actively engaged in a campaign to ensure that all domestic properties are fitted with sprinkler systems. Sprinkler systems are exceptionally effective through their ability to control a fire before it develops to life threatening proportions. Developers can help to anticipate the future needs of residents and prevent having to retrofit properties by installing 32mm mains water risers and sprinkler systems as part of new housing developments.

**Underlying Demand Trend**: In a time of budget cuts and with a need to work differently from all the public sector organisations already listed above, there will therefore be great pressures on maintaining and producing new infrastructure to meet the growing needs of South

Derbyshire as the development strategy increases the number of homes in the District. The Council is currently liaising with NHS England and Derby and Derbyshire CCG to establish what further healthcare provision, in the form of GP surgeries, pharmacies, mental health services and dental practices, will be required as a result of the development proposed through the Local Plan. At present the Area Team and the CCG are unable to quantify the effect of the Local Plan Part 1. Until more detailed information becomes available, the following approach will be taken.

Where the additional patients arising from a proposed development could be accommodated by the nearest health facilities, no expansion to those facilities would be required. However, where the additional patients arising from a proposed development would give rise to a requirement for specific additional provision, a financial contribution of £551 per dwelling towards those facilities would be required. The advice of the Clinical Commissioning Group(s) and the Area Team (NHS England) will be sought when determining planning applications, having regard to the restriction regarding pooling of contributions, in line with CIL Regulations.

Derby and Derbyshire CCG supports the view of the Area Team in not looking to create any single-handed GP led services. NHS England is working to develop a primary care strategy for each locality that will address population growth and other rising demands on primary care. The Area Team have agreed to lead on a review of practice premises quality to ensure that current premises are fit for purpose.

Derby and Derbyshire CCG has provided capacity information for the following GP surgeries: Sinfin Health Centre, Village Community Health Centre (Sinfin), Hollybrook Medical Centre, Charnwood Surgery, Wellside Medical Centre, Mickleover Medical Centre, Mickleover Surgery, Park Farm Medical Centre, Meadowfields Practice, Alvaston Medical Centre, Haven Medical Centre, Parkfields Surgery, Osmaston Surgery, Chellaston and Melbourne Medical Centres and Willington Surgery Partnership.

**Non-developer funding sources**: NHS England, NHS Derby and Derbyshire CCG, East Midlands Ambulance Service NHS Trust (EMAS), Derbyshire Fire and Rescue Service, Derbyshire Constabulary and Derbyshire Probation Service

**Developer funding arrangements in place**: Individual negotiations from planning applications in terms of Section 106.

New medical centre Drakelow Park	Local Plan Part 1	Unknown	Unknown	Unknown	Developer	H6	Х	Х	S106 agreement requires developers to provide a healthcare facility on the site.	

#### 20. Education Infrastructure

Main providers/partners: South Derbyshire District Council, Derbyshire County Council, Department for Education, Derby Adult Learning Services, Multi-Academy Trusts

**Existing capacity and recent provision**: There are currently four secondary schools in South Derbyshire. In terms of primary education, there are 40 primary phase schools in the District, comprising of 4 Infant schools, 2 Infant and Nursery schools, 5 Junior schools and 29 Primary schools. There is also a South Derbyshire Support Centre for children aged 7 – 11 and an Adult Community Education Centre, which is in Swadlincote.

**Early Years provision and demand:** Derbyshire County Council runs one Childrens/Sure Start Centre, in South Derbyshire, at Woodville. There are currently 20 pre-schools in the District, supplemented by registered child minders, day nurseries, school nursery classes and independent school nurseries. The latest early years sufficiency figures (Summer 2019) shows that at present there are sufficient number of early years places for 2,3 and 4 year olds in South Derbyshire.

**Specific provision initiatives**: There are a number of modernisation schemes in place at the moment to improve the condition of schools in South Derbyshire.

#### **Underlying Demand Trend:**

The current snapshot of population data within South Derbyshire (31st August 2019) continues to indicate a slight decline in birth rates noticed throughout the whole of Derbyshire (and nationally). The larger numbers currently in the Primary Phase are starting to move into the Secondary Phase however these numbers are being replaced by the slightly lower pre-school numbers. However, it is expected (based on recent trends) that there will be movement year on year to suggest additional numbers through the impact of housing and population moving into South Derbyshire. With the recent large residential developments gathering pace, primary figures and pre-school figures are producing pressure on places. New primary schools are being built to serve these developments but there will be pressure on the existing secondary provision. It has been established that there is a need for at least one new secondary school within the District during the Plan period to meet the needs resulting from the development supported by the Local Plan. The District Council is working with the County and City Education Authorities to secure the site for the additional secondary school and to establish funding arrangements.

**Non-developer funding sources for education**: Central Government Capital Maintenance grant, Central Government Basic Need funding. It should be noted that academies can secure funding directly from Central Government for expansions and improvements.

Developer funding arrangements in place: Individual negotiations from planning applications in terms of Section 106 and CIL.

#### 21. <u>Environmental Infrastructure</u>

Main providers/partners: South Derbyshire District Council, Town and Parish Councils and Derbyshire County Council, Derbyshire Wildlife Trust, Leicestershire and Rutland Wildlife Trust, Natural England, The National Trust, The Canal and River Trust, Derby & Sandiacre Canal Trust

There are five designated SSSI in South Derbyshire – Calke Park, Carvers Rocks, Hilton Gravel Pits, Ticknall Quarries and the River Mease (which is also an SAC). There is one National Nature Reserve (Calke Park), two Local Nature Reserve – Elvaston and Coton Park and four locations managed as wildlife sites by Derbyshire Wildlife Trust: Hilton Gravel Pits SSSI; Carvers Rocks SSSI (owned by Severn Trent Water); Willington Gravel Pits; and Spring Wood (partly in South Derbyshire). Dimminsdale, which is owned by Severn Trent Water and managed by the Leicestershire and Rutland Wildlife Trust, also falls partly within South Derbyshire.

The area of Local Nature Reserve in South Derbyshire is a long way below the recommended target of 1ha of LNR per 1,000 population. Around 20ha of LNR is designated, whereas the target should be 100.3ha.

There are 5 historic gardens in South Derbyshire, covering 620.64 ha. These are Calke Abbey, Bretby Hall, Melbourne Hall, Swarkestone Old Hall and Elvaston Castle.

There are 22 Conservation Areas in South Derbyshire and 710 listed buildings, of which 48 are Grade 1 (including Calke Abbey) and 48 are Grade 2\*. There are 22 scheduled ancient monuments in South Derbyshire District, including Swarkestone Bridge.

The historic Trent and Mersey Canal, which opened in 1771, runs through the north of the District. The Derby & Sandiacre Canal, which closed during the 1960s, ran from the Trent & Mersey Canal at Swarkestone to Sandiacre on the Erewash canal, with a branch to the river Derwent in Derby city centre. The Derby & Sandiacre Canal Trust aims to restore the canal to a fully navigable route with an associated multi-user towpath.

South Derbyshire District Council manages six cemeteries, which apart from providing a community service can also be a valued in terms of wildlife conservation and biodiversity.

Specific provision initiatives: None Identified

The Lowland Derbyshire Biodiversity Action Plan (2011-2020) holds all data on biodiversity and relates to combating the ecological issues in the area. This will be accompanied by a Species Action Plan to provide more guidance on local trends and distributions and actions to aid conservation.

Derbyshire Wildlife Trust Living Landscape approach in the Derwent and Trent Valleys have identified areas of key habitat and species action as part of their strategic development plan.

Non-developer funding sources: Derbyshire County Council

Developer funding arrangements in place: Individual negotiations from planning applications in terms of Section 106 and CIL.
